The existing arrangement is in adequate due to lower conductor size in the event of load transfer from one feeder to another during any preventive and breakdown activities. There are 27669 consumers are being served from this feeder. The absence of an alternate source also restricts the possibility of quick restoration of supply during contingencies, thereby adversely affecting the overall reliability and continuity of power supply.

The proposed measure for augmentation of 8 span to the higher ampacity is therefore considered necessary to strengthen the existing network and ensure more reliable power supply to the consumers presently dependent on the long radial 33 kV Angul-2 feeder.

Proposed Scenario:

- Augmentation of 33kV Angul-2 Feeder from point A to B as per the proposed SLD given below in between Angul Grid to 33/11kV Industrial PSS.
- After execution of proposal, Industrial PSS load will be able to take on 33kV Angul-2 Feeder.
- The proposal will enable N-1 connectivity to Industrial PSS.

Proposed SLD:

Scope of Work:

1. Augmentation of 33kV Angul-2 Feeder- 0.4ckm.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.19			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-	**ANED (Dhenkanal)**		
Name of the Work :-	Augmentation of 33kV Angul-2 Feeder of 0.4 CKM for to improve N-1 reliability.		
Scope of work:-	Proposal Details 1. 33kV 232sqmm OH XLPE line- 0.4Ckm		
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)		
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	33kV Line Length with 40 Mtr. Span using 232 SQ.MM. - XLPE AAA Covered Conductor-0.4ckm	₹ 15,19,179.86
		Total Amount	**₹ 15,19,179.86**
		Total Amount (In Cr)	**₹ 0.15**

Cost Estimate: ₹ 0.15 Cr. (For detailed BoQ refer Annexure-11.19).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Reduction of electrocution risk and public safety hazards.
c) Safe operation and isolation of the feeder.
d) Protection of electrical assets against lightening and surge related failure.
e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

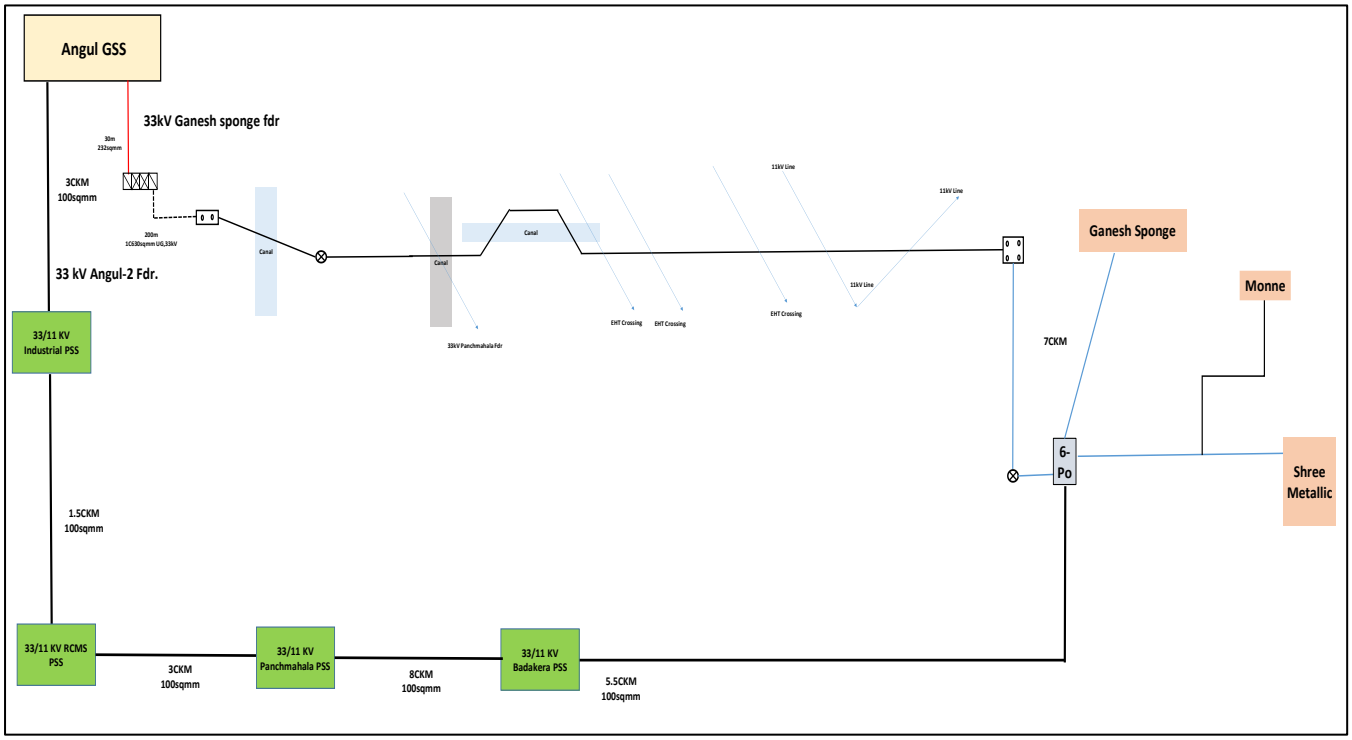
- Establishing N-1 connectivity between 33 kV Angul-1 and 33 kV Angul-2 Feeder.
- Reduction in technical loss of network and improve the voltage profile.
- Ensure reliable & safe power supply to the consumers at Angul Industrial Area.

20. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Ganesh sponge Feeder:

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Ganesh sponge feeder form Angul GSS to Badakera 6-Pole.

Requirement/ Need of the proposal:



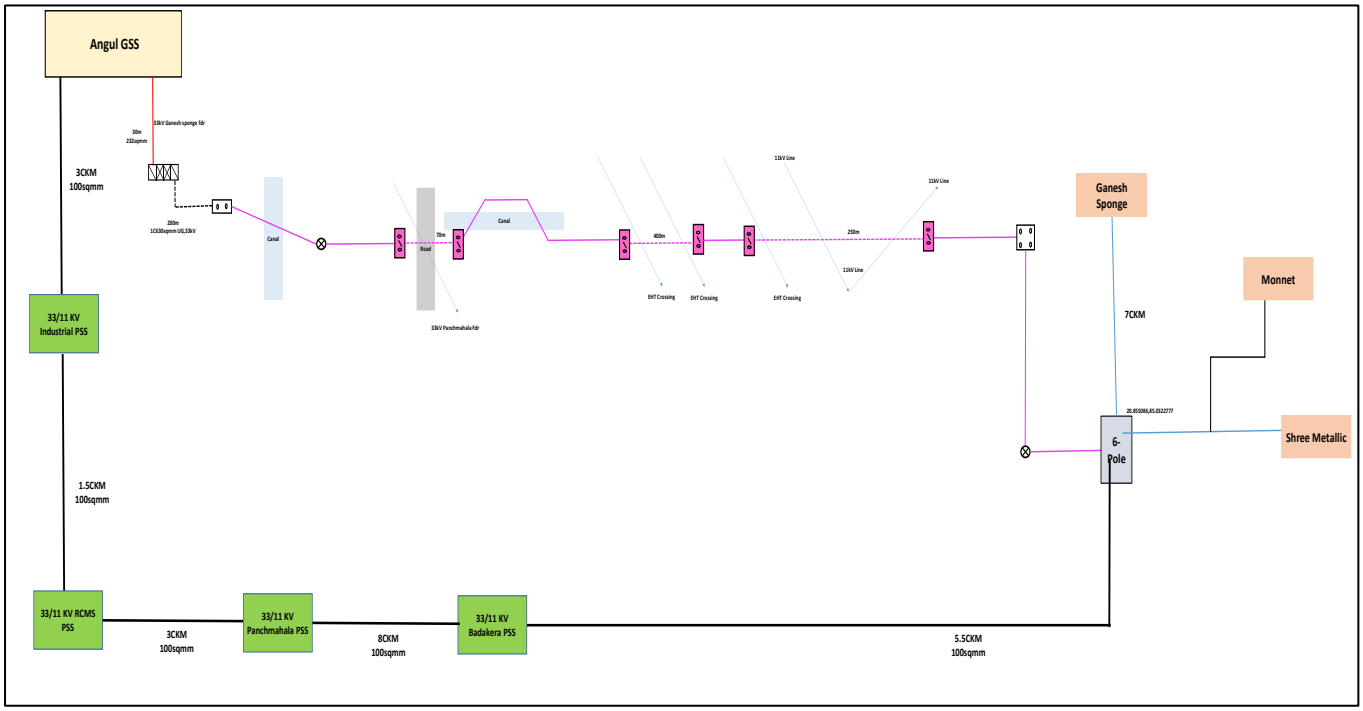
Objective:

To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- Existing 33kV Ganesh Sponge feeder is an industrial feeder and feeding lots of Industries. The feeder emanating from Angul GSS having lower size conductor and is in unsafe condition.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.
- In addition, minimum ground clearance has not been maintained in several places over the feeder. Since the existing feeder is bare and passing through dense vegetation which is causing frequent transient trippings.
- Since the existing Ganesh Sponge feeder having lower conductor size i.e. 55 Sq.mm. , during load transfer of Angul-2 feeder, Ganesh Sponmge feeder gets overloaded.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33 kV Angul-2 and Ganesh Sponge feeder emanating from Angul GSS are combining serving 33,337 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trappings during the last year was 27 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Ganesh sponge feeders of 7.5 CKM with XLPE covered conductor from Angul GSS to Badakera 6-Pole to improve safe and reliable power supply.
- After execution of the proposal, load will be bifurcated in between Ganesh Sponge and Angul-2 Feeder which will give better reliability to industrial consumer along with other consumers.

Proposed SLD:

Scope of Work:

- Augmentation of 33 kV line of 100 Sq.mm. to 232 Sq.mm. of 7.5 CKM along with U/G cable for EHT crossing from Angul GSS to Badakera 6-Pole.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.20			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-	**ANED (Dhenkanal)**		
Name of the Work :-	Augmentation of 33kV Ganesh Sponge feeder from Angul GSS to Badakera 6-Pole to improve network reliability

3	C	Standard BoQ and Estimate for Dismantling of Materials	₹ 2,46,866.17
		Total Amount	**₹ 2,54,24,482.50**
		Total Amount (In Cr)	**₹ 2.54**

Cost Estimate: ₹ 2.54 Cr. (For detailed BoQ refer Annexure-11.20).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

f) Safe working beneath of the EHT lines due to conversion from O/H to U/G.

Benefit to the system and consumers:

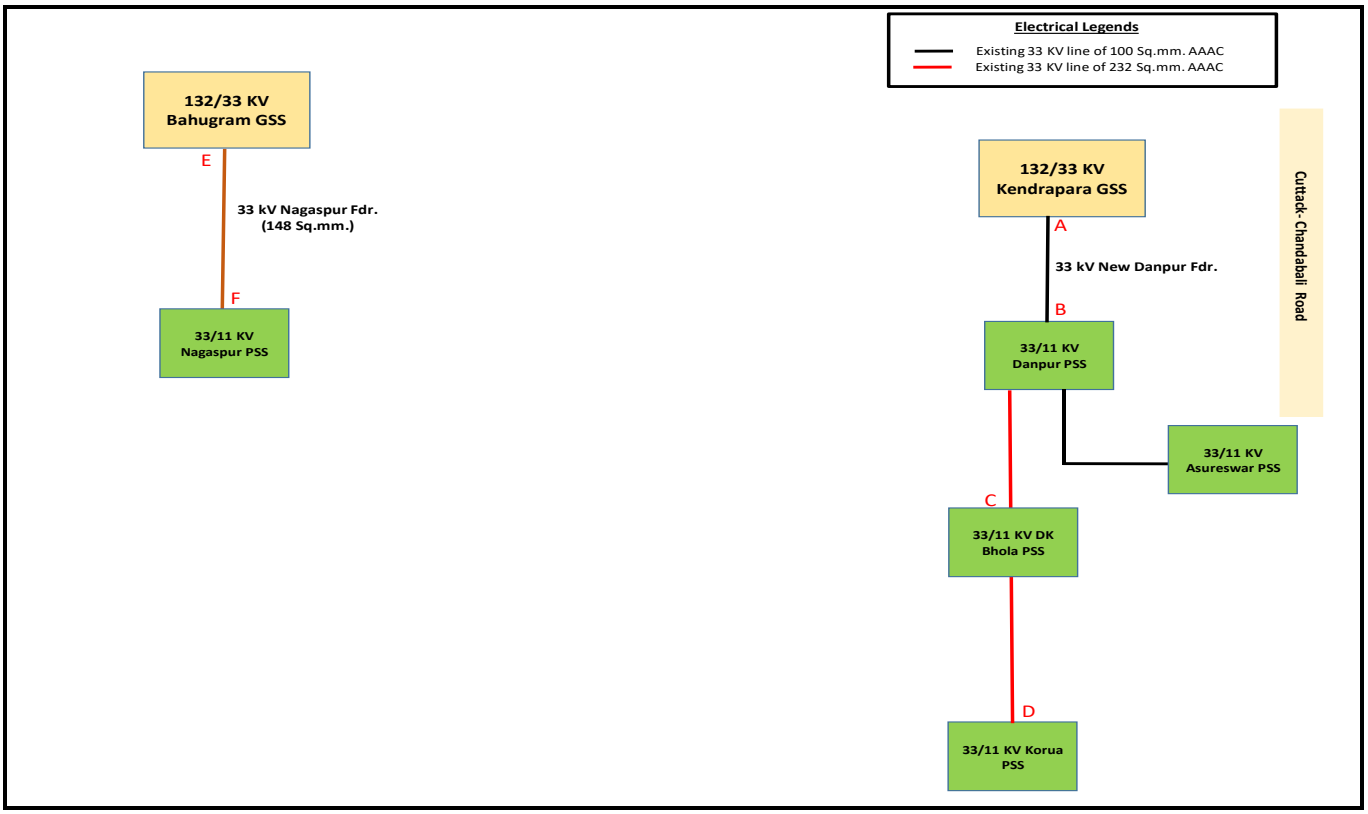
Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.

21. Proposal for reliability improvement by Construction of interlinking line between 33kV Nagaspur Feeder. & New Danpur Feeder:

Proposal:

Proposal for construction of new linking line between 33 kV Nagaspur & New Danpur Fdr.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, improve quality of power by providing N-1 connectivity to Korua PSS.

Existing Scenario:

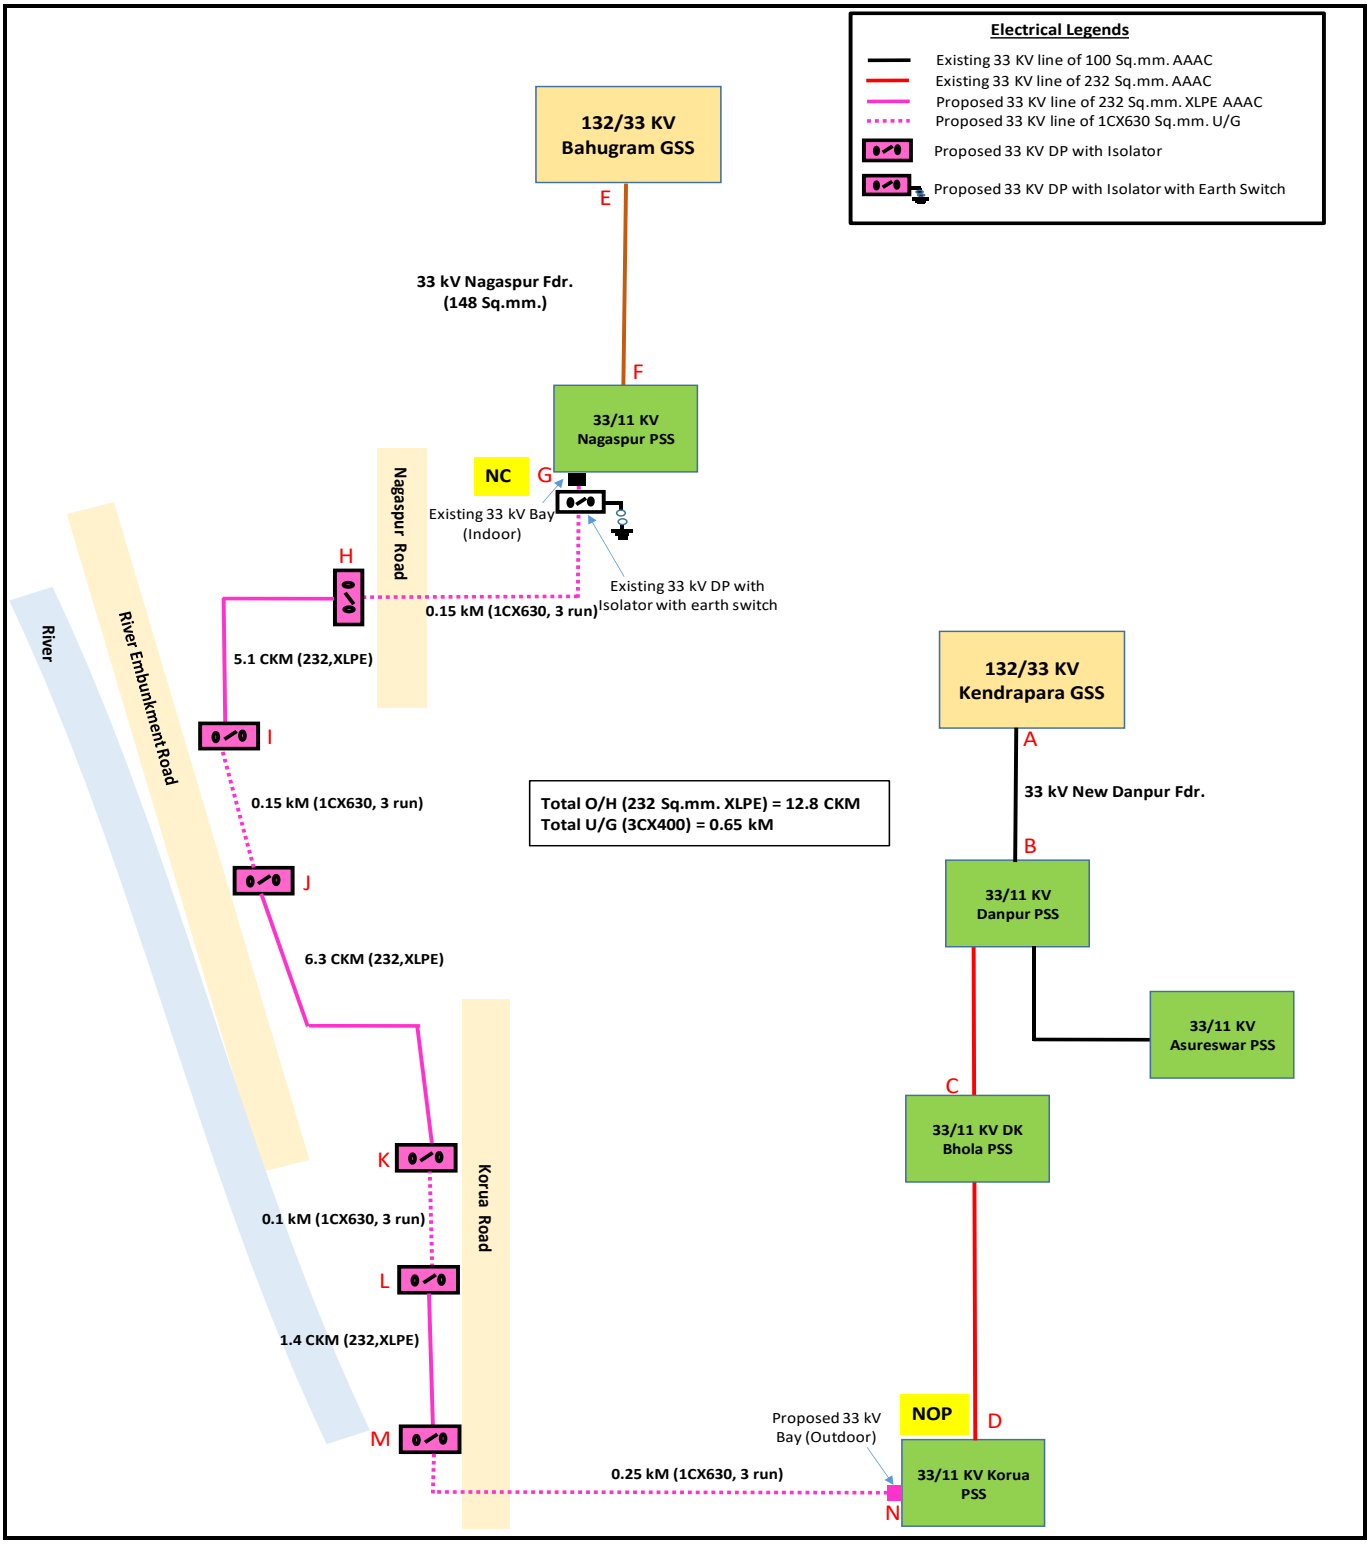
- At present, the existing 33 kV New Danpur feeder, emanating from Kendrapara GSS, supplies power to the 33/11 kV DK Bhola and Korua PSS. The feeder caters to a consumer base of approximately 22,056 consumers and is radial in nature and considerably lengthy.
- Recently, a new 33/11 kV Nagaspur PSS has been commissioned and charged through the 33 kV Nagaspur feeder, emanating from Bahugram GSS. The Nagaspur PSS is located approximately 13.45 km from the 33/11 kV Korua PSS.
- The existing 33 kV New Danpur feeder is highly lengthy, with the DK Bhola and Korua PSS connected radially from the feeder. Consequently, in the event of any fault or interruption in the feeder, all downstream PSSs remain without power supply until the fault is identified and rectified, resulting in prolonged interruption to a large consumer base.

Existing SLD:

Priority and Timeline of the Project:

Priority: During the last year, the feeder recorded 61 instances of tripping, indicating a significant level of interruption in the existing network. Owing to the considerable length of the feeder, identification and localization of faults require substantial time. Further, since the downstream PSSs are radially connected, any fault or interruption in the 33 kV New Danpur feeder causes the affected downstream area to remain without power supply until the fault is identified, isolated, and the feeder is restored.

The existing arrangement, therefore, results in frequent and prolonged power supply interruptions affecting a large consumer base of 22,056 consumers. The absence of an alternate source also restricts the possibility of quick restoration of supply during contingencies, thereby adversely affecting the overall reliability and continuity of power supply.



In view of the above, reliability enhancement of the existing network through provision of an alternate source of supply is essential. Establishing an interconnection between the 33/11 kV Nagaspur PSS and Korua PSS, with Nagaspur PSS being fed from the 33 kV Nagaspur feeder emanating from Bahugram GSS, will provide an alternate source to the downstream network. This arrangement will enable back-feeding of the affected area during outages of the New Danpur feeder, facilitate faster restoration of supply, reduce the duration and extent of interruptions, and substantially improve the reliability, continuity, and operational flexibility of the distribution system.

The proposed measure is therefore considered necessary to strengthen the existing network and ensure more reliable power supply to the consumers presently dependent on the long radial 33 kV New Danpur feeder.

Proposed Scenario:

- Construction of new interlinking line having length 13.45 CKM between 33 kV Nagaspur & New Danpur feeder to improve N-1 reliability.

Proposed SLD:

Scope of Work:

- Interconnection of 33 kV Nagaspur & New Danpur feeder is proposed to improve reliability & mitigation of radial connectivity.
- Construction of 12.8 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC.
- Supply & laying of 0.65 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in HDD method.
- Installation of 01 No. of 33 kV Bay (Outdoor type) at Korua PSS.
- Installation of 05 Nos 33 kV line protecting guarding having span 30 Mtr. Each for road crossing.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.21

3	PART C: Installation of 01 No. of 33 kV Bay(Outdoor type) at Bhatpada PSS(Refer PSLD N)	3,038,303.67
4	PART D: Installation of 05 Nos 33 kV line protecting guarding having span 30 Mtr. each(Refer PSLD)	146,721.57
5	**Total Gross**	**69,996,998.06**
Total estimated cost is Rs. 7.00 Cr.		

Cost Estimate: ₹ 7.00 Cr. (For detailed BoQ refer Annexure-11.21).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

f) Compliance with electrical safety regulation for distribution system.

g) Reduction of electrocution risk and public safety hazards.

h) Safe operation and isolation of the feeder.

i) Protection of electrical assets against lightening and surge related failure.

j) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

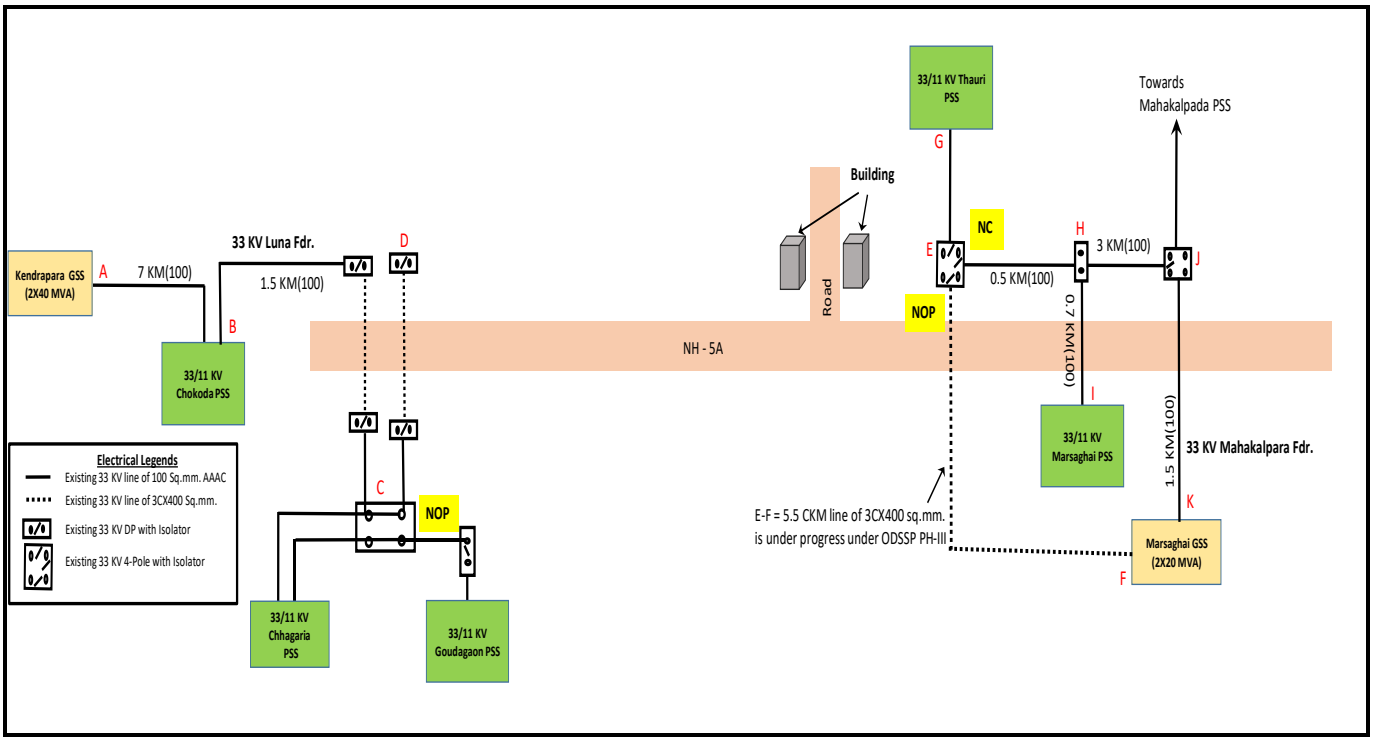
i. Second 33kV source will be available to 33/11 kV Nagaspur , DK bhola and Korua PSS.
ii. Ensuring safe, reliable and quality power supply to the consumers by improveing N-1 reliability.

22. Proposal for reliability improvement by Construction of interlinking line between 33kV Luna Feeder. & Thauri Feeder:

Proposal:

Proposal for construction of new linking line between 33 kV Luna & Thauri U/G Fdr.

Requirement/ Need of the proposal:



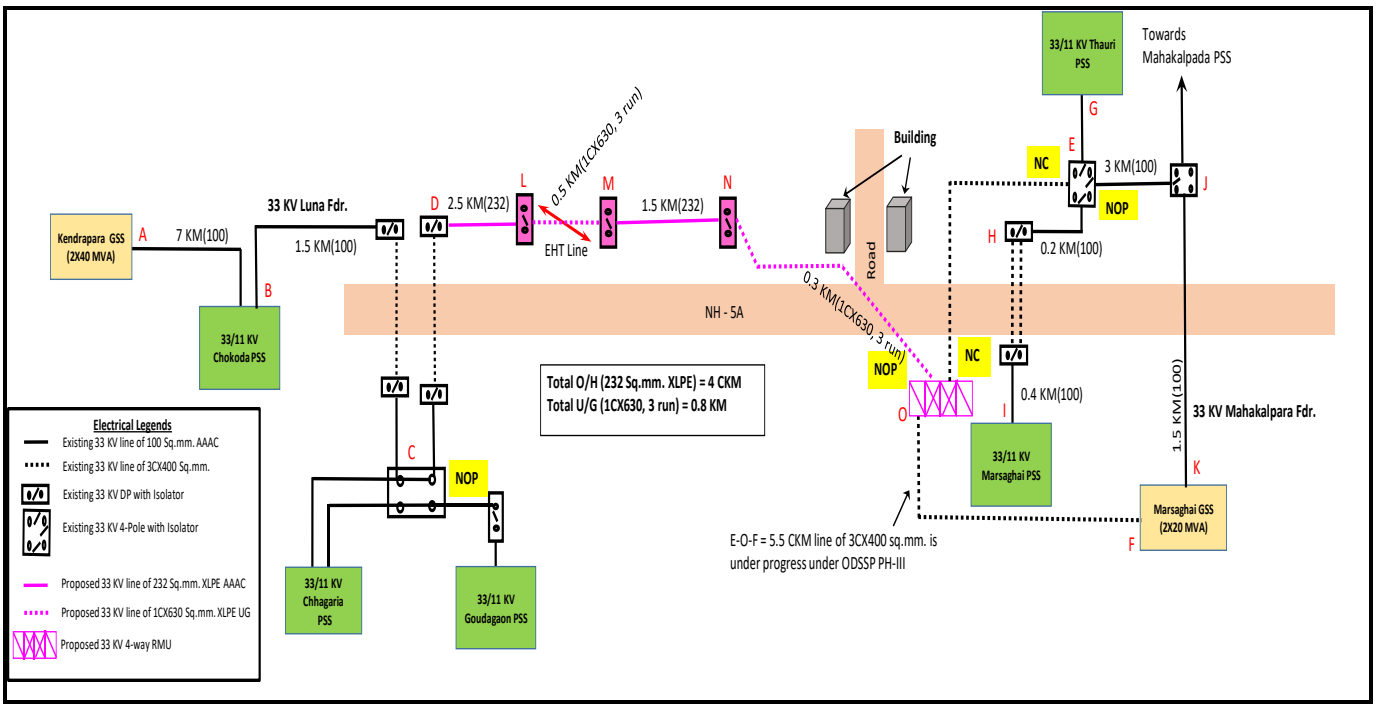
Objective:

To maintain reliability of power supply, improve quality of power by providing N-1 connectivity between 33 kV Luna & Thauri Fdr.

Existing Scenario:

- The existing 33 kV Luna feeder, emanating from Kendrapara GSS, supplies 33/11 kV Chokoda and Chhagaria PSSs, catering to approximately 12,561 consumers. The feeder is radial and considerably lengthy.
- The newly charged 33 kV Thauri feeder, feeding 33/11 kV Thauri PSS, passes through Marsaghai Chawk and provides an opportunity for establishing an alternate supply arrangement.
- Due to the length and radial configuration of the Luna feeder, any interruption results in widespread and prolonged power outages, adversely affecting supply reliability in both rural and semi-urban areas.

Existing SLD:



Priority and Timeline of the Project:

Priority: At present, the 33 kV Luna feeder, emanating from Kendrapara GSS, caters to approximately 12,561 consumers through a long and radial network, resulting in limited reliability and operational flexibility. The feeder recorded 67 trippings during the last year. Due to the considerable length of the feeder and absence of an alternate supply path, identification and isolation of faults take considerable time, leading to prolonged power interruptions and widespread outages in the affected areas. Hence, reliability enhancement of the 33 kV network is essential to minimize outage duration, facilitate faster restoration of supply, and ensure reliable and uninterrupted power supply to the consumers served by the feeder.

Proposed Scenario:

- Construction of new interlinking line having length 4.8 CKM between 33 kV Luna & Thauri feeder to improve N-1 reliability.

Proposed SLD:

Scope of Work:

- Interconnection of 33 kV Luna & New Thauri feeder is proposed to improve reliability & mitigation of radial connectivity.
- Construction of 4 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC.
- Supply & laying of 0.8 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in HDD method.
- Installation of 01 No. 33 kV 4-way RMU (LLVV) at marsaghai Chawk.
- Installation of 03 Nos 33 kV line protecting guarding having span 30 Mtr. Each for road crossing.

Proposed Cost with Estimate Break-up:

4	**Total Gross**	**34,941,549.43**
Total estimated cost is Rs. 3.49 Cr.		

Cost Estimate: ₹ 3.49 Cr. (For detailed BoQ refer Annexure-11.22).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

i) Second 33kV source will be available to 33/11 kV Chhagaria PSS and Chakoda PSS.

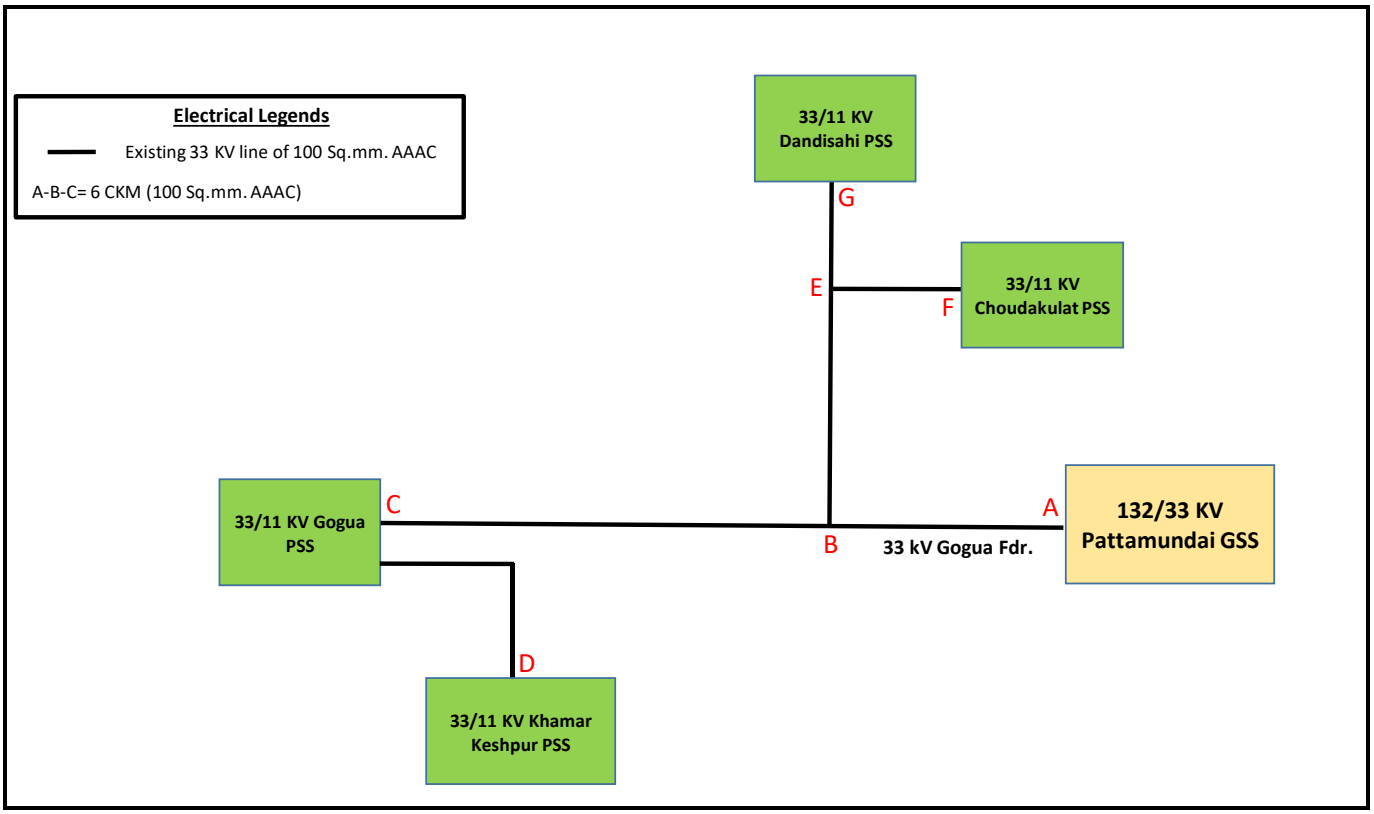
ii) Ensuring safe, reliable and quality power supply to the consumers by improveing N-1 reliability.

23. Proposal for reliability improvement by Augmentation and Refurbishment of 33kV Gogua Feeder:

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Gogua feeder.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

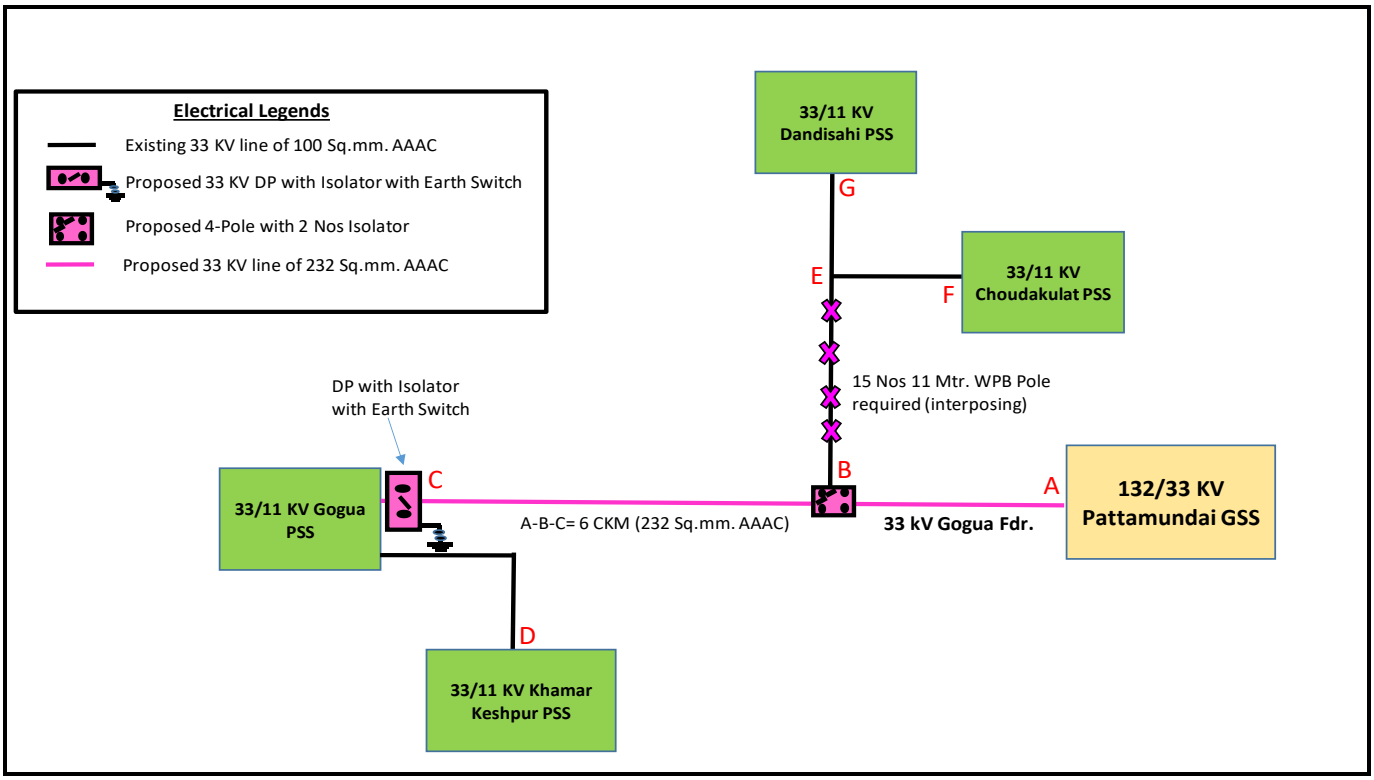
- The existing 33 kV Gogua feeder emanating from Pattamundai GSS is constructed with a lower-capacity conductor and is presently in an unsafe condition.
- The conductors are very old and have deteriorated significantly over time. Due to aging, reduced mechanical strength, and brittleness, conductor snapping incidents are occurring frequently, leading to repeated interruptions and reliability concerns.
- Furthermore, the statutory minimum ground clearance is not being maintained at several locations along the feeder route, posing a serious safety risk to the public as well as to the electrical network.

Existing SLD:

Priority and Timeline of the Project:

Priority: At present, the 33 kV Gogua feeder emanating from Pattamundai GSS is serving 20,219 consumers through an existing network comprising lower-capacity conductors. Due to the ageing and

deteriorated condition of the conductors, the presence of multiple joints, and frequent conductor snapping incidents, a large number of faults are occurring on the feeder, adversely affecting the reliability and quality of power supply. During the last year alone, the feeder experienced 218 tripping incidents, resulting in frequent interruptions to consumers.



Furthermore, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor have created significant safety concerns for both the general public and maintenance personnel. The existing network condition not only increases the risk of outages but also poses potential hazards to life and property.

In the absence of suitable reliability enhancement measures, including conductor strengthening/replacement and feeder upgradation, the consumers connected to the feeder will continue to experience frequent and prolonged power supply interruptions. Therefore, enhancement of the existing 33 kV Gogua feeder is essential to improve system reliability, reduce outage frequency, ensure compliance with safety standards, and provide uninterrupted power supply to the connected consumers.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Gogua feeder, to improve safe and reliable power supply.

Proposed SLD:

Scope of Work:

- Augmentation and Refurbishment of 33 kV Gogua Feeder to Enhance Reliability and Ensure Safe Power Supply.
- Construction of 6 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. AAAC.

- Installation of 01 No. of 4-Pole with 2 Nos Isolator.
- Installation of 15 Nos of 11 Mtr. WPB Pole (interposing) in existing line.
- Installation of 04 Nos guarding having span 30 Mtr each for road crossing.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.23		
TPCODL

5	PART E : Dismantling portion	342,578.62
6	**Total Gross**	**23,605,981.79**
Total estimated cost is Rs. 2.36 Cr.		

Cost Estimate: ₹ 2.36 Cr. (For detailed BoQ refer Annexure-11.23).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

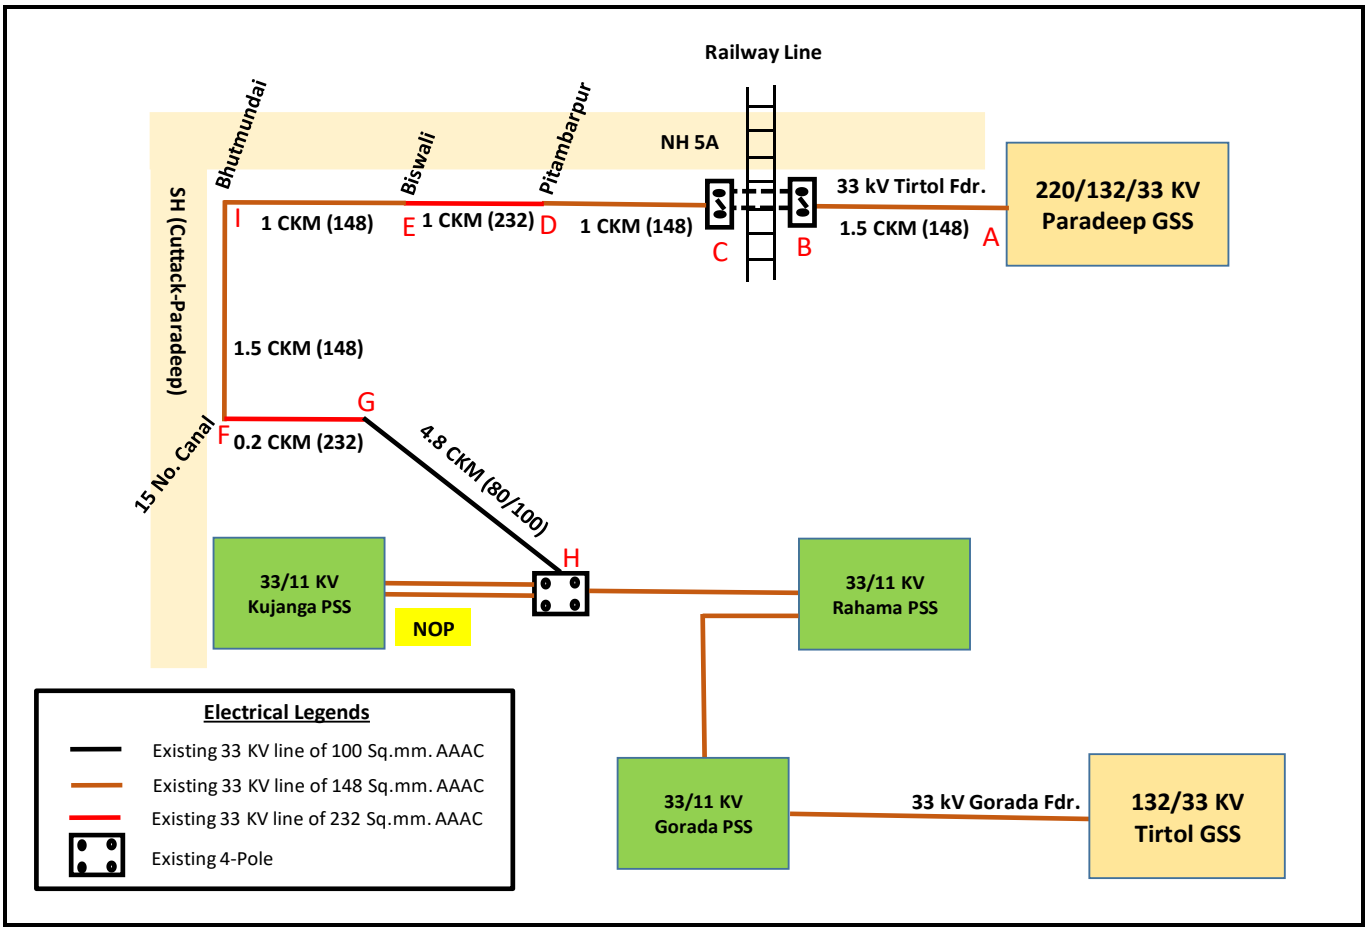
The proposed strengthening and augmentation of the 33 kV network is aimed at ensuring safe, reliable, and quality power supply to consumers by reducing feeder outages, improving system reliability, enhancing network safety, and minimizing power interruptions.

24. Proposal for reliability improvement by Augmentation and Refurbishment of 33kV Tirtol Feeder:

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Tirtol feeder.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

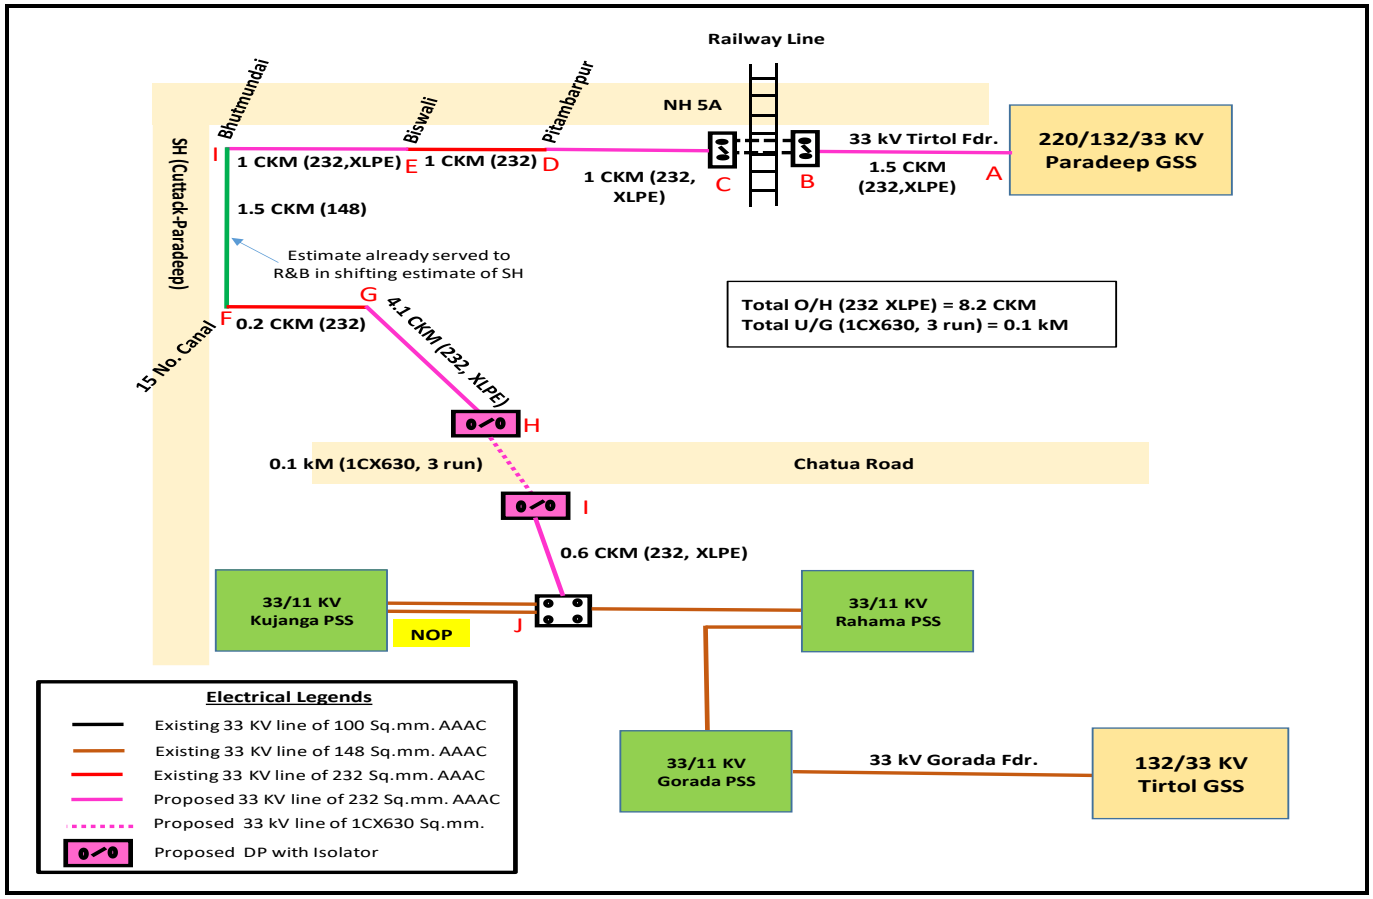
Existing Scenario:

- The existing 33 kV Tirtol feeder emanating from Paradeep GSS is constructed with lower-capacity conductors and is presently operating in an unsafe condition.
- The conductors are old and have significantly deteriorated due to ageing. Owing to loss of mechanical strength and increased brittleness, conductor snapping incidents are occurring frequently, leading to repeated interruptions and reduced reliability of power supply.
- Further, the statutory minimum ground clearance is not being maintained at several locations along the feeder route, creating safety hazards for the public and operating personnel.

Existing SLD:

Priority and Timeline of the Project:

Priority: At present, the 33 kV Tirtol feeder emanating from Paradeep GSS is serving 18,244 consumers through an existing network comprising lower-capacity conductors. Due to the ageing and deteriorated condition of the conductors, the presence of multiple joints, and frequent faults and conductor snapping incidents, the reliability of power supply through the feeder has been adversely affected. During the last year, the Tirtol feeder experienced 16 tripping incidents and Gorada Feeder experienced 92 tripping leading to interruptions in power supply to the connected consumers.



Furthermore, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose significant safety concerns for both the public and maintenance personnel. These conditions increase the risk of faults, supply interruptions, and potential hazards to life and property.

In the absence of suitable reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions. Therefore, augmentation and refurbishment of the existing 33 kV Tirtol feeder are essential to improve system reliability, enhance network safety, reduce outage frequency, and ensure safe, reliable, and quality power supply to the 18,244 consumers served by the feeder.

Proposed Scenario:

- Augmentation and refurbishment of the 33 kV Tirtol feeder are proposed to improve system reliability, enhance network safety, reduce outages, and ensure safe, reliable, and quality power supply to consumers.

Proposed SLD:

Scope of Work:

- Augmentation and Refurbishment of 33 kV Tirtol Feeder to Enhance Reliability and ensure Safe Power Supply.
- Construction of 8.2 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC.
- Supply & laying of 0.1 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in HDD method.
- Installation of 20 Nos of 14 Mtr. H-Pole for 11 kV line crossing to maintain safe clearances as per CEA guideline.
- Installation of 8 Nos guarding having span 30 Mtr. each for road crossing.

Proposed Cost with Estimate Break-up:

5	PART E : Dismantling portion	546,654.66
6	**Total Gross**	**38,058,143.72**
Total estimated cost is Rs. 3.81 Cr.		

Cost Estimate: ₹ 3.81 Cr. (For detailed BoQ refer Annexure-11.24).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

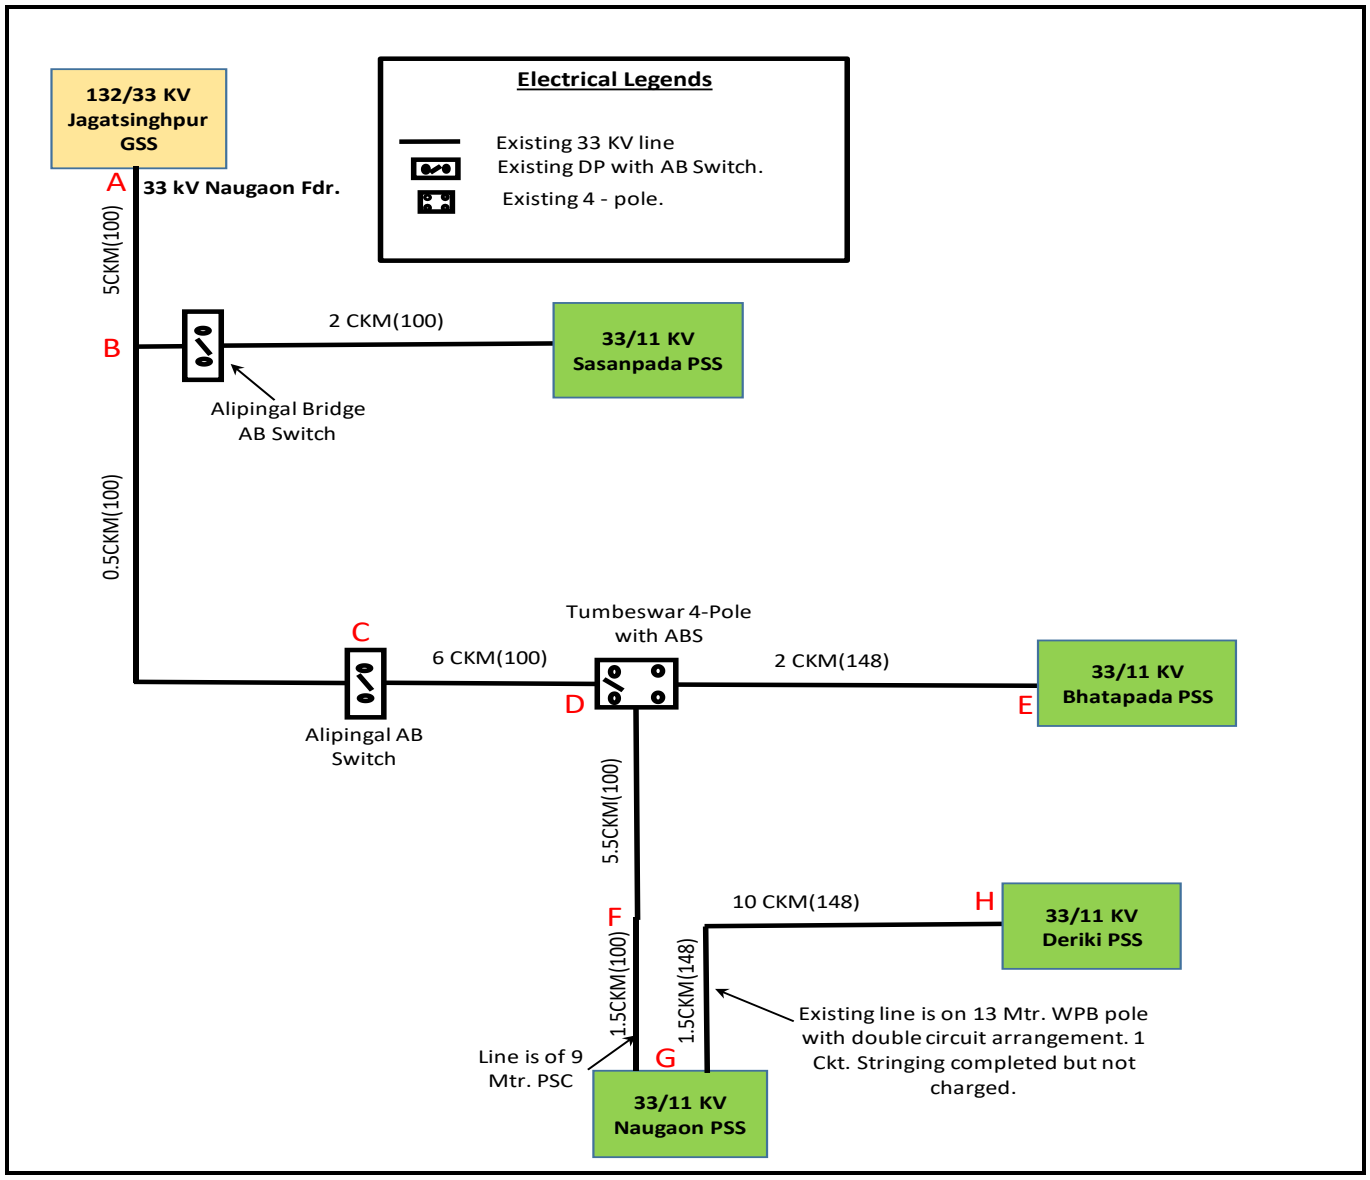
The proposed strengthening and augmentation of the 33 kV network is aimed at ensuring safe, reliable, and quality power supply to consumers by reducing feeder outages, improving system reliability, enhancing network safety, and minimizing power interruptions.

25. Proposal for reliability improvement by Augmentation and Refurbishment of 33kV Naugaon Feeder:

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Naugaon feeder from Jagatsinghpur GSS to Naugaon PSS.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- The existing 33 kV Naugaon feeder emanating from Jagatsinghpur GSS is constructed with lower-capacity conductors and is presently in an unsafe condition.
- The conductors are very old and have deteriorated considerably due to ageing. Owing to reduced mechanical strength and increased brittleness, conductor snapping incidents are occurring frequently, resulting in repeated outages and affecting the reliability of power supply.
- Further, the statutory minimum ground clearance is not being maintained at several locations along the feeder route, posing safety risks to the public as well as operation and maintenance personnel.
- In addition, the 33/11 kV Bhatapada Primary Substation (PSS) is connected in a T-off arrangement from the 33 kV Naugaon feeder. Consequently, any fault or maintenance activity on the feeder affects power supply to the substation and its downstream consumers, thereby impacting overall network reliability and operational flexibility.

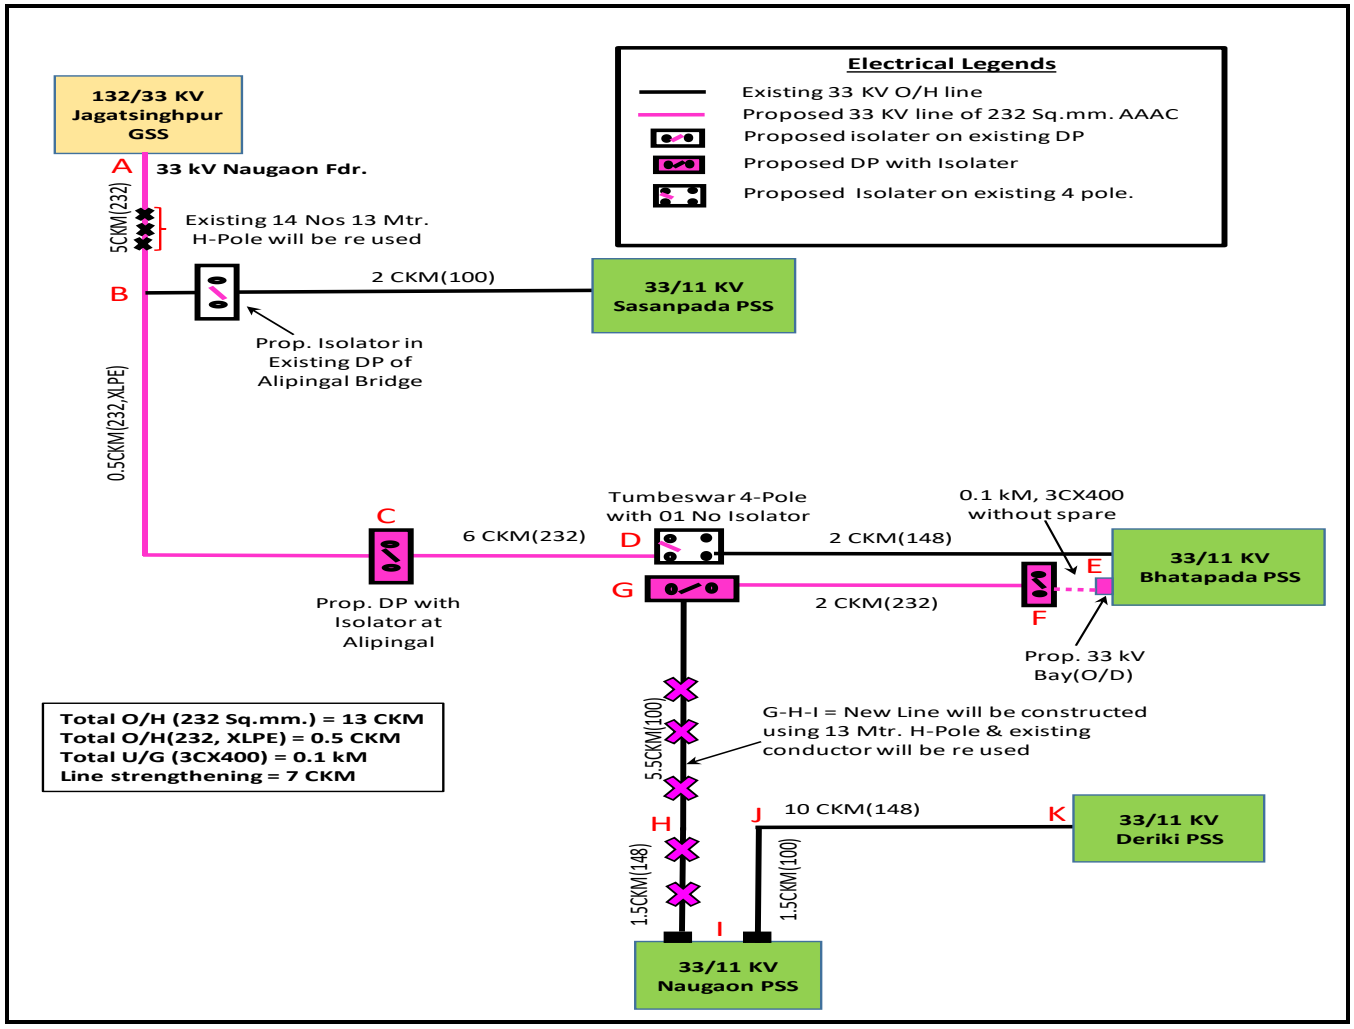
Existing SLD:

Priority and Timeline of the Project:

Priority: At present, the 33 kV Naugaon feeder emanating from Jagatsinghpur GSS is serving 21,910 consumers through an existing network comprising lower-capacity conductors. Due to the ageing and deteriorated condition of the conductors, the presence of multiple joints, and frequent faults and conductor snapping incidents, the reliability of power supply through the feeder has been significantly affected. During the last year, the feeder experienced 123 tripping incidents, resulting in frequent interruptions and inconvenience to consumers.

Furthermore, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose serious safety concerns for both the public and maintenance personnel. These conditions increase the likelihood of faults, outages, and potential hazards to life and property.

In addition, the 33/11 kV Bhatapada PSS is presently connected through a T-off arrangement from the 33 kV Naugaon feeder. Consequently, any fault or planned shutdown on the feeder directly affects the



power supply to the substation and its downstream consumers, thereby compromising network reliability and operational flexibility.

In the absence of suitable reliability enhancement measures, consumers connected to the feeder will continue to experience frequent and prolonged power supply interruptions. Therefore, augmentation and refurbishment of the existing 33 kV Naugaon feeder are essential to improve system reliability, reduce outage frequency, enhance network safety, strengthen power supply to Bhatapada PSS, and ensure safe, reliable, and quality power supply to the 21,910 consumers served by the feeder.

Proposed Scenario:

- Augmentation and refurbishment of the 33 kV Naugaon feeder are proposed to improve system reliability, enhance network safety, reduce outages, and ensure safe, reliable, and quality power supply to consumers.
- LILO arrangement at 33/11 kV Bhatapada PSS is proposed on the 33 kV Naugaon feeder to improve operational reliability, provide uninterrupted power supply, facilitate maintenance activities, and ensure smooth operation of the distribution network.

Proposed SLD:

Scope of Work:

- Augmentation and Refurbishment of 33 kV Naugaon Feeder to enhance reliability and ensure Safe Power Supply along with LILO arrangement at 33/11 kV Bhatpada PSS.
- Construction of 13 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. AAAC.
- Construction of 0.5 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC.
- Supply & laying of 0.1 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in Open Trench method.
- Strengthening of 7 CKM 33 kV O/H line using 13 Mtr. H-Pole where existing 100 Sq.mm. AAAC will be reused.
- Installation of 01 No. of Isolator in existing 4-Pole at Tambeswar.
- Installation of 01 No. of Isolator in existing DP at Alipingal Bridge.
- Installation of 01 No. of 33 kV Bay (Outdoor type) at Bhatpada PSS.
- Installation of 10 Nos guarding having span 30 Mtr. each for road crossing.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.25

Name of the Work :-	Proposal for construction of 2 CKM 33 kV O/H line using 232 Sq.mm. AAAC and augmentation of 11.5 CKM line of 33 kV Naugaon Fdr. from 100 Sq.mm. AAAC to 232 Sq.mm. AAAC along with strengthening of 7 CKM 33 kV line & installation of 01 No. of 33 kV O/D bay at Bhatpada PSS.	
Names of Schemes: -	**CAPEX 27-28**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 13 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. AAAC (Refer PSLD)	44,924,434.70
2	PART B: Construction of 0.5 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC(Refer PSLD)	2,210,901.67
3	PART C: Supply & laying of 0.1 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in Open Trench method (Refer PSLD)	1,161,243.52
4	PART D: 1. Strengthening of 7 CKM 33 kV O/H line using 13 Mtr. H-Pole where existing 100 Sq.mm. AAAC will be reused (Refer SLD G-H-I) 2. Installation of 01 No. of Isolator in existing 4-Pole at Tambeswar (Refer PSLD D) 3. Installation of 01 No. of Isolator in existing DP at Alipingal Bridge (Refer PSLD)	17,294,589.57
5	PART E: Installation of 01 No. of 33 kV Bay(Outdoor type) at Bhatpada PSS(Refer SLD - E)	3,038,303.67
6	PART F: Installation of 10 Nos guarding having span 30 Mtr.	293,443.13
7	PART G : Dismantling portion	1,084,346.36
8	**Total Gross**	**70,007,262.63**
Total estimated cost is Rs. 7.00 Cr.		

Cost Estimate: ₹ 7.00 Cr. (For detailed BoQ refer Annexure-11.25).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

i) The proposed strengthening and augmentation of the 33 kV network is aimed at ensuring safe, reliable, and quality power supply to consumers by reducing feeder outages, improving system reliability, enhancing network safety, and minimizing power interruptions.

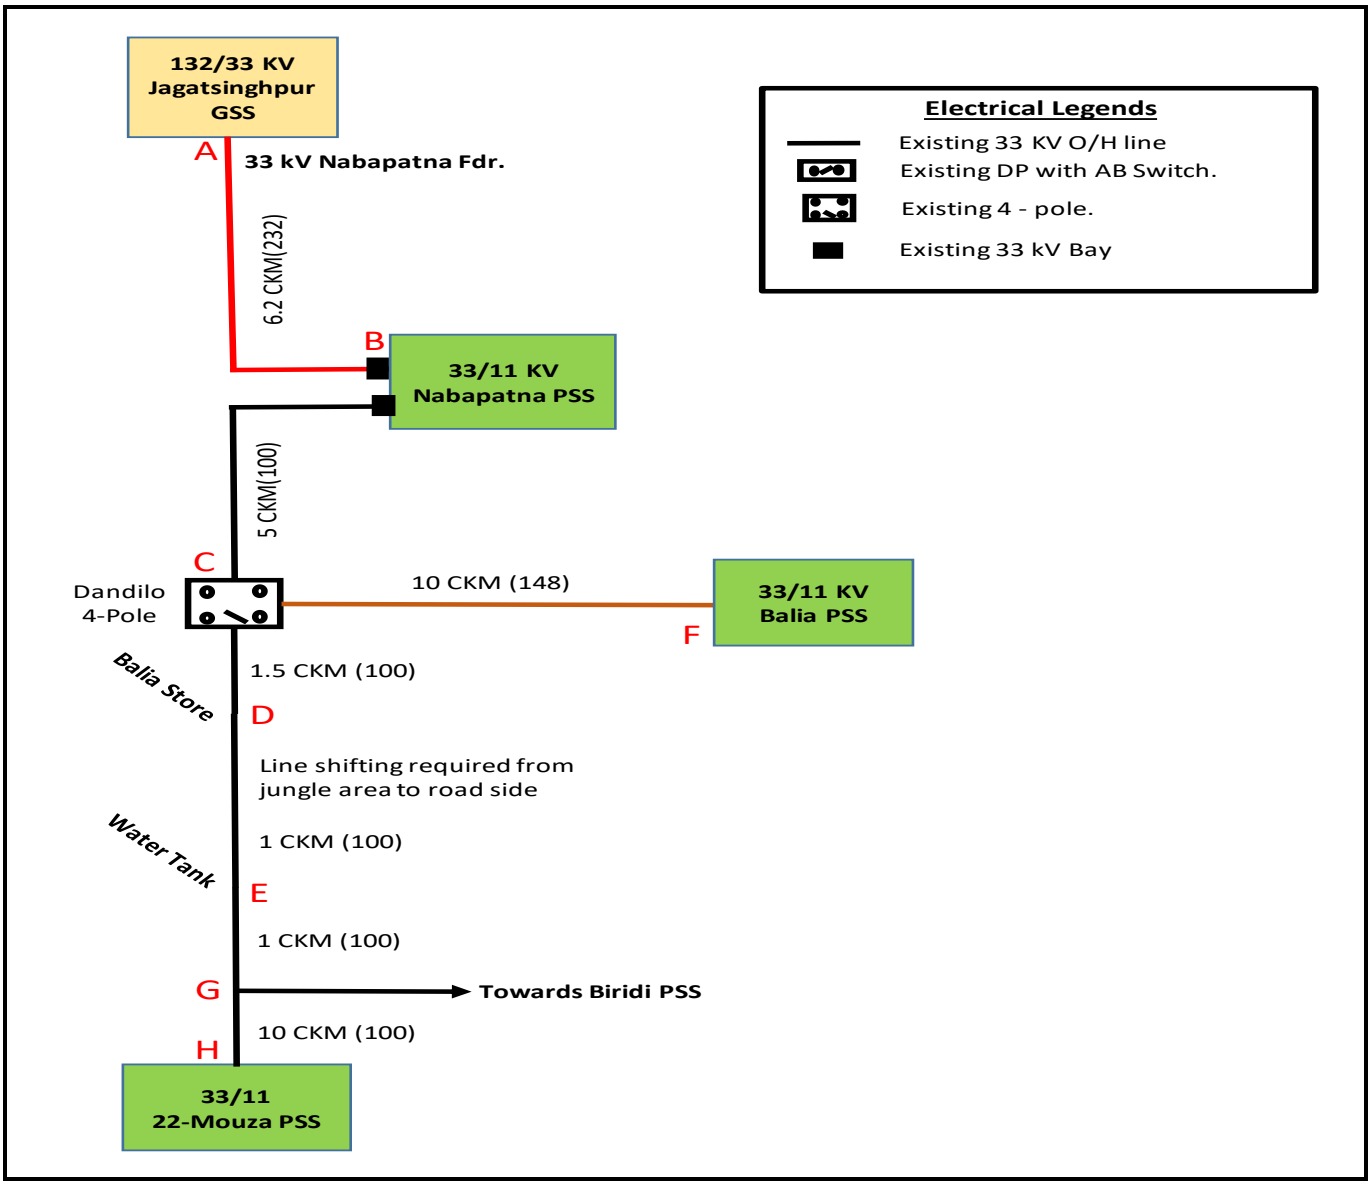
ii) The proposed LILO arrangement at 33/11 kV Bhatapada PSS will improve network reliability, enhance operational flexibility, reduce outage duration during faults and maintenance, and ensure a more reliable and uninterrupted power supply to consumers.

26. Proposal for reliability improvement by Augmentation and Refurbishment of 33kV Nabapatna Feeder:

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Nabapatna feeder from Balia store to Balia water tank.

Requirement/ Need of the proposal:



Objective:

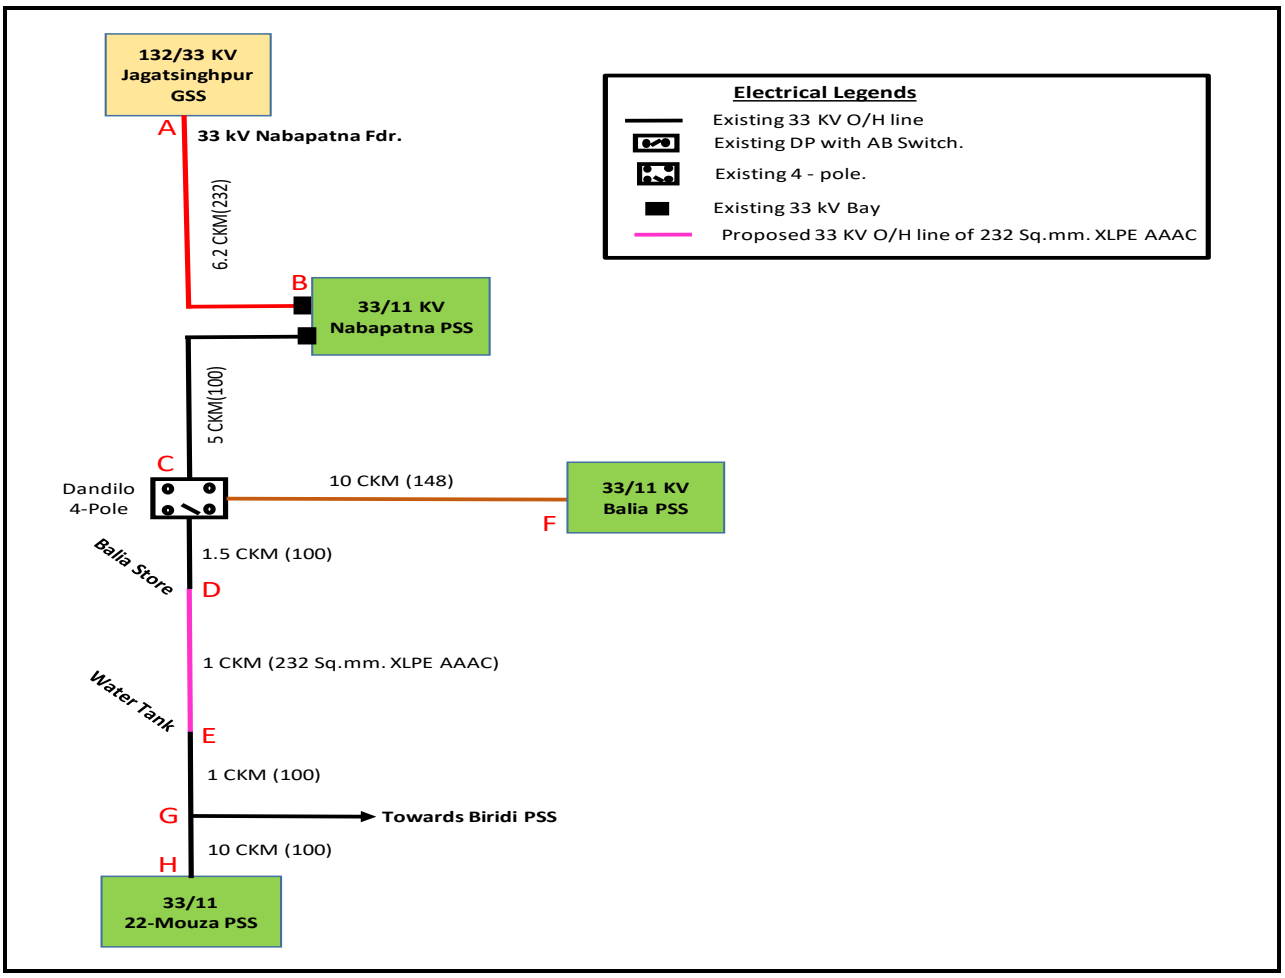
To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- The existing 33 kV Nabapatna feedder emanating from Jagatsinghpur GSS and serving to 33/11 kV Nabapatna, Balia & 22-Mouza PSS.
- The 33 kV feeder section from Balia Store to Balia Water Tank traverses a forest area, which is prone to frequent tripping due to vegetation growth and environmental factors. The difficult terrain and restricted accessibility create challenges in carrying out routine maintenance and emergency restoration works, thereby affecting the reliability of power supply.

Existing SLD:

Priority and Timeline of the Project:



Priority: At present, the 33 kV Nabapatna feeder emanating from Jagatsinghpur GSS is serving 21,517 consumers through an existing network comprising lower-capacity conductors. Due to the ageing and deteriorated condition of the conductors, the presence of multiple joints, and frequent faults and conductor snapping incidents, the reliability of power supply through the feeder has been adversely affected. During the last year, the feeder experienced 55 tripping incidents, resulting in frequent power supply interruptions to the consumers connected to the feeder.

Furthermore, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose significant safety concerns for both the public and maintenance personnel. A section of the feeder from Balia Store to Balia Water Tank passes through a forest area, making it highly susceptible to faults and tripping due to vegetation interference and environmental factors. The forest stretch also creates challenges in carrying out routine maintenance and fault restoration activities, thereby increasing outage duration and affecting overall feeder reliability.

Proposed Scenario:

- Shifting of the 33 kV feeder section from Balia Store to Balia Water Tank from the forest area to the roadside alignment is proposed to reduce vegetation-related trippings, improve accessibility for maintenance, shorten fault restoration time, enhance network reliability, and ensure safe and uninterrupted power supply to consumers.

Proposed SLD:

Scope of Work:

- Construction of 0.9 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.26		
TPCODL		
Name of the Division :-	JED	
Name of the Sub-Division : -	Raghunathpur	
Name of the Section : -	Biridi	
Name of the Work :-	Proposal for construction of 0.9 CKM line of 33 kV Nabapatna Fdr. using 232 Sq.mm. XLPE AAAC for shifting of line from forest area.	
Names of Schemes: -	**CAPEX 27-28**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**

1	PART B: 1. Construction of 0.9 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC(Refer PSLD) 2. Installation of 5 Nos of stud pole	4,429,602.08
2	PART B : Dismantling portion	55,559.69
3	**Total Gross**	**4,485,161.77**
Total estimated cost is Rs. 0.45 Cr.		

Cost Estimate: ₹ 0.45 Cr. (For detailed BoQ refer Annexure-11.26).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

The proposed shifting of the 33 kV feeder section from the forest corridor to the roadside alignment is aimed at ensuring safe, reliable, and quality power supply to consumers. The realignment will eliminate frequent vegetation-related interruptions, facilitate easier maintenance and patrolling, improve fault response time, and enhance the overall reliability and operational efficiency.

ANNEXURE-11.2			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**BCDD-1 (BBSR-I)**	
Name of the Work :-		Proposal for 33 kV N-1 reliability to Satyanagar and Unit-3 PSS	
Scope of work:-		Part-A : Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.	
Names of Schemes: -		***TPCODL CAPEX (FY 27-28)***	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	Part-A : Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.	₹ 15,995,596.26
		Total Amount	**₹ 15,995,596.26**
		Total Amount (In Cr)	**₹ 1.60**
Total estimated cost is Rs. 1.60 Crore. (On TPCODL CAPEX Scheme)			

Part-A : Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.

Standard BoQ and Estimate for 33kV 3C, 400sqmm UG Cable along with 33kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 33kV 3C, 400sqmm cable (open trench)***	***M***	***1200***		
1.1	Supply of 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA-20kA)	M	1200	3,165.00	3,798,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	4	25,930.00	103,720.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	11,900.00	47,600.00
1.6	Supply of materials for High Density Polyethelene **(HDPE) pipe 200mm** diameter, PE 80- PN8 for laying of 33kV UG cable	M	1200.00	812.00	974,400.00
	Sub Total (Supply Portion) (in Rs.)				**4,923,720.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 33kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 33kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by **open trench method**.	M	1200	115.00	138,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG cable kits	EA	8	2,000.00	16,000.00
1.4	Laying of 200**mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	1200.00	195.00	234,000.00
	Sub Total (Erection Portion) (in Rs.)				**388,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	558		
1.1.a	Earth work excavation of **soil**	M3	468.72	716.03	335,617.58
1.1.b	Earth work excavation of **hard rock**	M3	200.88	1,759.39	353,426.26
1.2	Back filling with excavated soil outside and above the trench	M3	669.6	220.00	147,312.00
1.3	Road Repair and restoration charges	KM	0.685	9,294,727.82	6,366,888.56
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM	**10**	16,703.11	167,031.15
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	40	1,035.17	41,406.80
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	1.2	10,470.00	12,564.00
	Sub Total (Civil Portion) (in Rs.)				**7,424,246.35**

A1	**Sub Total (Supply Portion)**	**4,923,720.00**

Gross Total Summary

1	Gross Total Material +Services (N+O) for 33 KV DP With Isolator	369,291.40
2	Gross Total Material +Services (N+O) for 33 KV Cut Point with 180 Degree Angle	144,032.46
3	Gross Total Material +Services (N+O) for 33 KV Cut Point with 90 Degree Angle	156,519.13
4	Gross Total Material +Services (N+O) for 33 KV Pin Points	4,631,178.88
Q	**Gross Total Material +Services**	**5,301,021.86**
R	Inspection Fee of Over Head Line (HT) - Rs.1500 up to 1 km.	1,500.00

S	Inspection Fee of Over Head Line (HT) - Rs. 750/ Additional Km	750.00
T	Inspection Fee of Drawing Checking and Approval	750.00
U	**Total Inspection Fees (R+S+T)**	**3,000.00**
V	GST @ 18% on Total Inspection Fees (U)	540.00
W	Total Inspection Fees including GST (U+V)	3,540.00
X	**Gross Total Material, Services and Inspection Fees (Q+W)**	**5,304,561.86**

Part-B: Dismantling

Standard BoQ and Estimate for Dismantling of Materials

SL.No	Description	Unit	Quantity	Rate	Amount
1	Dismantling of ACSR/AAAC 80/100 mm2 from overhead line	M	7500	9.21	69,045.75
A1				**Sub Total (Civil Portion) (in Rs.)**	**69,045.75**
A2				**Applicable Taxes to make it Landed Cost @18%**	**12,428.24**
A				**Total landed Cost (A=A1+ A2)**	**81,473.99**
B				**Other Overhead /(including Supervision Charges) @ 6 % of B**	
C				**Gross Total Estimated Cost i.e. (A+B)**	81,473.99
D				**CESS @ 1% of C**	814.74
E				**Grand Total (C+D)**	82,288.72

ANNEXURE-11.5			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**BED (BBSR-I)**	
Name of the Work :-		***Reliability Improvement of BBSR City Area by new linking line :*** New 33kV feeder from Balianta GSS to Bhingarpur PSS, for enabling reliable power supply by power evacuation and providing additional 33kV source to PSS.	
Scope of work:-		1. Construction of 3CX400sqmm without spare for length- 3.8KM 2. Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS Construction of 33kv ovehead line with 232sqmm for length- 7KM	
Names of Schemes: -		***TPCODL CAPEX (FY 27-28)***	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	Part-A: Construction of 3CX400sqmm without spare for length- 3.8KM	₹ 36,259,336.70
2	B	Part-B :- Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS	₹ 2,809,149.00
2	C	Part-C: Construction of 33kv ovehead line with 232sqmm for length- 7KM	₹ 25,833,900.80
		Total Amount	**₹ 64,902,386.51**
		Total Amount (In Cr)	**₹ 6.49**
Total estimated cost is Rs. 6.49 Crore. (On TPCODL CAPEX Scheme)			

Part-A: Construction of 3CX400sqmm without spare for length- 3.8KM

Standard BoQ and Estimate for 33kV 3C, 400sqmm UG Cable along with 33kV RMU					
Supply Portion					
Sl. No.	**Description of items**	**Unit**	**Quantity**	**Rate (in Rs.)**	**Amount (in Rs.)**
1	**Supply of materials for 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 33kV 3C, 400sqmm cable (open trench)***	***M***	***2300***		
b	***Length of 33kV 3C, 400sqmm cable (HDD)***	***M***	***1500***		
1.1	Supply of 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA-20kA)	M	3800	3,165.00	12,027,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	13	25,930.00	337,090.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	11,900.00	59,500.00
1.5	Supply of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT U/G Cable kits (Touch Proof)	EA	3	71,915.00	215,745.00
1.6	Supply of materials for High Density Polyethelene **(HDPE) pipe 200mm** diameter, PE 80- PN8 for laying of 33kV UG cable	M	2300.00	812.00	1,867,600.00
	Sub Total (Supply Portion) (in Rs.)				**14,506,935.00**
Erection Portion					
Sl. No.	**Description of items**	**Unit**	**Quantity**	**Rate (in Rs.)**	**Amount (in Rs.)**
1	**Erection, Commissioning & Testing of 33kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 33kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by **open trench method**.	M	3800	115.00	437,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG cable kits	EA	21	2,000.00	42,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	1500	2,970.00	4,455,000.00
1.4	Laying of 200**mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	2300.00	195.00	448,500.00
	Sub Total (Erection Portion) (in Rs.)				**5,382,500.00**
Civil Portion					
Sl. No.	**Description of items**	**Unit**	**Quantity**	**Rate (in Rs.)**	**Amount (in Rs.)**
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	2050		
1.1.a	Earth work excavation of **soil**	M3	1722	716.03	1,233,003.66
1.1.b	Earth work excavation of **hard rock**	M3	738	1,759.39	1,298,429.82
1.2	Back filling with excavated soil outside and above the trench	M3	2460	220.00	541,200.00
1.3	Road Repair and restoration charges	KM	0.55	9,294,727.82	5,112,100.30
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM	**10**	16,703.11	167,031.15
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	127	1,035.17	131,466.59
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	3.8	10,470.00	39,786.00
	Sub Total (Civil Portion) (in Rs.)				**8,523,017.52**

A1	**Sub Total (Supply Portion)**	**14,506,935.00**
A2	**Applicable Taxes to make it Landed Cost @18%**	**2,611,248.30**
A	**Total Landed Cost (A=A1 + A2)**	**17,118,183.30**
B	Stock, Storage & Insurance @ 3 % of A	513,545.50
C	**Sub Total (A+B)**	**17,631,728.80**
D	Contingency @ 3 % of C	528,951.86
E	Tools & Plants Charges @ 2% of C (considered for earthing items)	-
F	Transportation @ 7.5% of C	1,322,379.66
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)	-
H	**Total (C+D+E+F+G)**	**19,483,060.32**
I1	Sub Total (Erection Portion + Civil Portion)	13,905,517.52
I2	**Applicable Taxes to make it Landed Cost @18%**	**2,502,993.15**
I	**Total landed Cost (I=I1+ I2)**	**16,408,510.67**
J	**Total Cost (H+I)**	**35,891,570.99**
K	Other Overhead /(including Supervision Charges) @ 6 % of J	
L	**Total Estimated Capital Cost i.e. (J+K)**	**35,891,570.99**
M	CESS 1% of L	358,915.71
N	**Grand Total (L+M)**	**36,250,486.70**
O	Inspection Fee of UG Line (HT) - Rs. 3000/ km.	3,000.00
P	Inspection Fee of UG Line (HT) - Rs. 1500/ Additional Km	4,500.00
Q	Inspection Fee of RMU - Rs. 1500/ RMU	-
R	Inspection Fee of Drawing Checking and Approval	
S	Total Inspection Fees (O+P+Q+R)	**7,500.00**
T	GST @ 18% on Total Inspection Fees (S)	1,350.00
U	Total Inspection Fees including GST (S+T)	8,850.00
V	**Gross Total Material, Services and Inspection Fees (N+U)**	**36,259,336.70**

Part-B :- Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS					
No. of BAY requirement			1		
No. of VCB Requirement			1		
No. of Bus isolator requirement					
Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	T-1 GI Column(7.25 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI)) for 33kV incoming line, Nominal Unit Wt - 0.35 MT/column	KG	78.00	350	27,300.00
2	T-2 GI Column (7.25mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI)) for 33kV incoming line -1 no, Nominal Unit Wt - 0.42 MT/column	KG	78.00	420	32,760.00
3	T-1A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.31 MT/column (0.31x2=0.62MT)	KG	78.00	620	48,360.00
4	T-2A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.37 MT/column (0.37x2=0.74MT)	KG	78.00	740	57,720.00
5	G-3 GI Beam(5.05mtr long, consisting of 2 Nos 150X75 X5.7mm) for 33kV incoming line - (2 nos. Beam- one for Surge Arrester and other for Isolator, Nominal Unit Wt - 0.2 MT/Beam	KG	78.00	200	15,600.00
6	G-2 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	350	27,300.00
7	G-1 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	350	27,300.00

5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	4.725	2,329.61
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	2	440.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.2835	1,487.66
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.85	18,949.22
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	14.94	4,599.88
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	122.43	13,650.95
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	34.5	8,004.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	2.3	3,404.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	2.3	11,569.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.6	34,500.00

6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.2	31,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	56	15,120.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	991.4	101,122.80
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	1.2	9,540.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	530.2	55,140.80
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00

PART C: Construction of One No of 33 KV Outdoor line bay.					
No. of BAY requirement			1		
No. of VCB Requirement			1		
No. of Bus isolator requirement					
Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	T-1 GI Column(7.25 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI)) for 33kV incoming line, Nominal Unit Wt - 0.35 MT/column	KG	78.00	350	27,300.00
2	T-2 GI Column (7.25mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI)) for 33kV incoming line -1 no, Nominal Unit Wt - 0.42 MT/column	KG	78.00	420	32,760.00
3	T-1A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.31 MT/column (0.31x2=0.62MT)	KG	78.00	620	48,360.00
4	T-2A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.37 MT/column (0.37x2=0.74MT)	KG	78.00	740	57,720.00
5	G-3 GI Beam(5.05mtr long, consisting of 2 Nos 150X75 X5.7mm) for 33kV incoming line - (2 nos. Beam- one for Surge Arrester and other for Isolator, Nominal Unit Wt - 0.2 MT/Beam	KG	78.00	200	15,600.00
6	G-2 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	350	27,300.00
7	G-1 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	350	27,300.00
8	Equipment Structures (GI) For 33 KV Isolator (Unit Wt of Equipment Structures per set - 0.33 MT)	KG	78.00	660	51,480.00
9	GI Spikes with cone and GI (2 nos) base plate 10mm (50x3000 mm GI pipe) (Unit Wt=0.035 MT) (0.035x6 = 0.21 MT)	KG	78.00	210	16,380.00
10	GI Pipe Earthing 40mm. 3 Mtr. Long	No.	1,300.00	20	26,000.00
11	50x6mm Flat(GI) for earthing, 2.36kg/mtr.	KG	78.00	708	55,224.00
12	232 sq.mm AAAC for 33kV side jumpering and Bus Formation etc.	M	181.65	50	9,082.50
13	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator with earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	1,01,652.00	1	1,01,652.00
14	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator without earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	86,858.00	1	86,858.00
15	33KV Outdoor VCB-1250 A, 25 KV/3 sec Gang operated type (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,63,629.00	1	2,63,629.00
16	Indoor CR PANEL FOR Feeder(IC/OG) PROTECTION 33KV Outdoor VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,70,500.00	1	2,70,500.00
18	33KV, Single Phase, Outdoor, OILCOOLED CT , 25KA/3sec CTR-200-400-800/1-1-1 A(Accuracy Class-PS/0.2S/5P20,Burden -/30VA/30VA	EA	40,551.00	3	1,21,653.00

19	33KV, Single Phase, Outdoor, OILCOOLED PT 33000/√3/110/√3 Volt (Accuracy class 3P/3P/0.2, Burden-100/100/100 VA	EA	24,028.00	9	2,16,252.00
20	Lightning Arrester(30KV,10KA) (Station Class,class-2)	EA	4,443.00	3	13,329.00

Civil & Services

Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	Construction Earthing chamber including installation of earthing pipe.Making earthing chamber including excavation , soil treatment with bentonide powder , calculation of earth resistance, including Installation of 3Mtr GI Pipe 40mm/50mm including welding of Flat(GI) around pipe .	No.	3,784.73	20	75,694.60
2	**VCB Foundation**				
2.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.28	3,589.33
2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.34125	349.06

2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.455	2,387.60
2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.825	18,783.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	13.25	4,079.54
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	140	15,610.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.96875	3,928.91
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4.5	990.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.363	371.31

3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.363	1,904.83
3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.3625	15,707.91
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	14.94	4,599.88
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	122.43	13,650.95
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	51.30975	25,297.76
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	24	5,280.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	2.1	11,019.70

4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	14.175	94,247.45
4.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	89.64	27,599.26
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	734.58	81,905.67
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	9.45	4,659.23
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.567	2,975.32
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.7	37,898.45

5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	69	16,008.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	4.6	6,808.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	4.6	23,138.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	9.2	69,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	8.4	63,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	112	30,240.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	1982.8	2,02,245.60

6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	2.4	19,080.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	1060.4	1,10,281.60
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00
K1				**Total Civil & Services**	**10,66,232.61**

TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**PED and KHD**	
Name of the Sub-		PURI-II and Khordha	
Name of the Work :-		Refurbishment & augmentation of Existing 33kV Delanga feeder.	
Names of Schemes: -		**TPCODL CAPEX (FY 27-28)**	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	PART A: Supply & Laying of 33kV 3CX400sqmm UG Cable length= 1.4 KM without spare run.	₹ 1,74,36,312.31
2	B	PART B: Construction of 33kV , 3Ph, 3W Overhead Line Line Length= 8.2 CKM, with 40 Mtr. Span using 148 SQ.MM. -AAA Conductor & 13 Mtr. H-Pole for Pin-Points and Cut-Points & 13 Mtr WPB Pole for DP	₹ 3,14,12,989.17
3	C	PART C: Construction of 33kV , 3Ph, 3W Overhead Line Line Length= 2.5 CKM, with 40 Mtr. Span on 13 mtr H-Pole for Pin-Points and Cut-Points & 13 Mtr WPB Pole for DP using 148 SQ.MM. -XLPE AAA Covered Conductor	₹ 1,10,33,112.32
4	D	PART D: Shifting of 3 Nos. outdoor Bay.	₹ 80,74,854.09
5	E	PART E: Construction of 2 Nos. 33kV Bus.	₹ 32,38,272.51
6	F	PART F: Dismantling of Materials	₹ 12,27,311.25
		Total Amount	**₹ 7,24,22,851.65**
		Total Amount (In Cr)	**7.24**
Total estimated cost is Rs. 7.24 Crore. (On TPCODL Capex Scheme)			

PART A: Supply & Laying of 33kV 3CX400sqmm UG Cable length= 1.4 KM without spare run.					
Supply Portion					
Sl. No.	**Description of items**	**Unit**	**Quantity**	**Rate (in Rs.)**	**Amount (in Rs.)**

3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	1.089	1,113.94
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.089	5,714.50
3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	7.0875	47,123.72
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	44.82	13,799.63
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	367.29	40,952.84
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	153.9293	75,893.28

4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	72	15,840.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	6.3	33,059.11
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	42.525	2,82,742.35
4.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	268.92	82,797.78
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	2203.74	2,45,717.01
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	75.6	37,273.82
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	32	7,040.00

5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	4.536	23,802.56
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	45.6	3,03,187.56
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	239.04	73,598.03
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	1958.88	2,18,415.12
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	103.5	24,012.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	6.9	10,212.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	6.9	34,707.00

6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	13.8	1,03,500.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	12.6	94,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	168	45,360.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	2974.2	3,03,368.40
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	3.6	28,620.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	1590.6	1,65,422.40
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	64.8	42,120.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	21.6	64,800.00
K1				**Total Civil & Services**	**27,73,291.35**

TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**PED**	
Name of the Sub-		PURI-I & PURI-III	
Name of the Work :-		Extension of 33kV JBPC feeder from JBPC to Atharnala PSS to Talabania PSS for reliability improvement in puri town area	
Names of Schemes: -		**TPCODL CAPEX (FY 27-28)**	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	PART A:- Supply & laying of 33kV, 3CX400 sq.mm XLPE U/G Cable =4.2 Km Without spare run.(Refer proposed SLD point A-B, C-D & E-F)	₹ 5,85,63,393.51
2	B	PART B:- Installation of 3 Nos. of metering cubicle for feeder out going.	₹ 9,67,777.64
		Total Amount	**₹ 5,95,31,171.15**
		Total Amount (In Cr)	**5.95**
Total estimated cost is Rs. 5.95 Crore. (On TPCODL Capex Scheme)			

PART A:- Supply & laying of 33kV, 3CX400 sq.mm XLPE U/G Cable =4.2 Km Without spare run.(Refer proposed SLD point A-B, C-D & E-F)					
Supply Portion					
Sl. No.	**Description of items**	**Unit**	**Quantity**	**Rate (in Rs.)**	**Amount (in Rs.)**
1	**Supply of materials for 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 33kV 3C, 400sqmm cable (open trench)***	***M***	***2100***		
1.1	Supply of 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA-20kA)	M	4200	3,165.00	1,32,93,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	22	25,930.00	5,70,460.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT U/G Cable kits (Touch Proof)	EA	8	71,915.00	5,75,320.00
1.6	Supply of materials for High Density Polyethelene **(HDPE) pipe 200mm** diameter, PE 80- PN8 for laying of 33kV UG cable	M	4200.00	812.00	34,10,400.00
2	**Supply of 33kV RMU**				
a	***No. of 33kV 4Way RMU LLVV(2ISO+2BKR)+ AUX.PT***	***EA***	***1***		
b	***No. of 33KV RMU 4WAY 630A LVVV(1ISO+3BKR)+AUXPT***	***EA***	***1***		
2.1	Supply of RMU 33KV 4W 630A LLVV(2ISO+2BKR)+ AUX.PT	EA	1	30,18,066.00	
2.2	Supply of 33KV RMU 4WAY 630A LVVV(1ISO+3BKR)+AUXPT	EA	1	31,79,375.00	31,79,375.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
4	**FRTU for RMU SCADA Automation**				
a	***No. of FRTU***	***EA***	***1***		
4.1	Pre-Wired FRTU Panel with FRTU	EA	1	1,56,247.00	1,56,247.00
4.2	Managed Layer2 Ethernet Switch (FRTU Panel)	EA	1	95,000.00	95,000.00
4.3	Networking Accessories	SET	1	72.00	72.00
4.4	CMR with Mounting Base for Digital Inputs	EA	32	275.00	8,800.00
4.5	Interposing Relay for Digital Output	EA	16	275.00	4,400.00
4.6	Battery Charger	EA	1	17,500.00	17,500.00
4.7	Battery	EA	1	12,500.00	12,500.00
4.8	4G Modem cum Router	EA	1	24,400.00	24,400.00
4.9	Instrumentation Cable 12 C X 0.5 mm2, Armored cable for Status and Indications	M	40	309.00	12,360.00
4.10	Instrumentation Cable 7 C X 1.5 mm2, Armored for Control Output	M	40	299.00	11,960.00
4.11	Twisted Pair Shielded & Over all shielded Instrumentation Cable 5 P X 1.0 mm2, Armored for Analog Input	M	40	382.00	15,280.00
4.12	4 C X 4 mm2 Copper cable for extension of CT & PT	M	20	185.59	3,711.80
4.13	2 C X 4 mm2 Cable for DC Power Supply	M	10	210.00	2,100.00
4.14	4P X 0.36 mm2, Armored Communication Cable for MFM	M	20.0	229.00	4,580.00

4.15	Armored CAT6 SFTP Cable	M	20	107.00	2,140.00
4.16	Un-Armored CAT6 SFTP Cable	M	20	55.00	1,100.00
4.17	Multi Function Meter	EA	2	14,000.00	28,000.00
	Sub Total (Supply Portion) (in Rs.)				**2,14,35,965.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 33kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 33kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by **open trench method**.	M	4200	115.00	4,83,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG cable kits	EA	30	2,000.00	60,000.00
1.3	Laying of 200**mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	4200.00	195.00	8,19,000.00
2	**Erection, Commissioning, Wiring and Testing of 33kV RMU**				
2.5	Erection of RMU 33KV 4W 630A LLVV(2ISO+2BKR)+ AUX.PT	EA	1	14,000.00	14,000.00
2.11	Erection of 33KV RMU 4WAY 630A LVVV(1ISO+3BKR)+AUXPT	EA	1	14,000.00	14,000.00
3	**FRTU and OFC for RMU SCADA Automation**				
3.1	Services of FRTU Panel, Communication and Other Supplied System (One Extra for existing RMU relaction)	EA	2.0	6,755.00	13,510.00
	Sub Total (Erection Portion) (in Rs.)				**14,03,510.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	2090		
1.1.a	Earth work excavation of **soil**	M3	1755.6	716.03	12,57,062.27

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	**CED**
Name of the Sub-Division : -	Gopalpur
Name of the Work :-	Proposal for construction of 33 kV line from 33/11 kV Dahaliabag PSS to Grand Bazar for N-1 connectivity between 33 kV Balikuda & Phulnakhra feeder.
Names of Schemes: -	TPCODL CAPEX (FY 27-28)

ABSTRACT OF ESTIMATE

Sl. No.	Description	Amount
1	Part-A :- 1. Supply and Laying of 6.5 KM 33 kV 3C X 400 Sq.mm. U/G cable without spare. 2. Supply and Installation of 1 No. of 33 kV 4 Way RMU at Dhaliabag PSS	60,367,468.93
	Total Amount	**60,367,468.93**
	Total Amount (In Cr.)	**6.04**

Total estimated cost is Rs.6.04 Crore. (On TPCODL Capex Scheme)

Part-A :-
1. Supply and Laying of 6.5 KM 33 kV 3C X 400 Sq.mm. U/G cable without spare.
2. Supply and Installation of 1 No. of 33 kV 4 Way RMU at Dhaliabag PSS

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 33kV 3C, 400sqmm cable (open trench)***	***M***	***4000***		
b	***Length of 33kV 3C, 400sqmm cable (HDD)***	***M***	***2500***		
1.1	Supply of 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA-20kA)	M	6500	3,165.00	20,572,500.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	25	25,930.00	648,250.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT UG Cable kits	EA	3	11,900.00	35,700.00
1.4	Supply of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT U/G Cable kits (Touch Proof)	EA	5	71,915.00	359,575.00
1.5	Supply of materials for High Density Polyethelene **(HDPE) pipe 200mm** diameter, PE 80- PN8 for laying of 33kV UG cable	M	4000.00	812.00	3,248,000.00
2	**Supply of 33kV RMU**				
a	***No. of 33kV 4Way RMU LLVV(2ISO+2BKR)+ AUX.PT***	***EA***	***1***		
2.1	Supply of RMU 33KV 4W 630A LLVV(2ISO+2BKR)+ AUX.PT	EA	1	3,018,066.00	3,018,066.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00

ANNEXURE-11.16		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	**CDD-II**	
Name of the Sub-Division : -	Badambadi	
Name of the Work :-	Proposal for 33 kV linking line of 0.45 KM from CRRI-1 Fdr. to Matagajpur PSS for N-1 connectivity	
Names of Schemes: -	TPCODL CAPEX (FY 27-28)	
ABSTRACT OF ESTIMATE		
Sl. No.	**Description**	**Amount**
1	Part-A:- Laying of 0.45 KM 33 kV 3Cx400 Sq.mm. U/G Cable without spare run from existing 4 pole at JICA to Matagajpur PSS.	4,243,461.88
2	Part-B :- Installation of 1 No. of 33 kV Line Bay at Matagajpur PSS (Refer SLD point)	3,153,527.78
	Total Amount	**7,396,989.66**
	Total Amount (In Cr.)	**0.74**
Total estimated cost is Rs. 0.74 Crore. (On TPCODL Capex Scheme)		

Part-A:- Laying of 0.45 KM 33 kV 3Cx400 Sq.mm. U/G Cable without spare run from existing 4 pole at JICA to Matagajpur PSS.

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 33kV 3C, 400sqmm cable (open trench)***	***M***			
b	***Length of 33kV 3C, 400sqmm cable (HDD)***	***M***	***450***		
1.1	Supply of 33kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA-20kA)	M	450	3,165.00	1,424,250.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	1	25,930.00	25,930.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, HT UG Cable kits	EA	2	11,900.00	23,800.00
	Sub Total (Supply Portion) (in Rs.)				**1,473,980.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 33kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 33kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by **open trench method**.	M	450	115.00	51,750.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 33kV, 3Core, 400sqmm, aluminium UG cable kits	EA	3	2,000.00	6,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	450	2,970.00	1,336,500.00
	Sub Total (Erection Portion) (in Rs.)				**1,394,250.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	Road Repair and restoration charges	KM	0.05	9,294,727.82	464,736.39
2	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	15	1,035.17	15,527.55
3	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	0.45	10,470.00	4,711.50
	Sub Total (Civil Portion) (in Rs.)				**484,975.44**

A1	**Sub Total (Supply Portion)**	**1,473,980.00**
A2	**Applicable Taxes to make it Landed Cost @18%**	**265,316.40**
A	**Total Landed Cost (A=A1 + A2)**	**1,739,296.40**
B	Stock, Storage & Insurance @ 3 % of A	52,178.89
C	**Sub Total (A+B)**	**1,791,475.29**
D	Contingency @ 3 % of C	53,744.26
E	Tools & Plants Charges @ 2% of C (considered for earthing items)	-
F	Transportation @ 7.5% of C	134,360.65
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)	-
H	**Total (C+D+E+F+G)**	**1,979,580.20**
I1	Sub Total (Erection Portion + Civil Portion)	1,879,225.44
I2	**Applicable Taxes to make it Landed Cost @18%**	**338,260.58**
I	**Total landed Cost (I=I1+ I2)**	**2,217,486.02**
J	**Total Cost (H+I)**	**4,197,066.22**
K	Other Overhead /(including Supervision Charges) @ 6 % of J	
L	**Total Estimated Capital Cost i.e. (J+K)**	**4,197,066.22**
M	CESS 1% of L	41,970.66
N	**Grand Total (L+M)**	**4,239,036.88**
O	Inspection Fee of UG Line (HT) - Rs. 3000/ km.	3,000.00
P	Inspection Fee of UG Line (HT) - Rs. 1500/ Additional Km	
Q	Inspection Fee of RMU - Rs. 1500/ RMU	-
R	Inspection Fee of Drawing Checking and Approval	750.00
S	Total Inspection Fees (O+P+Q+R)	**3,750.00**
T	GST @ 18% on Total Inspection Fees (S)	675.00
U	Total Inspection Fees including GST (S+T)	4,425.00
V	**Gross Total Material, Services and Inspection Fees (N+U)**	**4,243,461.88**

Part-B :-

Installation of 1 No. of 33 kV Line Bay at Matagajpur PSS (Refer SLD point)

No. of BAY requirement	1
No. of VCB Requirement	1

No. of Bus isolator requirement

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
2	T-2 GI Column (7.25mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI)) for 33kV incoming line -1 no, Nominal Unit Wt - 0.42 MT/column	KG	78.00	420	32,760.00
4	T-2A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.37 MT/column (0.37x2=0.74MT)	KG	78.00	740	57,720.00
5	G-3 GI Beam(5.05mtr long, consisting of 2 Nos 150X75 X5.7mm) for 33kV incoming line - (2 nos. Beam- one for Surge Arrester and other for Isolator, Nominal Unit Wt - 0.2 MT/Beam	KG	78.00	200	15,600.00
6	G-2 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	350	27,300.00
8	Equipment Structures (GI) For 33 KV Isolator (Unit Wt of Equipment Structures per set - 0.33 MT)	KG	78.00	990	77,220.00
9	GI Spikes with cone and GI (2 nos) base plate 10mm (50x3000 mm GI pipe) (Unit Wt=0.035 MT) (0.035x6 = 0.21 MT)	KG	78.00	210	16,380.00
10	GI Pipe Earthing 40mm. 3 Mtr. Long	No.	1,300.00	17	22,100.00
11	50x6mm Flat(GI) for earthing, 2.36kg/mtr.	KG	78.00	602	46,940.40
12	232 sq.mm AAAC for 33kV side jumpering and Bus Formation etc.	M	181.65	50	9,082.50
13	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator with earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	101,652.00	1	101,652.00
14	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator without earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	86,858.00	2	173,716.00
15	33KV Outdoor VCB-1250 A, 25 KV/3 sec Gang operated type (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	263,629.00	1	263,629.00
16	Indoor CR PANEL FOR Feeder(IC/OG) PROTECTION 33KV Outdoor VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	270,500.00	1	270,500.00
18	33KV, Single Phase, Outdoor, OILCOOLED CT , 25KA/3sec CTR-200-400-800/1-1-1 A(Accuracy Class-PS/0.2S/5P20,Burden -/30VA/30VA	EA	40,551.00	3	121,653.00
19	33KV, Single Phase, Outdoor, OILCOOLED PT 33000/√3/110/√3 Volt (Accuracy class 3P/3P/0.2, Burden-100/100/100 VA	EA	24,028.00	3	72,084.00
20	Lightning Arrester(30KV,10KA) (Station Class,class-2)	EA	4,443.00	3	13,329.00
21	Lightening arrester 33 kV, 10 kV, CL III. (with surge counter)	EA	11,900.00	3	35,700.00
22	Control Cable 12Core x 2.5 mm^2	Mtr	329.00	50	16,450.00
23	Control Cable 16Core x 2.5 mm^2	Mtr	426.00	50	21,300.00
24	Control Cable 4Core x 2.5 mm^2	Mtr	124.00	50	6,200.00
25	Control Cable 7Core x 2.5 mm^2	Mtr	196.00	50	9,800.00
29	Disc insulator (B&S) 90 KN polymer	No.	289.00	18	5,202.00
30	H W fitting(B&S) 90KN,4 Bolt	No.	631.00	18	11,358.00
31	Wedge connector for 232 sq.mm AAA conductor	NO.	333.00	12	3,996.00
32	GI Nut , Bolt & Washer of different sizes	K.g.	74.00	200	14,800.00

H	Erection Charges @ 10% of C (except Trf/Breaker/WPB/ H-Pole/HT stay set/GI Pipe/PSC pole/GI Pipe earthing) (With Applicable Taxes @ 18% to make it Landed Cost)				141,974.76
I	Erection Charges @ 20% of PSC pole (With Applicable Taxes @ 18% to make it Landed Cost)				-
J				**Sum of (C to I)**	**2,145,358.80**

Civil & Services

Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	Construction Earthing chamber including installation of earthing pipe.Making earthing chamber including excavation , soil treatment with bentonide powder , calculation of earth resistance, including Installation of 3Mtr GI Pipe 40mm/50mm including welding of Flat(GI) around pipe .	No.	3,784.73	17	64,340.41
2	**VCB Foundation**				
2.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.28	3,589.33
2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.34125	349.06
2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.455	2,387.60

2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.825	18,783.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	13.25	4,079.54
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	140	15,610.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.96875	3,928.91
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4.5	990.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.363	371.31
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.363	1,904.83
3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.3625	15,707.91
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	14.94	4,599.88

3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	122.43	13,650.95
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	51.30975	25,297.76
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	24	5,280.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	2.1	11,019.70
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	14.175	94,247.45
4.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	89.64	27,599.26
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	734.58	81,905.67
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	14.175	6,988.84
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	6	1,320.00

5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.8505	4,462.98
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	8.55	56,847.67
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	44.82	13,799.63
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	367.29	40,952.84
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	34.5	8,004.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	2.3	3,404.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	2.3	11,569.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.6	34,500.00

6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.2	31,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	56	15,120.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	991.4	101,122.80
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	1.2	9,540.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	530.2	55,140.80
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00

ANNEXURE-11.17		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	**AED**	
Name of the Sub-Division : -	Athagarh	
Name of the Work :-	Proposal for 33 kV linking line of 0.1 KM from Athagarh Fdr. to Tigiria PSS for N-1 connectivity and augmentation of 2.7 CKM of 33 kV Athagarh Fdr. of Khuntuni GSS.	
Names of Schemes: -	TPCODL CAPEX (FY 27-28)	
ABSTRACT OF ESTIMATE		
Sl. No.	**Description**	**Amount**
1	Part-A :- Construction of 0.1 KM 33 kV line with 232 Sq.mm. AAAC (Refer SLD point- A-B)	579,784.10
2	Part-B :- 1. Installation of 1 No. of 33 kV Line Bay at Tigiria PSS (Refer SLD point- B) 2. Strengthening of 33 kV Bus at Tigiria PSS. 3. Shifting of 33/0.4 kV Station Transformer.	4,448,446.85
3	Part-C:- Augmentation of 2.7 KM 33 kV line with 232 Sq.mm. XLPE AAAC of Athagarh Fdr. emanating from Khuntia Grid. (Refer SLD)	8,139,352.53
4	Part-D:- Laying of 0.25 KM 33 kV 3Cx400 Sq.mm. U/G Cable (2 Run) with Back to back arrangement for 132 kV line crossing.	3,362,073.42
	Total Amount	**16,529,656.90**
	Total Amount (In Cr.)	**1.65**
Total estimated cost is Rs. 1.65 Crore. (On TPCODL Capex Scheme)		

Part-A :- Construction of 0.1 KM 33 kV line with 232 Sq.mm. AAAC (Refer SLD point- A-B)

No. of 33 KV DP required With Isolator (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8050)	1

MATERIALS FOR 33 KV DP With Isolator

Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	WPB (GI) Pole 160x152 - 13 Mtr. long for DP	EA	33,970.00	2	67,940.00

Civil & Services

Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	Construction Earthing chamber including installation of earthing pipe.Making earthing chamber including excavation , soil treatment with bentonide powder , calculation of earth resistance, including Installation of 3Mtr GI Pipe 40mm/50mm including welding of Flat(GI) around pipe .	No.	3,784.73	16	60,555.68
2	**VCB Foundation**				
2.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.28	3,589.33
2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.34125	349.06

2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.455	2,387.60
2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.825	18,783.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	13.25	4,079.54
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	140	15,610.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.96875	3,928.91
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4.5	990.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.363	371.31
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.363	1,904.83

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.3625	15,707.91
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	14.94	4,599.88
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	122.43	13,650.95
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	51.30975	25,297.76
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	24	5,280.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	2.1	11,019.70
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	14.175	94,247.45
4.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	89.64	27,599.26
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	734.58	81,905.67
5	**Isolator**				

5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	9.45	4,659.23
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.567	2,975.32
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.7	37,898.45
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	172.5	40,020.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	11.5	17,020.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	11.5	57,845.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	23	172,500.00

6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	21	157,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	280	75,600.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	4957	505,614.00
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	6	47,700.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2651	275,704.00
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00

1	Construction Earthing chamber including installation of earthing pipe.Making earthing chamber including excavation , soil treatment with bentonide powder , calculation of earth resistance, including Installation of 3Mtr GI Pipe 40mm/50mm including welding of Flat(GI) around pipe .	No.	3,784.73	14	52,986.22
2	**VCB Foundation**				
2.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.28	3,589.33
2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.34125	349.06
2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.455	2,387.60

2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.825	18,783.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	13.25	4,079.54
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	140	15,610.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.96875	3,928.91
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4.5	990.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.363	371.31
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.363	1,904.83
3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.3625	15,707.91
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	14.94	4,599.88

3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	122.43	13,650.95
4	**Column as per Drawing Schedule-**

5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	34.5	8,004.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	2.3	3,404.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	2.3	11,569.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.6	34,500.00

6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.2	31,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	56	15,120.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	991.4	101,122.80
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	1.2	9,540.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	530.2	55,140.80
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00

ANNEXURE-11.22		
TPCODL		
Name of the Division :-	KED-II	
Name of the Sub-Division : -	Marsaghai	
Name of the Section : -	Marsaghai	
Name of the Work :-	Proposal for construction of 4.8 CKM 33 kV line between 33 kV Luna Fdr. & Thauri Fdr. for N-1 connectivity.	
Names of Schemes: -	**CAPEX 27-28**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 4 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC (Refer PSLD DL & MN)	18,258,958.13
2	PART B: 1. Supply & laying of 0.8 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in HDD method (Refer PSLD LM & NO) 2. Installation of 01 No. 33 kV 4-way RMU(LLVV) (Refer O)	16,594,558.36
3	PART C: Installation of 03 Nos 33 kV line protecting guarding having span 30 Mtr. each(Refer PSLD)	88,032.94
4	**Total Gross**	**34,941,549.43**
Total estimated cost is Rs. 3.49 Cr.		

PART A: Construction of 4 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC (Refer PSLD DL & MN)

No. of 33 KV DP required Without Isolator (Ref. Drawing No.- PD-1346-TPCODL-33 kV-OH-8003)	5

MATERIALS FOR 33 KV DP Without Isolator

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	WPB (GI) Pole 160x152 - 13 Mtr. long for DP	EA	33,970.00	10	339,700.00
2	GI Channel,angle, flat of different size	KG	78.00	1052.21	82,072.38
3	Danger Plate	EA	180.00	10	1,800.00

ANNEXURE-11.25

TPCODL

Name of the Division :-	JED
Name of the Sub-Division : -	Balikuda
Name of the Section : -	Naugaon
Name of the Work :-	Proposal for construction of 2 CKM 33 kV O/H line using 232 Sq.mm. AAAC and augmentation of 11.5 CKM line of 33 kV Naugaon Fdr. from 100 Sq.mm. AAAC to 232 Sq.mm. AAAC along with strengthening of 7 CKM 33 kV line & installation of 01 No. of 33 kV O/D bay at Bhatpada PSS.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Construction of 13 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. AAAC (Refer PSLD)	44,924,434.70
2	PART B: Construction of 0.5 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC(Refer PSLD)	2,210,901.67
3	PART C: Supply & laying of 0.1 kM 33 kV 1CX630 Sq.mm. XLPE U/G cable (3 run) in Open Trench method (Refer PSLD)	1,161,243.52
4	PART D: 1. Strengthening of 7 CKM 33 kV O/H line using 13 Mtr. H-Pole where existing 100 Sq.mm. AAAC will be reused (Refer SLD G-H-I) 2. Installation of 01 No. of Isolator in existing 4-Pole at Tambeswar (Refer PSLD D) 3. Installation of 01 No. of Isolator in existing DP at Alipingal Bridge (Refer PSLD)	17,294,589.57
5	PART E: Installation of 01 No. of 33 kV Bay(Outdoor type) at Bhatpada PSS(Refer SLD - E)	3,038,303.67
6	PART F: Installation of 10 Nos guarding having span 30 Mtr.	293,443.13
7	PART G : Dismantling portion	1,084,346.36
8	**Total Gross**	**70,007,262.63**

Total estimated cost is Rs. 7.00 Cr.

PART A: Construction of 13 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. AAAC (Refer PSLD)

No. of 33 KV DP required Without Isolator (Ref. Drawing No.- PD-1346-TPCODL-33 kV-OH-8003)	15

5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	34.5	8,004.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	2.3	3,404.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	2.3	11,569.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.6	34,500.00

6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.2	31,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	56	15,120.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	991.4	101,122.80
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	1.2	9,540.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	530.2	55,140.80
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00

ANNEXURE-11.26		
TPCODL		
Name of the Division :-	JED	
Name of the Sub-Division : -	Raghunathpur	
Name of the Section : -	Biridi	
Name of the Work :-	Proposal for construction of 0.9 CKM line of 33 kV Nabapatna Fdr. using 232 Sq.mm. XLPE AAAC for shifting of line from forest area.	
Names of Schemes: -	**CAPEX 27-28**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART B: 1. Construction of 0.9 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC(Refer PSLD) 2. Installation of 5 Nos of stud pole	4,429,602.08
2	PART B : Dismantling portion	55,559.69
3	**Total Gross**	**4,485,161.77**
Total estimated cost is Rs. 0.45 Cr.		

PART B:

1. Construction of 0.9 CKM 33 kV O/H line using 13 Mtr. H-Pole & 232 Sq.mm. XLPE AAAC(Refer PSLD)

2. Installation of 5 Nos of stud pole

No. of 33 KV DP required Without Isolator (Ref. Drawing No.- PD-1346-TPCODL-33 kV-OH-8003)	1

				Total Cost for Overload mitigation (Cr.)		**₹ 40.00**	

1. Proposal for overloading mitigation and Reliability improvement of 11 kV Kaushalyaganga Feeder:

Proposal:

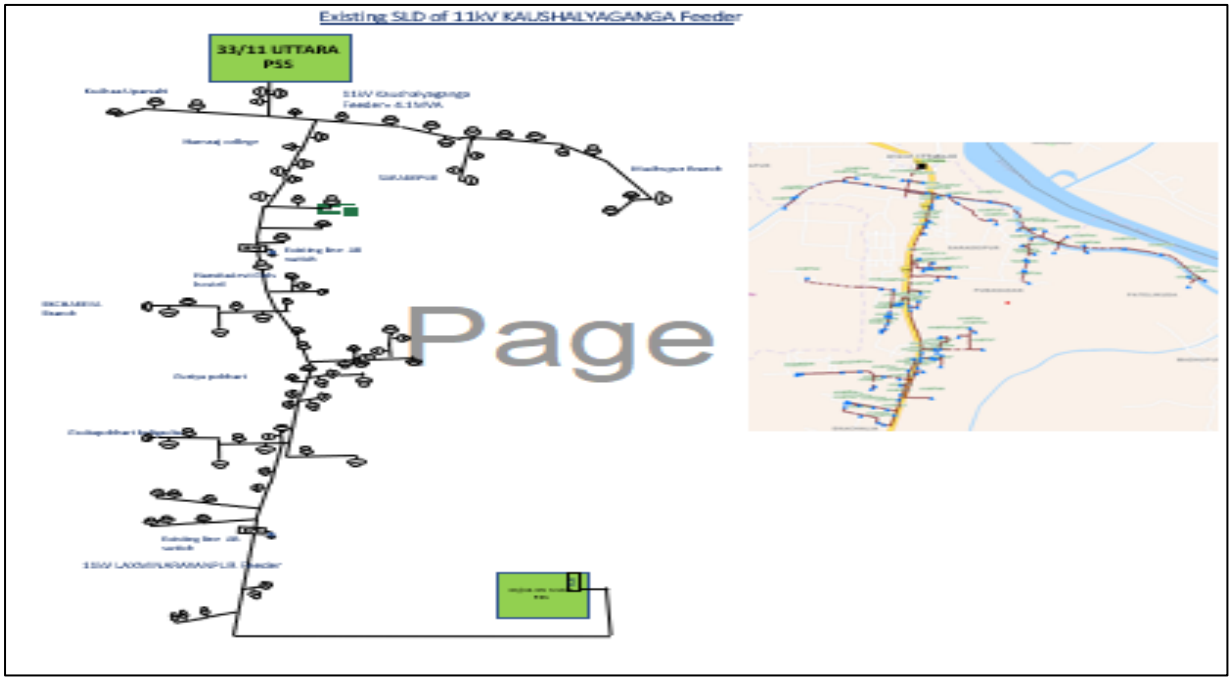
Proposal for bifurcation of 11 kV Kaushalyaganga Feeder to mitigate overloading and improve reliability.

Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by bifurcating the feeder from Siula PSS.

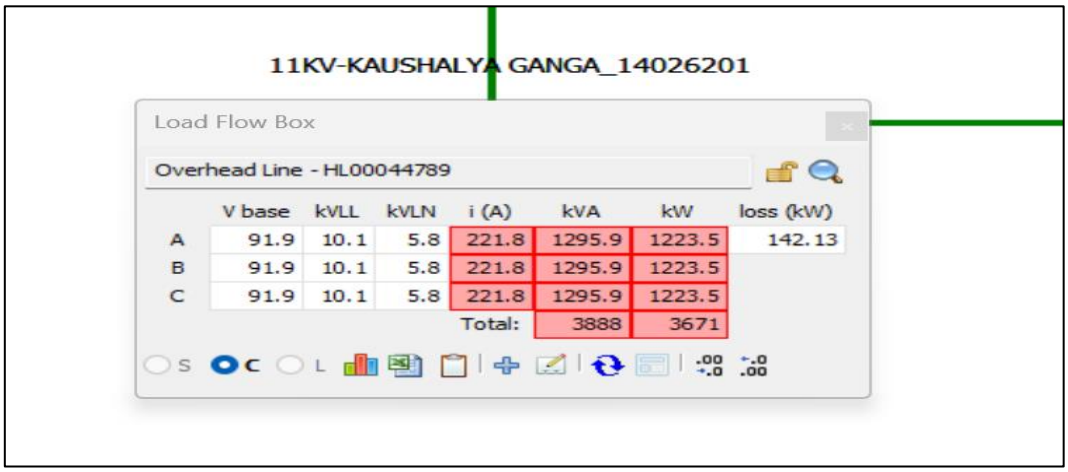
Existing Scenario:

- 11kV Kaushalyaganga feeder is emanating from 33/11kV Uttara PSS.Total length of this feeder is 1.85 CKM and the peak load is 2.97 MVA.
- Conductor size of 11kV Kaushalyaganga feeder is 80/55 sq.mm & the feeder is 84% loaded w.r.t the current carrying capacity of the conductor and 111% loaded considering 15% load growth for Urban feeders.
- This feeder is completely feeding Urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.



Existing Summer'26 Loading and projected load at 11 kV Kaushalyaganga Feeder:

Existing Loading									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer '26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer '28 (MVA)	% Loading	Feeder Overloading Status (Sumeer' 28)	Loss in kW in Summer '28
Uttara	Kaushalyaganga	3.54	2.97	84%	Under load	3.93	111%	Over load	142.13



GIS Map:-

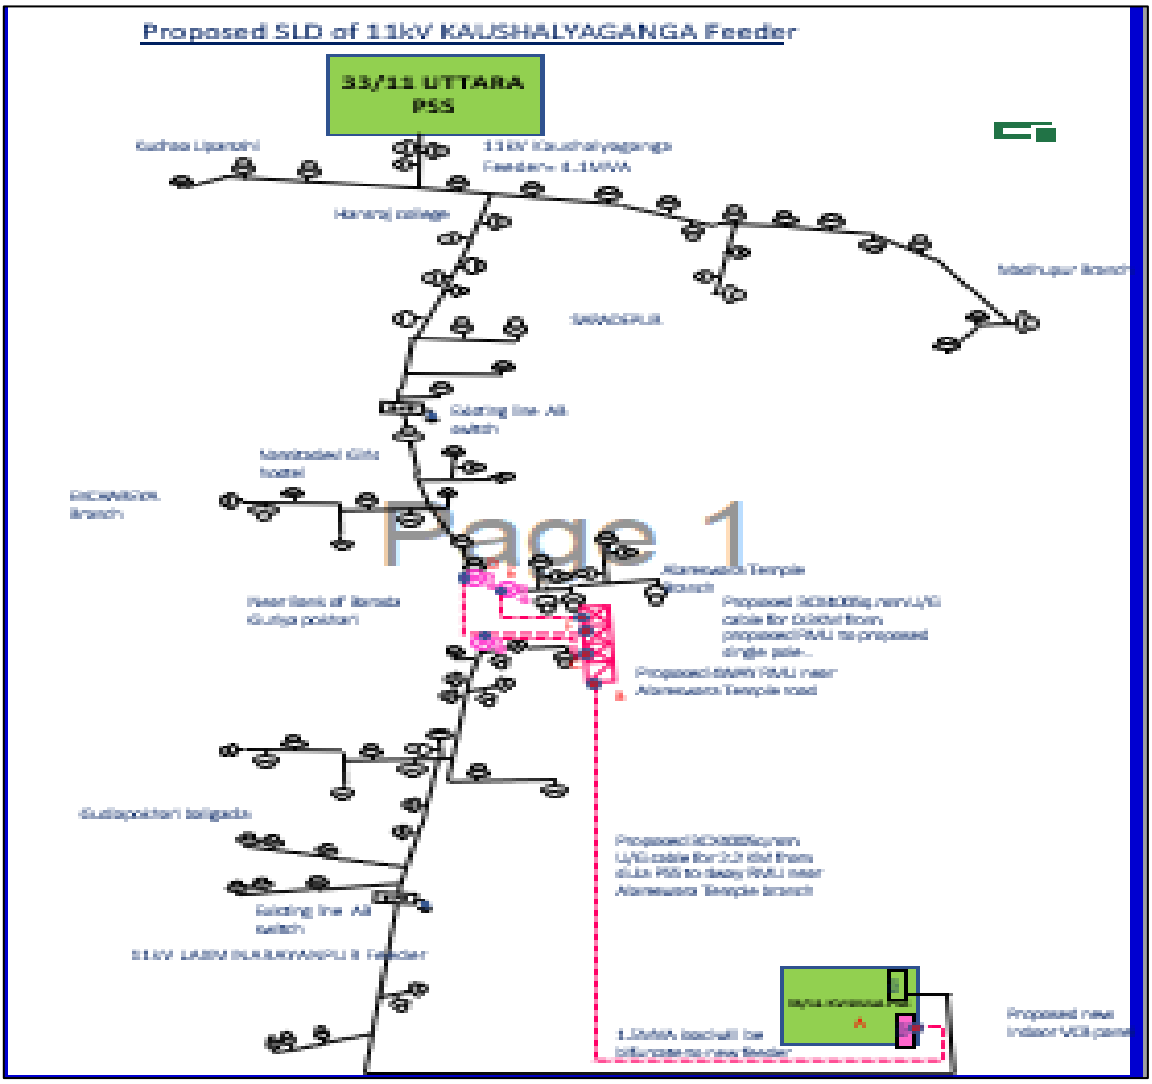
Existing SLD:

Load Flow Study of existing scenario in CYME Software:-

Priority of the Project:

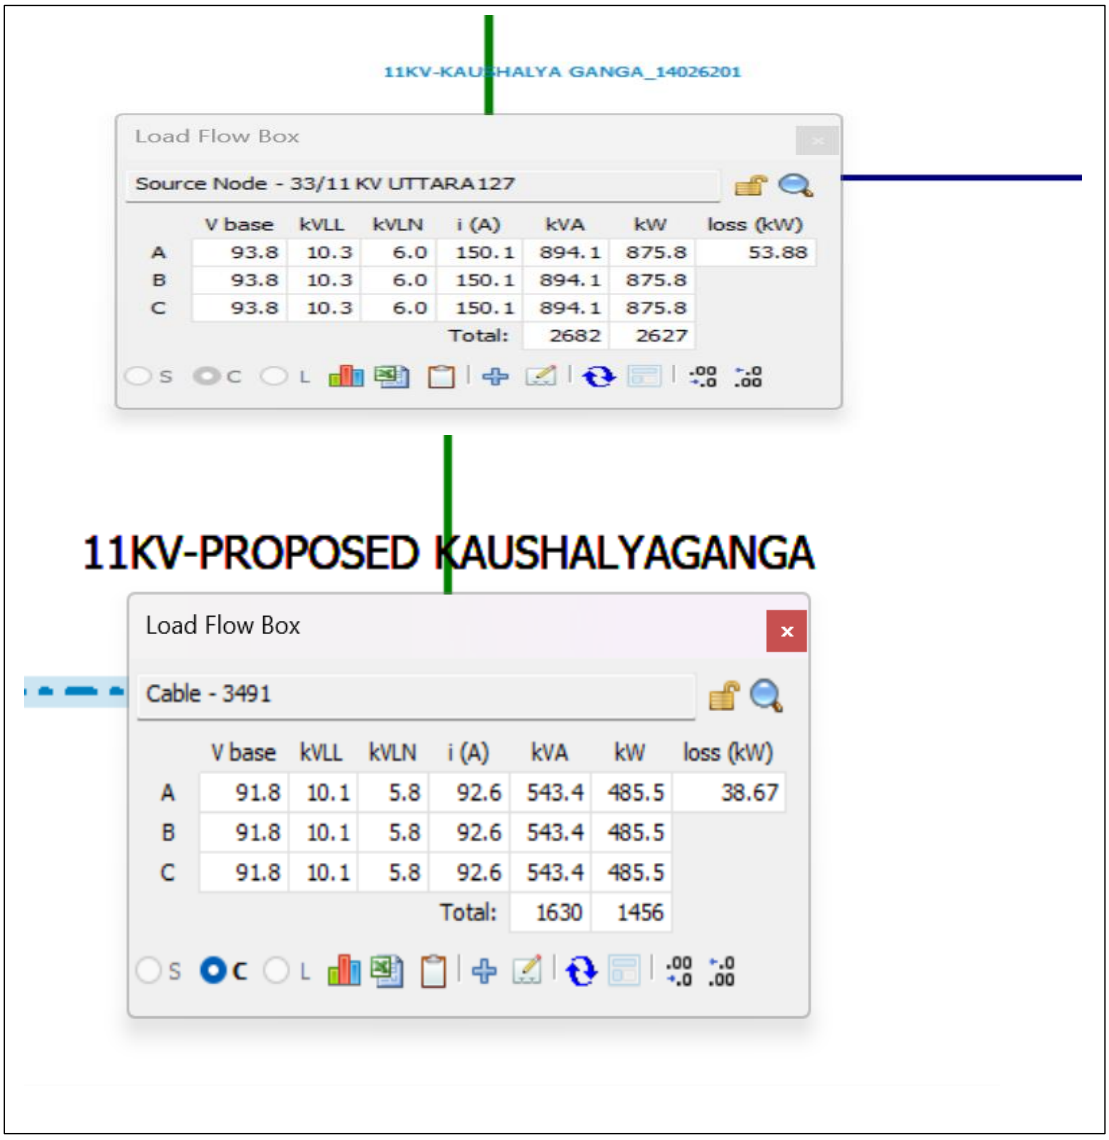
Priority: Since the feeder loading has reached 84% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 111%. In case the issue is not addressed, there will be load shedding of 2480nos. consumers for prolonged period.

Technical Justification:



- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 89% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.

Proposed Scenario:



- It is proposed to construct of 3 KM new line using 11kV 3Cx400sqmm from Siula PSS to Alareswara Temple road for load Bifurcation from existing 11KV Kaushalyanga Feeder
- Installation of 1 No. of 11kV RMU at branch line for feeder bifurcation

Loading after Proposal (Summer'28)						
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load Summer'28 (MVA)**	**% Loading in Summer-28**	**Feeder Status**	**Loss in kW in Summer'28**
Uttara	Kaushalyaganga	3.54	1.30	37%	Under load	53.88
Siula	Alareswara	5.75	3.28	57%	Under load	38.67

Proposed SLD:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- It is proposed to construct of 3 KM new line using 11kV 3Cx400sqmm from Siula PSS to Alareswara Temple road for load Bifurcation from existing 11KV Kaushalyaganga Feeder
- Installation of 1 No. of 11kV RMU at branch line for feeder bifurcation

Proposed Cost with Estimate Break-up:

ANNEXURE- 21.1		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BED
Name of the Sub-Division : -		TEMPLE
Name of the Section : -		UTTARA
Name of the Feeder: -		11kV KAUSHALYAGANGA Feeder
Name of the Work :-		Proposal for Construction of 2.5KM U/G line for Bifurcation of Kaushalyaganga Feeder due to Overloading.
Names of Schemes: -		**CAPEX 27-28**
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART-A :- Construction of One No. 11 kV Indoor Bay at Siula PSS.	30,11,803.97
2	PART-B:- Constrction of 3nos of 11KV pole with LA for cable raising purpose near proposed 4Way RMU .	3,29,740.61
3	PART-C:- Installation of 1no of DP with Isolator with Earth Switch at Siula PSS.	3,63,345.44
4	PART-D:- 1.Supply and laying 3CX400Sq.mm U/G cable for 3KM without spare run from PSS to near Alareswara Temple branch. 2. Installation of 1 nos of 4 way RMU(LVVV) near band of baroda Gudiapokhari /Near Alareswara Branch for Bifurcation of Kaushalyaganga Feeder.	2,77,13,452.93
5	**Total Gross**	**3,14,18,342.96**
Total estimated cost is Rs. 3.14 Crore. (On TPCODL CAPEX Scheme)		

Cost Estimate: ₹ 3.14 Crore (For detailed BoQ refer Annexure- 21.1)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Cost Benefit Analysis:

Stage	PSS	Feeder	Peak Loading (kW)	Losses at peak loading (kW)	Loss Saving in KW	Avg.Loss Saving with LLF (kW) (LLF –0.255)	Unit saved annually (kWH)	Annual saving (Rs Lacs) (Rs 3.55/Unit)

L	Pay Back Period	100/K	13.67	Years

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation
2. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
3. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply
4. The above arrangement will help to release power supply to upcoming potential consumers.

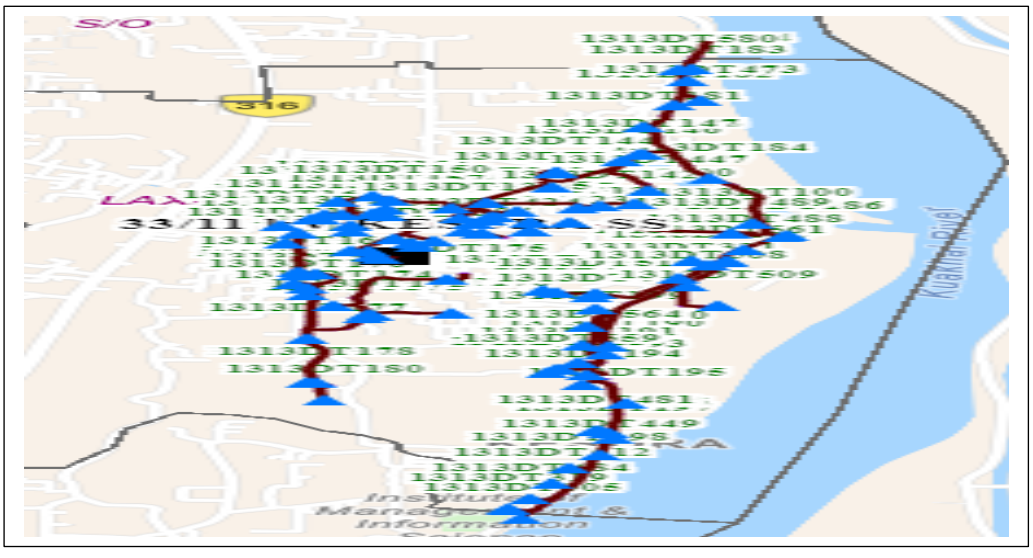
2. Proposal for overloading mitigation and Reliability improvement of 11 kV Kesura Village Feeder:

Proposal:

Proposal for bifurcation and augmentation of 11 kV Kesura Village Feeder to mitigate overloading and improve reliability.

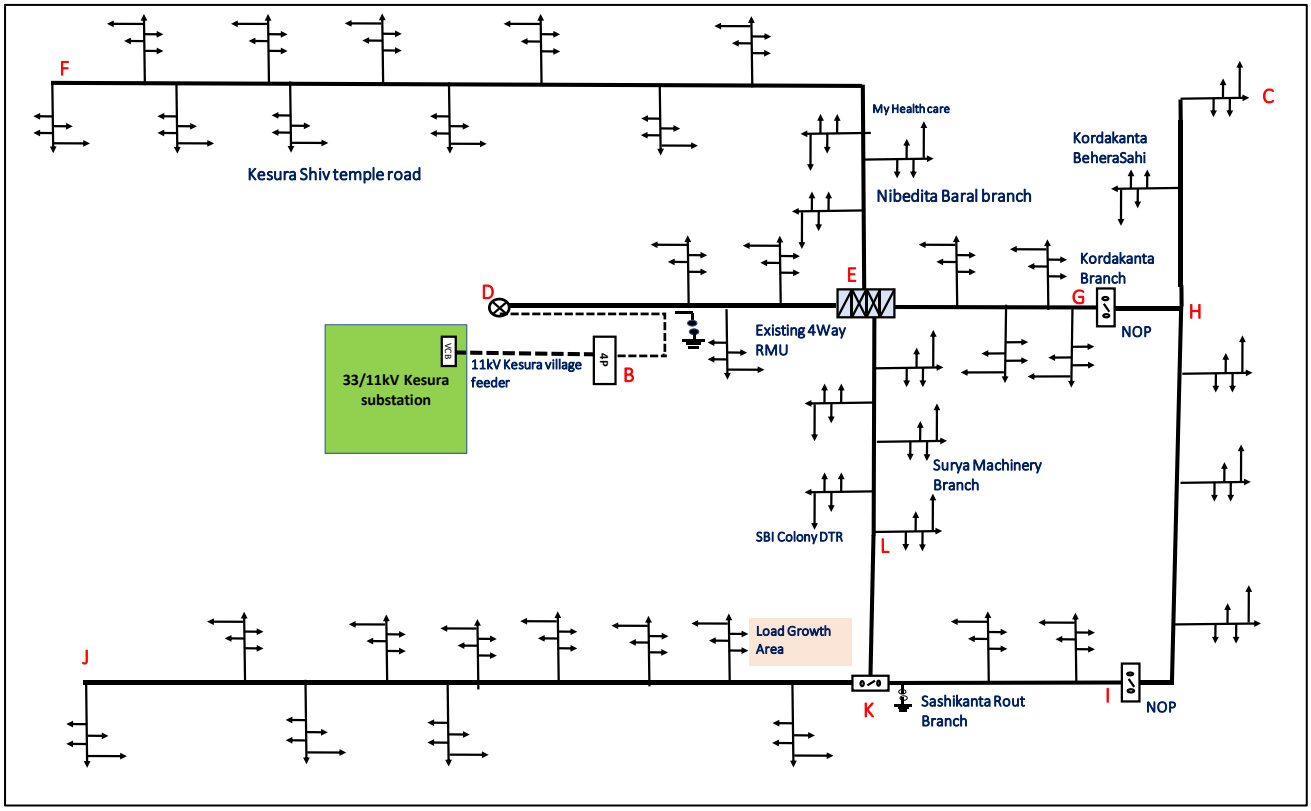
Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by bifurcating the feeder from Kesura PSS and strengthening the existing network by doing Conductor Augmentation.



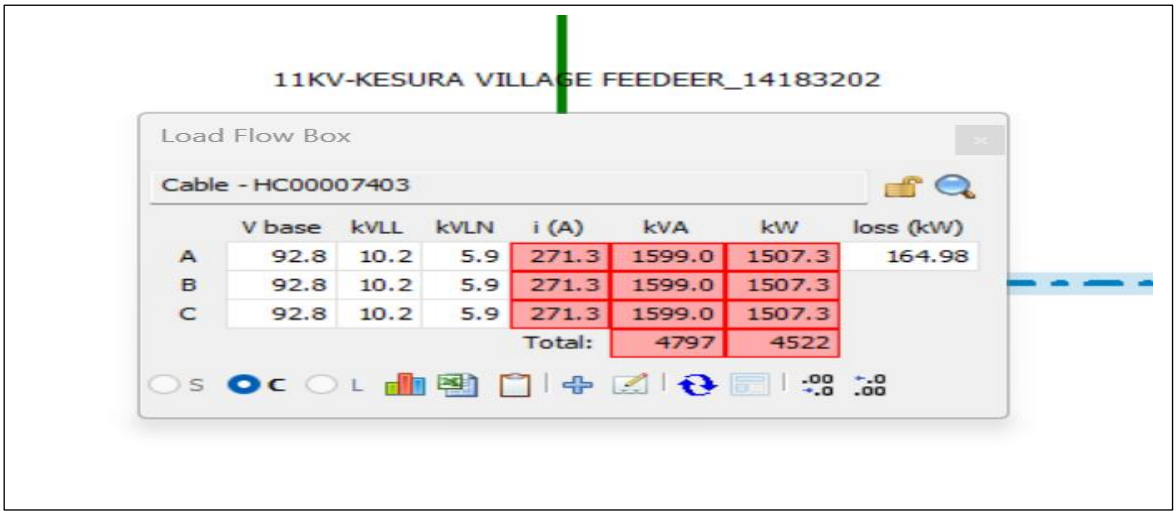
Existing Scenario:

- 11kV Kesura Village feeder is emanating from 33/11kV Kesura PSS. Total length of this feeder is 13CKM and the peak load is 3.54 MVA.
- Conductor size of 11kV Kesura Village feeder is 55/80sq.mm & the feeder is 89% loaded w.r.t the current carrying capacity of the conductor and 118% loaded considering 15% load growth for Urban feeders.
- This feeder is completely feeding Urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.



Existing Summer'26 Loading and projected load at 11 kV Kesura Village Feeder:

Existing Loading									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer '26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer '28 (MVA)	% Loading	Feeder Overloading Status (Sumeer'28)	Loss in kW in Summer '28
Kesura	Kesura Village	3.96	3.54	89%	Under load	4.68	118%	Over load	164.98



GIS Map:-

Existing SLD:

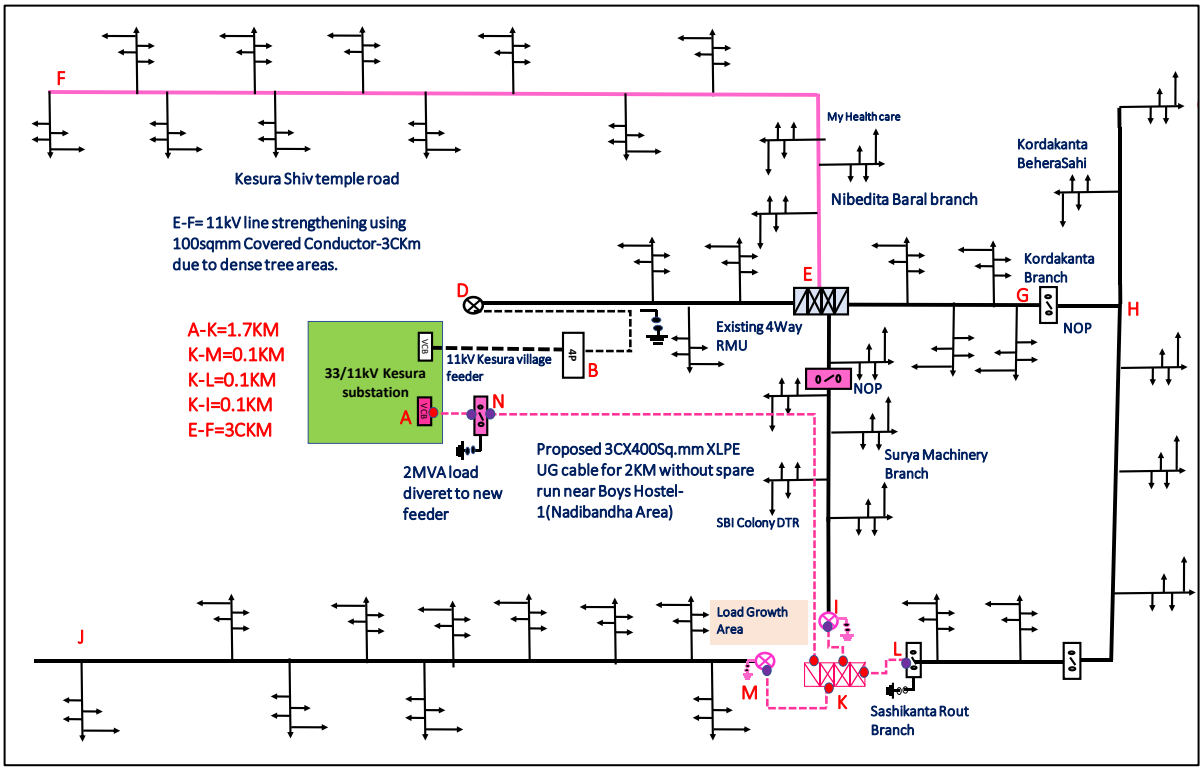
Load Flow Study of existing scenario in CYME Software:-

Priority of the Project:

Priority: Since the feeder loading has reached 89% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 118%. In case the issue is not addressed, there will be load shedding of 2812nos. consumers for prolonged period.

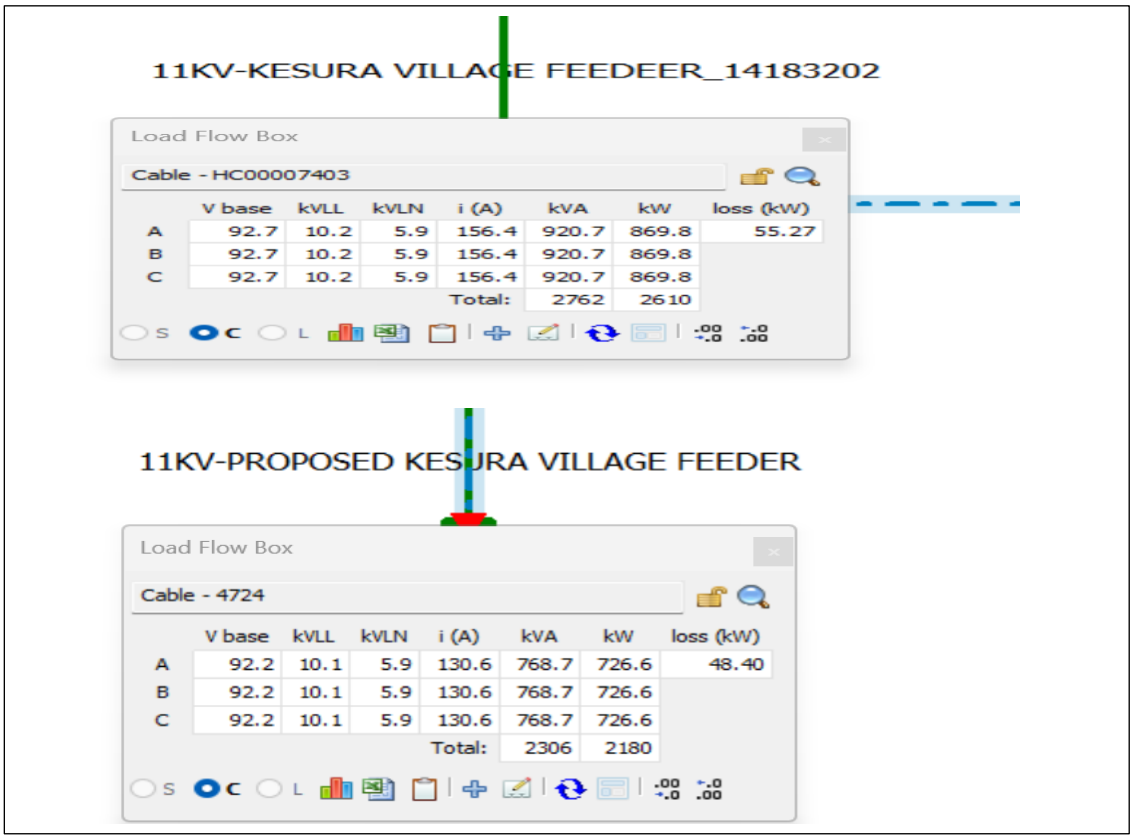
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.



- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 89% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.

Proposed Scenario:



- It is proposed to construct of 2 KM new line using 11kV 3Cx400sqmm from Kesura PSS to Nadibandh Boys Hostel for load Bifurcation from existing 11KV Kesura Village Feeder
- Installation of 1 No. of 11kV RMU for feeder bifurcation.
- Conductor augmentation of 3 CKM using 100mm2 XLPE Covered Conductor for feeder strengthening.

Loading after Proposal (Summer'28)

Sl. No.	Description	Gross
1	PART-A: - Construction of 3.5KM new line from Laxmisagar PSS to 4pole near Jagannath Avenue using 11kV 3C, 400sqmm UG Cable along with 11kV RMU	3,66,67,918.63
2	PART-B:- 1. Installation of 1no. of Line DP with AB Switch 2. Augmentation of 1.3Kms O/H line due to dense vegetation area and damagaed conductor	17,86,530.11
3	PART-C:- Installation of 1no of DP with Isolator with Earth Switch at Laxmisagar PSS.	3,63,345.44
4	PART-D:- Dismantling	40,282.84
5	**Total Gross**	**3,88,58,077.03**
Total estimated cost is Rs. 3.89Cr.(On TPCODL CAPEX Scheme)		

Cost Estimate: ₹ 3.89 Crore (For detailed BoQ refer Annexure- 21.3)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Cost Benefit Analysis:

Stage	PSS	Feeder	Peak Loading (kW)	Losses at peak loading (kW)	Loss Saving in KW	Avg.Loss Saving with LLF (kW) (LLF –0.255)	Unit saved annually (kWH)	Annual saving (Rs Lacs) (Rs 3.55/Unit)
Before Proposal	Laxmisagar	Laxmisagar U/G	6780	373	**205.86**	**52.49**	**459850.07**	**16.32**
After Proposal	Laxmisagar	Laxmisagar U/G	3284	104				
After Proposal	Laxmisagar	Road-7 Feeder	2374	64

L	Pay Back Period	100/K	7.92	Years

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation
2. Improved capability of Network by use of covered conductor ,resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply
5. The above arrangement will help to release power supply to upcoming potential consumers

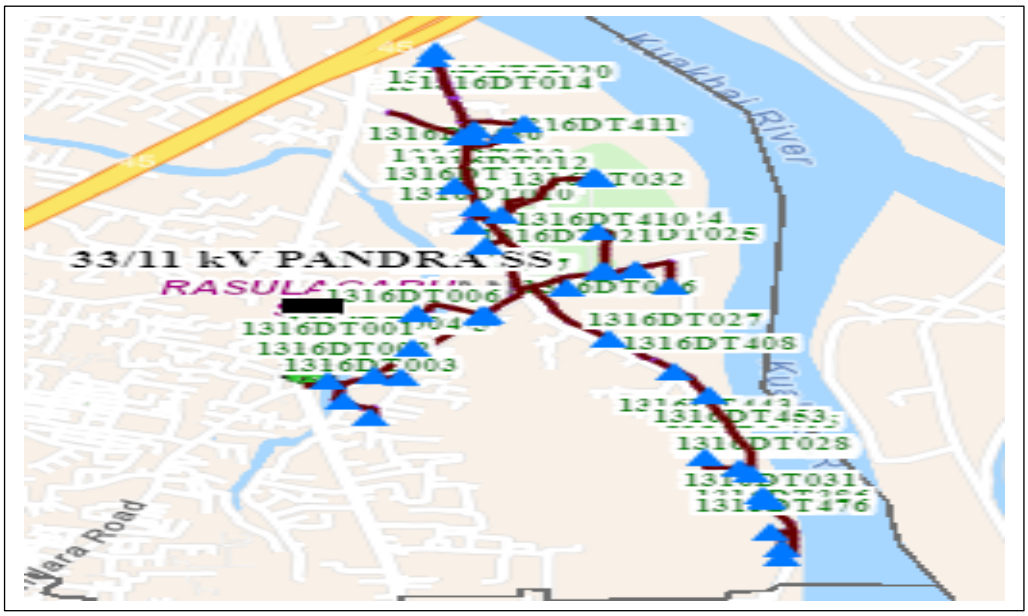
4. Proposal for overloading mitigation and Reliability improvement of 11 kV Pandra Village Feeder:

Proposal:

Proposal for bifurcation and augmentation of 11 kV Pandra Village Feeder to mitigate overloading and improve reliability.

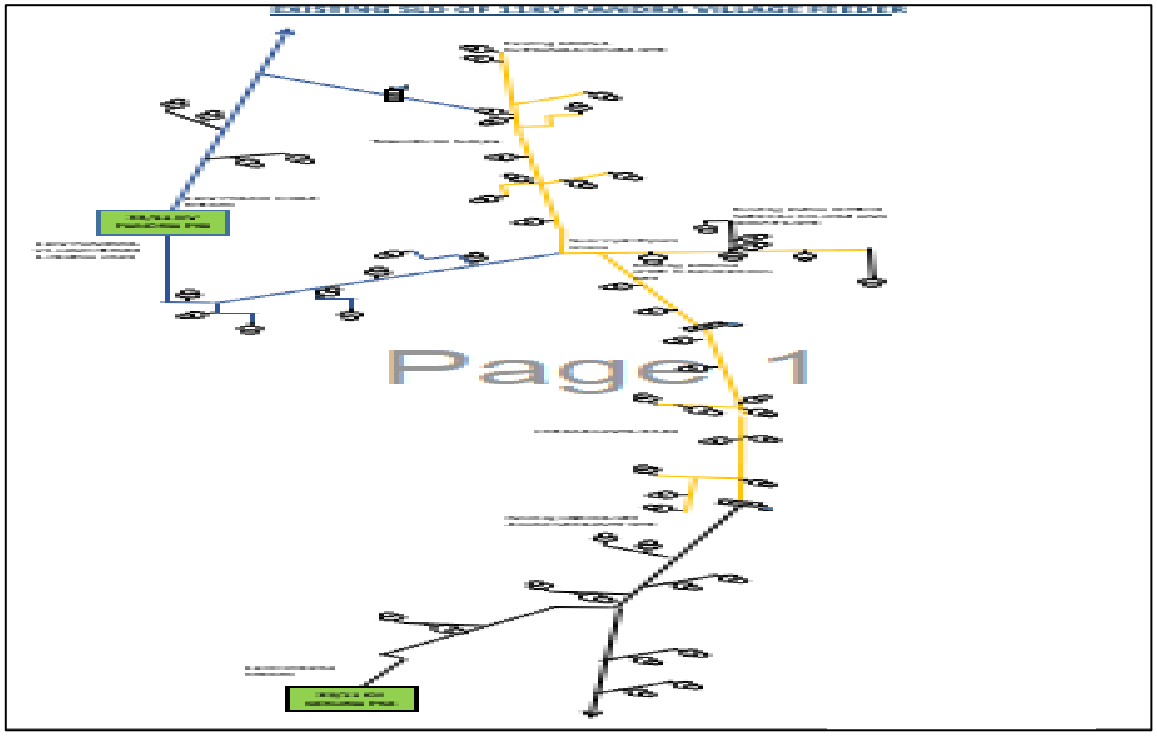
Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by bifurcating the feeder from Pandra PSS and strengthening the existing network by doing Conductor Augmentation.



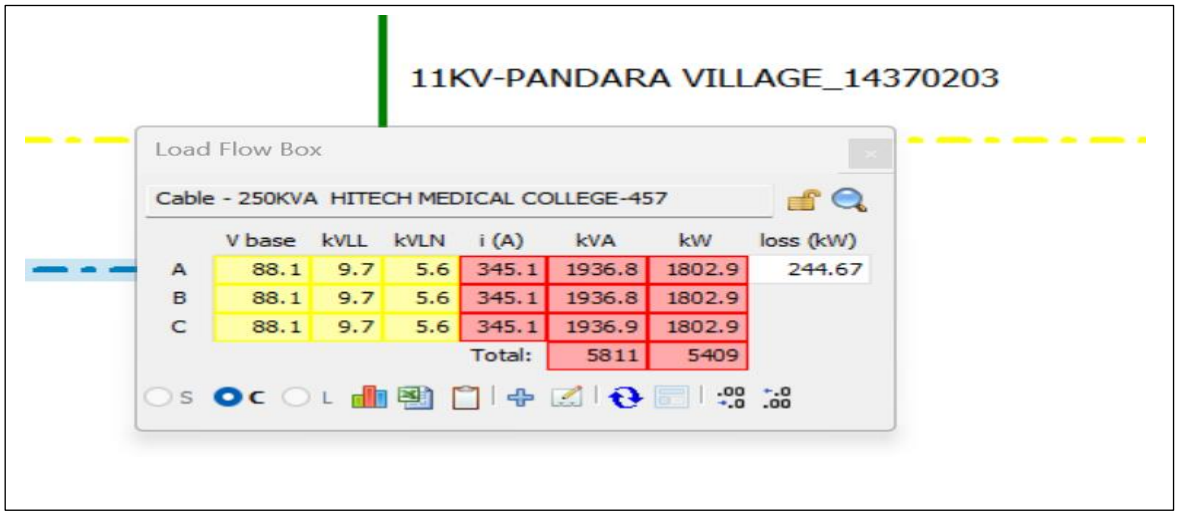
Existing Scenario:

- 11kV Pandra Village feeder is emanating from 33/11kV Pandra PSS.Total length of this feeder is 7.06 CKM and the peak load is 4.11 MVA.
- Conductor size of 11kV Pandra Village feeder is 100 sq.mm & the feeder is 79% loaded w.r.t the current carrying capacity of the conductor and 105% loaded considering 15% load growth for Urban feeders.
- This feeder is completely feeding Urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.



Existing Summer'26 Loading and projected load at 11 kV Pandra Village Feeder

Existing Loading									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer' 26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer' 28 (MVA)	% Loading	Feeder Overloading Status (Sumeer'28)	Loss in kW in Summer' 28
Pandra	Pandra Village	5.18	4.11	79%	Under load	5.44	105%	Over load	244.67



GIS Map:-

Existing SLD:

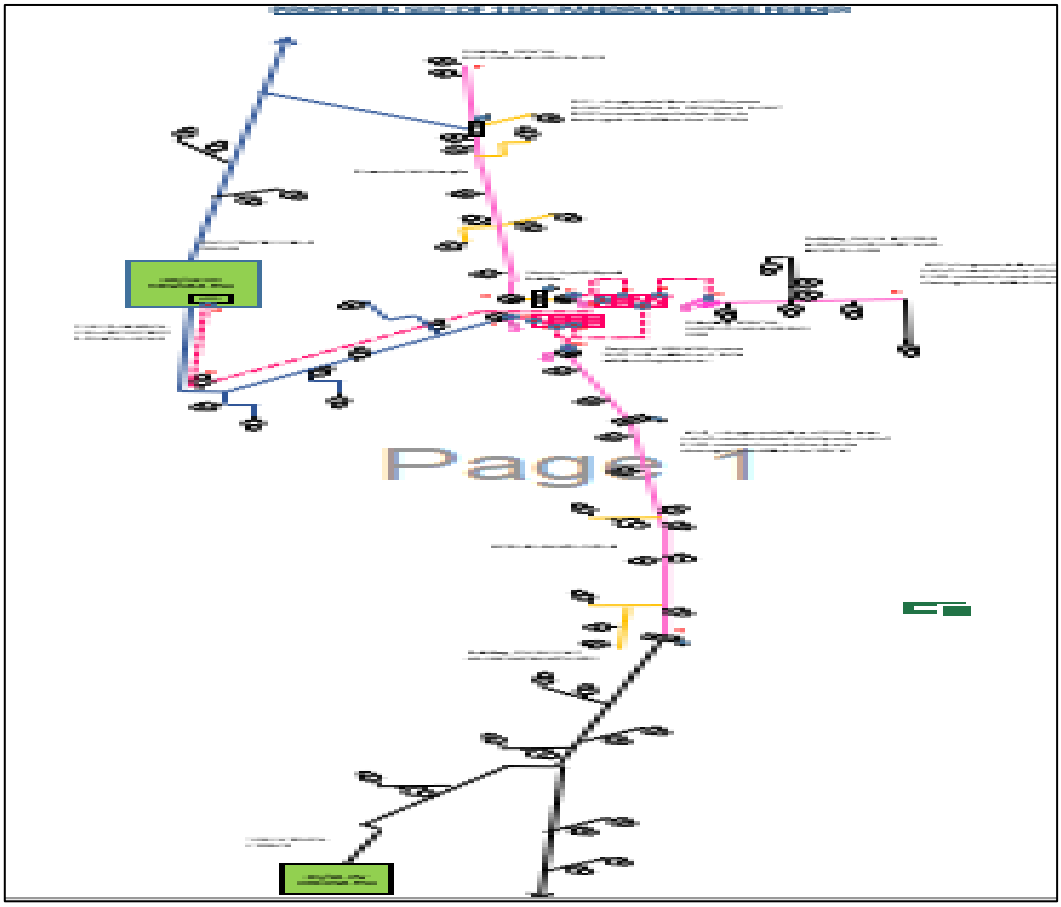
Load Flow Study of existing scenario in CYME Software:-

Priority of the Project:

Priority: Since the feeder loading has reached 79% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 105%. In case the issue is not addressed, there will be load shedding of 1166nos. consumers for prolonged period.

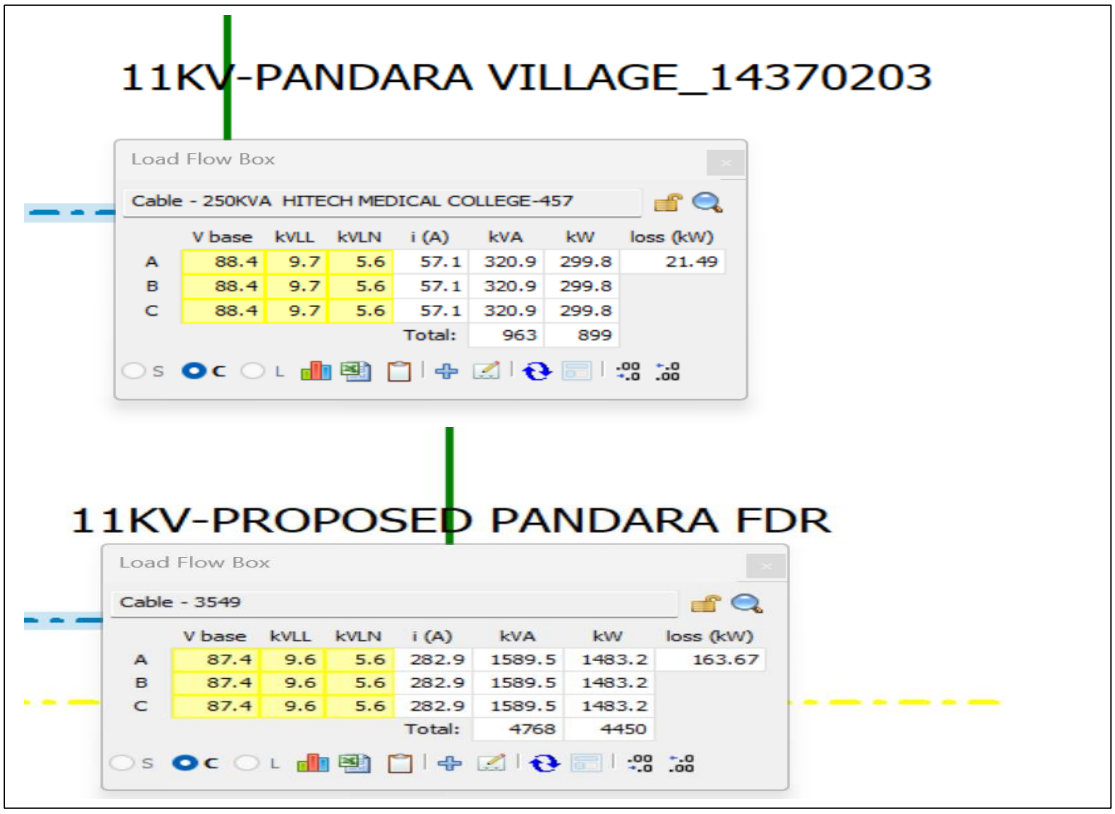
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.



- In AS IS scenario, the feeder is 79% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.

Proposed Scenario:



- It is proposed to construct of 1.8 KM new line using 11kV 3Cx400sqmm from Pandra PSS to Jyoti Fly Ash for load Bifurcation from existing 11KV Pandra Village Feeder
- Installation of 1 No. of 11kV RMU for feeder bifurcation.
- Conductor augmentation of 4 CKM using 100mm2 XLPE Covered Conductor for feeder strengthening.

Loading after Proposal (Summer'28)						
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load Summer'28 (MVA)**	**% Loading in Summer-28**	**Feeder Status**	**Loss in kW in Summer'28**

Benefit to the system and consumers:

5. Improved Reliability thereby overloading mitigation
6. Improved capability of Network by use of covered conductor, resulting into reduction in tripping on the feeder.
7. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
8. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply
9. The above arrangement will help to release power supply to upcoming potential consumers

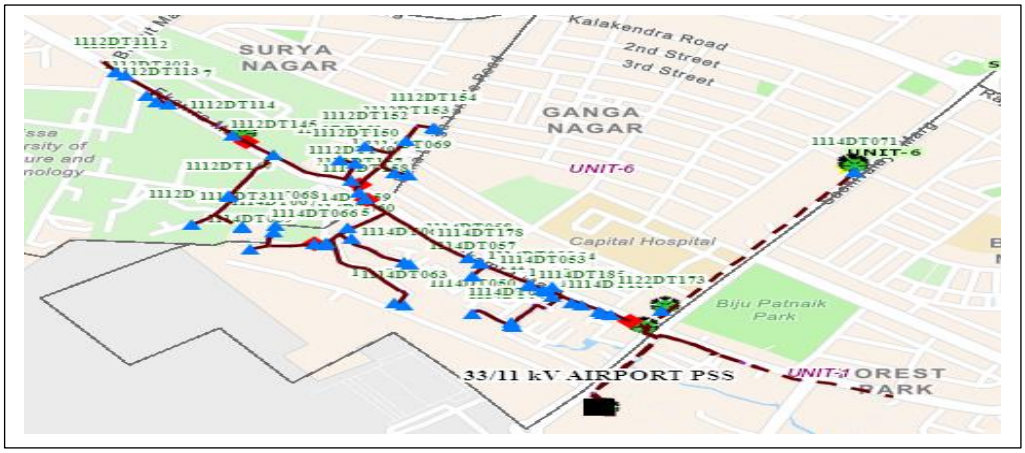
8. Proposal for overloading mitigation and Reliability improvement of 11kV JP RMU-34 Feeder:

Proposal:

Proposal for load bifurcation of 11 kV JP RMU-34 Feeder on 11kV Ganganagar feeder to mitigate overloading and improve reliability.

Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading 11kV JP RMU-34 load will be bifurcated on 11kV Ganganagar Feeder and strengthening the existing network by doing Conductor Augmentation.



Existing Scenario:

- 11kV JP RMU-34 feeder is emanating from 33/11kV Airport PSS. Total length of this feeder is 5.12 KM and the peak load is 3.08 MVA.
- Conductor size of 11kV JP RMU-34 feeder is 120sq.mm & the feeder is 102% loaded w.r.t the current carrying capacity of the conductor and 123% loaded considering 10% load growth for Urban feeders.
- This feeder is completely feeding Urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.

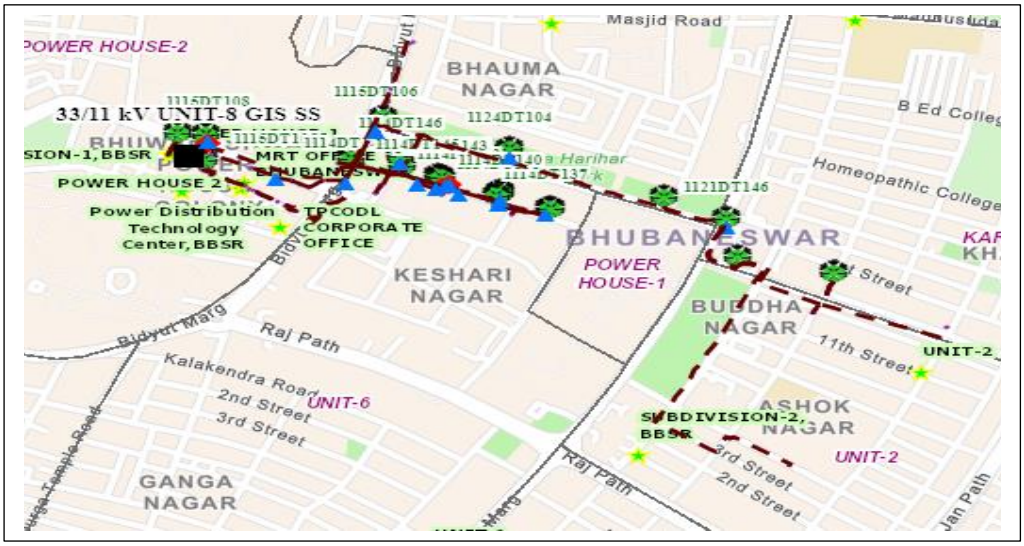
9. Proposal for overloading mitigation and Reliability improvement of 11kV Telephone Bhawan Feeder:

Proposal:

Proposal for bifurcation and augmentation of 11 kV Telephone Bhawan Feeder to mitigate overloading and improve reliability.

Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by bifurcating the feeder from Kharvel Nagar PSS



Existing Scenario:

- 11kV Telephone Bhawan feeder is emanating from 33/11kV Unit-8 PSS. Total length of this feeder is 2.28KM and the peak load is 2.59MVA.
- Conductor size of 11kV Ashok Nagar feeder is 3Cx120 sq.mm & the feeder is 84% loaded w.r.t the current carrying capacity of the conductor and 102% loaded considering 10% load growth for Urban feeders.
- This feeder is completely feeding Urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.

Benefit to the system and consumers:

- Improved Reliability thereby overloading mitigation.
- Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
- Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
- The above arrangement will help to release power supply to upcoming potential consumers.

10. Proposal for overloading mitigation and Reliability improvement of 11kV Town-2 Feeder:

Proposal:

Proposal for augmentation/refurbishment of 1.6 CKM 11 kV O/H line using 14 Mtr. H-Pole/11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAA Conductor along with construction of 0.8 CKM O/H line for N-1 connectivity between 11 kV Town-2 & Block Fdr. to mitigate overloading issue.

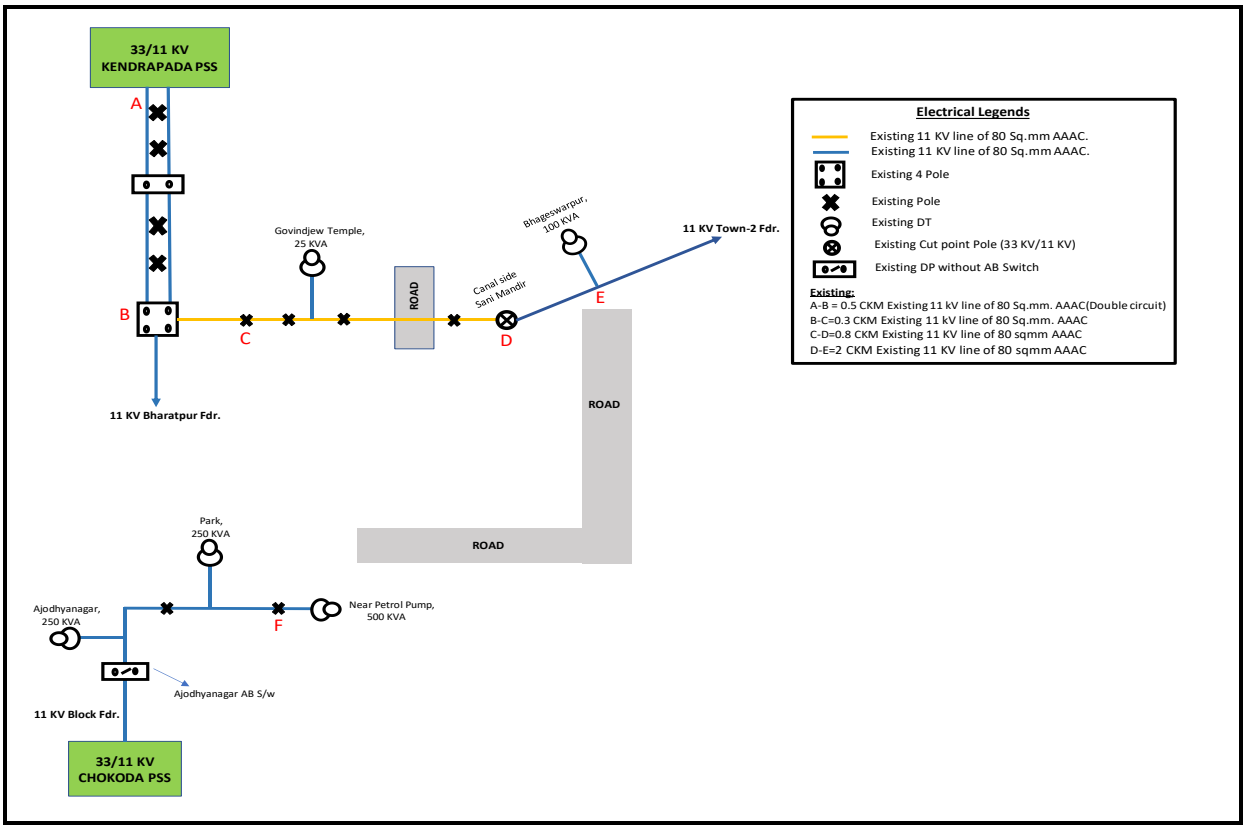
Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Town-2 Feeder.

Existing Scenario:

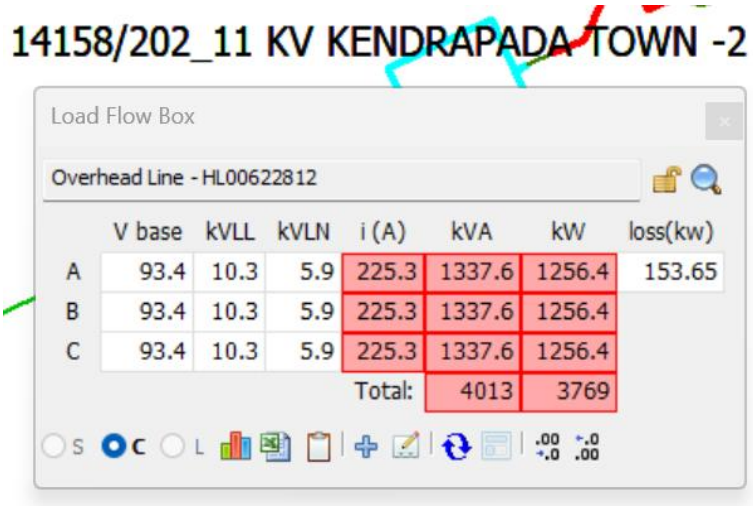
- At present, 11kV Town-2 feeder is emanating from 33/11kV Kendrapara PSS. Total length of this feeder is 7.2 CKM and the peak load is 4.01 MVA.
- In the existing scenario, Conductor size of 11kV feeder is 80 sq.mm & the feeder is 89% loaded w.r.t the current carrying capacity of the conductor.
- Considering 11% load growth for next 2Yrs. the feeder loading will reach 109% of its capacity.
- This feeder is proposed to ensure safe power supply to the domestic consumers.
- This feeder is mainly feeding urban consumers of Kendrapara Town area, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load

growth of the area, conductor augmentation proposed for overloading mitigation & reliability improvement.



Existing Summer'26 Loading and projected load at 11kV Town-2 Feeder

Existing Scenario									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer '26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer '28 (MVA)	% Loading	Feeder Overloading Status (Sumeer'28)	Loss in kW in Summer '28
Kendrapara	Town-2	4.51	4.01	89%	Under load	4.94	109%	Over load	153.65



GIS Map:-

Existing SLD:

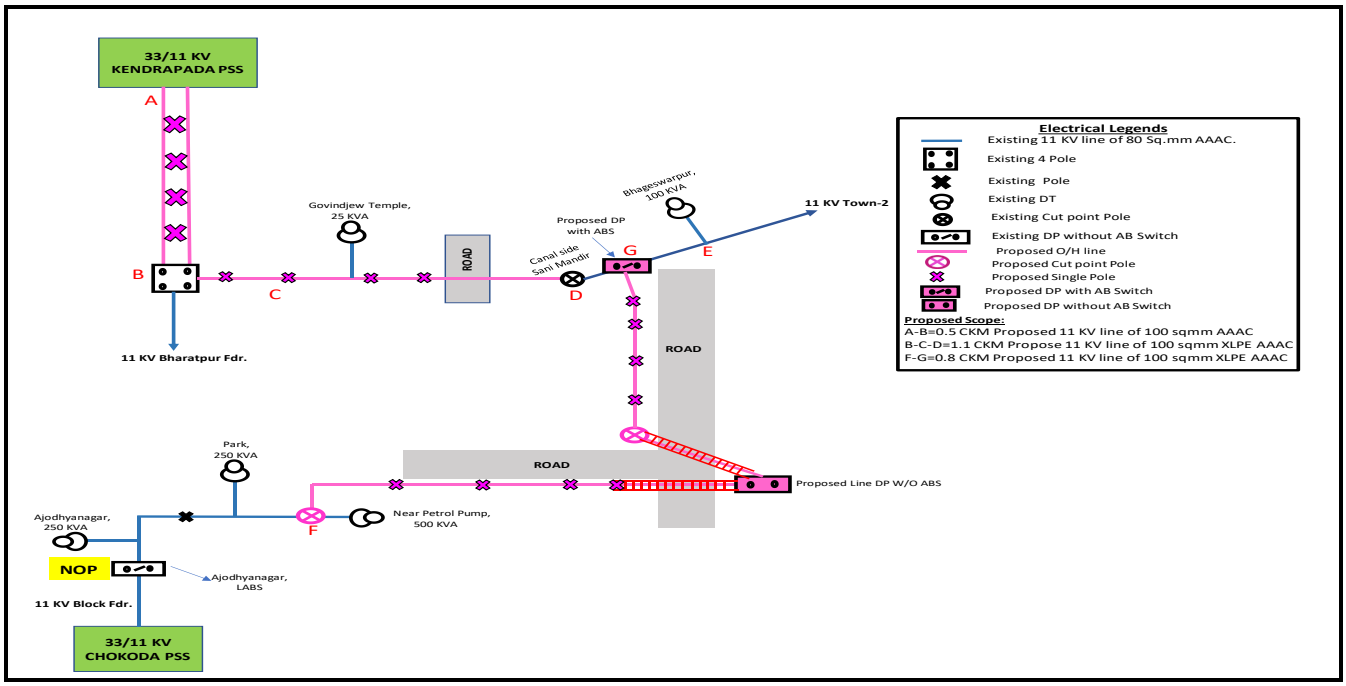
Load Flow Study of existing scenario in CYME Software:-

Priority and Timeline of the Project:

Priority: Since the feeder loading has reached 89% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 109%. In case the issue is not addressed, there will be load shedding of 2658 nos. consumers for prolonged period.

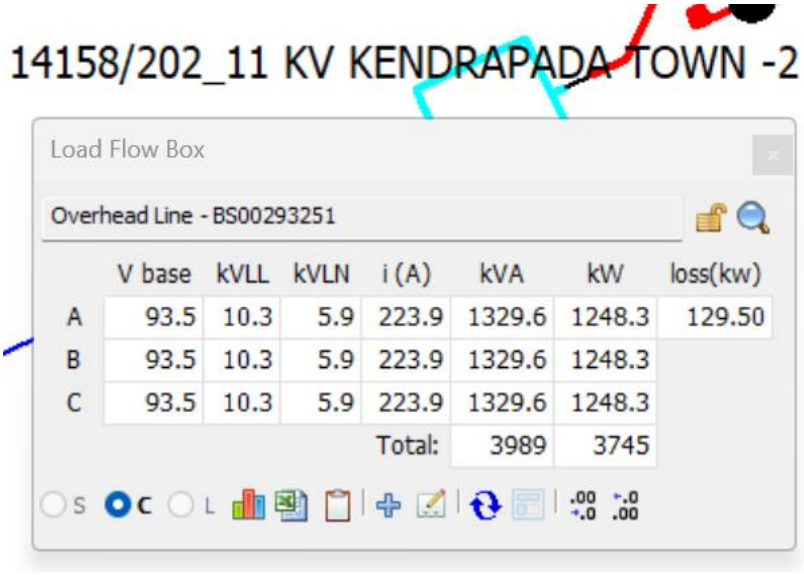
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 89% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.



Proposed Scenario:

- Proposal for augmentation of 0.5 CKM 11 kV double circuit O/H line of 11 kV Town-2 & Bharatpur feeder using 100 Sq.mm. XLPE AAAC & 14 Mtr. H-Pole to mitigate overloading issue.
- Proposal for augmentation of 1.1 CKM O/H line of 11 kV Town-2 feeder using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC.
- Proposal for construction 0.8 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC for N-1 connectivity between 11 kV Town-2 & Block feeder.



Proposed Summer'28 Loading and projected load at 11kV Town-2 Feeder:

Loading after Proposal (Summer'28)						
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load Summer'28 (MVA)**	**% Loading in Summer-28**	**Feeder Status**	**Loss in kW in Summer'28**
Kendrapara	Town-2	5.18	4.94	95%	Under load	129.50

Proposed SLD:

Load Flow Study of proposed scenario in Cyme Software:

	V base	kVLL	kVLN	i (A)	kVA	kW	loss(kw)

6	**Total Amount**	**8,793,027.11**
	Total Amount (In Cr.)	**0.88**
Total estimated cost is Rs. 0.88 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 0.88 Crore (For detailed BoQ refer Annexure- 21.10)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Cost Benefit Analysis:

Stage	PSS	Feeder	Peak Loading (kW)	Losses at peak loading (kW)	Loss Saving in KW	Avg.Loss Saving with LLF (kW) (LLF –0.255)	Unit saved annually (kWH)	Annual saving (Rs Lacs) (Rs 3.55/Unit)

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation of 11 kV Town-2 feeder.
2. N-1 connectivity will be established between 11 kV Town-2 & Block feeder.
3. Improved capability of Network by use of higher size conductor, resulting into reduction in tripping on the feeder.
4. Reduction in tripping will ultimately improve useful life of Power-transformer upstream.
5. Consumers will get Quality & Reliable power supply with fewer interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
6. The above arrangement will help to release power supply to upcoming potential urban consumers.

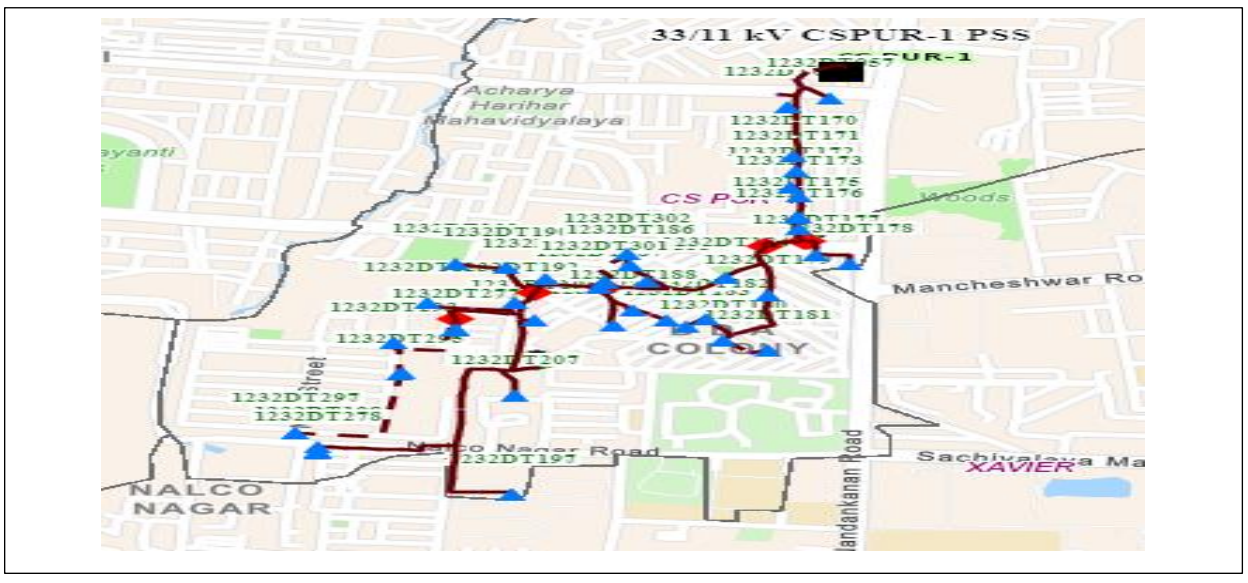
11. Proposal for overloading mitigation and Reliability improvement of 11kV BDA Feeder:

Proposal:

Proposal for Load Diversion of existing 11 BDA Feeder load emanating from 33/11kV CSPur-1 PSS by linking with nearby Feeder.

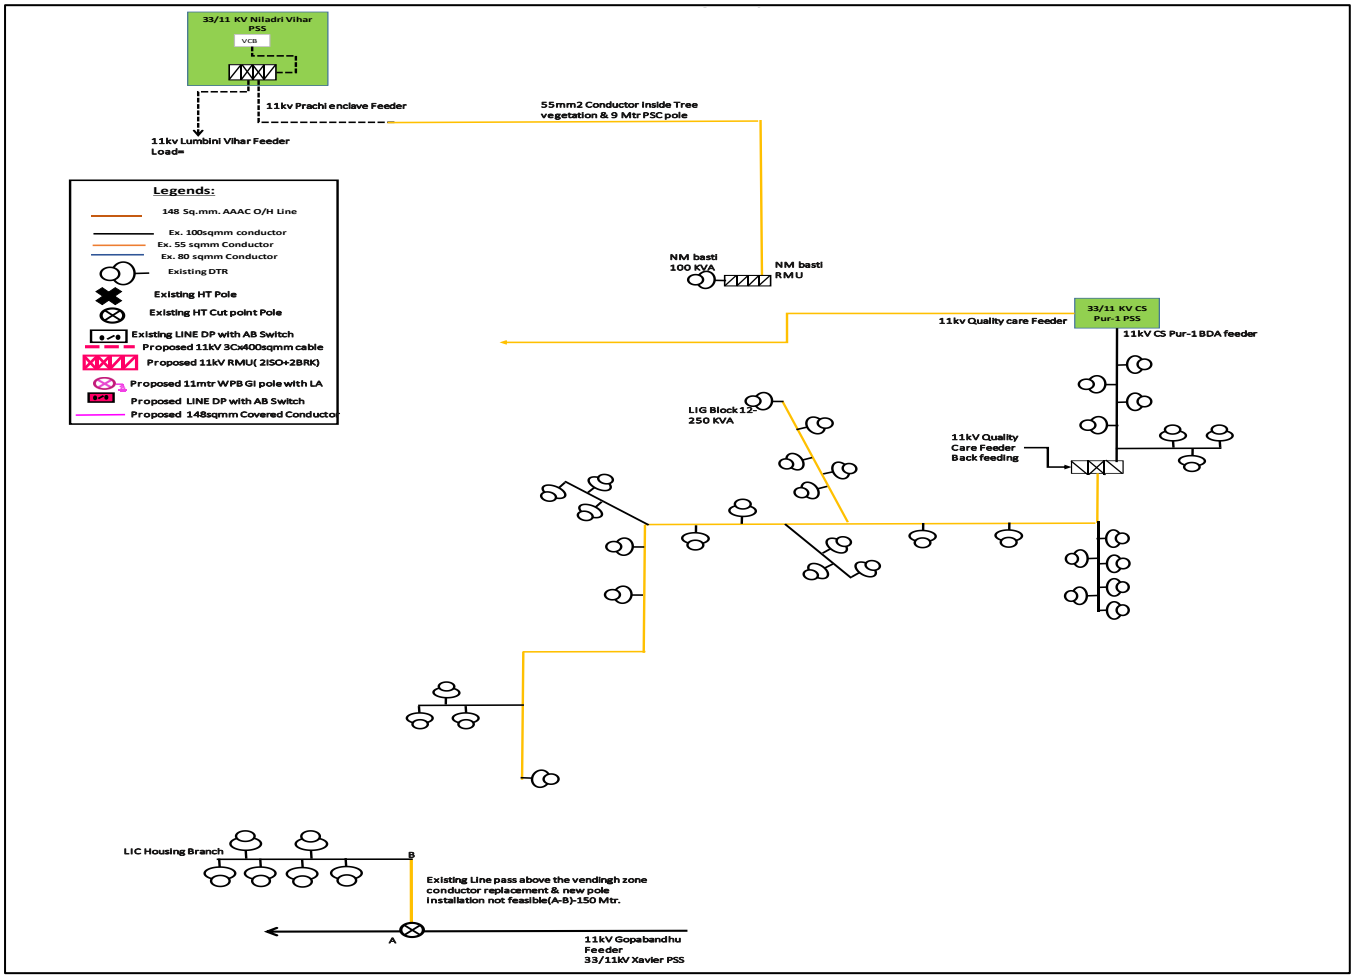
Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by load diversion of the existing feeder with construction of new Linking line & load Diversion.



Existing Scenario:

- 11kV BDA feeder is emanating from 33/11kV CS Pur-1 PSS. Total length of this feeder is 5.65 CKM and the peak load is 3.56 MVA.
- Conductor size of 11kV CS Pur-1 BDA feeder is 55 sq.mm & the feeder is 101% loaded w.r.t the current carrying capacity of the conductor and 133% loaded considering 15% load growth for urban feeders.
- This feeder is completely feeding commercial & domestic consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.



Existing Summer'26 Loading and projected load at 11kV BDA Feeder

Existing Scenario									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer '26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer '28 (MVA)	% Loading	Feeder Overloading Status (Summer' 28)	Loss in kW in Summer '28
CS Pur-1	BDA	3.56	3.58	101%	Over load	4.73	133%	Over load	155.75
CS Pur-1	Quality Care	3.56	1.25	35%	Under load	1.65	46%	Under load	26.39

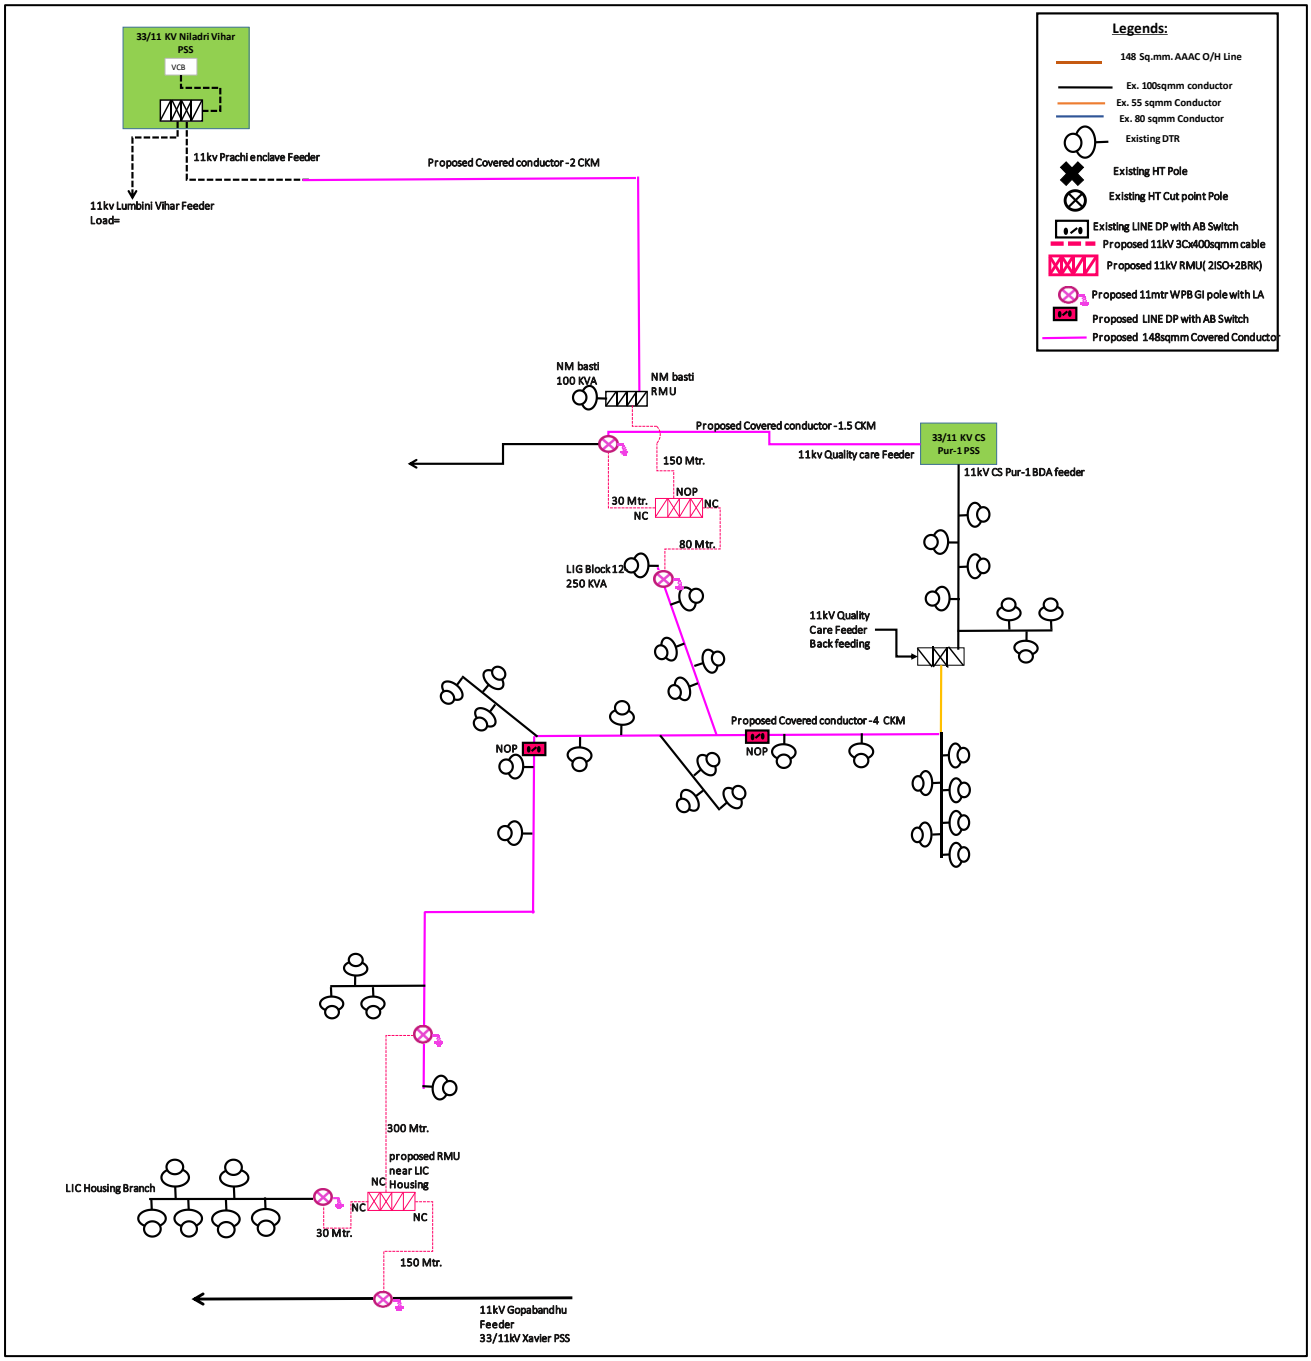
C	109.6	10.0	5.8	255.1	1488.9	1403.7	
				Total:	4467	4211	

Priority and Timeline of the Project:

Priority: Since the feeder loading has reached 101% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 133%. In case the issue is not addressed, there will be load shedding of 3494 nos. consumers for prolonged period.

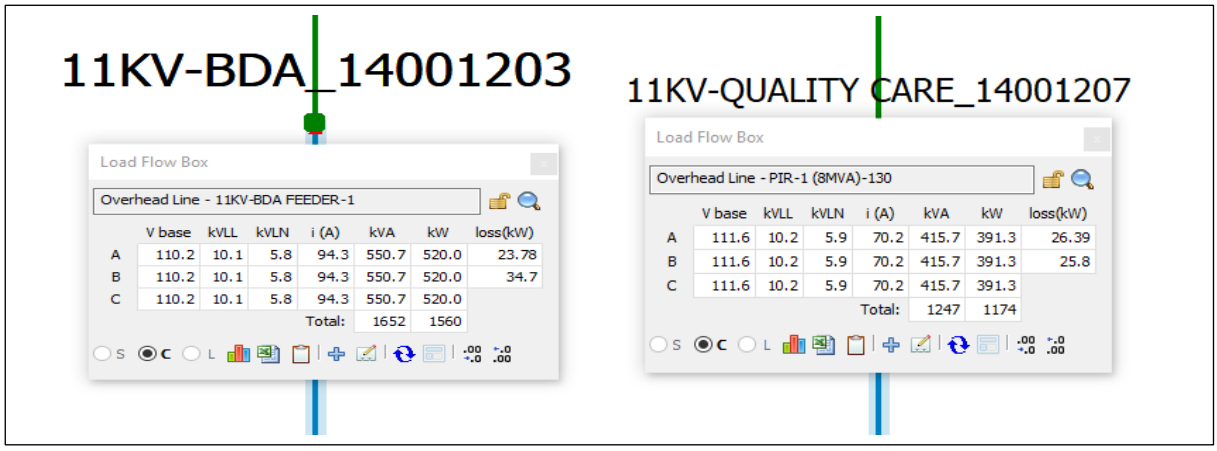
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 95% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.



Proposed Scenario:

1. Installation of 2 Nos. of RMU in BDA Feeder for linking with 11kV Gopabandhu feeder, 11kV District Center & Quality Care Feeder.
2. Augmentation of 11kV BDA feeder of length 4CKM.
3. Augmentation of Back feeding 11kV district center feeder of length-2 CKM
4. Augmentation of Back feeding 11kV Quality Care feeder of length 1.5 CKM.



Proposed Summer'28 Loading and projected load at 11kV BDA Feeder:

Loading after Proposal (Summer'28)						
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load Summer'28 (MVA)**	**% Loading in Summer-28**	**Feeder Status**	**Loss in kW in Summer'28**
CS Pur-1	BDA	5.18	1.65	32%	Under load	23.78
CS Pur-1	Quality Care	5.18	4.46	86%	Under load	105.46

Proposed SLD:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

1. Installation of 2 Nos. of RMU in BDA Feeder for linking with 11kV Gopabandhu feeder, 11kV District Center & Quality Care Feeder.
2. Augmentation of 11kV BDA feeder of length 4CKM.
3. Augmentation of Back feeding 11kV district center feeder of length-2 CKM
4. Augmentation of Back feeding 11kV Quality Care feeder of length 1.5 CKM.

Proposed Cost with Estimate Break-up:

Benefit to the system and consumers:

- Improved Reliability thereby overloading mitigation.
- Improved capability of Network by use of covered conductor, resulting into reduction in tripping on the feeder.
- Reduction in tripping will ultimately improve useful life of Power-transformer upstream.
- Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
- The above arrangement will help to release power supply to upcoming potential consumers.

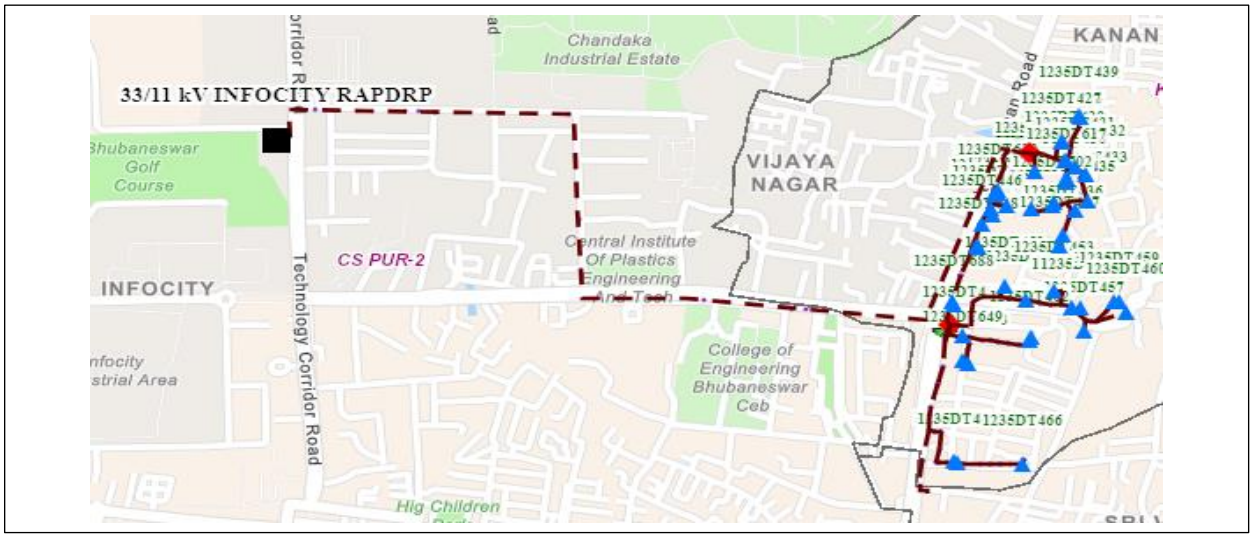
12. Proposal for overloading mitigation and Reliability improvement of 11kV Info Patia Feeder:

Proposal:

Proposal for Load Diversion & Augmentation of existing 11 kV Info Patia Feeder emanating from 33/11kV Infocity PSS by installation of RMU & interlinking with nearby 11kV Feeder.

Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by load diversion & augmentation of the existing feeder with interlinking with nearby Feeder.



Existing Scenario:

- 11kV Info Patia feeder is emanating from 33/11kV Infocity PSS. Total length of this feeder is 7.1 CKM and the peak load is 3.98 MVA.
- Conductor size of 11kV Infopatia feeder is 80 sq.mm & the feeder is 88.18% loaded w.r.t the current carrying capacity of the conductor and 116% loaded considering 15% load growth for urban feeders.
- This feeder is completely feeding commercial & domestic consumers, feeder is passes inside tree vegetation. Several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.

Benefit to the system and consumers:

10. Improved Reliability thereby overloading mitigation.
11. Improved capability of Network by use of covered conductor, resulting into reduction in tripping on the feeder.
12. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
13. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
14. The above arrangement will help to release power supply to upcoming potential consumers.

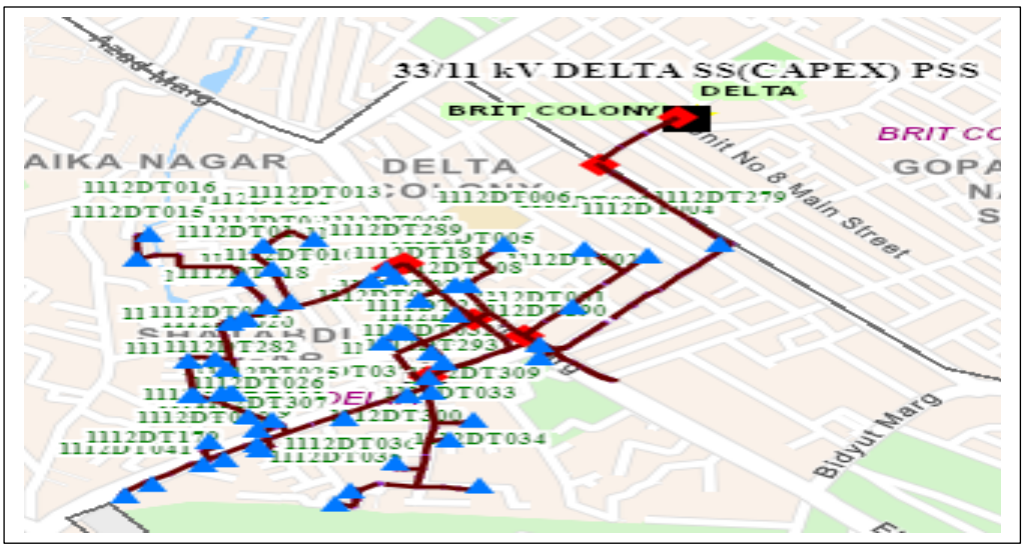
15. Proposal for overloading mitigation and Reliability improvement of 11kV Shatabdi Nagar Feeder:

Proposal:

Proposal for bifurcation and augmentation of 11 kV Shatabdi Nagar Feeder to mitigate overloading and improve reliability.

Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by bifurcating the feeder from Delta PSS and strengthening the existing network by doing Conductor Augmentation.



Existing Scenario:

- 11kV Shatabdi Nagar feeder is emanating from 33/11kV Delta PSS. Total length of this feeder is 10.8 KM and the peak load is 3.58MVA.
- Conductor size of 11kV Shatabdi Nagar feeder is 80sq.mm & the feeder is 99% loaded w.r.t the current carrying capacity of the conductor and 119% loaded considering 15% load growth for Urban feeders.
- This feeder is completely feeding Urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.

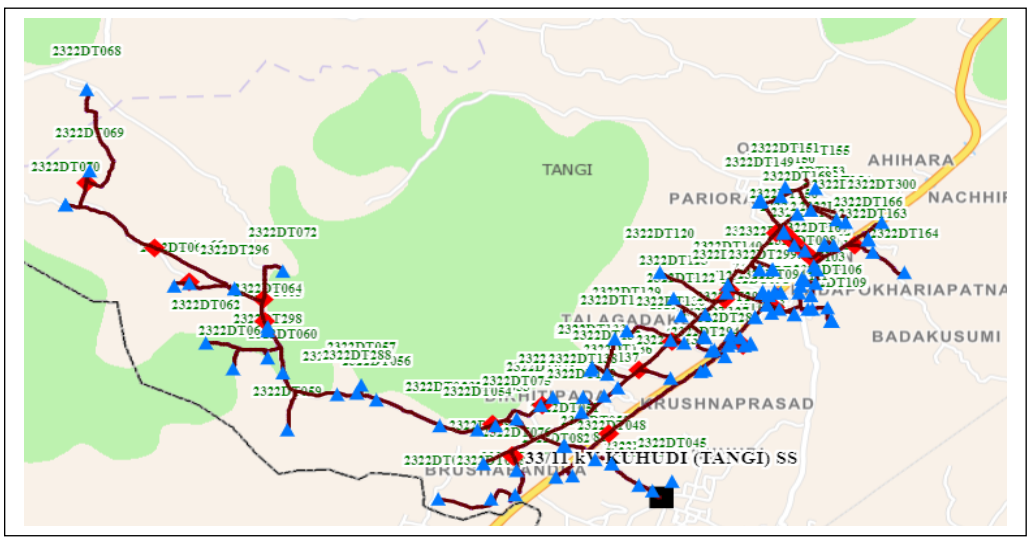
16. Proposal for overloading mitigation and Reliability improvement of 11kV Chandeswar Feeder:

Proposal:

Proposal for Bifurcation of existing 11 KV Chandeswar Feeder load emanating from 33/11kV Kuhudi PSS by construction of 1no. of new 11kV feeder from 33/11kV Kuhudi PSS through existing 11kV bay and 1.86km 11KV new line from Kuhudi PSS to NH-16.

Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by bifurcating the existing feeder with construction of new 11kV feeder.



Existing Scenario:

- 11kV Chandeswar feeder is emanating from 33/11kV Kuhudi PSS. Total length of this feeder is 31.6 CKM and the peak load is 3.45 MVA.
- Conductor size of 11kV Chandeswar feeder is 55 sq.mm & the feeder is 97% loaded w.r.t the current carrying capacity of the conductor and 109% loaded considering 6% load growth for rural feeders.
- This feeder is completely feeding industrial, commercial & domestic consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.

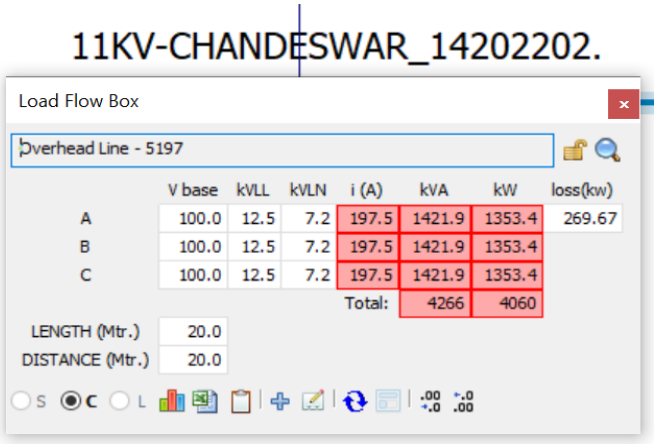
Kuhudi	Chandeswar	3.54	3.45	97%	4.33	122%	Over load

GIS Map:-



Existing SLD:

Page 1

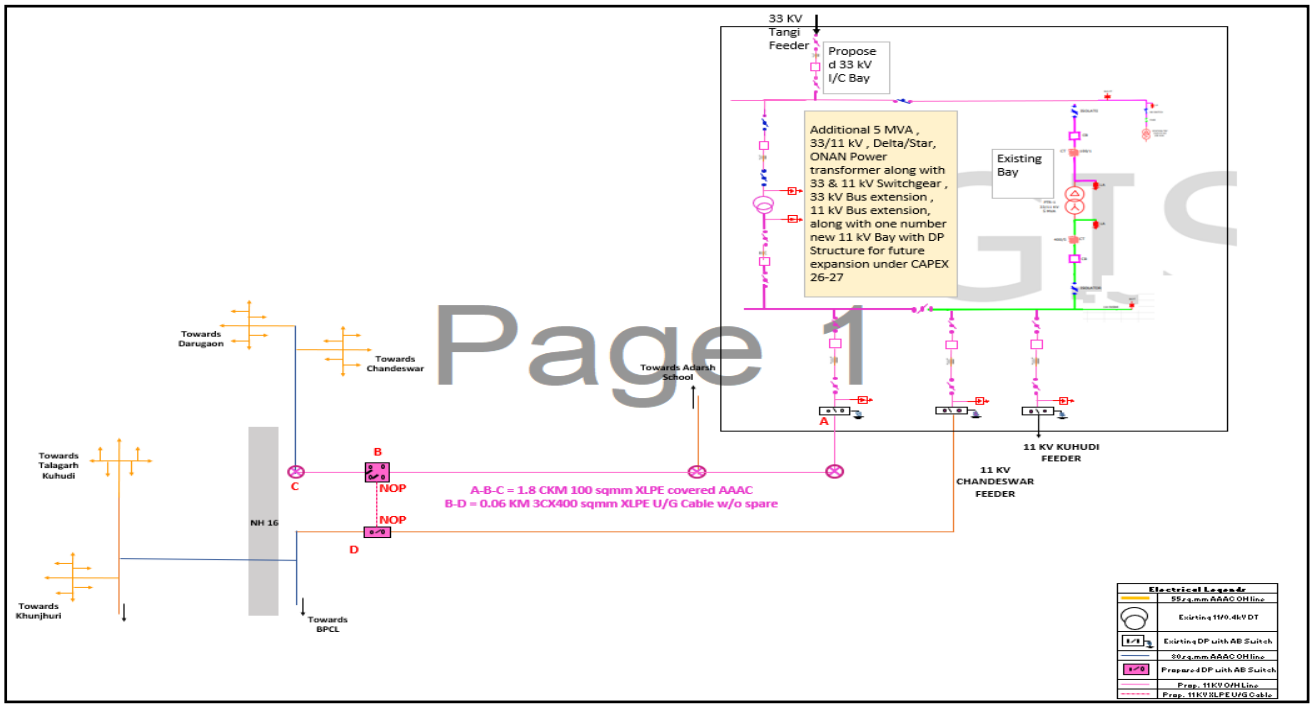
Load Flow Study of existing scenario in CYME Software:-

Priority of the Project:

Since the feeder loading has reached 97% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 122%. In case the issue is not addressed, there will be load shedding of 2636 nos. consumers for prolonged period.

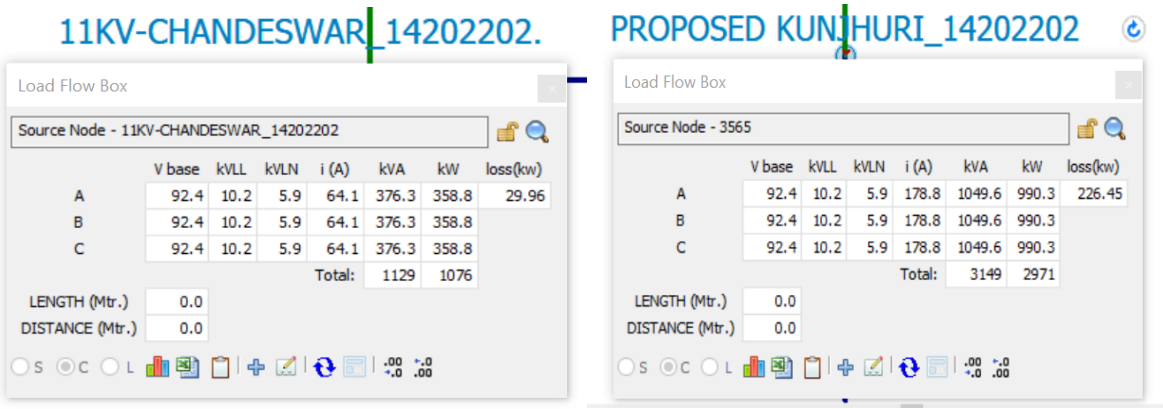
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 97% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.



Proposed Scenario:

- It is proposed to construct of 1.8 CKM new line using 100 sqmm XLPE covered AAAC from Kuhudi PSS to NH-16.
- 0.06 KM new U/G line using 3CX400 sqmm XLPE U/G cable without spare run.



Proposed Summer'28 Loading and projected load at 11kV Chandeswar Feeder:

5. The above arrangement will help to release power supply to upcoming potential consumers.

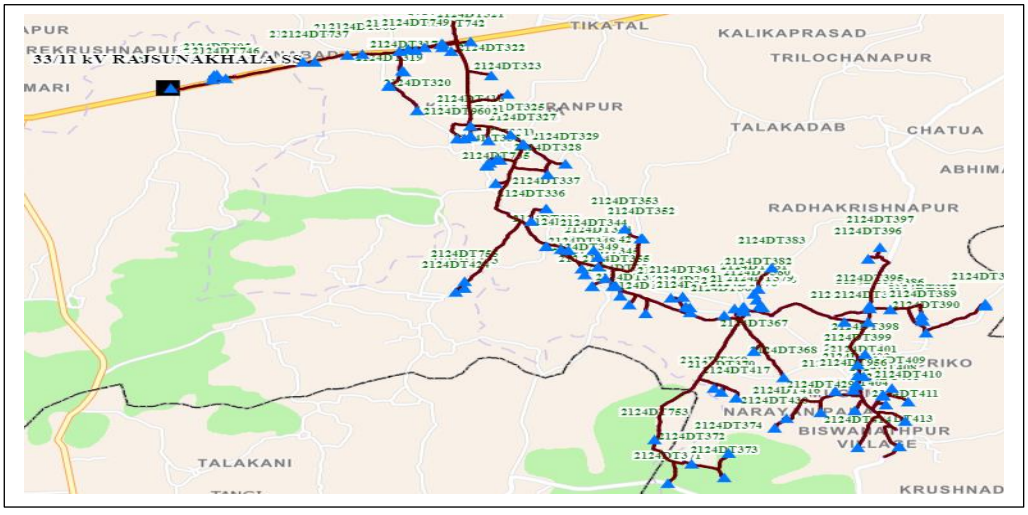
17. Proposal for overloading mitigation and Reliability improvement of 11 kV Sanapadar Feeder:

Proposal:

Augmentation and refurbishment of 11 kV Sanapadar Feeder to mitigate overloading and improve reliability.

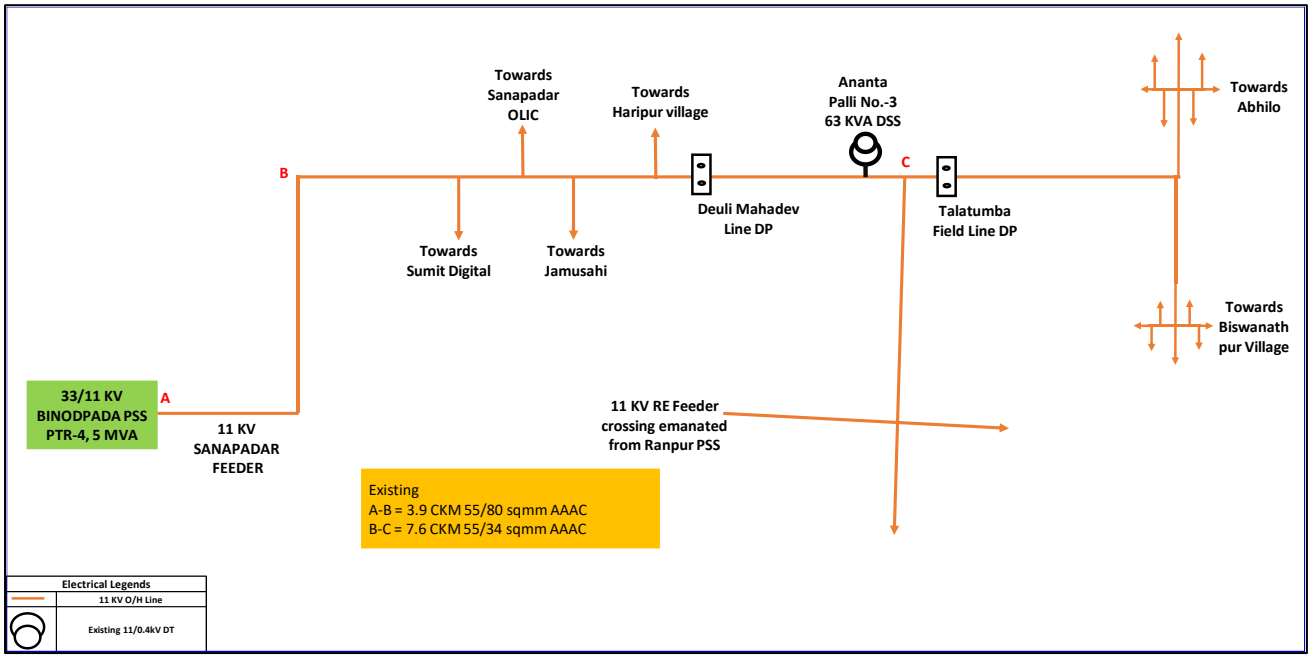
Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by strengthening the existing network doing Conductor Augmentation.



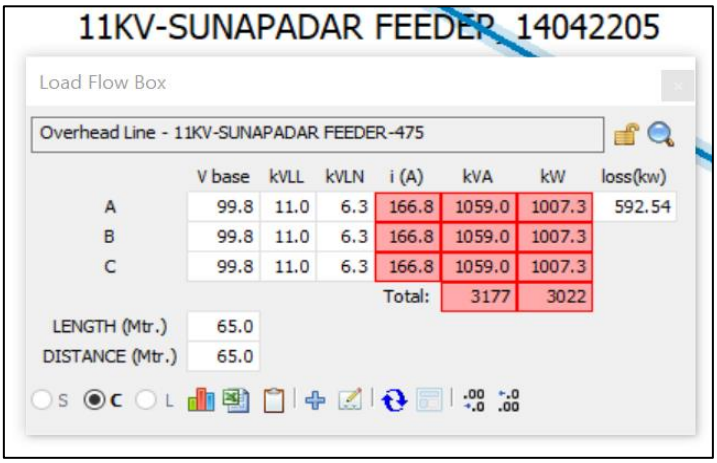
Existing Scenario:

- 11kV Sanapadar feeder is emanating from 33/11kV Binodpada PSS. Total length of this feeder is 46.1 CKM and the peak load is 2.46 MVA.
- Conductor size of 11kV Sanapadar feeder is 34 sq.mm & the feeder is 93% loaded w.r.t the current carrying capacity of the conductor and 117% loaded considering 12% load growth for rural feeders.
- This feeder is completely feeding commercial and domestic consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, augmentation of this feeder is proposed to mitigate overloading issue.



Existing Summer'26 Loading and projected load at 11 kV Sanapadar Feeder

Existing Scenario								
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Peak Loading Summer' 26 (MVA)**	**% Loading**	**Projected load Summer' 28 (MVA)**	**% Loading**	**Feeder Overloading Status (Sumeer'28)**	**Loss in kW in Summer' 28**
Binodpada	Sanapadar	2.63	2.46	93%	3.09	117%	OVERLOAD	592.54



GIS Map:-

Existing SLD:

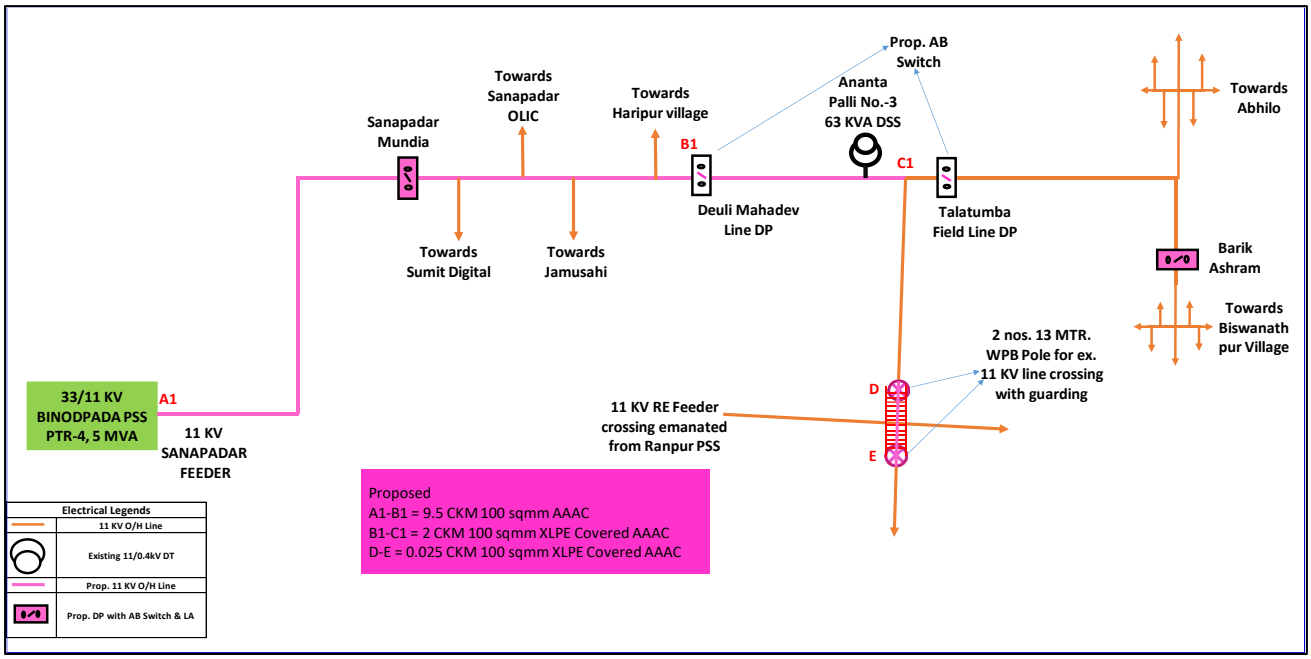
***Load Flow Study of existing scenario in CYME Software*:-**

Priority of the Project:

Since the feeder loading has reached 93% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 117%. In case the issue is not addressed, there will be load shedding of 3409 nos. consumers for prolonged period.

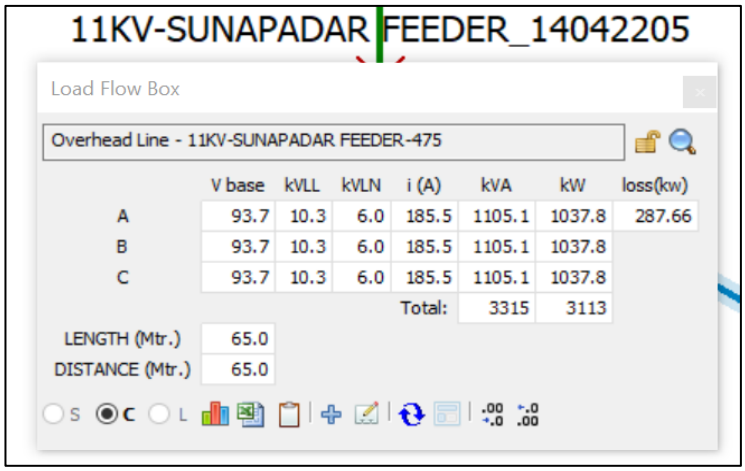
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 93% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.



Proposed Scenario:

- Conductor augmentation of 9.5 CKM using 100mm2 AAA Conductor for feeder strengthening & mitigation of overload.
- Conductor augmentation of 2.025 CKM using 100mm2 XLPE Covered Conductor for feeder strengthening & mitigation of overload.
- Installation of 1 Set FPI every 3 CKM of the line.



Proposed Summer'28 Loading and projected load at 11 kV Sanapadar Feeder:

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation
2. Improved capability of Network by use of covered conductor, resulting into reduction in tripping on the feeder
3. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply
5. The above arrangement will help to release power supply to upcoming potential consumers

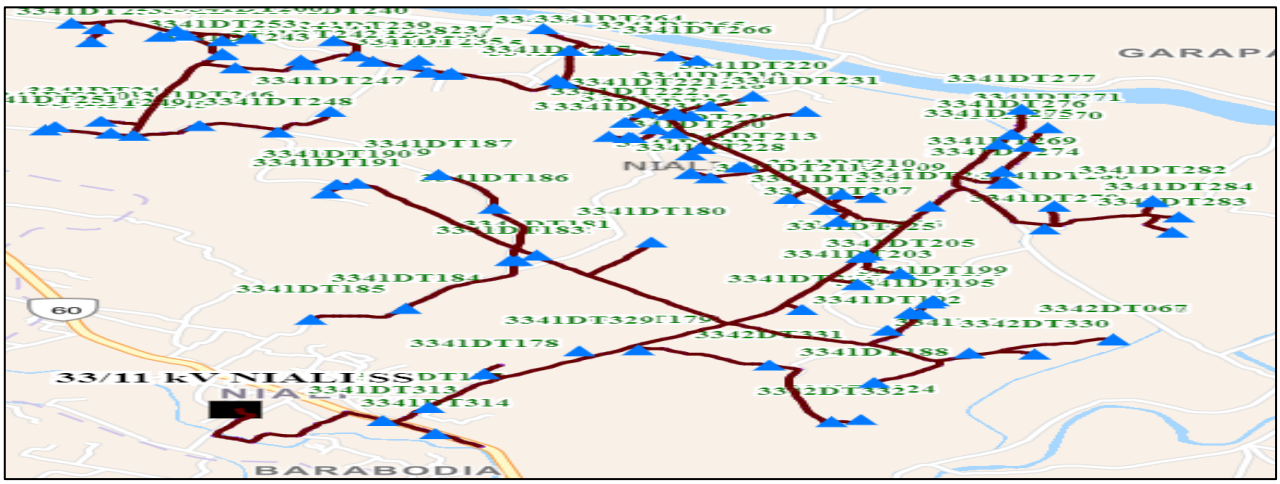
19. Proposal for overloading mitigation and Reliability improvement of 11kV Bilasuni (Tola) Feeder:

Proposal:

Proposal for augmentation/refurbishment of 4.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor along with construction of 0.16 CKM 11 kV line for N-1 connectivity between 11 kV Bilasuni(Tola) & Kaliaghai Fdr to mitigate overloading issue.

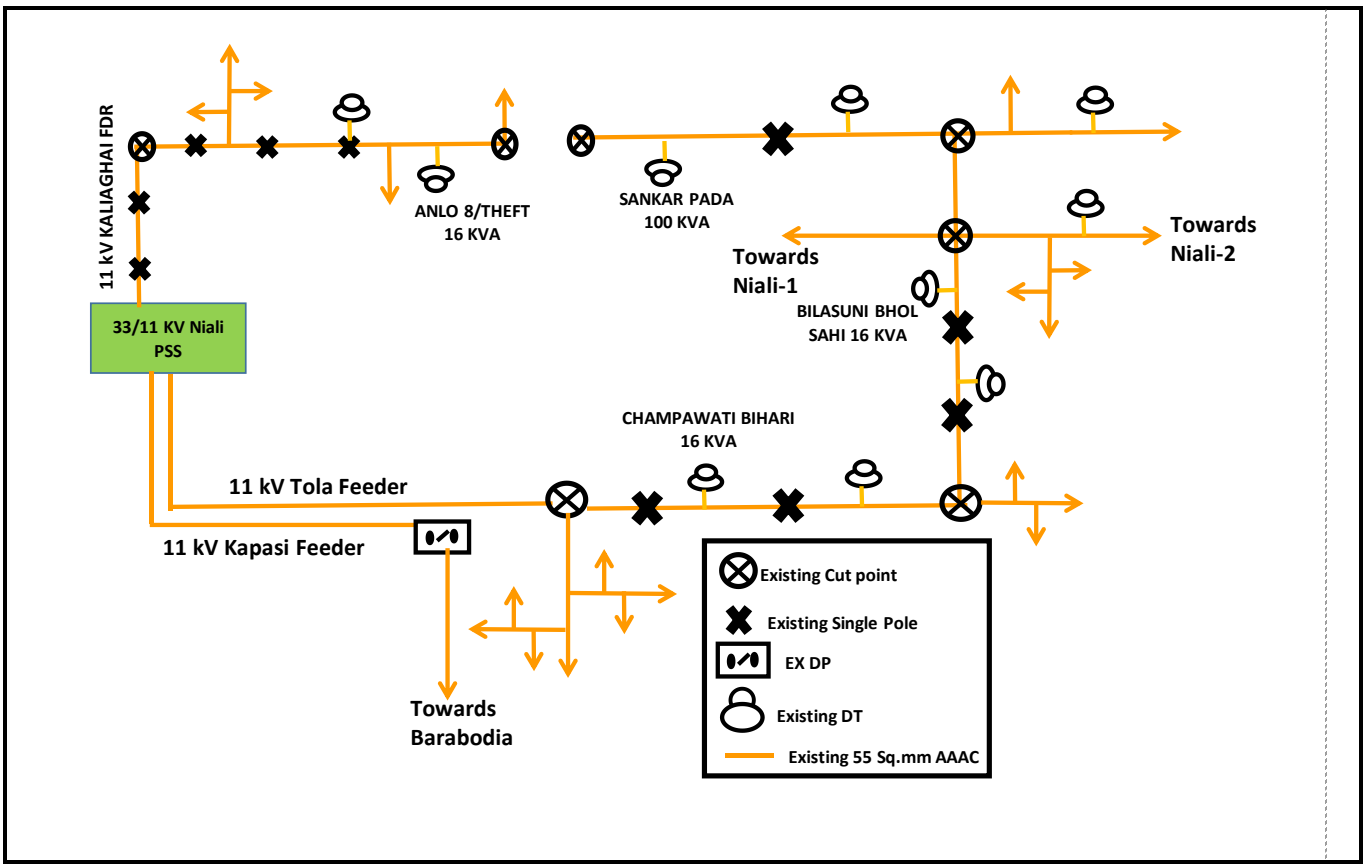
Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Bilasuni(Tola) Feeder.



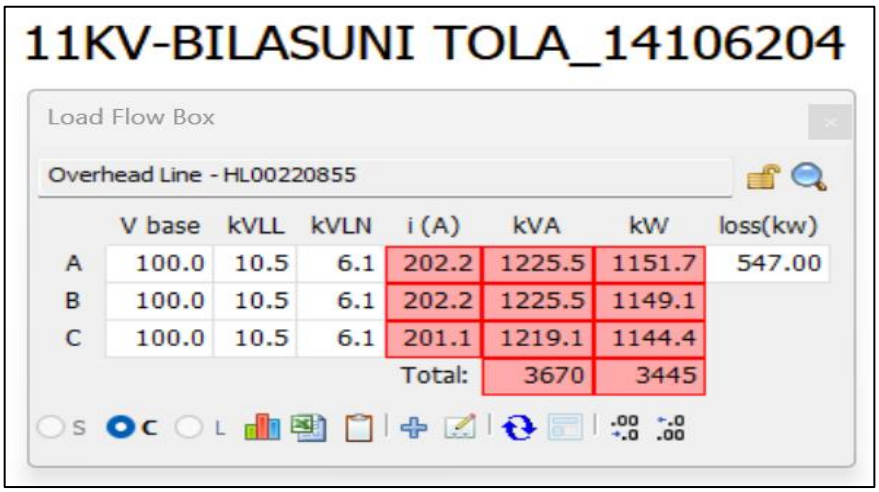
Existing Scenario:

- At present, 11kV Bilasuni(Tola) feeder is emanating from 33/11kV Niali PSS. Total length of this feeder is 45.62 CKM and the peak load is 3.7 MVA.
- In the existing scenario, Conductor size of 11kV Bilasuni(Tola) feeder is 55 sq.mm & the feeder is 104% loaded w.r.t the current carrying capacity of the conductor.
- Considering 7% load growth for next 2Yrs. the feeder loading will reach 120% of its capacity.
- This feeder is proposed to ensure safe power supply to the domestic consumers.
- This feeder is mainly feeding sub urban and rural consumers of Niali area, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the area, conductor augmentation proposed for overloading mitigation & reliability improvement.



Existing Summer'26 Loading and projected load at 11kV Bilasuni(Tola) Feeder

Existing Scenario									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer '26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer '28 (MVA)	% Loading	Feeder Overloading Status (Sumeer'28)	Loss in kW in Summer '28
Niali	Bilasuni(Tola)	3.54	3.70	104%	Over load	4.24	120%	Over load	547



GIS Map:-

Existing SLD:

Load Flow Study of existing scenario in CYME Software:-

	V base	kVLL	kVLN	i (A)	kVA	kW	loss(kw)
A	100.0	10.5	6.1	202.2	1225.5	1151.7	547.00
B	100.0	10.5	6.1	202.2	1225.5	1149.1	
C	100.0	10.5	6.1	201.1	1219.1	1144.4	
				Total:	3670	3445	

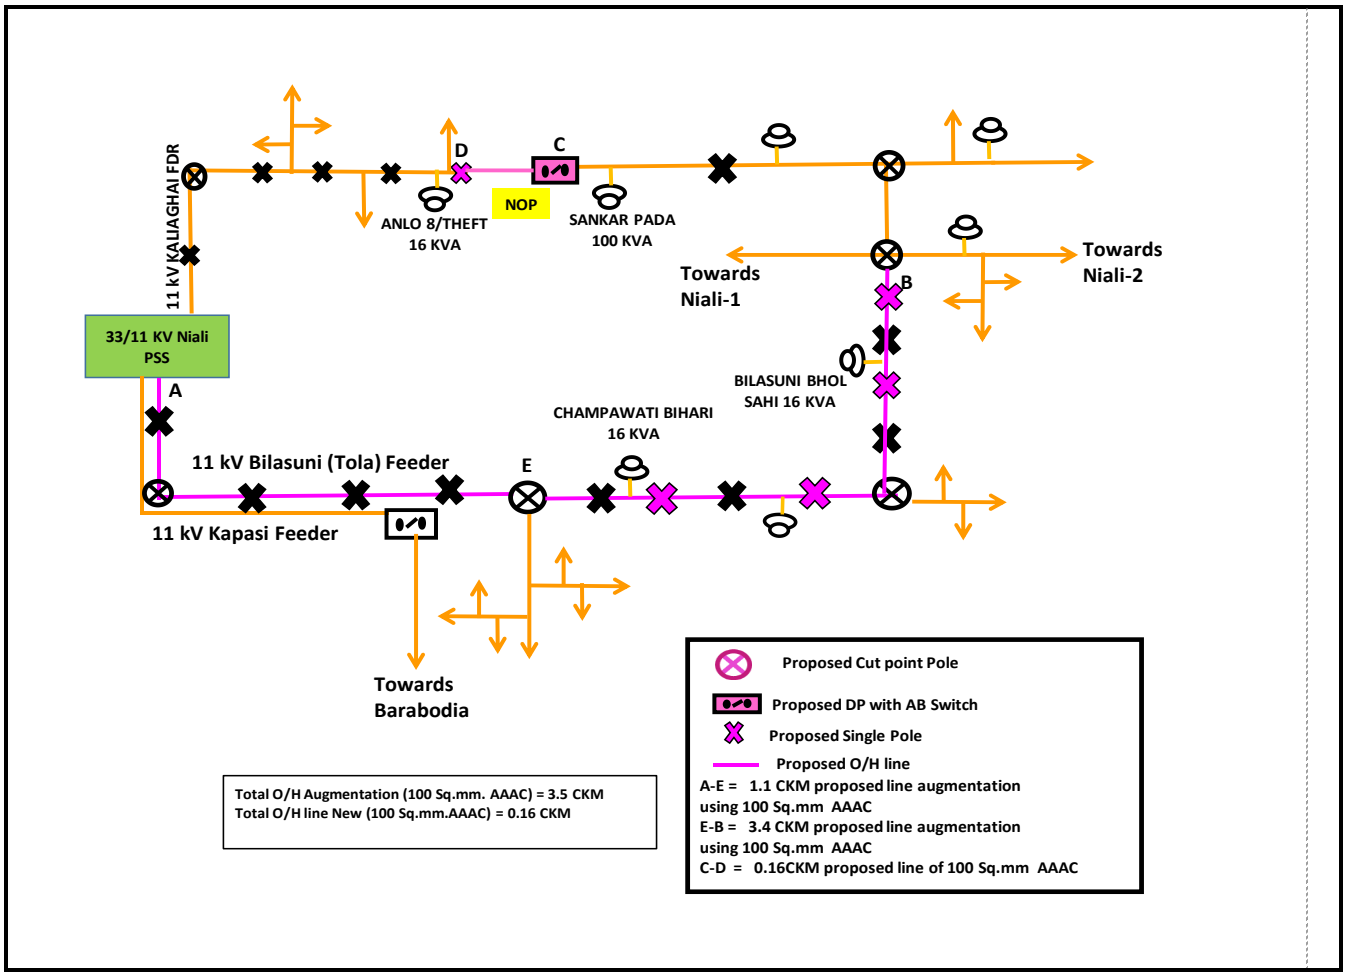
Priority and Timeline of the Project:

Priority: Since the feeder loading has reached 104% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 120%. In case the issue is not addressed, there will be load shedding of 4651nos. consumers for prolonged period.

Technical Justification

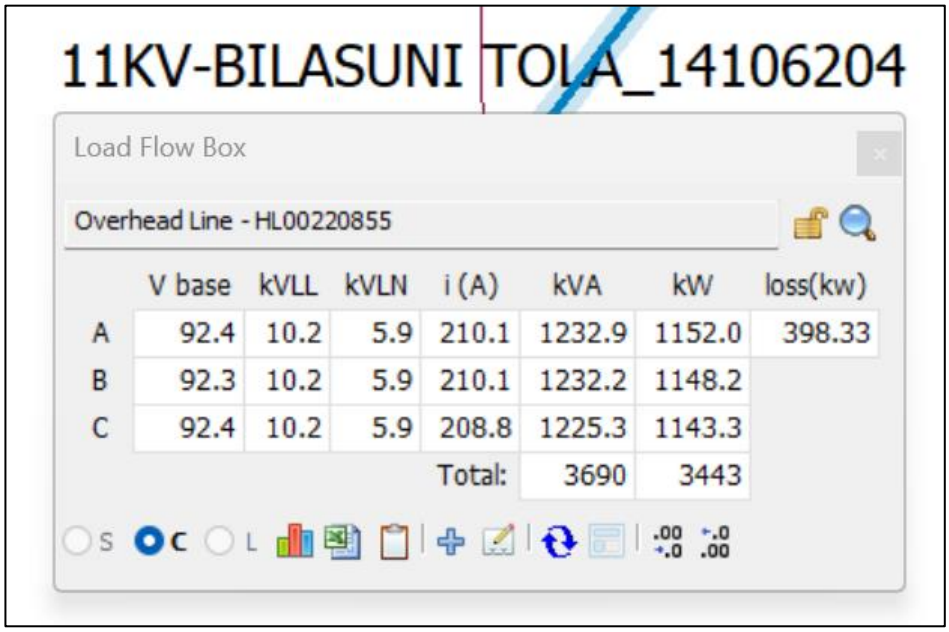
- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.

- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 104% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.



Proposed Scenario:

- Proposal for construction of 0.16 CKM 11 kV interlinking line between 11 kV Tola & kaliaghai feeder to improve N-1 reliability.
- Augmentation of 4.5 CKM 11 kV O/H line using 11 Mtr. WPB & 100 Sq.mm. AAAC to mitigate overloading issue.



Proposed Summer'28 Loading and projected load at 11kV Bilasuni(Tola) Feeder:

Loading after Proposal (Summer'28)						
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Projected load Summer'28 (MVA)	% Loading in Summer-28	Feeder Status	Loss in kW in Summer'28
Niali	Bilasuni(Tola)	5.18	4.24	82%	Under load	398.33

Proposed SLD:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 1.1 CKM 11 kV line using 100 Sq.mm. AAA Conductor (Poles is not required).
- Augmentation of 3.4 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor.
- Construction of 0.16 CKM 11 kV O/H line using 100 Sq.mm. AAAC & 11 Mtr. WPB Pole for N-1 connectivity between 11 kV Tola & Kaliaghai FDR.

Proposed Cost with Estimate Break-up:

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation of 11 kV Bilasuni(Tola) feeder.
2. Improved capability of Network by use of higher size conductor, resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fewer interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
5. The above arrangement will help to release power supply to upcoming potential consumers.

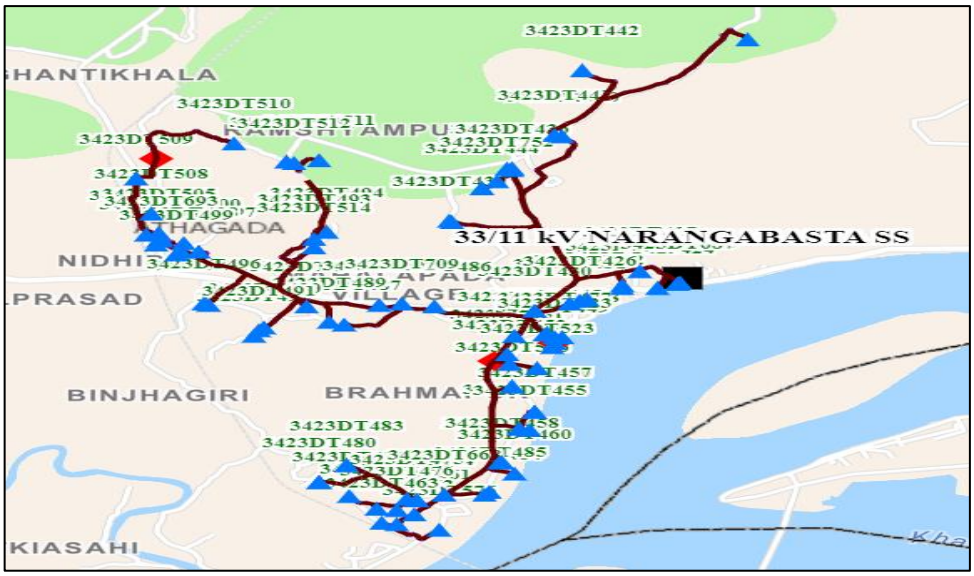
20. Proposal for overloading mitigation and Reliability improvement of 11kV Megha Feeder:

Proposal:

Proposal for refurbishment of 3 CKM O/H line using 100 Sq.mm XLPE AAA Conductor & 11 Mtr. WPB Pole (interposing) along with conversion of O/H to 0.25 CKM U/G in college premises to mitigate overloading issue of 11 kV Megha feeder.

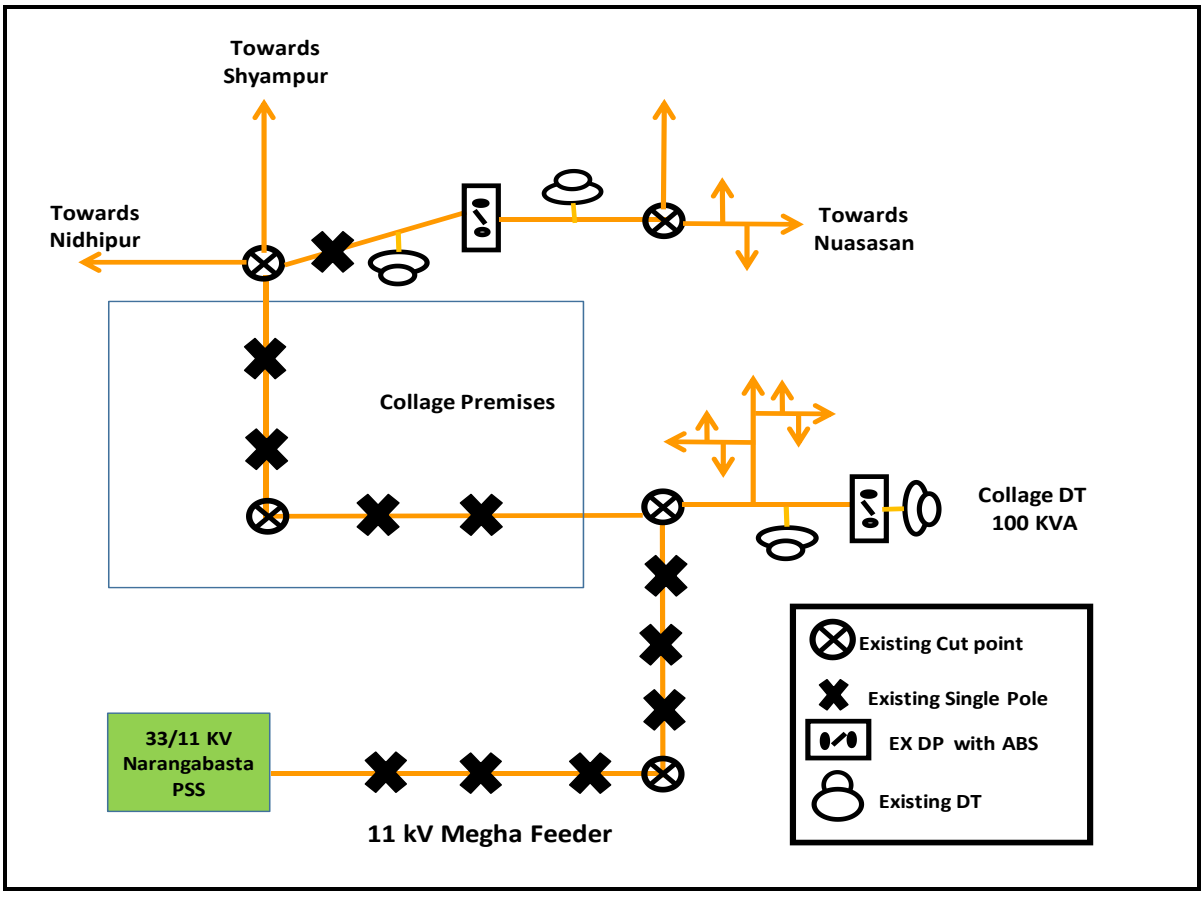
Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Megha Feeder.



Existing Scenario:

- At present, 11kV Megha feeder is emanating from 33/11kV Narangabasta PSS. Total length of this feeder is 27.11 CKM and the peak load is 3.08 MVA.
- In the existing scenario, Conductor size of 11kV Megha feeder is 55 sq.mm & the feeder is 87% loaded w.r.t the current carrying capacity of the conductor.
- Considering 8% load growth for next 2Yrs. the feeder loading will reach and 101% of its capacity.
- This feeder is mainly feeding rural consumers of Narangabasta area, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the area, conductor augmentation proposed for overloading mitigation & reliability improvement.



Existing Summer'26 Loading and projected load at 11kV Megha Feeder

A	92.2	10.1	5.9	208.8	1223.4	1154.3	288.44
B	92.2	10.1	5.9	208.8	1223.3	1153.8	
C	92.2	10.1	5.9	208.6	1222.2	1153.0	
				Total:	3669	3461	

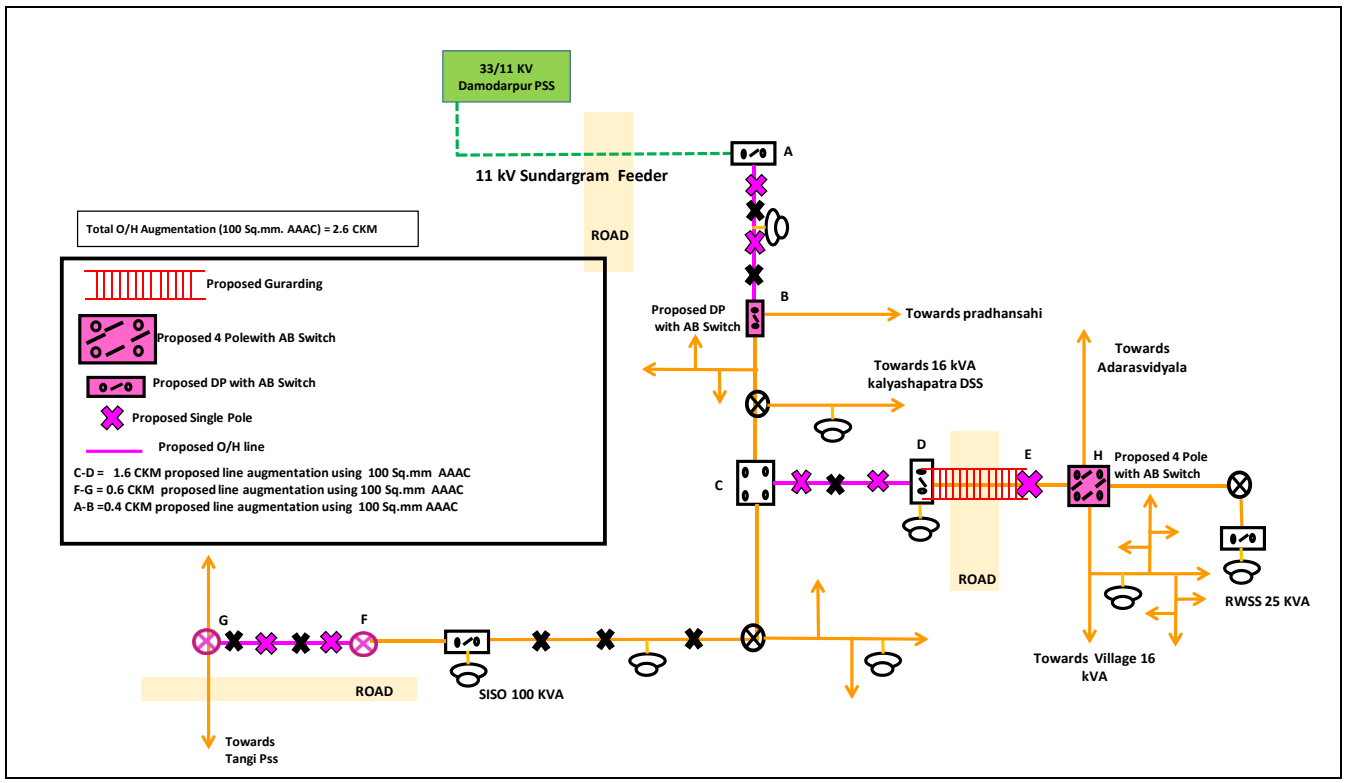
Priority and Timeline of the Project:

Priority: Since the feeder loading has reached 103% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 118%. In case the issue is not addressed, there will be load shedding of 6980 nos. consumers for prolonged period.

Technical Justification

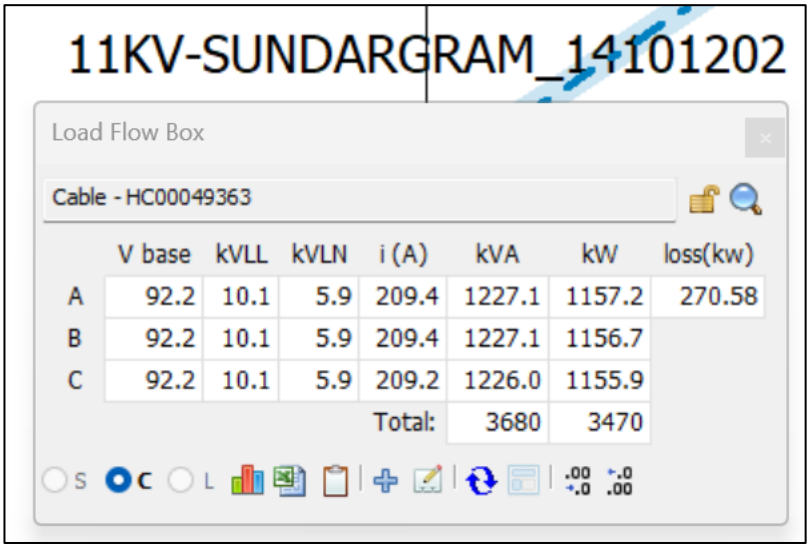
- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.

- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 103 % loaded w.r.t the current carrying capacity.



Proposed Scenario:

- Augmentation of 2.6 CKM 11 kV O/H line using 11 Mtr. WPB (interposing) & 100 Sq.mm. AAAC to mitigate overloading issue.
- Installation of 01 No. of 4 pole with 4 Nos of Ab Switch.
- Installation of 01 No. of 11 kV line protecting guarding for road crossing.



Proposed Summer'28 Loading and projected load at 11kV Sundargram Feeder:

Loading after Proposal (Summer'28)						
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load Summer'28 (MVA)**	**% Loading in Summer-28**	**Feeder Status**	**Loss in kW in Summer'28**
Damodarpur	Sundargram	5.18	4.19	81%	Under load	270.58

Proposed SLD:

Load Flow Study of proposed scenario in Cyme Software:

	V base	kVLL	kVLN	i (A)	kVA	kW	loss(kw)
A	92.2	10.1	5.9	209.4	1227.1	1157.2	270.58
B	92.2	10.1	5.9	209.4	1227.1	1156.7	
C	92.2	10.1	5.9	209.2	1226.0	1155.9	
				Total:	3680	3470	

Scope of Work:

- Augmentation of 2.6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC (Refer PSLD A-B,C-D,G-F).
- Installation 1 Nos of 11 KV 4 Pole using WPB GI Pole 160x152 (11Mtr. Long) with 4 Nos of AB Switch.
- Construction 1 No of Protecting Guarding on Double Pole for Road Crossing.

Proposed Cost with Estimate Break-up:

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation of 11 kV Sundargram feeder.
2. Improved capability of Network by use of higher size conductor, resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fewer interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
5. The above arrangement will help to release power supply to upcoming potential consumers.

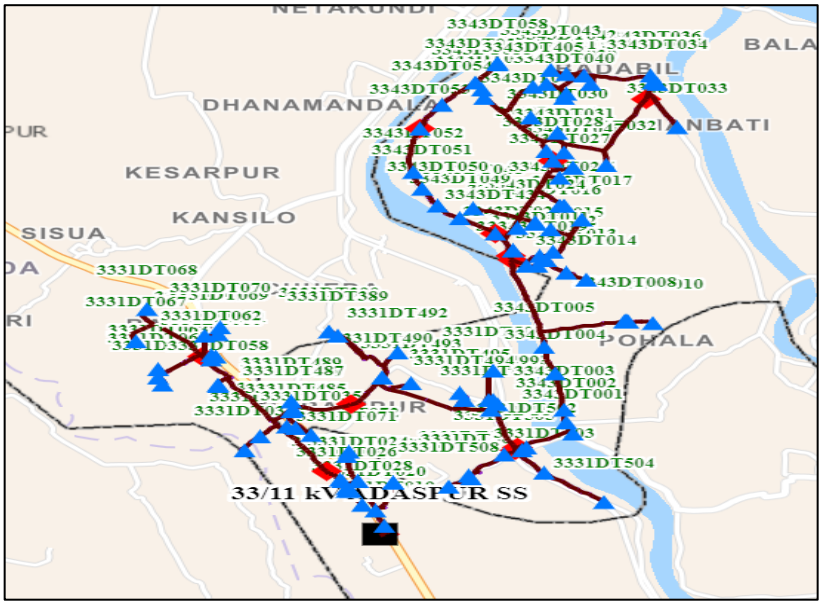
23. Proposal for overloading mitigation and Reliability improvement of 11kV Adaspur Feeder:

Proposal:

Proposal for augmentation of of 2 CKM O/H line of 11 kV adaspur Fdr. using 100 Sq.mm XLPE AAA Conductor & 11 Mtr. WPB Pole to mitigate overloading issue. .

Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Adaspur Feeder.



Existing Scenario:

- At present, 11kV Adaspur feeder is emanating from 33/11kV Adaspur PSS. Total length of this feeder is 31.98 CKM and the peak load is 4.16 MVA.
- In the existing scenario, Conductor size of 11kV Adaspur feeder is 55 sq.mm & the feeder is 117% loaded w.r.t the current carrying capacity of the conductor.
- Considering 7% load growth for next 2Yrs. the feeder loading will reach 134% of its capacity.
- This feeder is mainly feeding rural consumers of Adaspur area, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the area, conductor augmentation proposed for overloading mitigation & reliability improvement.

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation of 11 kV Adaspur feeder.
2. Improved capability of Network by use of higher size conductor, resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fewer interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
5. The above arrangement will help to release power supply to upcoming potential consumers.

24. Proposal for overloading mitigation and Reliability improvement of 11kV Mahanga Feeder:

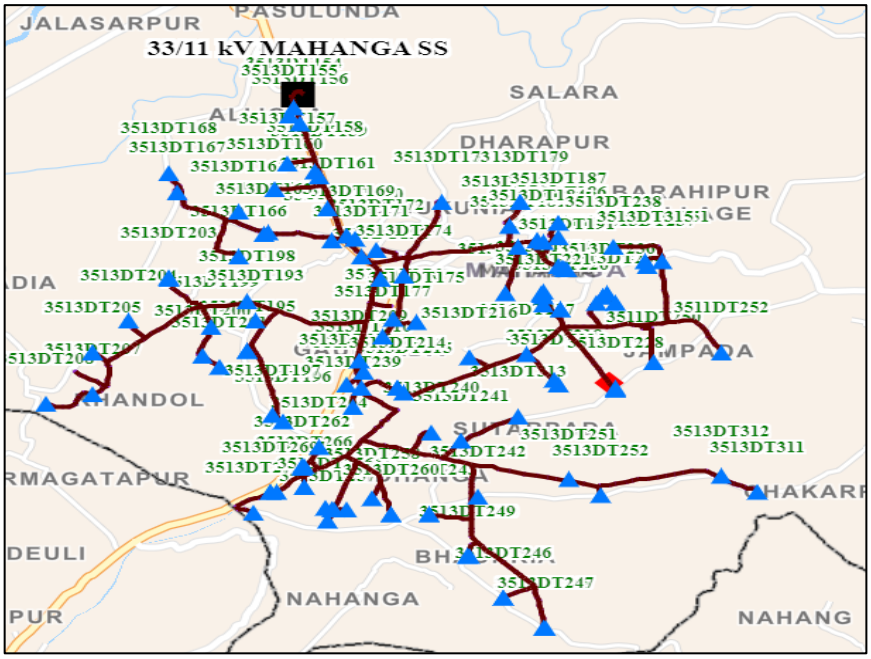
Proposal:

Proposal for augmentation of of 2 CKM O/H line of 11 kV Mahanga Fdr. using 100 Sq.mm XLPE AAA Conductor & 11 Mtr. WPB Pole to mitigate overloading issue of 11 kV Mahanga feeder

Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Mahanga Feeder.

Existing Scenario:



- At present, 11kV Mahanga feeder is emanating from 33/11kV Mahanga PSS. Total length of this feeder is 41.57 CKM and the peak load is 3.34 MVA.

- In the existing scenario, Conductor size of 11kV Mahanga feeder is 55 sq.mm & the feeder is 94% loaded w.r.t the current carrying capacity of the conductor.
- Considering 6% load growth for next 2Yrs. the feeder loading will reach 106% of its capacity.
- This feeder is mainly feeding rural consumers of Mahanga area, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the area, conductor augmentation proposed for overloading mitigation & reliability improvement.

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation of 11 kV Mahanga feeder.
2. Improved capability of Network by use of higher size conductor, resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fewer interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
5. The above arrangement will help to release power supply to upcoming potential consumers.

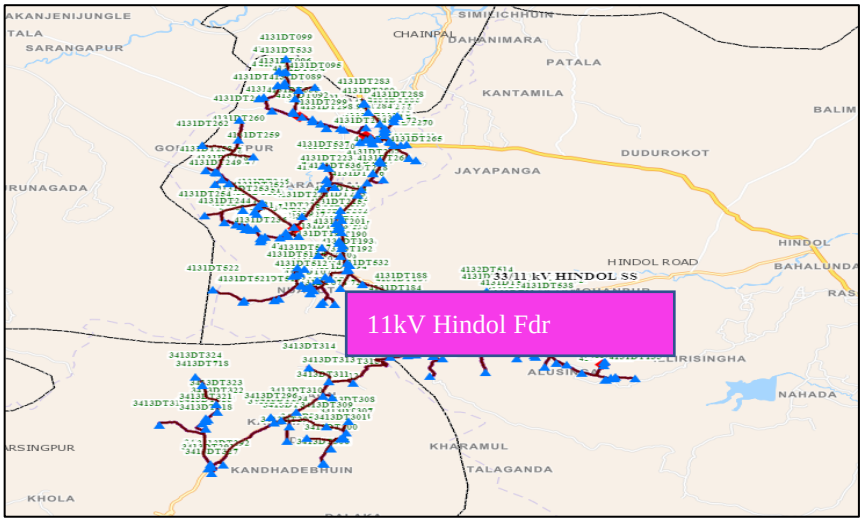
25. Proposal for overloading mitigation and Reliability improvement of 11kV Hindol Feeder:

Proposal:

Proposal for Construction of 11kV New linking line Overhead from Mahidharpur Petrol Pump 25kVA to Madhia Munda 25kVA for length-1.4CKM for Overloading Mitigation purpose.

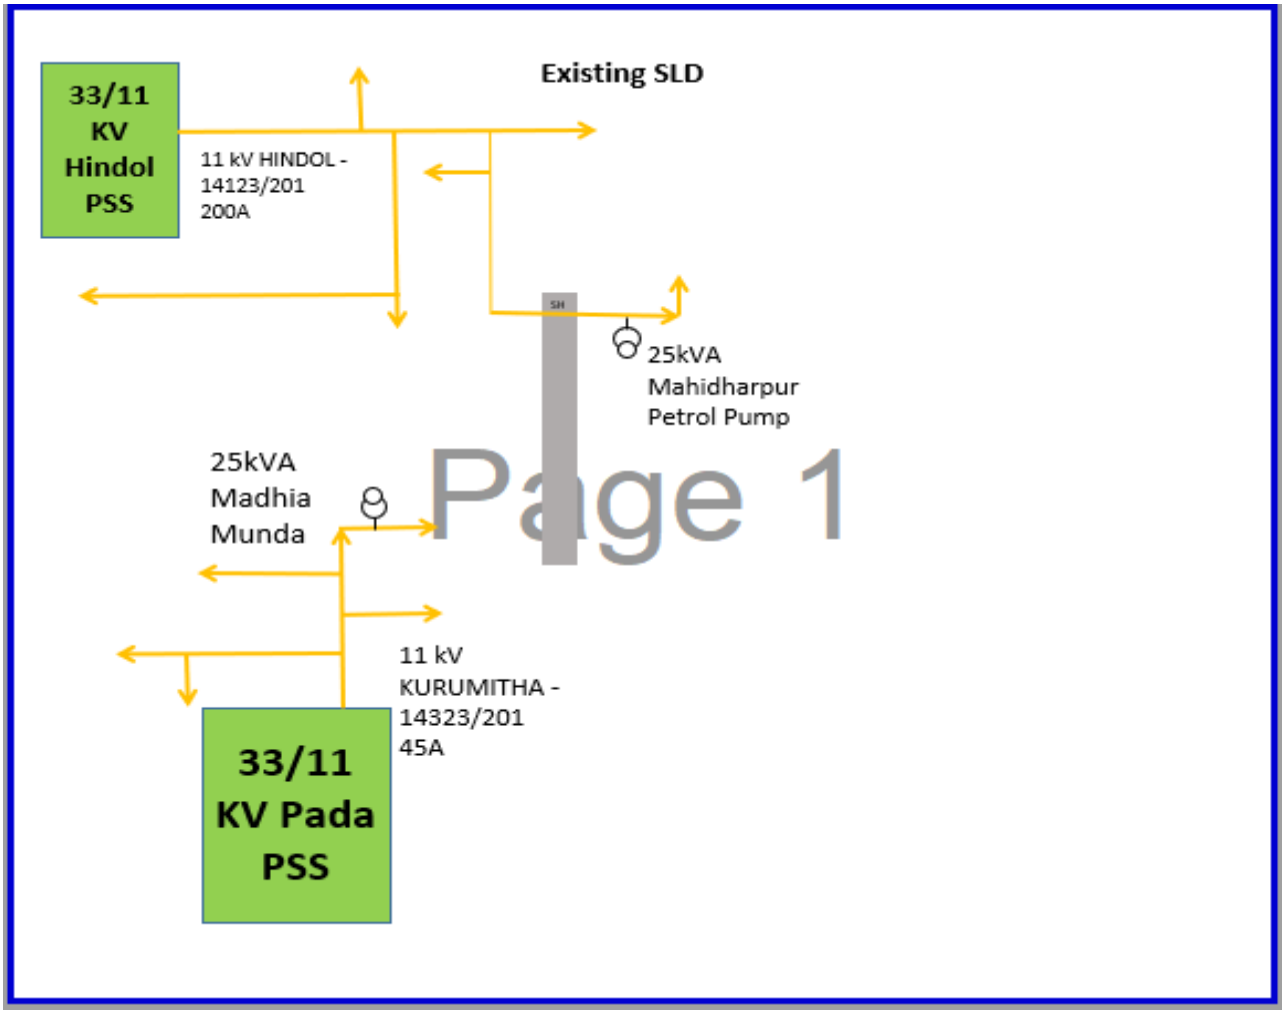
Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by construction of new linking line.



Existing Scenario:

- At present, 11kV Hindol feeder is emanating from 33/11kV Hindol PSS. The total trunk length of 11kV Hindol feeder is 121km and peak load is 3.81MVA.
- Conductor size of 11kV Hindol feeder is 55 sq.mm & the feeder is 104% loaded w.r.t the current carrying capacity of the conductor and 122% loaded considering 8% load growth for rural feeders.
- This feeder is completely feeding industrial, commercial & domestic consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.



Existing Summer'26 Loading and projected load at 11kV Hindol Feeder

		Total Amount (In Cr)	**₹ 0.33**

Cost Estimate: ₹ 0.33 Crore (For detailed BoQ refer Annexure- 21.25)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Cost Benefit Analysis:

Stage	PSS	Feeder	Peak Loading (kW)	Losses at peak loading (kW)	Loss Saving in KW	Avg.Loss Saving with LLF (kW) (LLF –0.255)	Unit saved annually (kWH)	Annual saving (Rs Lacs) (Rs 3.55/Unit)

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation.
2. Improved capability of Network by use of covered conductor, resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
5. The above arrangement will help to release power supply to upcoming potential consumers.

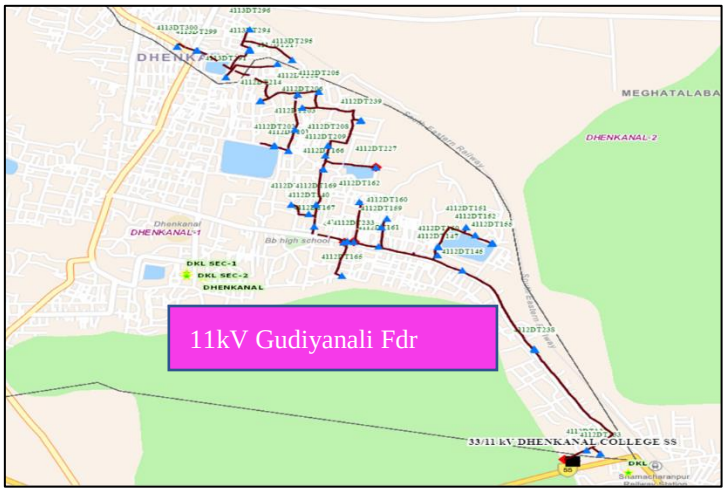
26. Proposal for overloading mitigation and Reliability improvement of 11kV Gudiyanali Feeder:

Proposal:

Proposal for Construction of 11kV New linking line Overhead and UG cable from Surya Hotel 500kVA DSS to Jawahar Chowk 250kVA DSS for length-0.690CKM for Overloading Mitigation purpose.

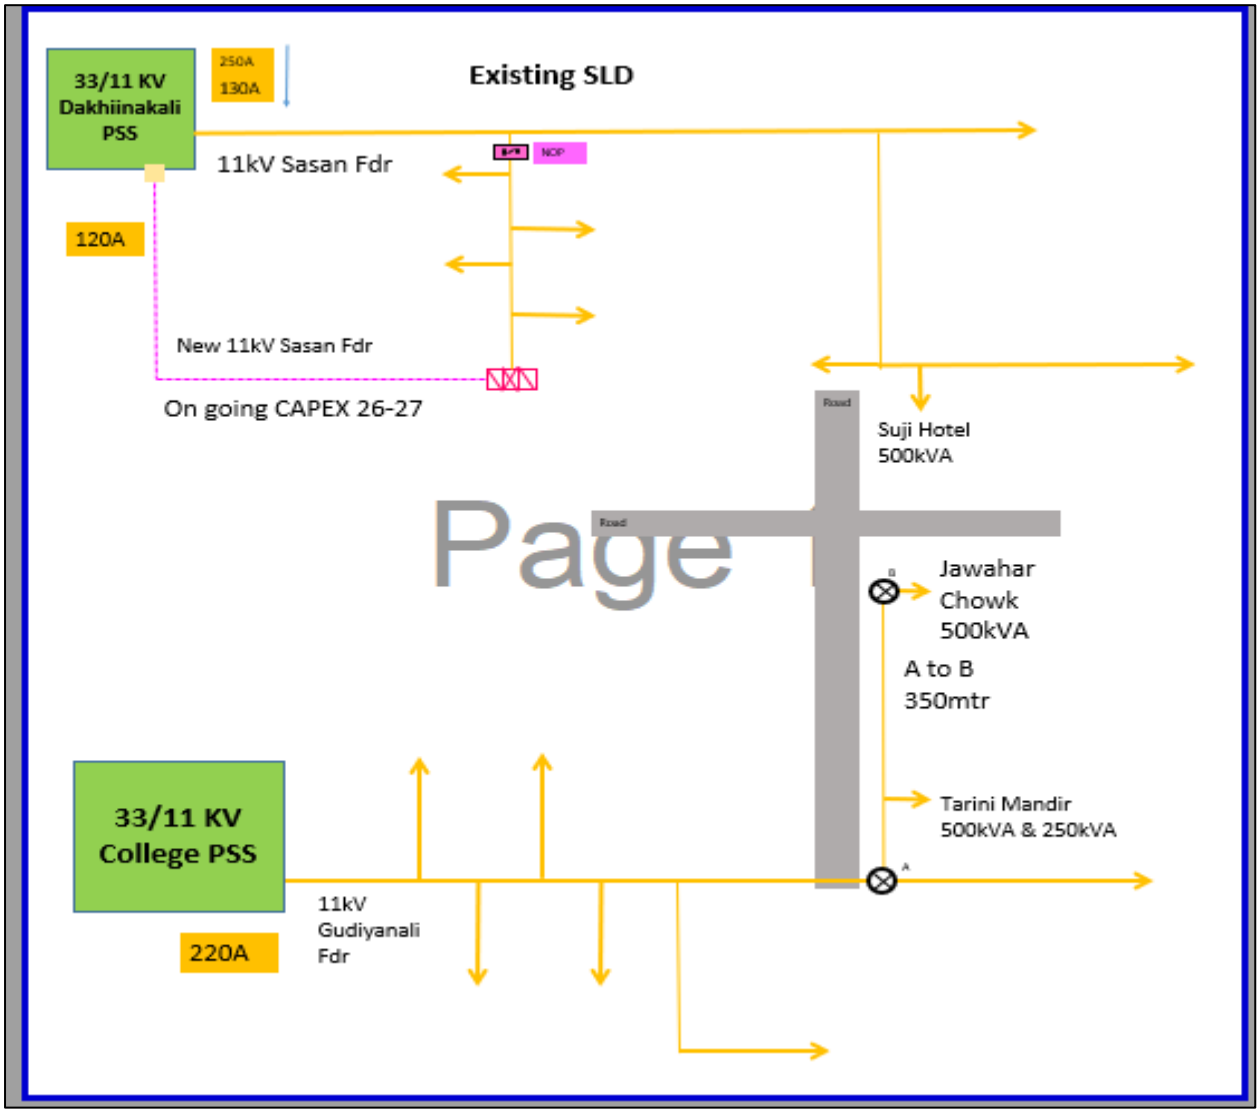
Requirement/ Need of the proposal:

Objective: To ensure mitigation of overloading by construction of new linking line.



Existing Scenario:

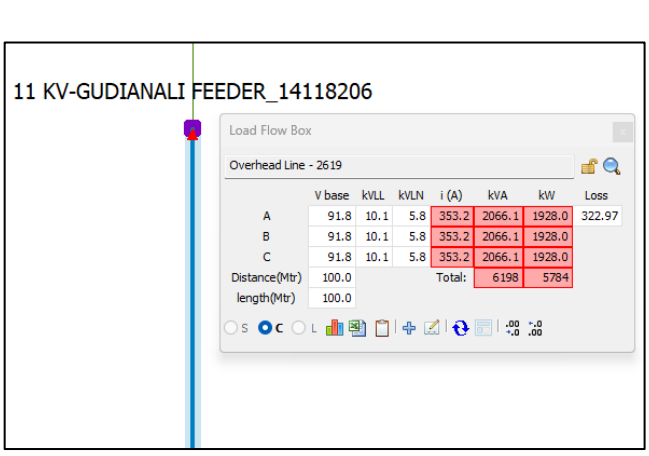
- At present, 11kV Gudiyanali feeder is emanating from 33/11kV College PSS. The total trunk length of 11kV Gudiyanali feeder is 8km and peak load is 5.90 MVA.
- Conductor size of 11kV Gudiyanali feeder is 100 sq.mm & the feeder is 101% loaded w.r.t the current carrying capacity of the conductor and 117% loaded considering 8% load growth for rural feeders.
- This feeder is completely feeding industrial, commercial & domestic consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.

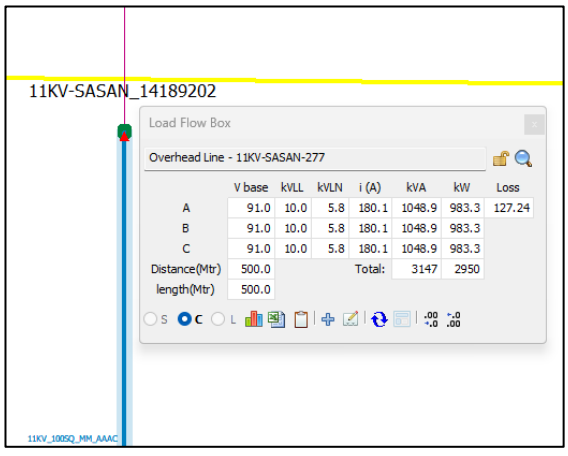


Existing Summer'26 Loading and projected load at 11kV Gudiyanali Feeder

Existing Scenario									
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Peak Loading Summer '26 (MVA)**	**% Loading**	**Feeder Overloading Status (AS IS)**	**Projected load Summer '28 (MVA)**	**% Loading**	**Feeder Overloading Status (Sumeer' 28)**	**Loss in kW in Summer '28**
College	Gudiyanali	5.18	6.20	120%	Over load	7.23	140%	Over load	323
Dakhinakali	Sasan	5.18	3.15	61%	Under load	3.67	71%	Under load	128

GIS Map:-





Existing SLD:

Page

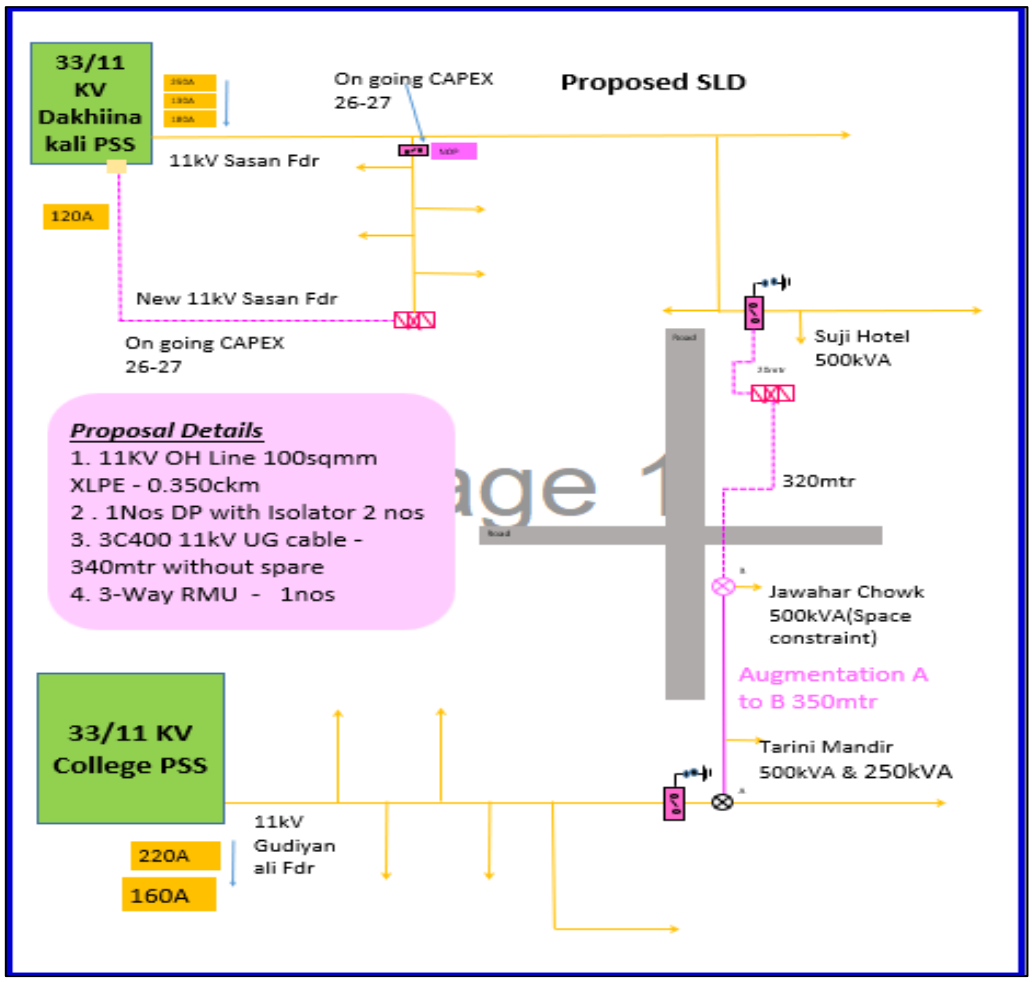
Load Flow Study of existing scenario in CYME Software:-

Priority and Timeline of the Project:

Priority: Since the feeder loading has reached 114% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 133%. In case the issue is not addressed, there will be load shedding of 4002nos. consumers for prolonged period.

Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 114% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.



Proposed Scenario:

- Construction of 11kV New Linking line from Surya Hotel 500kVA DSS to Jawahar Chowk 250kVA DSS.
- The New feeder will help for maintaining reliable power supply for smooth operation

Proposed Summer'28 Loading and projected load at 11kV Gudiyanali Feeder:

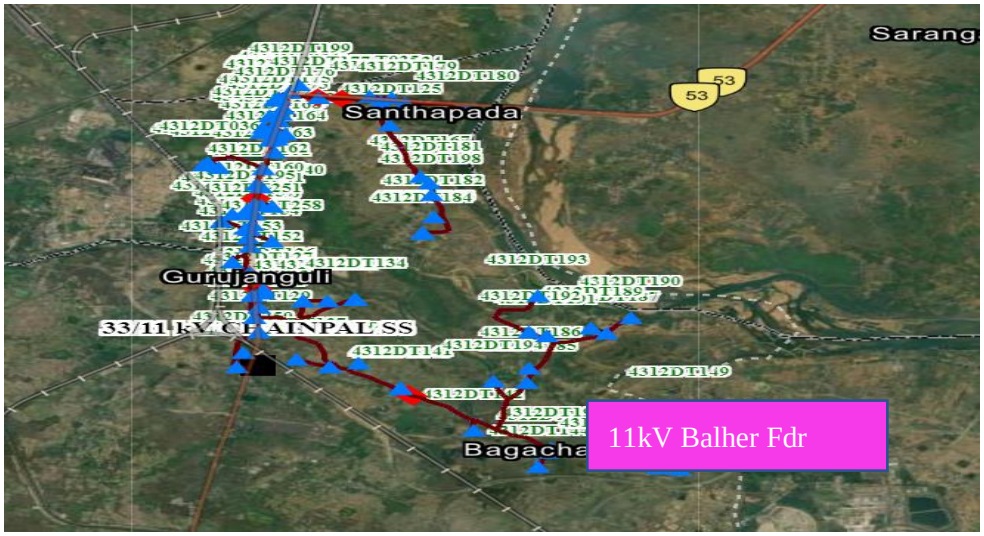
28. Proposal for overloading mitigation and Reliability improvement of 11kV Balher Feeder:

Proposal:

Proposal for Augmentation of 11kV Balher feeder from Chainpal PSS to KRISHANA TIMBER RAIL GATE CHAINPAL 16kVA. To improve power supply & mitigating Overloading,Reliability,Reduce feeder length and loss reduction for length-1.45CKM for Overloading Mitigation purpose.

Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Balher Feeder..



Existing Scenario:

- At present, 11kV Balher feeder is emanating from 33/11kV Chainpal PSS. The total trunk length of 11kV Balher feeder is 24km and peak load is 3.56 MVA.
- In the existing scenario, conductor size of 11kV Balher Feeder is 55 sq mm & the feeder is 100% loaded w.r.t the current carrying capacity of the conductor.
- Considering 8% load growth for next 2Yrs. the feeder loading will reach 117% of its capacity.
- This feeder is proposed to ensure safe power supply to the domestic as well as commercial consumers.
- This feeder is mainly feeding urban consumers and some rural consumers of Chainpal area, several breakdown on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the urban area, conductor augmentation proposed for overloading mitigation & to improving reliability.

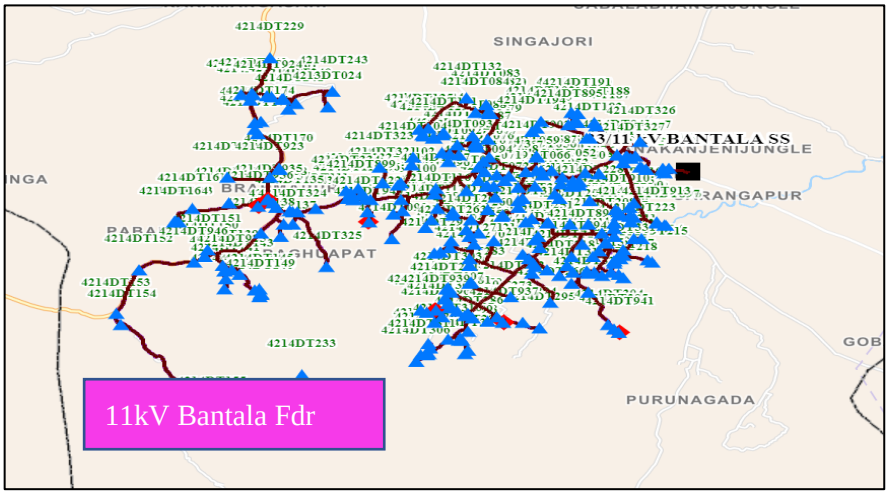
29. Proposal for overloading mitigation and Reliability improvement of 11kV Bantala Feeder:

Proposal:

Proposal for 1CKM Linking Line From 11KV KHINDA FEEDER (KALEIPADA AGRO 25 KVA DT) WITH KHALAGOAN AGRO-2 25 KVA DT . To improve power supply & mitigating Overloading, Reliability, Reduce feeder length and loss reduction.1.45ckm

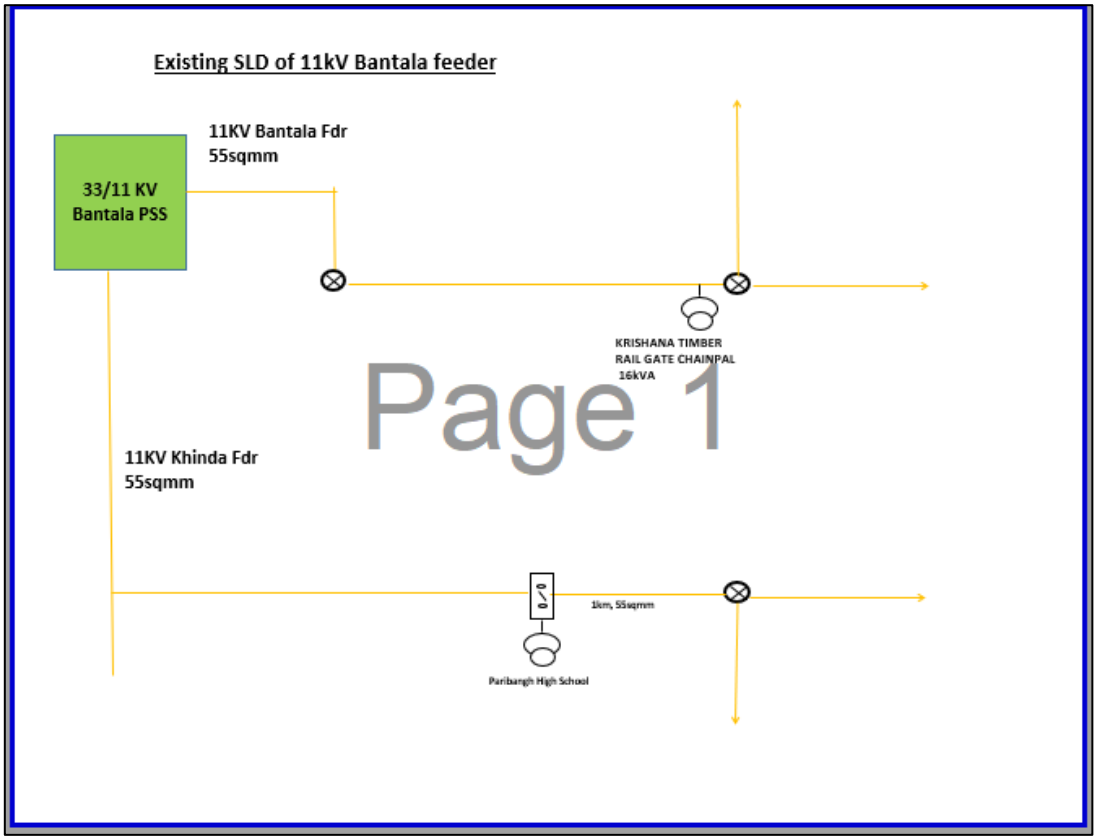
Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV Bantala Feeder.



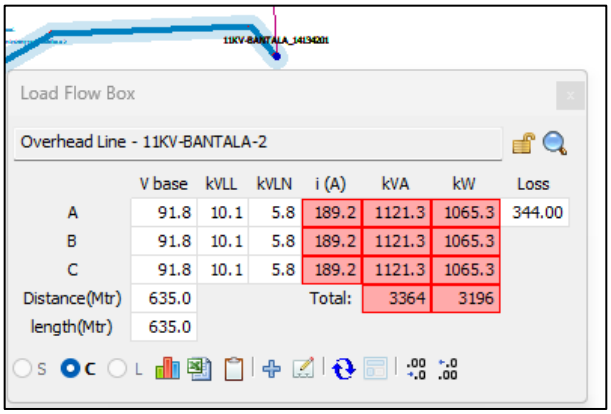
Existing Scenario:

- At present, 11kV Bantala feeder is emanating from 33/11kV Bantala PSS. The total trunk length of 11kV Bantala feeder is 121km and peak load is 3.36 MVA.
- In the existing scenario, conductor size of 11kV Bantala Feeder is 55 sq mm & the feeder is 95% loaded w.r.t the current carrying capacity of the conductor.
- Considering 10% load growth for next 2Yrs. the feeder loading will reach 115% of its capacity.
- This feeder is proposed to ensure safe power supply to the domestic as well as commercial consumers.
- This feeder is mainly feeding urban consumers and some rural consumers of Chainpal area, several breakdown on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the urban area, conductor augmentation proposed for overloading mitigation & to improving reliability.

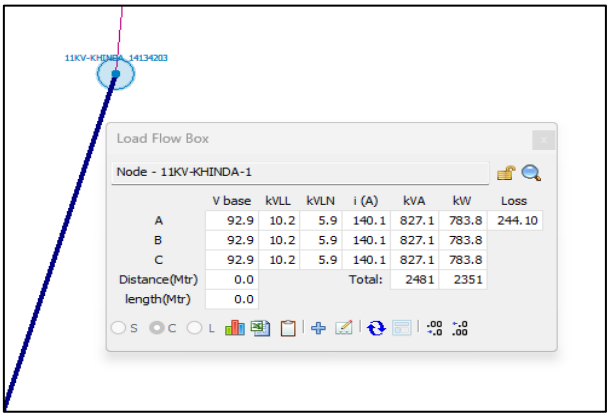


Existing Summer'26 Loading and projected load at 11kV Balher Feeder

Existing Scenario									
Name of the PSS	11 kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer' 26 (MVA)	% Loading	Feeder Overloading Status (AS IS)	Projected load Summer' 28 (MVA)	% Loading	Feeder Overloading Status (Sumeer'28)	Loss in kW in Summer' 28
Bantala	Bantala	3.54	3.36	95%	Under load	4.07	115%	Over load	344
Bantala	Khinda	3.54	2.48	70%	Under load	2.89	82%	Under load	245



GIS Map:-



Existing SLD:

Load Flow Study of existing scenario in CYME Software:-

Priority and Timeline of the Project:

Priority: Since the feeder loading has reached 95% loading in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 115%. In case the issue is not addressed, there will be load shedding of 3327nos. consumers for prolonged period.

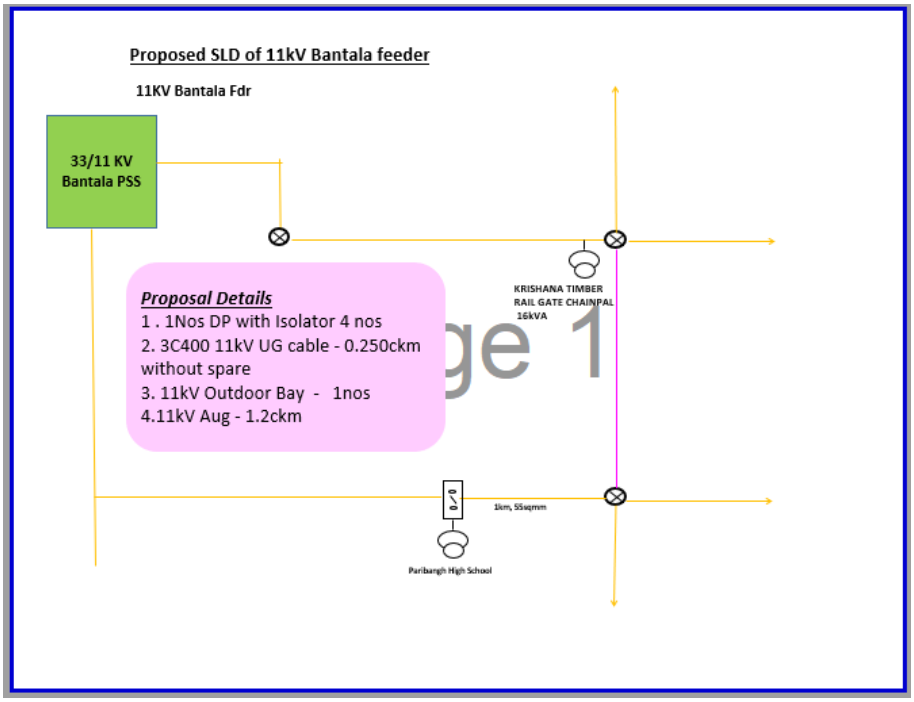
Technical Justification

- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the feeder is 95% loaded w.r.t the current carrying capacity. The feeder loading is not N-1 complaint.

Proposed Scenario:

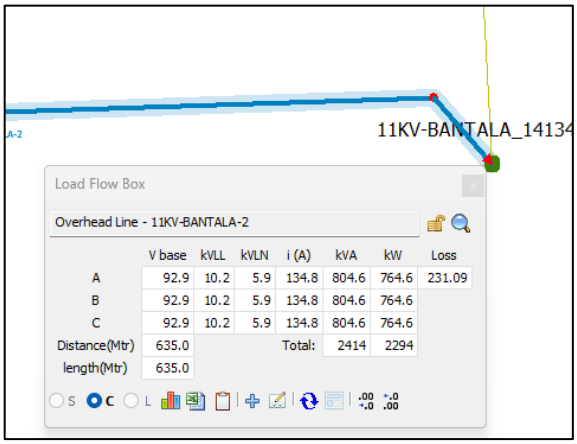
1 . 1Nos DP with Isolator 4 nos

2. 3C400 11kV UG cable - 0.250ckm without spare

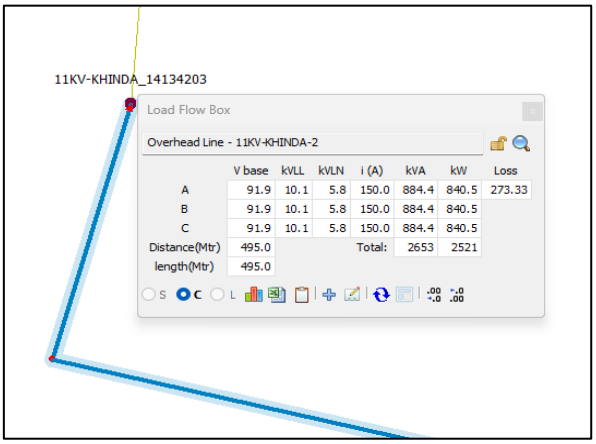


3. 11kV Outdoor Bay - 1nos

4.11kV Aug - 1.2ckm



Proposed Summer'28 Loading and projected load at 11kV Bantala Feeder:



Loading after Proposal (Summer'28)						
Name of the PSS	**11 kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load Summer'28 (MVA)**	**% Loading in Summer-28**	**Feeder Status**	**Loss in kW in Summer'28**
Bantala	Bantala	3.54	2.41	68%	Under load	175.00
Bantala	Khinda	3.54	2.65	75%	Under load	121.00

Proposed SLD:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 11kV Balher feeder from Chainpal PSS to KRISHANA TIMBER RAIL GATE CHAINPAL 16kVA. To improve power supply & mitigating Overloading,Reliability,Reduce feeder length and loss reduction for length-1.45CKM.

Proposed Cost with Estimate Break-up:

Sl. No.	**Part**	**Description**	**Amount**
1	A	Part-A Supply and Laying of 11kV 3C, 400sqmm UG Cable without spare-0.25ckm	₹ 18,04,460.21
2	B	Part-B Aug 11kV Line Length with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor-1.2ckm	₹ 33,20,562.19
		Total Amount	**₹ 51,25,022.40**
		Total Amount (In Cr)	**₹ 0.51**

Cost Estimate: ₹ 0.51 Crore (For detailed BoQ refer Annexure- 21.28)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Cost Benefit Analysis:

Stage	PSS	Feeder	Peak Loading (kW)	Losses at peak loading (kW)	Loss Saving in KW	Avg.Loss Saving with LLF (kW) (LLF –0.255)	Unit saved annually (kWH)	Annual saving (Rs Lacs) (Rs 3.55/Unit)

Benefit to the system and consumers:

1. Improved Reliability thereby overloading mitigation.
2. Improved capability of Network by use of covered conductor, resulting into reduction in tripping on the feeder.
3. Reduction in tripping will ultimately improve improved useful life of Power-transformer upstream.
4. Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
5. The above arrangement will help to release power supply to upcoming potential consumers.

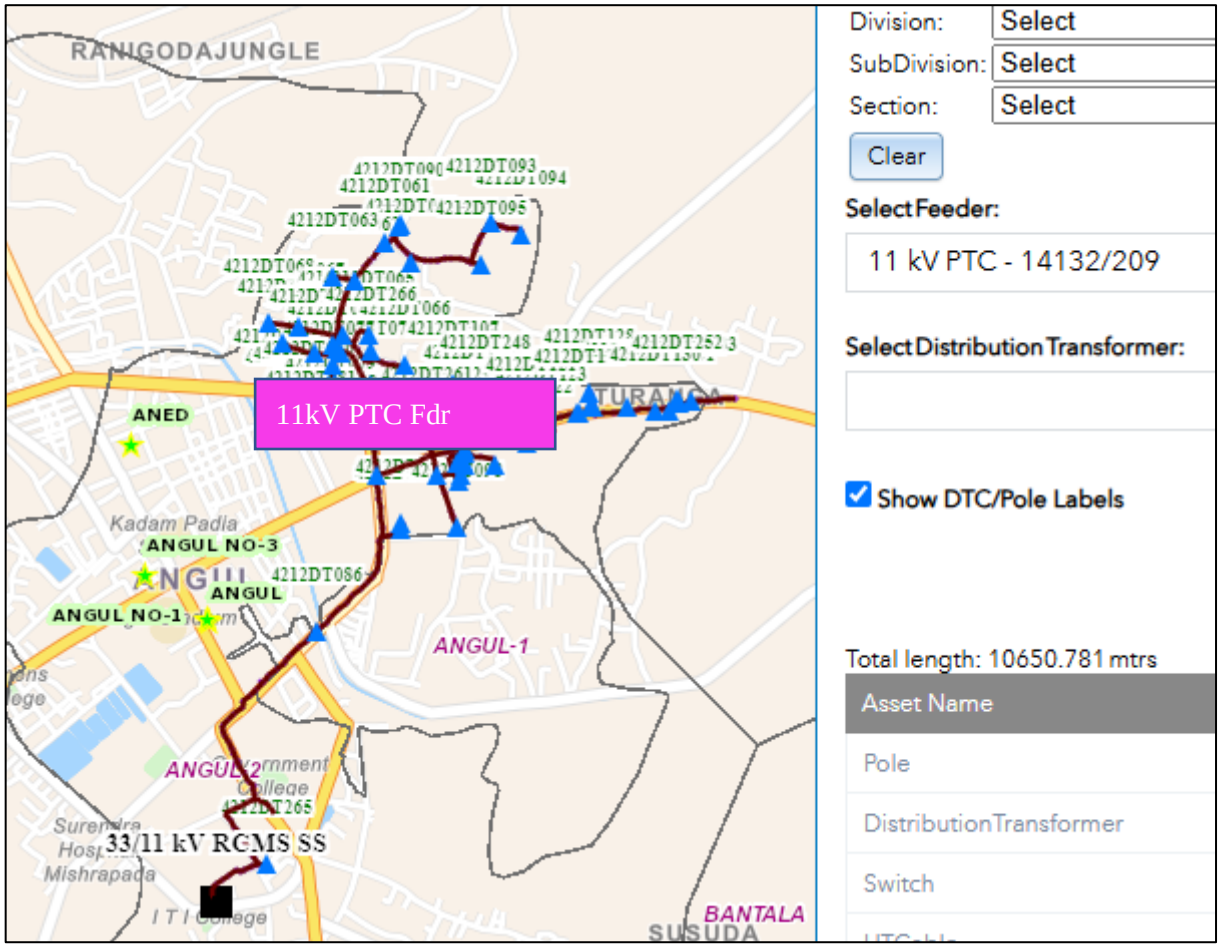
30. Proposal for overloading mitigation and Reliability improvement of 11kV PTC Feeder:

Proposal:

Proposal for 0.25ckm New linking line from AB Switch at 11kv PTC Feeder near RAAZ CHAKA SIMILIPADA 500 KVA DTC4212DT089) for linking from 11KV RCMS THANA feeder near NEAR JUDGE QUARTER 10 kva DTC 4212DT163. To improve power supply & mitigating Overloading, Reliability, Reduce feeder length and loss reduction.0.25ckm

Requirement/ Need of the proposal:

Objective: To mitigate the overloading of the 11 kV PTC Feeder.



Existing Scenario:

- At present, 11kV PTC feeder is emanating from 33/11kV PTC PSS. The total trunk length of 11kV PTC feeder is 11km and peak load is 3.36 MVA.
- In the existing scenario, conductor size of 11kV PTC Feeder is 80 sq mm & the feeder is 95% loaded w.r.t the current carrying capacity of the conductor.
- Considering 10% load growth for next 2Yrs. the feeder loading will reach 115% of its capacity.
- This feeder is proposed to ensure safe power supply to the domestic as well as commercial consumers.
- This feeder is mainly feeding urban consumers and some rural consumers of Chainpal area, several breakdown on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the urban area, conductor augmentation proposed for overloading mitigation & to improving reliability.

2.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	17.25	4,002.00
2.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	1.15	1,702.00
2.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	1.15	5,784.50
2.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	2.3	17,250.00
2.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	2.1	15,750.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	28	7,560.00
2.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	495.7	50,561.40
2.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	0.6	4,770.00
2.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	265.1	27,570.40

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BED
Name of the Sub-Division : -		RASULGARH
Name of the Section : -		LAXMISAGAR
Name of the Feeder: -		11kV Kesura Village Feeder (Kesura PSS)
Name of the Work :-		Proposal for Construction of 2 KM new line from Kesura PSS to near Boys Hostel-1(Nadibandha Area) using 11kV 3C, 400sqmm UG Cable with 1nos of 11kV RMU(LVVV) along with 3CKM augmentation due to dense tree areas .
Names of Schemes: -		**CAPEX 27-28**
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A:- Construction of 2 KM new line from Kesura PSS to near Boys Hostel-1(Nadibandha Area) using 11kV 3C, 400sqmm UG Cable along with 1nos of 11kV RMU(LVVV).	2,45,29,914.54
2	PART-B :- 1. Installation of 1 nos of DP with Isolator with earth switch arrangment .	3,14,531.15
3	PART-C:- 1. Augmentation of 55Sq.mm conductor to 100Sq.mm AAAC XLPE covered conductor for 3CKM due to damaged condition. 2. Installation of 1 nos of DP with AB switch arrangment & installation of 2 nos of pole with LA.	34,78,147.90
4	PART-D:- Dismantling of Materials	90,576.80
5	**Total Gross**	**2,84,13,170.38**
Total estimated cost is Rs. 2.84 Crore. (On TPCODL CAPEX Scheme)		

PART A:-

Construction of 2 KM new line from Kesura PSS to near Boys Hostel-1(Nadibandha Area) using 11kV 3C, 400sqmm UG Cable along with 1nos of 11kV RMU(LVVV).

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1800***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***200***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	2000	2,375.00	47,50,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	8	15,950.00	1,27,600.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	8,260.00	41,300.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	2,900.00	14,500.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1800.00	812.00	14,61,600.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**76,61,276.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	2000	110.00	2,20,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	18	2,000.00	36,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	200	2,970.00	5,94,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	1800.00	195.00	3,51,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**12,16,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	1600		
1.1.a	Earth work excavation of **soil**	M3	1344	716.03	9,62,344.32
1.1.b	Earth work excavation of **hard rock**	M3	576	1,759.39	10,13,408.64
1.2	Back filling with excavated soil outside and above the trench	M3	1920	220.00	4,22,400.00
1.3	Road Repair and restoration charges	KM	0.85	92,94,727.82	79,00,518.65
3	**RMU Civil works**

ANNEXURE- 21.3

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	BED
Name of the Sub-Division : -	RASULGARH
Name of the Section : -	Laxmisagar
Name of the Feeder: -	11kV Laxmisagar U/G Feeder
Name of the Work :-	Proposal for Construction of 3.5KM of 3CX400SQMM UG Cable New line from Laxmisagar PSS to near 4 Pole and augmentation of 1.3km O/H line
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-A: - Construction of 3.5KM new line from Laxmisagar PSS to 4pole near Jagannath Avenue using 11kV 3C, 400sqmm UG Cable along with 11kV RMU	3,66,67,918.63
2	PART-B:- 1. Installation of 1no. of Line DP with AB Switch 2. Augmentation of 1.3Kms O/H line due to dense vegetation area and damagaed conductor	17,86,530.11
3	PART-C:- Installation of 1no of DP with Isolator with Earth Switch at Laxmisagar PSS.	3,63,345.44
4	PART-D:- Dismantling	40,282.84
5	**Total Gross**	**3,88,58,077.03**

Total estimated cost is Rs. 3.89Cr.(On TPCODL CAPEX Scheme)

PART-A: -
Construction of 3.5KM new line from Laxmisagar PSS to 4pole near Jagannath Avenue using 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***3300***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***500***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	3800	2,375.00	90,25,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	14	15,950.00	2,23,300.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	6	8,260.00	49,560.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	2,900.00	11,600.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	3200.00	812.00	25,98,400.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**1,31,74,136.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	3800	110.00	4,18,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	24	2,000.00	48,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	1000	2,970.00	29,70,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	3200.00	195.00	6,24,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**40,75,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	2000		
1.1.a	Earth work excavation of **soil**	M3	1680	716.03	12,02,930.40
1.1.b	Earth work excavation of **hard rock**	M3	720	1,759.39	12,66,760.80
1.2	Back filling with excavated soil outside and above the trench	M3	2400	220.00	5,28,000.00
1.3	Road Repair and restoration charges	KM	0.8	92,94,727.82	74,35,782.26
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM	**50**	16,703.11	8,35,155.74
3.1	RMU Plinth	EA	1	1,71,056.00	1,71,056.00
4	**Fencing**				
a	**GI Chain link**	EA	**1**		

4.1	GI chain link fencing for RMU	RM	18	4,167.57	75,016.30
5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	2	3,784.73	7,569.46
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	127	1,035.17	1,31,466.59
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	1	1,000.00	1,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	3.8	10,470.00	39,786.00
	Sub Total (Civil Portion) (in Rs.)				**1,16,94,523.54**
A1	**Sub Total (Supply Portion)**				**1,31,74,136.60**
A2	**Applicable Taxes to make it Landed Cost @18%**				**23,71,344.59**
A	**Total Landed Cost (A=A1 + A2)**				**1,55,45,481.19**

ANNEXURE- 21.4

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	BED
Name of the Sub-Division : -	RASULGARH
Name of the Section : -	RASULGARH S/O
Name of the Feeder: -	11kV PANDRA VILLAGE Feeder
Name of the Work :-	Proposal for Construction of 1.8 KM new line from Pandra Viillage PSS to Near Jyoti flyash bricks using 11kV 3C, 400sqmm UG Cable along with 2nos of 11kV RMU(LVVV) along with 4CKM augmentation due to damaged condutor.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A:- Construction of 1.8 KM new line from Pandra Viillage PSS to Near Jyoti flyash bricks using 11kV 3C, 400sqmm UG Cable along with 2nos of 11kV RMU(LVVV).	2,73,87,415.30
2	PART-B:- 1. Augmentation of 55Sq.mm conductor to 100Sq.mm AAAC XLPE covered conductor for 4CKM due to damaged condition. 2. Installation of 1 nos of pole with LA arrangment & installation of 3 nos of LA on extisting pole.	42,14,382.42
3	PART-C:- Installation of 1no of DP with Isolator with Earth Switch at Pandra PSS.	3,63,345.44
4	PART-D:- Dismantling of Materials	1,03,090.70
5	**Total Gross**	**3,20,68,233.86**

Total estimated cost is Rs. 3.21 Crore. (On TPCODL CAPEX Scheme)

PART A:-

Construction of 1.8 KM new line from Pandra Viillage PSS to Near Jyoti flyash bricks using 11kV 3C, 400sqmm UG Cable along with 2nos of 11kV RMU(LVVV).

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1300***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***500***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	1800	2,375.00	42,75,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	8	15,950.00	1,27,600.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	8	8,260.00	66,080.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	2,900.00	11,600.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1300.00	812.00	10,55,600.00
2	**Supply of 11kV RMU**

ANNEXURE- 21.5

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	BED
Name of the Sub-Division : -	RASULGARH
Name of the Section : -	RASULHARH
Name of the Feeder: -	11kV Prachi Vihar Feeder
Name of the Work :-	Proposal for Construction of 1.8KM of 3CX400SQMM UG Cable New line from Pandra PSS to near Local Dhaba and augmentation of 2.4km O/H line
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-A: - Construction of 1.8KM new line from Pandra PSS to near Local Dhaba using 11kV 3C, 400sqmm UG Cable along with 11kV RMU	2,12,65,471.57
2	PART-B:- 1. Installation of 2 nos. of Line DP with AB Switch 2. Augmentation of 2.4Kms O/H line due to dense vegetation area and damagaed conductor	41,53,244.32
3	PART-C:- Installation of 1no of DP with Isolator with Earth Switch at Pandra PSS.	3,63,345.44
4	PART-D:- Dismantling	87,012.30
5	**Total Gross**	**2,58,69,073.65**

Total estimated cost is Rs. 2.59 Crore. (On TPCODL CAPEX Scheme)

PART-A: -
Construction of 1.8KM new line from Pandra PSS to near Local Dhaba using 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1500***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***300***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	1800	2,375.00	42,75,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	6	15,950.00	95,700.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	8,260.00	41,300.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	2,900.00	14,500.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1500.00	812.00	12,18,000.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**69,10,776.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	1800	110.00	1,98,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	16	2,000.00	32,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	300	2,970.00	8,91,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	1500.00	195.00	2,92,500.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**14,28,500.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	1200		
1.1.a	Earth work excavation of **soil**	M3	1008	716.03	7,21,758.24
1.1.b	Earth work excavation of **hard rock**	M3	432	1,759.39	7,60,056.48
1.2	Back filling with excavated soil outside and above the trench	M3	1440	220.00	3,16,800.00
1.3	Road Repair and restoration charges	KM	0.6	92,94,727.82	55,76,836.69
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM	**50**	16,703.11	8,35,155.74
3	**RMU Civil works**				
3.1	RMU Plinth	EA	1	1,71,056.00	1,71,056.00
4	**Fencing**				
a	**GI Chain link**	EA	**1**		

4.1	GI chain link fencing for RMU	RM	18	4,167.57	75,016.30
5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	2	3,784.73	7,569.46
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	60	1,035.17	62,110.20
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	1	1,000.00	1,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	1.8	10,470.00	18,846.00
	Sub Total (Civil Portion) (in Rs.)				**85,46,205.11**

ANNEXURE- 21.7		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-I
Name of the Sub-Division : -		SDO-1
Name of the Section : -		Unit-6
Name of the Feeder: -		11kV BM RMU-15
Name of the Work :-		Proposal for load diversion of 11kV BMRMU-15 through Linking line for mitigation of overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length- 0.52 KM using 3Cx400mm2 XLPE UG cable from BM CSS-11 t0 SE RMU 04. 2. Installation of 2 Nos. of RMU in 11kV BM RMU-19 & 11kV BM RMU-15.	93,90,294.74
2	Part-B:-Augmentation of 11kV BM RMU-15 Feeder of length 0.7 CKM.	12,02,724.09
3	Part-C Dismantling.	33,538.44
4	**Total Gross**	**1,06,26,557.27**
Total estimated cost is Rs. 1.06 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length- 0.52 KM using 3Cx400mm2 XLPE UG cable from BM CSS-11 t0 SE RMU 04.

2. Installation of 2 Nos. of RMU in 11kV BM RMU-19 & 11kV BM RMU-15.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***300***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***220***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	520	2,375.00	12,35,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	1	15,950.00	15,950.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	10	8,260.00	82,600.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA		2,900.00	-
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	300.00	812.00	2,43,600.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***2***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	12,62,647.00	25,25,294.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**41,09,703.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	520	110.00	57,200.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	11	2,000.00	22,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	220	2,970.00	6,53,400.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	300.00	195.00	58,500.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	15,000.00	30,000.00
	Sub Total (Erection Portion) (in Rs.)				**8,21,100.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	300		
1.1.a	Earth work excavation of **soil**	M3	252	716.03	1,80,439.56
1.1.b	Earth work excavation of **hard rock**	M3	108	1,759.39	1,90,014.12
1.2	Back filling with excavated soil outside and above the trench	M3	360	220.00	79,200.00
1.3	Road Repair and restoration charges	KM	0.15	92,94,727.82	13,94,209.17
2	**Civil works for U/G Cable laying in Trench**				

2.1	Cable Trench with RCC Wall	RM		16,703.11	-

Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length- 1.15 CKM using 3Cx400mm2 XLPE UG cable from Airport PSS to Gitanjali Enclave. 2. Installation of 3 Nos. of RMU in 11kV JPRMU-34 Feeder.	1,48,96,648.41
2	Part-B:-Augmentation of 11kV JP RMU-34 Feeder of length 1.15 CKM.	21,05,417.82
3	Part-C Dismantling.	52,885.53
4	**Total Gross**	**1,70,54,951.76**
Total estimated cost is Rs. 1.71 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length- 1.15 CKM using 3Cx400mm2 XLPE UG cable from Airport PSS to Gitanjali Enclave.

2. Installation of 3 Nos. of RMU in 11kV JPRMU-34 Feeder.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***800***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***170***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	970	2,375.00	23,03,750.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	2	15,950.00	31,900.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	12	8,260.00	99,120.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	7	2,900.00	20,300.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	800.00	812.00	6,49,600.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***3***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	3	12,62,647.00	37,87,941.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	39.60	78.00	3,088.80
3.2	Pipe Earthing 40mm. GI Pipe	EA	6	1,300.00	7,800.00
	Sub Total (Supply Portion) (in Rs.)				**69,03,499.80**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	970	110.00	1,06,700.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	21	2,000.00	42,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	170	2,970.00	5,04,900.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	800.00	195.00	1,56,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	3	15,000.00	45,000.00
	Sub Total (Erection Portion) (in Rs.)				**8,54,600.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	744

Name of the Work :-		Proposal for Bifurcation of 11kV Telephone Bhawan Feeder for mitigation of overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length- 1.2 CKM using 3Cx400mm2 XLPE UG cable from Kharvel nagar PSS to Telephone Bhawan feeder near Assembly. 2. Installation of 1no. of RMU near BM RMU-10.	1,34,45,366.93
2	**Total Gross**	**1,34,45,366.93**
Total estimated cost is Rs. 1.34 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length- 1.2 CKM using 3Cx400mm2 XLPE UG cable from Kharvel nagar PSS to Telephone Bhawan feeder near Assembly.

2. Installation of 1no. of RMU near BM RMU-10.

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1000***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***200***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	1200	2,375.00	28,50,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	4	15,950.00	63,800.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	8,260.00	41,300.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA		2,900.00	-
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1000.00	812.00	8,12,000.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**50,33,376.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	1200	110.00	1,32,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	9	2,000.00	18,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	200	2,970.00	5,94,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	1000.00	195.00	1,95,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**9,54,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	1000		
1.1.a	Earth work excavation of **soil**	M3	840	716.03	6,01,465.20
1.1.b	Earth work excavation of **hard rock**	M3	360	1,759.39	6,33,380.40
1.2	Back filling with excavated soil outside and above the trench	M3	1200	220.00	2,64,000.00
1.3	Road Repair and restoration charges	KM	0.3	92,94,727.82	27,88,418.35
2	**Civil works for U/G Cable laying in Trench**				

2.1	Cable Trench with RCC Wall	RM		16,703.11	-
2.2	Cable Trench with Brick Wall	RM		13,124.93	-
3	**RMU Civil works**				
3.1	RMU Plinth	EA	1	1,71,056.00	1,71,056.00
4	**Fencing**				
a	**GI Chain link**	EA	**1**		
4.1	GI chain link fencing for RMU	RM	18	4,167.57	75,016.30
4.2	Boundary wall Fencing for RMU	RM	0	11,173.88	-
5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	2	3,784.73	7,569.46
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	40	1,035.17	41,406.80
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	1	1,000.00	1,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	1.2	10,470.00	12,564.00
	Sub Total (Civil Portion) (in Rs.)				**45,95,876.51**
A1	**Sub Total (Supply Portion)**				**50,33,376.60**
A2	**Applicable Taxes to make it Landed Cost @18%**				**9,06,007.79**
A	**Total Landed Cost (A=A1 + A2)**				**59,39,384.39**
B	Stock, Storage & Insurance @ 3 % of A				1,78,181.53
C	**Sub Total (A+B)**				**61,17,565.92**
D	Contingency @ 3 % of C				1,83,526.98
E	Tools & Plants Charges @ 2% of C (considered for earthing items)				25.03
F	Transportation @ 7.5% of C				4,58,817.44
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)				125.14
H	**Total (C+D+E+F+G)**				**67,60,060.51**
I1	Sub Total (Erection Portion + Civil Portion)				55,49,876.51
I2	**Applicable Taxes to make it Landed Cost @18%**				**9,98,977.77**
I	**Total landed Cost (I=I1+ I2)**				**65,48,854.28**
J	**Total Cost (H+I)**				**1,33,08,914.78**
K	Other Overhead /(including Supervision Charges) @ 6 % of J				
L	**Total Estimated Capital Cost i.e. (J+K)**				**1,33,08,914.78**
M	CESS 1% of L				1,33,089.15
N	**Grand Total (L+M)**				**1,34,42,003.93**
O	Inspection Fee of UG Line (HT) - Rs. 375 upto 1 KM.				375.00
P	Inspection Fee of UG Line (HT) - Rs. 225/ Additional Km				225.00
Q	Inspection Fee of RMU - Rs. 1500/ RMU				1,500.00
R	Inspection Fee of Drawing Checking and Approval				750.00
S	Total Inspection Fees (O+P+Q+R)				**2,850.00**
T	GST @ 18% on Total Inspection Fees (S)				513.00
U	Total Inspection Fees including GST (S+T)				3,363.00
V	**Gross Total Material, Services and Inspection Fees (N+U)**				**1,34,45,366.93**

ANNEXURE-21.10		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	KED-I	
Name of the Sub-Division : -	Kendrapara	
Name of the Section : -	Kendrapara-I	
Name of the Work :-	Proposal for augmentation of 1.6 CKM 11 kV O/H line of 11 kV Town-2 feeder for mitigation of overloading issue along with construction of 0.8 CKM 11 KV line using 100 Sq.mm XLPE AAA Conductor for N-1 connectivity between 11 kV Block & Town-2 Fdr.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 0.5 CKM 11 kV O/H line (Double Circuit) using 14 Mtr. H-Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD AB)	2,289,438.07
2	PART B: Construction of 1.1 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD BCD)	3,662,146.99
3	PART C: Construction of 0.8 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC in vertical arrangement (Refer PSLD F-G)	2,584,152.13
4	PART D: Installation of 05 Nos of 11 kV line protecting guarding having span 40 Mtr. (Refer PSLD)	152,185.94
5	PART E: Dismantling Portion	105,103.98
6	**Total Amount**	**8,793,027.11**
	Total Amount (In Cr.)	**0.88**
Total estimated cost is Rs. 0.88 Crore. (On TPCODL Capex Scheme)		

PART A: Construction of 0.5 CKM 11 kV O/H line (Double Circuit) using 14 Mtr. H-Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD AB)

ANNEXURE- 21.11		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Periphery
Name of the Section : -		CS Pur-1
Name of the Feeder: -		11kV BDA
Name of the Work :-		Proposal for Load Bifurcation of existing 11kV BDA feeder for mitigation of overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Installation of 2 Nos. of RMU in BDA Feeder for linking with 11kV Gopabandhu feeder, 11kV District Center & Quality Care Feeder. (near LIC housing & Near care Hospital Main road).	87,06,252.59
2	Part-B:- 1. Augmentation of 11kV BDA feeder of length 4CKM. 2. Augmentation of Back feeding 11kV district center feeder of length-2 CKM 3. Augmentation of Back feeding 11kV Quality Care feeder of length 1.5 CKM.	1,23,65,081.10
3	Part-C Dismantling.	3,06,560.76
4	**Total Gross**	**2,13,77,894.45**
Total estimated cost is Rs. 2.14 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Installation of 2 Nos. of RMU in BDA Feeder for linking with 11kV Gopabandhu feeder, 11kV District Center & Quality Care Feeder. (near LIC housing & Near care Hospital Main road).

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***740***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	740	2,375.00	17,57,500.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	1	15,950.00	15,950.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	7	8,260.00	57,820.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	2,900.00	14,500.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	740.00	812.00	6,00,880.00
2	**Supply of 11kV RMU**				
a	***No. of 11kV 3WAY 630A LLV WITH FRTU & AUX PT***	***EA***	***2***		
2.1	Supply of 11kV RMU 3WAY 630A LLV WITH FRTU & AUX PT	EA	2	7,51,384.00	15,02,768.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**39,56,677.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	740	110.00	81,400.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	13	2,000.00	26,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	0	2,970.00	-
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	740.00	195.00	1,44,300.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	0	15,000.00	-
	Sub Total (Erection Portion) (in Rs.)				**2,75,700.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	700		
1.1.a	Earth work excavation of **soil**	M3	588	716.03	4,21,025.64
1.1.b	Earth work excavation of **hard rock**	M3	252	1,759.39	4,43,366.28
1.2	Back filling with excavated soil outside and above the trench	M3	840	220.00	1,84,800.00
1.3	Road Repair and restoration charges	KM	0.1	92,94,727.82	9,29,472.78

ANNEXURE- 21.12		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Periphery
Name of the Section : -		CS Pur-2
Name of the Feeder: -		11kV Info Patia
Name of the Work :-		Proposal for Augmentation of existing 11kV Info patia feeder using 100mm2 XLPE Covered conductor & Load Diversion to near By feeder for mitigation of Overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Installation of 1 No. of RMU in near Sai Mandir RMU in Info Patia Feeder for linking with Royalty Sqauare feeder.	26,03,175.37
2	Part-B:-Augmentation of 11kV Info patia feeder of length 3.5CKM.	59,99,583.83
3	Part-C Dismantling.	1,46,835.72
4	**Total Gross**	**87,49,594.92**
Total estimated cost is Rs. 0.87 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Installation of 1 No. of RMU in near Sai Mandir RMU in Info Patia Feeder for linking with Royalty Sqauare feeder.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***80***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	80	2,375.00	1,90,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA		15,950.00	-
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	8,260.00	33,040.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	2	2,900.00	5,800.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	80.00	812.00	64,960.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**15,60,076.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	80	110.00	8,800.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	6	2,000.00	12,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	0	2,970.00	-
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	80.00	195.00	15,600.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**51,400.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	64		
1.1.a	Earth work excavation of **soil**	M3	53.76	716.03	38,493.77

Annexure- 21.14		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		NED
Name of the Sub-Division : -		Nimapada
Name of the Section : -		Nimapada-1
Name of the Work :-		Proposal for Bifurcation of existing 11 KV OMFED Feeder load emanating from 33/11 KV Nimapada PSS by using 11kV RMU to mitigate overloading issue & to improve reliability.
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A- Supply and Laying of 11kV 1C, 630sqmm UG Cable of length = 0.04 KM, 3 run without spare run.	26,38,950.37
2	PART B: Construction of 11kV Feeder outgoing DP with isolator & Earth switch.	2,92,205.32
3	PART C- Supply and Laying of 11kV 3C, 400sqmm UG Cable of length = 0.8 KM, with one run spare.	1,08,56,119.92
4	11kV Line Length with 40 Mtr. Span using 100 SQ.MM. -AAA Conductor	8,06,775.75
5	PART E: Dismantling of Materials	7,300.49
6	**Total Gross**	**1,46,01,351.84**
Total estimated cost is Rs. 1.46 Cr.		

PART A- Supply and Laying of 11kV 1C, 630sqmm UG Cable of length = 0.04 KM, 3 run without spare run.					
Supply Portion					
Sl. No.	**Description of items**	**Unit**	**Quantity**	**Rate (in Rs.)**	**Amount (in Rs.)**
1	**Supply of materials for 11kV, 1Core, 630sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 1C, 630sqmm cable (open trench)***	***M***	***40***		
1.1	Supply of 11kV, 1Core, 630sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	120	1,037.00	1,24,440.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 630sqmm, HT UG Cable kits	EA	3	7,220.00	21,660.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 630sqmm, HT UG Cable kits	EA	3	7,390.00	22,170.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 110mm diameter, PE 80- PN8 for laying of 11kV U/G cable	M	120.00	261.00	31,320.00

ANNEXURE-21.15		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-I
Name of the Sub-Division : -		SDO-1
Name of the Section : -		Delta
Name of the Feeder: -		11kV Shatabdi Nagar
Name of the Work :-		Proposal for Bifurcation of 11kV Shatabdi Nagar Feeder for mitigation of overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length- 0.82 CKM using 3Cx400mm2 XLPE UG cable from near Watco SS to City Womens College Chowk. 2. Installation of 2 Nos. of RMU.	1,29,58,843.37
2	Part-B:- 1. Augmentation of 11kV Unit-8 feeder of length 0.5 CKM. 2. Augmentation of 11kV Shatabdi Nagar feeder of length-4 CKM. 3. Construction of 11kV New O/H line of length 0.5 CKM for linking with 11kV Shatabdi Nagar	75,45,755.09
3	Part-C Dismantling.	2,06,360.17
4	**Total Gross**	**2,07,10,958.62**
Total estimated cost is Rs. 2.07Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length- 0.82 CKM using 3Cx400mm2 XLPE UG cable from near Watco SS to City Womens College Chowk.

2. Installation of 2 Nos. of RMU.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***600***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***220***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	820	2,375.00	19,47,500.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	2	15,950.00	31,900.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	8	8,260.00	66,080.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	6	2,900.00	17,400.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	600.00	812.00	4,87,200.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***2***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	12,62,647.00	25,25,294.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**50,82,633.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	820	110.00	90,200.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	16	2,000.00	32,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	220	2,970.00	6,53,400.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	600.00	195.00	1,17,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	15,000.00	30,000.00
	Sub Total (Erection Portion) (in Rs.)				**9,22,600.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	552		
1.1.a	Earth work excavation of **soil**	M3	463.68	716.03	3,32,008.79
1.1.b	Earth work excavation of **hard rock**	M3	198.72	1,759.39	3,49,625.98
1.2	Back filling with excavated soil outside and above the trench	M3	662.4	220.00	1,45,728.00
1.3	Road Repair and restoration charges	KM	0.3	92,94,727.82	27,88,418.35
2	**Civil works for U/G Cable laying in Trench**				

2.1	Cable Trench with RCC Wall	RM		16,703.11	-
2.2	Cable Trench with Brick Wall	RM		13,124.93	-
3	**RMU Civil works**				
3.1	RMU Plinth	EA	2	1,71,056.00	3,42,112.00
4	**Fencing**				
a	**GI Chain link**	EA	**2**		
b	**Boundary Wall**	EA			
4.1	GI chain link fencing for RMU	RM	36	4,167.57	1,50,032.60
4.2	Boundary wall Fencing for RMU	RM	0	11,173.88	-
5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	4	3,784.73	15,138.92
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	27	1,035.17	27,949.59
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	2	1,000.00	2,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	0.82	10,470.00	8,585.40
	Sub Total (Civil Portion) (in Rs.)				**41,61,599.63**

ANNEXURE-21.17	
TP CENTRAL ODISHA DISTRIBUTION LIMITED	
Name of the Division :-	KHD
Name of the Sub-Division : -	Begunia
Name of the Section : -	Rajsunakhala
11kV feeder name : -	11kV Sanapadar feeder
Name of the Work :-	Proposal for augmentation of existing 11 KV Sanapadar Feeder emanating from 33/11 KV Binodpada PSS to mitigate the overloading issue.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Augmentation of 9.5 CKM 11kV O/H Line using 100 SQ.MM. -AAA Conductor over existing and new intermediate pole. (Refer PSLD point A1-B1)	1,37,82,522.67
2	PART B: Augmentation of 2.025CKM 11kV O/H Line Length using 100 SQ.MM. -XLPE AAA Covered Conductor over existing and new intermediate pole. (Refer PSLD point B1-C1 & D-E)	37,16,745.16
3	PART C: Construction of 1 no.11 KV Line Protecting Guarding on Single Pole. (Refer PSLD point D-E)	28,797.88
4	PART D: Dismantling of Materials	4,92,243.20
5	**Total Gross**	**1,80,20,308.90**
Total estimated cost is Rs. 1.80 Cr.		

PART A: Augmentation of 9.5 CKM 11kV O/H Line using 100 SQ.MM. -AAA Conductor over existing and new intermediate pole. (Refer PSLD point A1-B1)

ANNEXURE-21.18

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	NYED
Name of the Sub-Division :-	Itamati
Name of the Section : -	Itamati
Name of the Work :-	Proposal for augmentation of existing 11 KV Itamati Feeder emanating from 33/11 KV Itamati PSS to mitigate the overloading issue.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Augmentation of 3 CKM 11kV O/H Line using 100 SQ.MM. -AAA Conductor.	24,26,204.22
2	PART B: Augmentation of 1 CKM 11kV O/H Line using 100 SQ.MM. -XLPE AAA Covered Conductor.	10,10,769.98
3	Standard BoQ and Estimate for Dismantling of Materials	61,377.70
4	**Total Gross**	**34,98,351.90**

Total estimated cost is Rs. 0.35 Cr.

PART A: Augmentation of 3 CKM 11kV O/H Line using 100 SQ.MM. -AAA Conductor.

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	CED	
Name of the Sub-Division : -	NIALI	
Name of the Section : -	NIALI	
Name of the Work :-	Proposal for augmentation/refurbishment of 4.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor along with construction of 0.16 CKM 11 kV line for N-1 connectivity between 11 kV Bilasuni(Tola) & Kaliaghai Fdr to mitigate overloading issue.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: 1. Augmentation of 1.1 CKM 11 kV line using 100 Sq.mm. AAA Conductor (Poles is not required) (Refer PSLD A-E) 2. Augmentation of 3.4 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor (Refer PSLD E-B) 3. Construction of 0.16 CKM 11 kV O/H line using 100 Sq.mm. AAAC & 11 Mtr. WPB Pole for N-1 connectivity between 11 kV Tola & Kaliaghai FDR (Refer PSLD C-D)	4,643,603.23
2	Part B: Dismantling	112,625.10
	Total Amount	**4,756,228.33**
	Total Amount (In Cr.)	**0.48**
Total estimated cost is Rs. 0.48 Crore. (On TPCODL Capex Scheme)		

PART A:

1. Augmentation of 1.1 CKM 11 kV line using 100 Sq.mm. AAA Conductor (Poles is not required) (Refer PSLD A-E)

2. Augmentation of 3.4 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor (Refer PSLD E-B)

3. Construction of 0.16 CKM 11 kV O/H line using 100 Sq.mm. AAAC & 11 Mtr. WPB Pole for N-1 connectivity between 11 kV Tola & Kaliaghai FDR (Refer PSLD C-D)

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	CED	
Name of the Sub-Division : -	GOPALPUR	
Name of the Section : -	ADASPUR	
Name of the Work :-	Proposal for augmentation/refurbishment of 2.6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor to mitigate overloading issue of 11 kV Sundargram feeder.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 2.6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC (Refer PSLD A-B,C-D,G-F)	2,670,962.73
2	PART B: Installation 1 Nos of 11 KV 4 Pole using WPB GI Pole 160x152 (11Mtr. Long) with 4 Nos of AB Switch.	523,973.29
3	PART C: Construction 1 No of Protecting Guarding on Double Pole for Road Crossing (Refer PSLD)	32,271.30
4	Part D: Dismantling	65,072.28
	Total Amount	**3,292,279.59**
	Total Amount (In Cr.)	**0.33**
Total estimated cost is Rs. 0.33 Crore. (On TPCODL Capex Scheme)		

PART A: Augmentation of 2.6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC (Refer PSLD A-B,C-D,G-F)

Name of the Sub-Division : -	Adaspur	
Name of the Section : -	Niali	
Name of the Work :-	Proposal for augmentation of of 2 CKM O/H line of 11 kV adaspur Fdr. using 100 Sq.mm XLPE AAA Conductor & 11 Mtr. WPB Pole to mitigate overloading issue.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 2 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) using 100 Sq.mm. XLPE AAAC (Refer PSLD)	2,736,752.08
2	PART B: Installation of 02 Nos of 11 kV line protecting guarding on Single Pole for Road Crossing having span 20 Mtr. each(Refer PSLD)	56,502.88
3	Part C: Dismantling	50,055.60
	Total Amount	**2,843,310.55**
	Total Amount (In Cr.)	**0.28**
Total estimated cost is Rs. 0.28 Crore. (On TPCODL Capex Scheme)		

PART A: Augmentation of 2 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) using 100 Sq.mm. XLPE AAAC (Refer PSLD)

No. of DP required Without AB switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8035)	1
