2	PART-B: Installation of 11 KV line protecting guarding of 1 No span having span 40 Mtr. (Refer PSLD)	30,437.19
3	PART C: Dismantling Portion	38,614.32
	Total Amount	**1,817,370.58**
	Total Amount (In Cr.)	**0.18**
Total estimated cost is Rs. 0.18 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 0.18 Cr. (For detailed BoQ refer Annexure-12.55)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

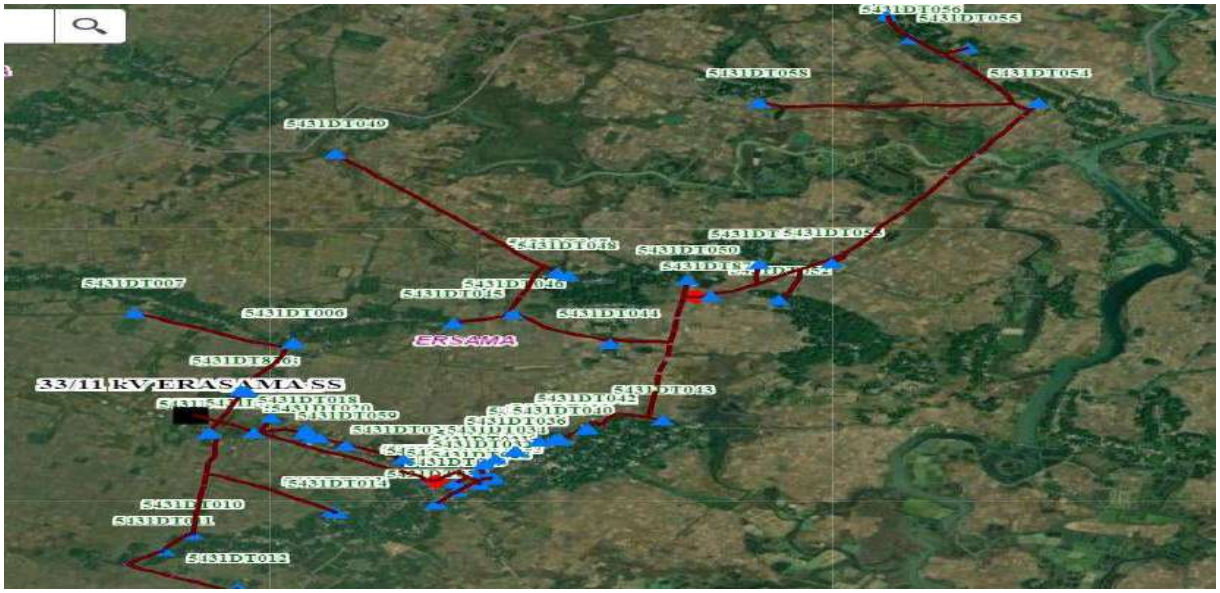
Benefit to the system and consumers:

- Reliability will be improved for 11 kV Rangiagarh feeder.
- Feeder restoration will be quick.
- Helps maintain voltage levels and reduce technical losses.
- Enables easier switching operations during faults or planned outages.
- The above arrangement will help to release power supply to upcoming potential consumers.

56.0 Proposal for Reliability improvement of 11kV Ersama Bazar Feeder:

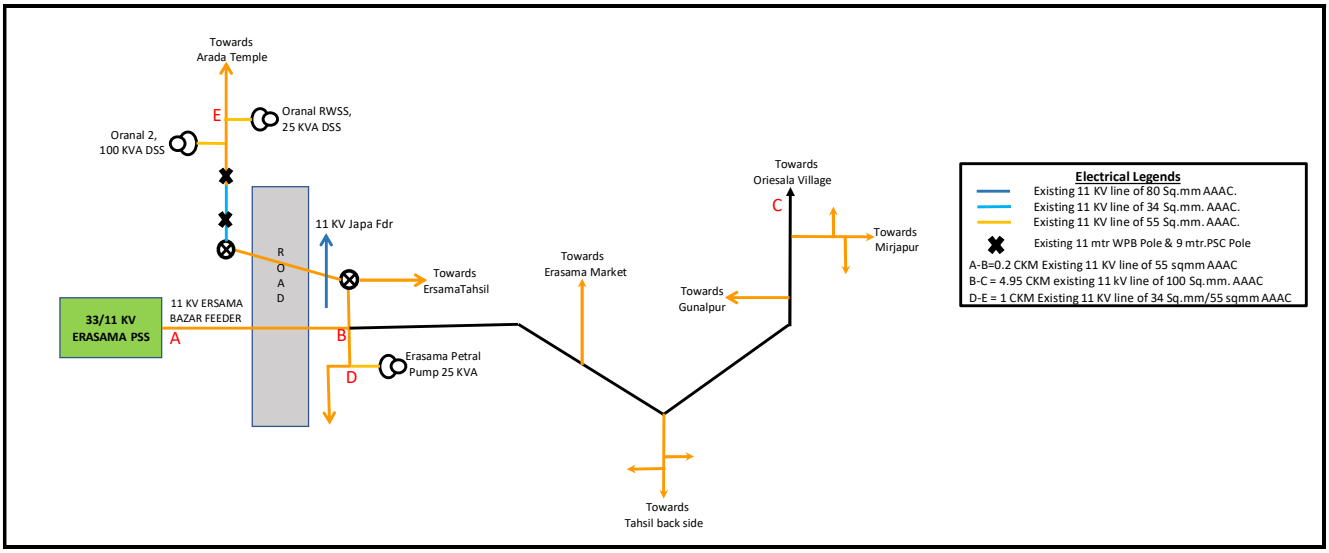
Proposal:

Proposal for augmentation/refurbishment of 11 kV Ersama Bazar feeder for length 1.2 CKM for improvement of reliability.



Requirement/ Need of the proposal:

Objective: Reliability improvement of 11kV Ersama Bazar Feeder.

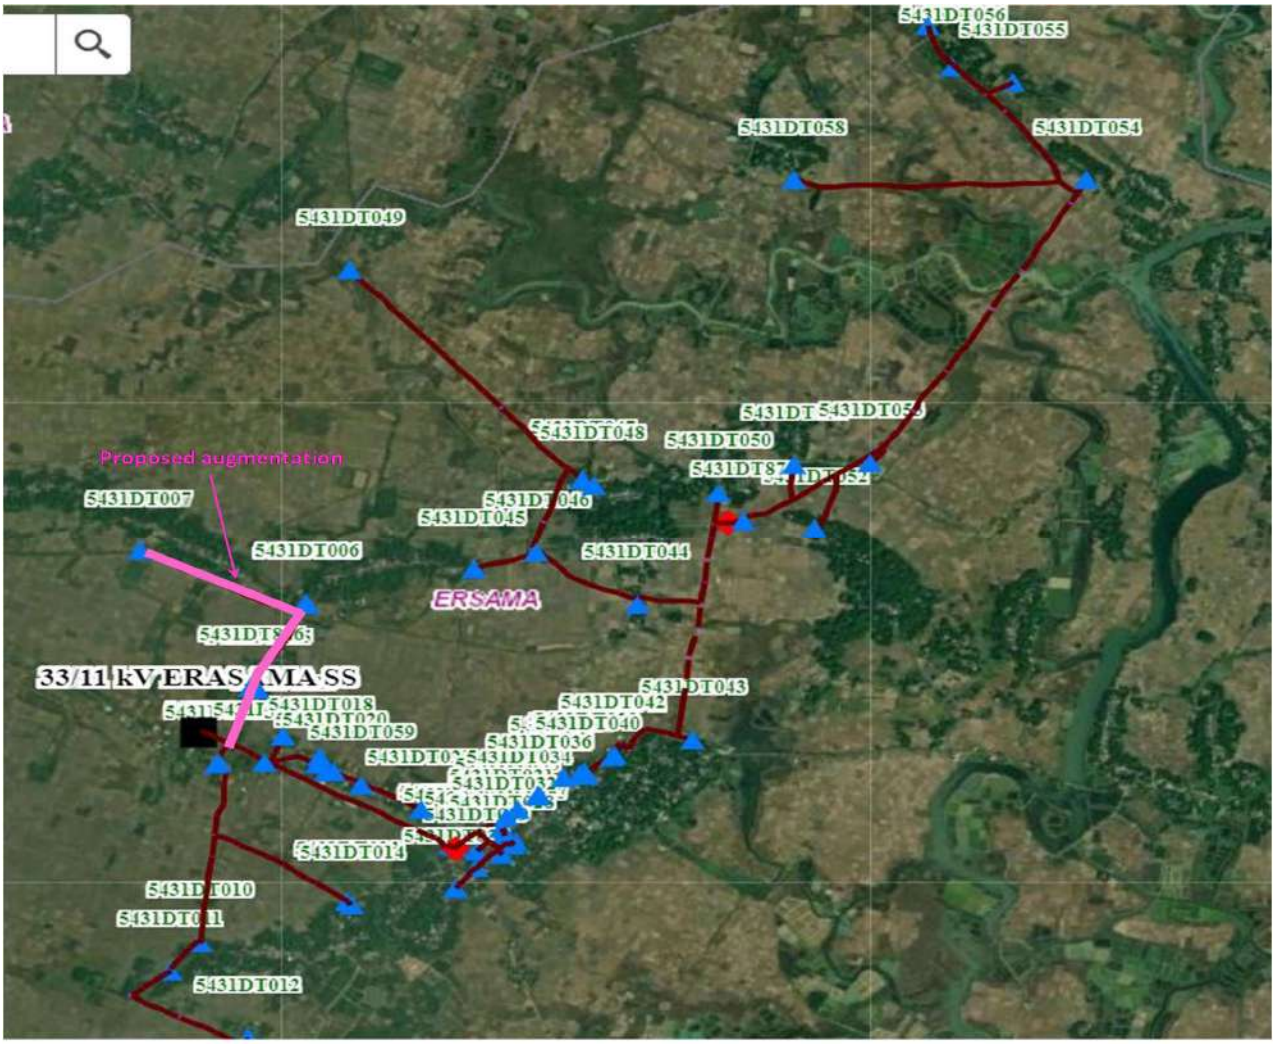


Existing Scenario:

- At present, 11kV Ersama Bazar feeder is emanating from 33/11kV Ersama PSS. The total length of 11kV Ersama Bazar feeder is 17 km and peak load is 1.71 MVA.
- Branch part of arada is very unsafe & line is of 9 Mtr. PSC pole & 34/55 Sq.mm. AAAC with very long span & frequent tripping is observed due to aged conductor.
- At present frequent shutdowns are required for connecting feeder restoration.

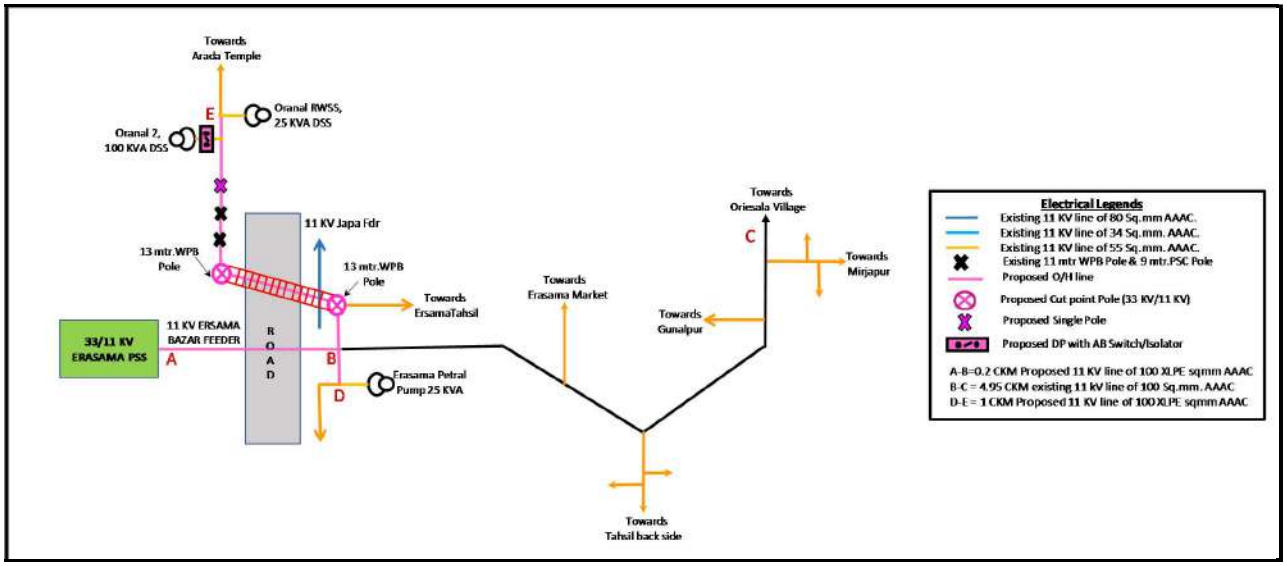
GIS MAP

Existing SLD:



Priority and Timeline of the Project:

Priority: Since the 11kV Ersama Bazar feeder caters to rural area and is experiencing frequent interruptions due to feeder trippings, ageing network and repeated shutdown for restoration and maintenance activities. Total 2121 No's consumer connected to the 11KV Ersama Bazar feeder. No of 11KV feeder tripping in FY26 is 7 No's & 1 No till July 26. In addition, substantial vegetation growth along the feeder corridor and ageing conductors increases the risk of faults, conductor snapping and supply interruptions, posing potential safety hazards to both the public and operating personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.



Proposed Scenario:

- Augmentation of 1.2 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC for strengthening of arada branch part of 11 kV Ersama Bazar feeder.
- Installation of 01 No 11 kV line protecting guarding for road crossing.
- 02 Nos. 13 Mtr. WPB Pole proposed for 11 kV Japa feeder crossing.

GIS Map Proposed:-

Proposed SLD:

Scope of Work:

- Augmentation of 1.2 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) & 100 Sq.mm. XLPE AAA Conductor.
- Installation of 02 Nos. of 13 mtr. WPB pole for providing proper insulation at the 11 kV line crossing.
- Installation of 01 No of 11 kV line protecting guarding having span 40 Mtr.

Proposed Cost with Estimate Break-up:

- The above arrangement will help to release power supply to upcoming potential consumers.

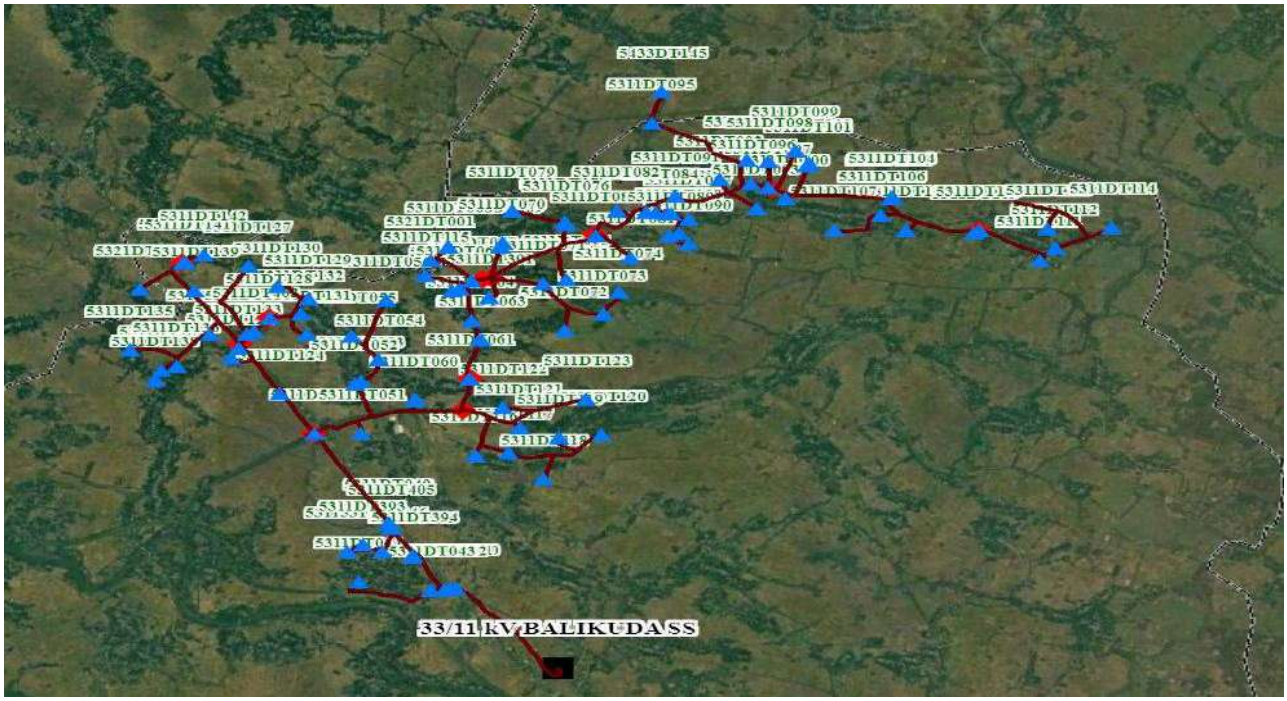
57.0 Proposal for Reliability improvement of 11kV Dengapola Feeder:

Proposal:

Proposal for augmentation of trunk part of 11 kV Dengapola feeder along with construction of 11kV interlinking line between 11 kV Dengapola & Govindpur feeder for length-1.5 KM for reliability purpose.

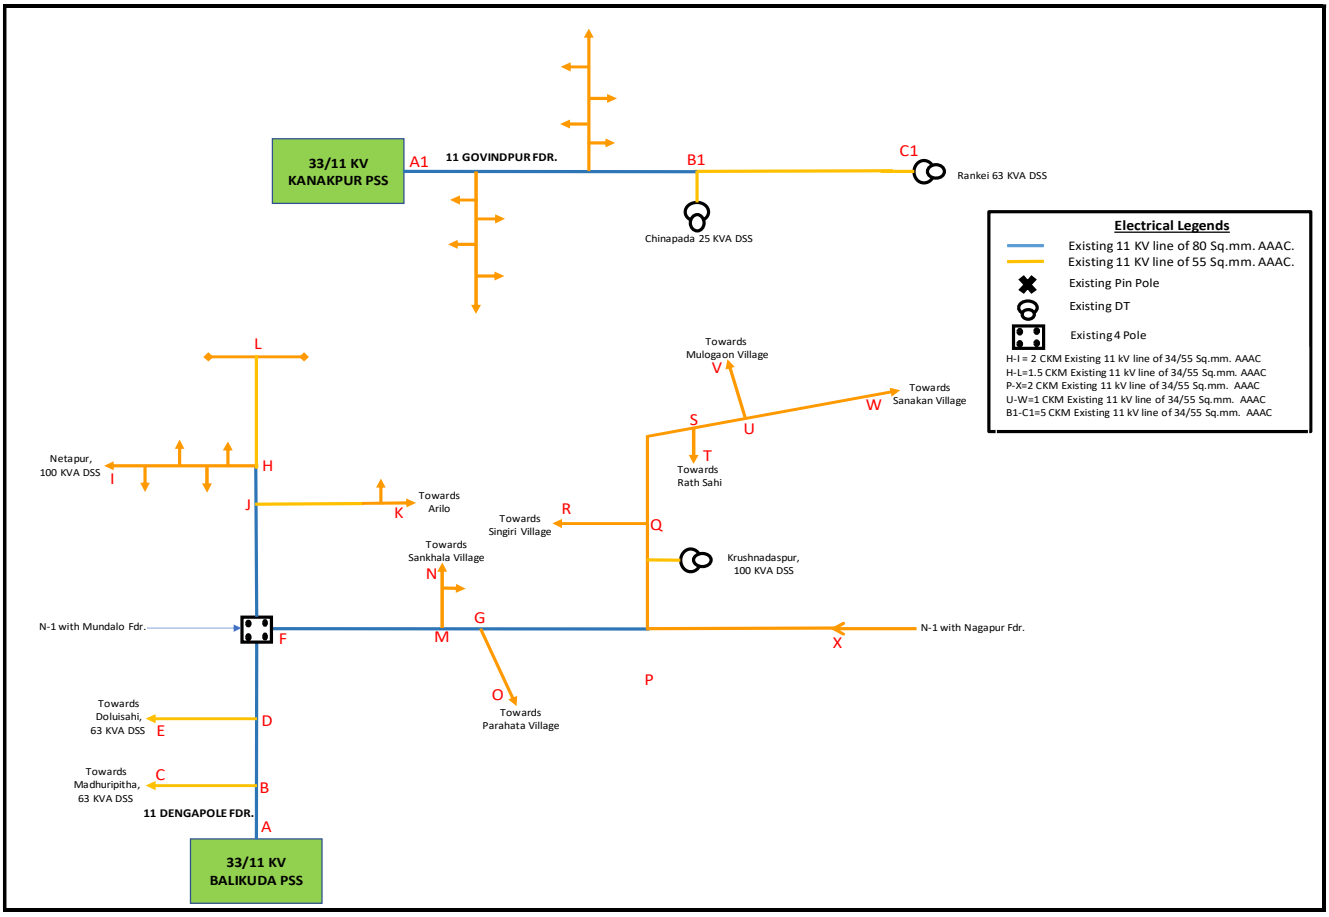
Requirement/ Need of the proposal:

Objective: Reliability improvement of 11kV Dengapola Feeder.



Existing Scenario:

- At present, 11kV Dengapola feeder is emanating from 33/11kV Balikuda PSS. The total length of 11kV Dengapola feeder is 43.8 km and peak load is 2.32 MVA.
- The trunk as well as branch conductor having lower size conductor and is in unsafe condition. Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors



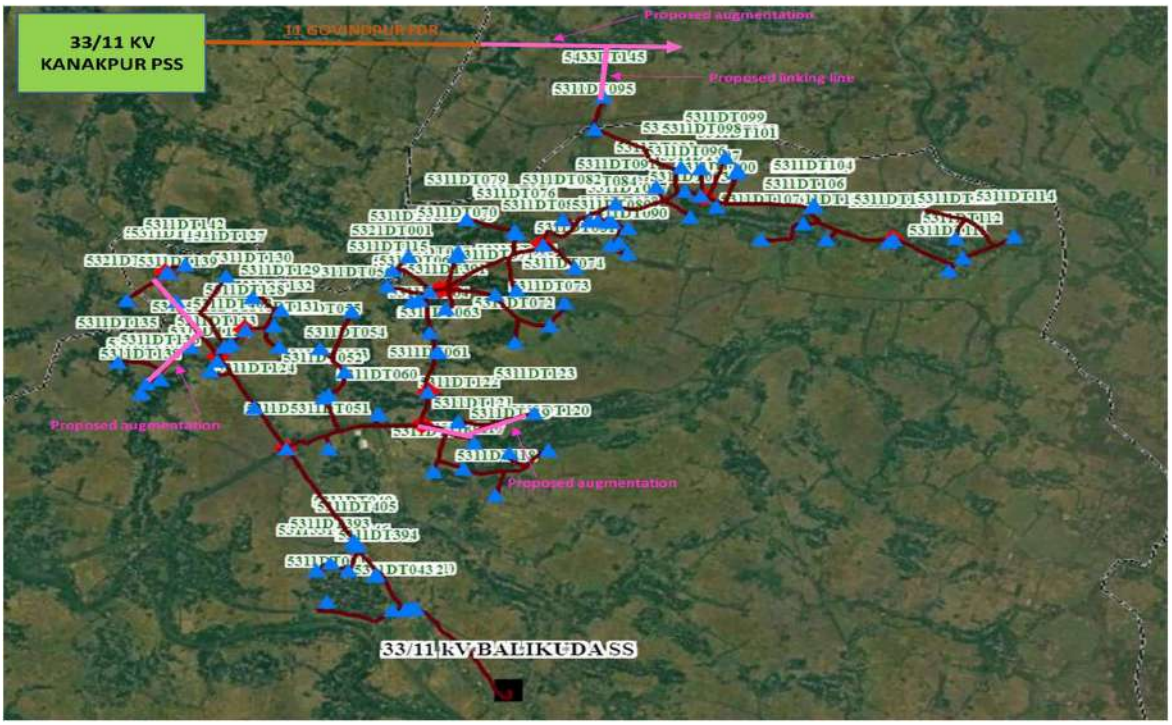
are snapping frequently. In addition, minimum ground clearance has not been maintained in several places over the feeder.

- 11 kV Govindpur feeder is nearby to 11 kV Dengapola and interlinking is possible for reliability improvement.
- Frequent tripping is observed in the 11KV Dengapola feeder which hampers the power supply reliability of Town DTR.
- At present frequent shutdowns are required for connecting feeder restoration.

GIS MAP

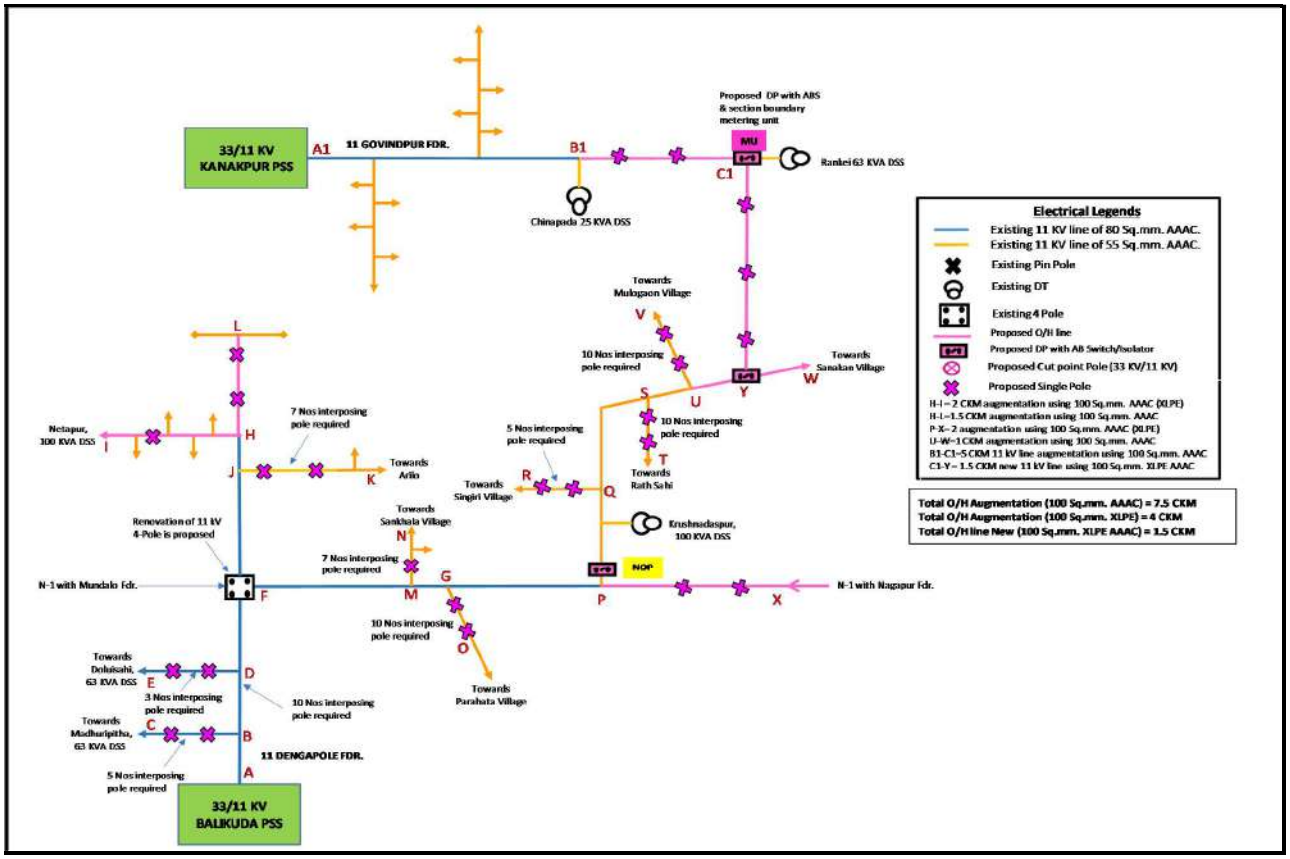
Existing SLD:

Priority and Timeline of the Project:



Priority: Since the 11kV Dengapola feeder is experiencing frequent interruptions due to feeder trippings, ageing network and repeated shutdown for restoration and maintenance activities. Total 4474 No's consumer connected to the 11KV Dengapola feeder. No of 11KV feeder tripping in FY26 is 343 No's & 165 No's till July 26. In addition, long span and ageing conductors increases the risk of faults, conductor snapping and supply interruptions, posing potential safety hazards to both the public and operating personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:



- Augmentation of 11 kV O/H line of 6.5 CKM using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC/ 100 sq.mm. XLPE AAAC for strengthening of existing line of 11 kV Dengapola feeder.
- Augmentation of 11 kV O/H line of 5 CKM using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC for strengthening of existing line of 11 kV Govindpur feeder.
- Construction of 1.5 CKM 11 kV O/ line using 11 Mtr. H-Pole & 100 Sq.mm. XLPE AAAC for N-1 connectivity between 11 kV Dengapola & Govindpur feeder.
- Renovation of existing 4-Pole.
- Installation of 07 Nos of 11 kV line protecting guarding for road crossing.

- Installation of 01 No. HT Meter at the section boundary for energy auditing purpose.

GIS Map Proposed:

Proposed SLD:

Scope of Work:

- Construction of 1.5 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. XLPE AAAC.
- Augmentation of 7.5 CKM 11 kV O/H line from 34/55 Sq.mm. AAAC to 100 Sq.mm. AAAC & installation of interposing pole.
- Installation of 67 Nos interposing pole in existing line.
- Installation of 03 Nos DP with AB Switch for Doluisahi, Amanipatna & Bhagawanpur DSS.
- Augmentation of 4 CKM 11 kV O/H line from 34/55 Sq.mm. AAAC to 100 Sq.mm. XLPE AAAC & installation of interposing pole.
- Renovation of existing 4-Pole.
- Installation of 07 Nos of 11 kV line protecting guarding having span 30 Mtr.
- Installation of 01 No. section boundary meter.

Proposed Cost with Estimate Break-up:

7	PART G: Installation of 01 No. section boundary meter (refer PSLD)	92,915.60
8	**Total Amount**	**23,649,119.29**
	Total Amount (In Cr.)	**2.36**
Total estimated cost is Rs. 2.36 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 2.36 Cr. (For detailed BoQ refer Annexure-12.57)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

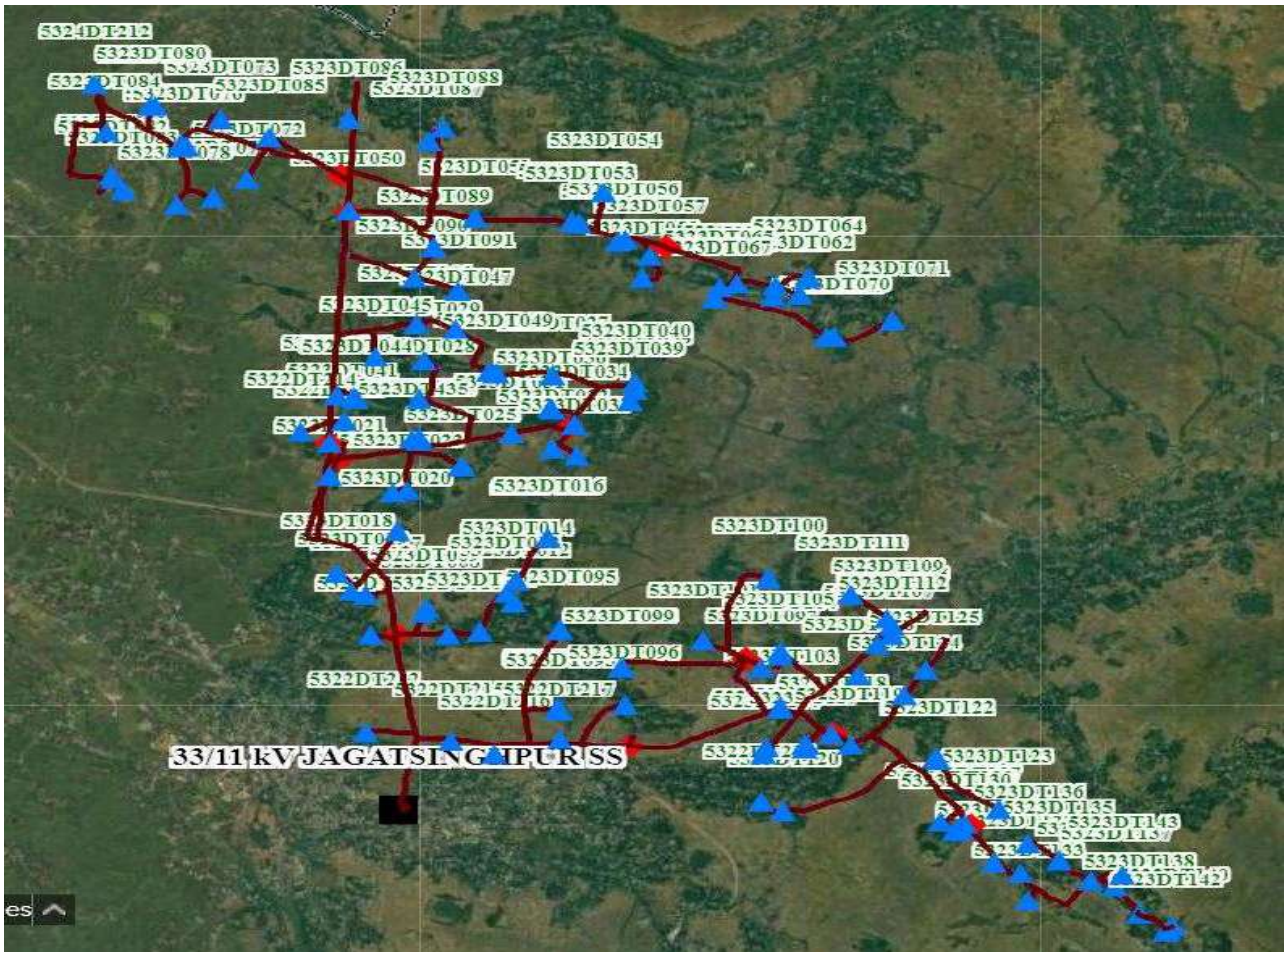
Benefit to the system and consumers:

- Reliability will be improved for 11 kV Dengapola feeder by establishing N-1 connectivity.
- Feeder restoration will be quick.
- By linking 11KV Dengapola feeder and 11KV Govindpur feeder can ensure load diversion in case of requirement to maintain reliability ensuring ring connectivity.
- Helps maintain voltage levels and reduce technical losses.
- Enables easier switching operations during faults or planned outages.
- The above arrangement will help to release power supply to upcoming potential consumers.

58.0 Proposal for Reliability improvement of 11kV Chhapada Feeder:

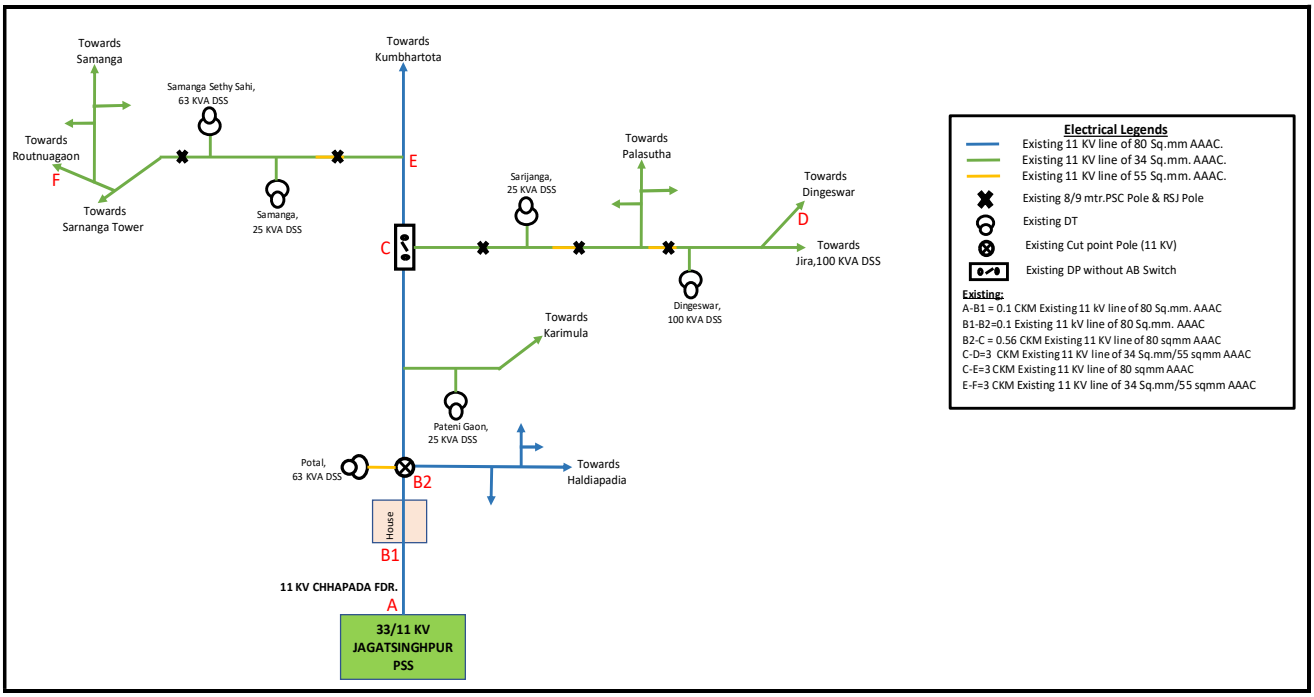
Proposal:

Proposal for augmentation/refurbishment of 11 kV Chhapada feeder for length 6.1 CKM for improvement of reliability.



Requirement/ Need of the proposal:

Objective: Reliability improvement of 11kV Chhapada Feeder.

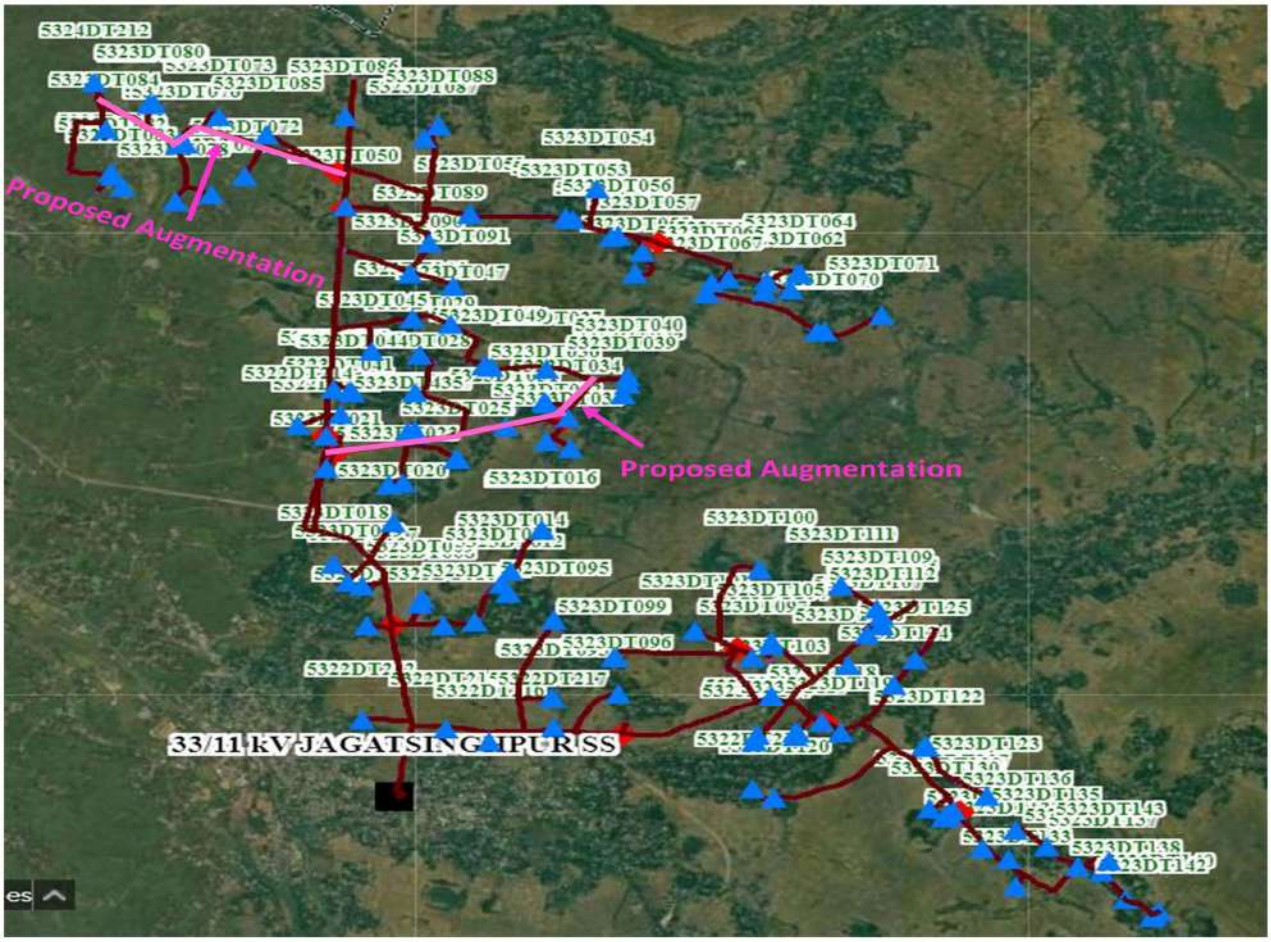


Existing Scenario:

- At present, 11kV Chhapada feeder is emanating from 33/11kV Jagatsinghpur PSS. The total length of 11kV Chhapada feeder is 49 km and peak load is 3.27 MVA.
- Frequent tripping is observed in the 11KV Chhapada feeder due to lower size and aged conductor.
- At present frequent shutdowns are required for connecting feeder restoration.

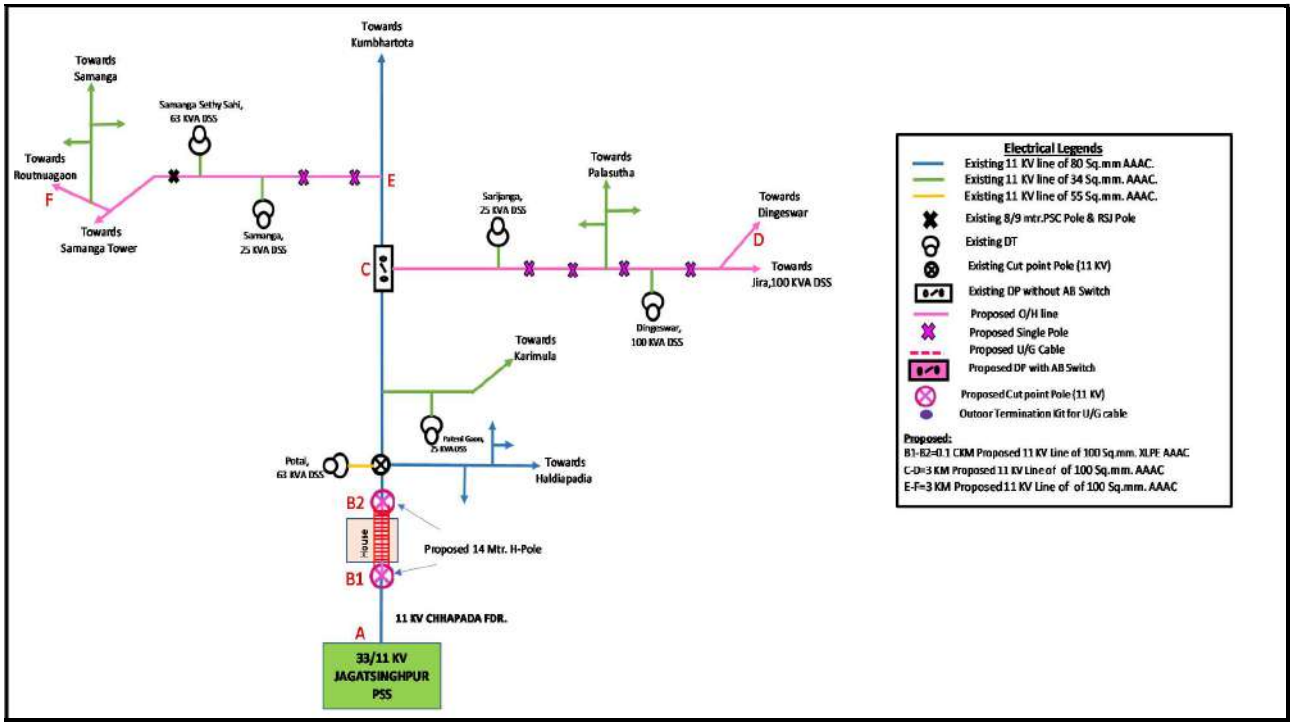
GIS MAP

Existing SLD:



Priority and Timeline of the Project:

Priority: Since the 11kV Chhapada feeder caters to sub urban & rural area and is experiencing frequent interruptions due to feeder tripping, ageing network and repeated shutdown for restoration and maintenance activities. Total 5117 No's consumer connected to the 11KV Chhapada feeder. No of 11KV feeder tripping in FY26 is 11 No's & 6 No's till July 26. In addition, substantial vegetation growth along the feeder corridor and ageing conductors increases the risk of faults, conductor snapping and supply interruptions, posing potential safety hazards to both the public and operating personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.



Proposed Scenario:

- Augmentation of 6.1 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC for strengthening of 11 kV Chhapada feeder.
- Installation of 04 Nos 11 kV line protecting guarding for road crossing.

GIS Map Proposed:-

Proposed SLD:

Scope of Work:

- Construction of 0.1 CKM 11 kV O/H line using 14 Mtr. H-Pole & 100 Sq.mm. XLPE AAAC.
- Augmentation of 6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor.
- Installation of 04 Nos of 11 kV line protecting guarding having span 30 Mtr.

Proposed Cost with Estimate Break-up:

Cost Estimate: ₹ 0.97 Cr. (For detailed BoQ refer Annexure-12.58)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

- Reliability will be improved for 11 kV Chhapada feeder.
- Feeder restoration will be quick.
- Helps maintain voltage levels and reduce technical losses.
- Enables easier switching operations during faults or planned outages.
- The above arrangement will help to release power supply to upcoming potential consumers.

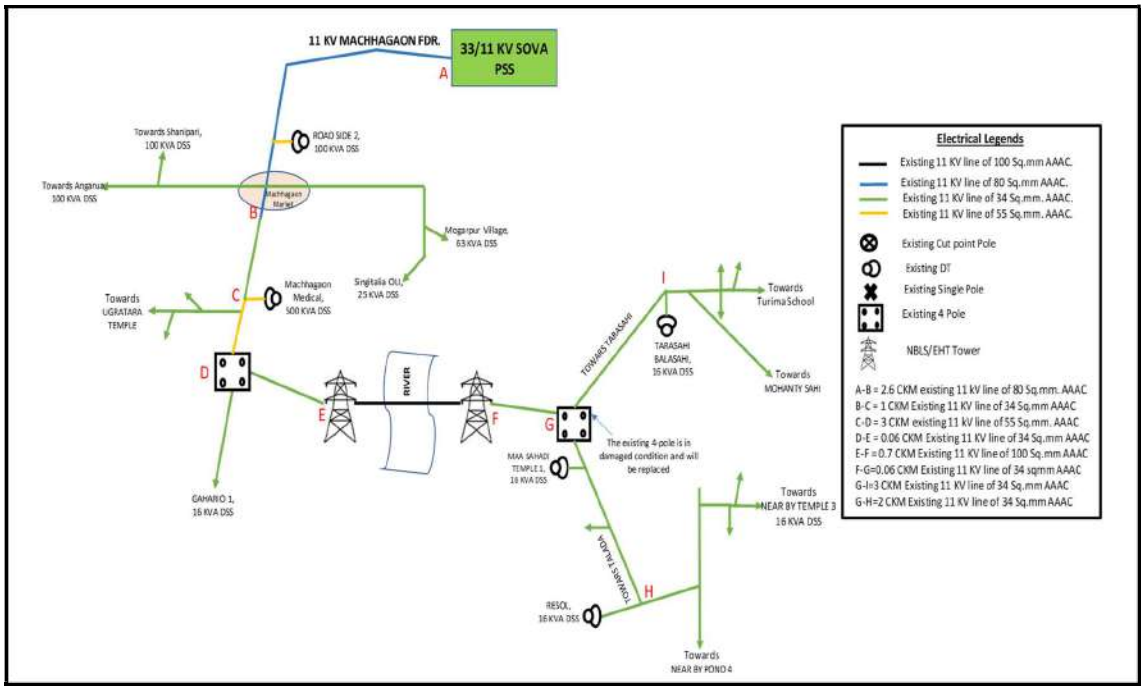
59.0 Proposal for Reliability improvement of 11kV Macchegaon Feeder:

Proposal:

Proposal for augmentation/refurbishment of 11 kV Macchegaon feeder for length 6.12 CKM for improvement of reliability.

Requirement/ Need of the proposal:

Objective: Reliability improvement of 11kV Macchegaon Feeder.



Existing Scenario:

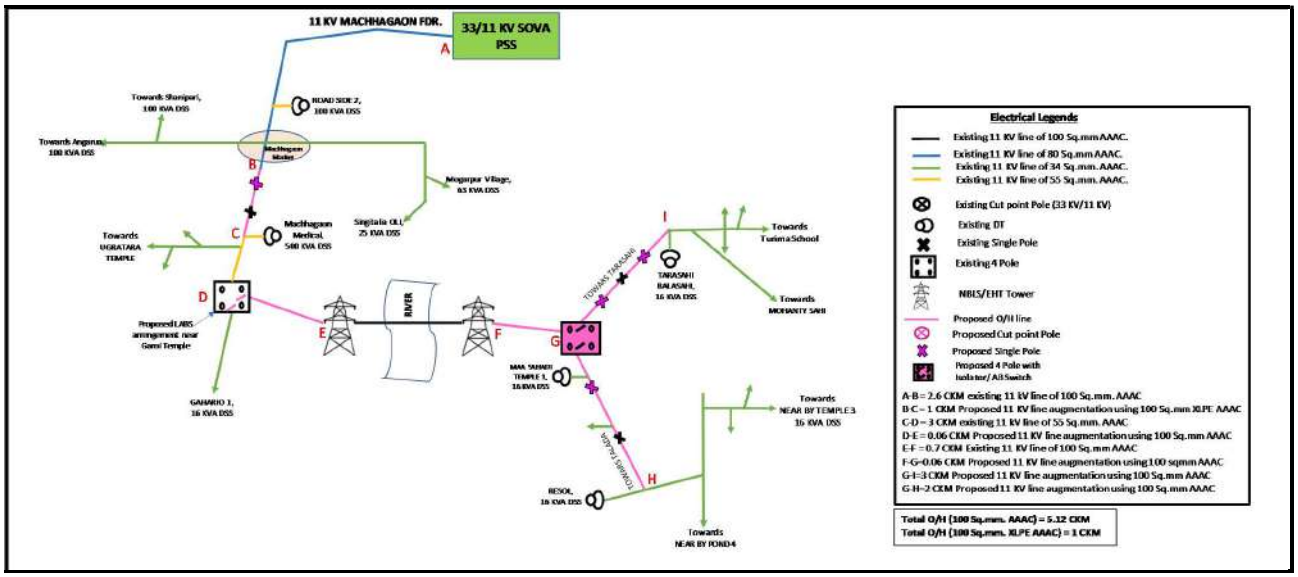
- At present, 11kV Macchegaon feeder is emanating from 33/11kV Sova PSS. The total length of 11kV Macchegaon feeder is 41.8 km and peak load is 2.30 MVA.
- Frequent tripping is observed in the 11KV Macchegaon feeder due to lower size and aged conductor.
- At present frequent shutdowns are required for connecting feeder restoration.

GIS MAP

Existing SLD:

Priority and Timeline of the Project:

Priority: Since the 11kV Macchegaon feeder caters to rural area and is experiencing frequent interruptions due to feeder tripping, ageing network and repeated shutdown for restoration and maintenance activities. Total 4249 No's consumer connected to the 11KV Macchegaon feeder. No of 11KV feeder tripping in FY26 is 59 No's & 104 No's till July 26. In addition, substantial vegetation growth along the feeder corridor and ageing conductors increases the risk of faults, conductor snapping and supply interruptions, posing potential safety hazards to both the public and operating personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.



Proposed Scenario:

- Augmentation of 6.12 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC/100 Sq.mm. XLPE AAAC for strengthening of 11 kV Macchegaon feeder.
- Installation of 01 No. 4-Pole with AB Switch for dropdown of conductor from river crossing tower.
- Installation of 05 Nos 11 kV line protecting guarding for road crossing.

GIS Map Proposed:-

Proposed SLD:

Scope of Work:

- Augmentation of 5.12 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC.

- Augmentation of 1 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. XLPE AAAC.
- Installation of 01 No. 4-Pole with 02 Nos AB Switch.
- Installation of 02 Nos AB Switch in existing 4-Pole.
- Installation of 05 Nos of 11 kV line protecting guarding having span 30 Mtr.

Proposed Cost with Estimate Break-up:

6	**Total Amount**	**9,356,442.85**
	Total Amount (In Cr.)	**0.94**
Total estimated cost is Rs. 0.94 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 0.94 Cr. (For detailed BoQ refer Annexure-12.59)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Reduction of electrocution risk and public safety hazards.
c) Safe operation and isolation of the feeder.
d) Protection of electrical assets against lightening and surge related failure.
e) Improvement in operational safety for maintenance personnel and public.

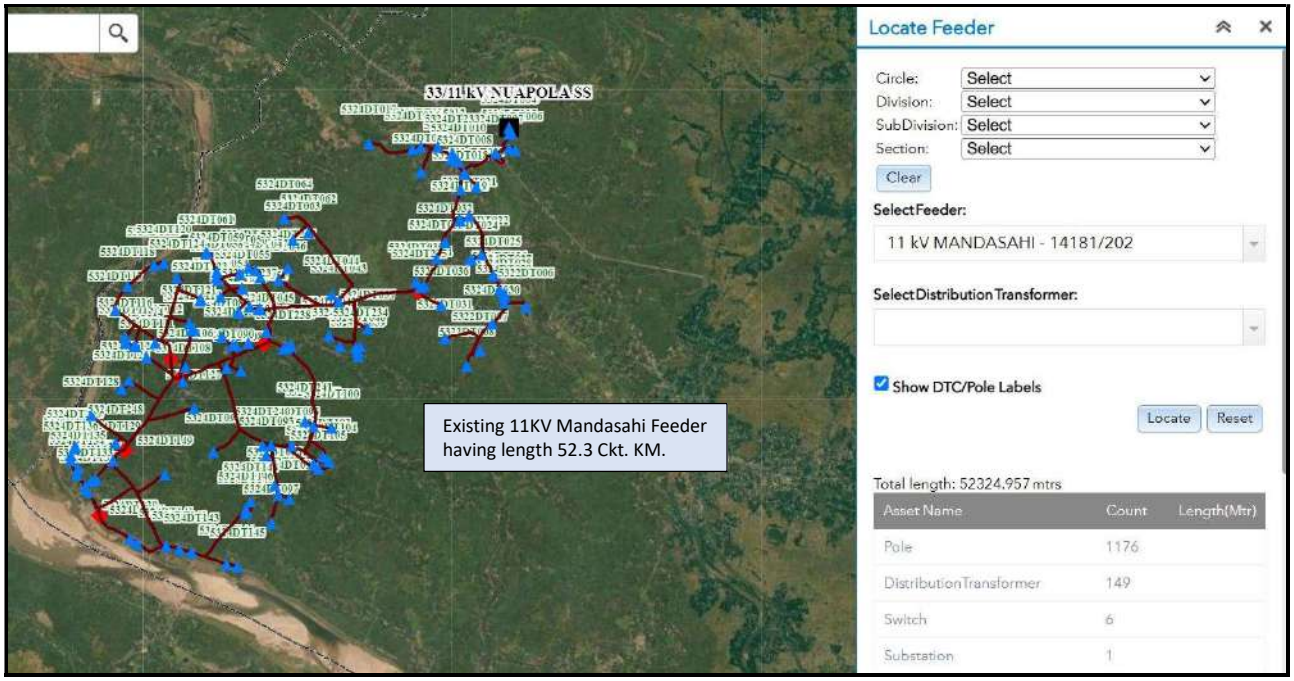
Benefit to the system and consumers:

- Reliability will be improved for 11 kV Macchegaon feeder.
- Feeder restoration will be quick.
- Helps maintain voltage levels and reduce technical losses.
- Enables easier switching operations during faults or planned outages.
- The above arrangement will help to release power supply to upcoming potential consumers.

60.0 Proposal for Length Reduction of 11kV Mandasahi Feeder:

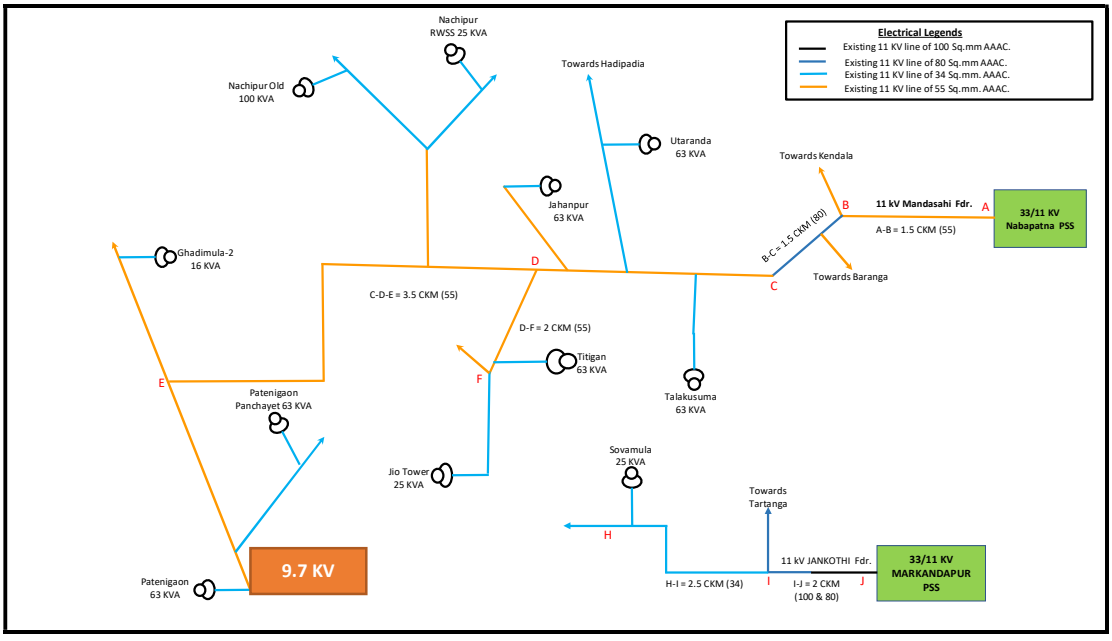
Proposal:

Proposal for reduction in length of 11KV Mandasahi feeder and reliability improvement.



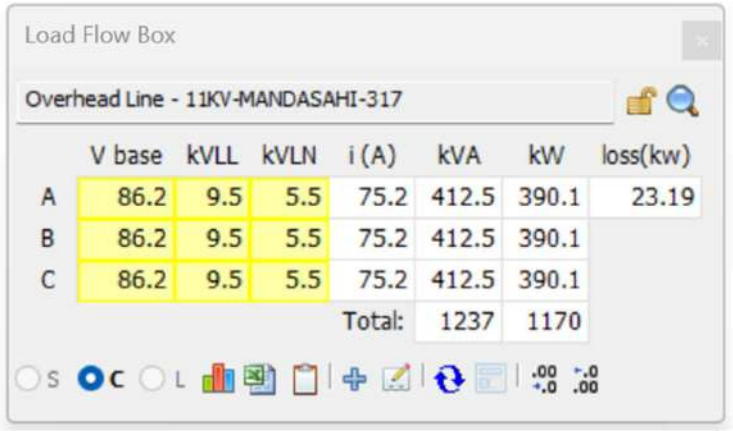
Requirement/ Need of the proposal:

Objective: Length reduction and reliability improvement of 11kV Mandasahi Feeder.



Existing Scenario:

- At present, 11kV Mandasahi feeder is emanating from 33/11kV Nabapatna PSS having a feeder length of 52.3 Ckt. KM and tail end voltage is 9.7 KV.
- Entire 11kV Mandasahi Fdr is of 55/80 Sq.mm. AAAC.
- At present, as the feeder is lengthy in nature therefore consumers are facing low voltage issues at tail end.
- Since the feeder is very lengthy, during any breakdown fault finding takes longer duration and delays the power restoration.



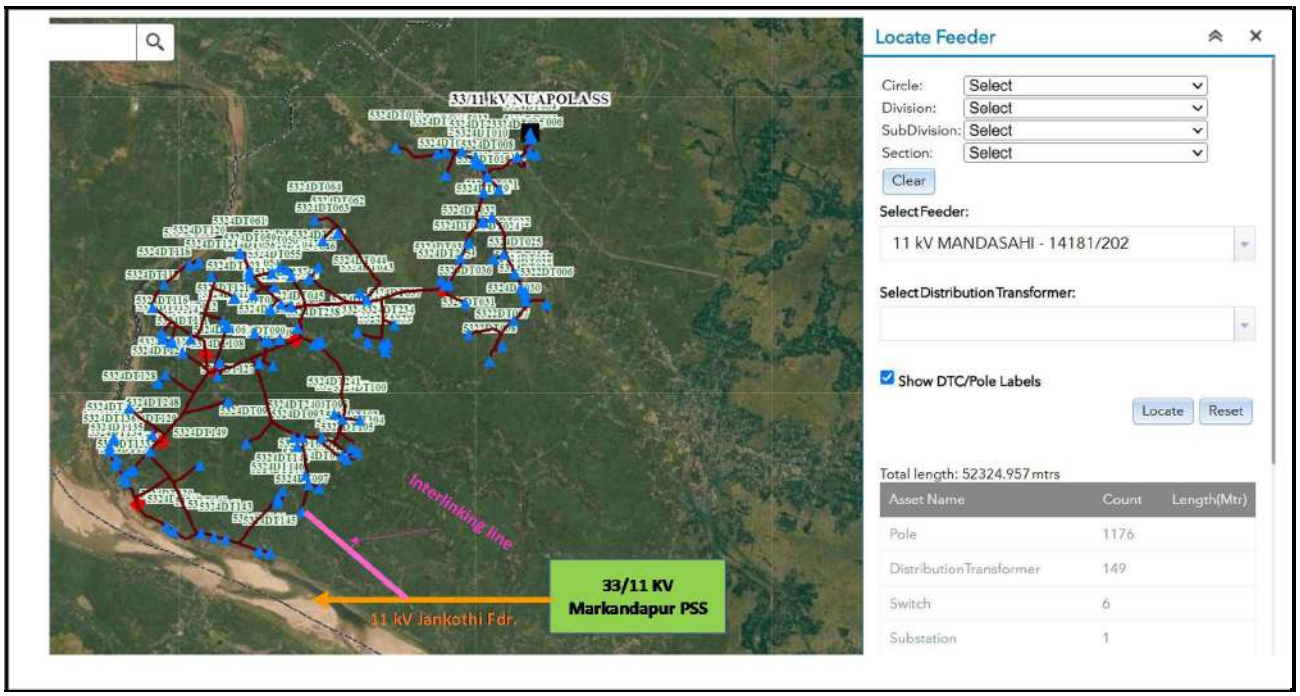
GIS SLD:

Existing SLD:

Tail end Voltage in existing scenario through load flow analysis with 2 years load growth:

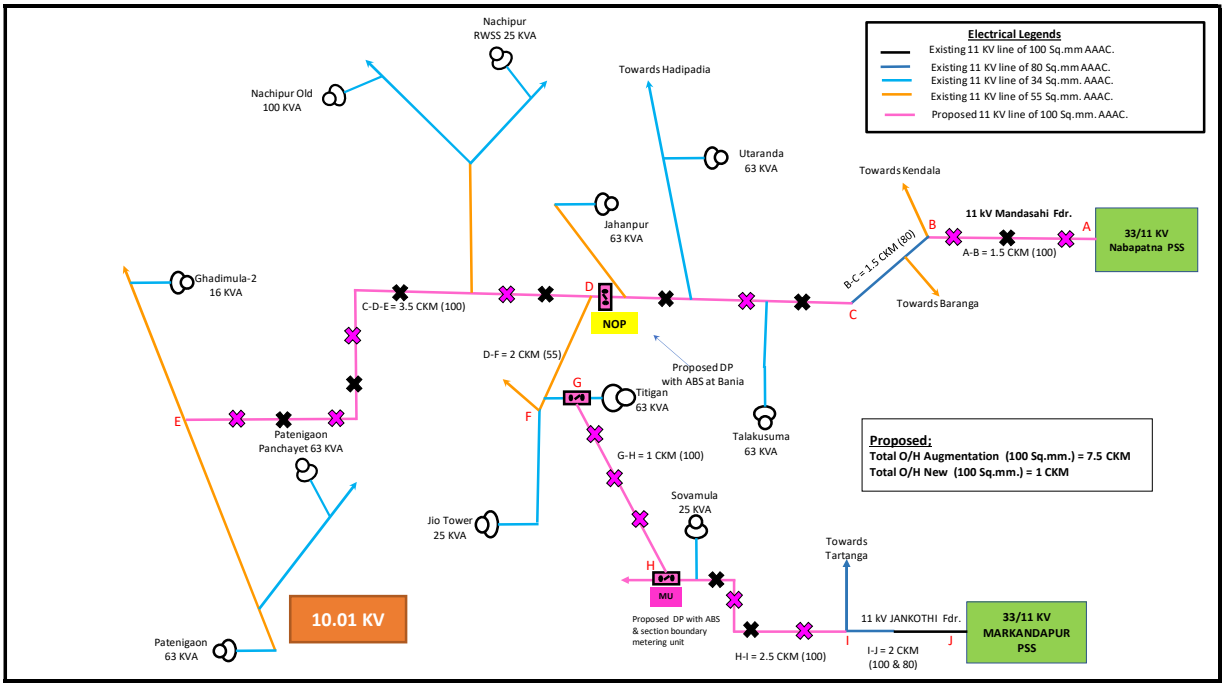
Priority and Timeline of the Project:

Priority: The existing 11kV Mandasahi feeder has a length of 52.3 Ckm in the AS-IS scenario, resulting in a tail-end voltage of 9.7 kV. With the projected load growth, the tail-end voltage is expected to drop further and reach 9.5 kV by Summer-2028 2year load growth. If this issue is not addressed in a timely manner, consumers connected at the far end of the feeder are likely to experience persistent low-voltage conditions, adversely affecting the quality and reliability of power supply.



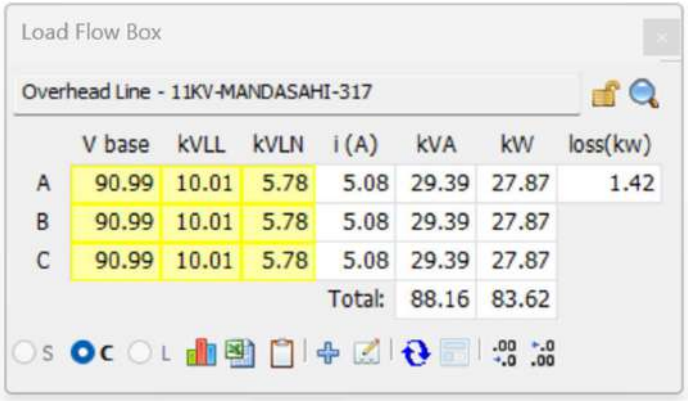
Technical Justification

- As per OERC directive, the 11kV feeder length must be below 50Ckm. In case feeder length is more than the prescribed length, the consumer connected to these feeders will face severe low voltage issues which will cause damage to the appliances or non-functioning of same.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, voltage regulation for the 11kV feeders is (-9% to +6%), i.e., 10.01kV to 11.66kV is required for augmentation / new feeder.
- In AS IS scenario, the voltage at the tail-end of the feeder is 9.7 kV. The voltage regulation of the feeder is not within permissible limits.
- The feeder is facing frequent interruption since the feeder is lengthy & passed through difficult terrains such as Paddy field area, dense vegetation & in narrow market lane area. In case of the any fault it takes longer duration for fault identification & restoration. Total 5199No's consumer connected to the 11KV Mandasahi feeder. No of 11KV feeder tripping in FY26 is 173 No's & 156 No's till July 26.



Proposed Scenario:

- It is proposed for interlinking of existing 11KV Mandasahi feeder with nearby 11KV Jankothi feeder emanating from Markandapur PSS for existing Mandasahi feeder length reduction by construction of 1 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. AAAC .
- Augmentation of 7.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC for strengthening of existing line.
- Installation of 05 Nos of 11 kV line protecting guarding having span 40 Mtr. For road crossing.
- Installation of 01 No. HT Meter at the section boundary for energy auditing purpose.



GIS SLD:

Proposed SLD:

Tail end Voltage in proposed scenario after interlinking through load flow analysis:

	V base	kVLL	kVLN	i (A)	kVA	kW	loss(kw)
A	90.99	10.01	5.78	5.08	29.39	27.87	1.42
B	90.99	10.01	5.78	5.08	29.39	27.87	
C	90.99	10.01	5.78	5.08	29.39	27.87	
				Total:	88.16	83.62	

Length of Sections

	A	B	C	Total
3-phase	31336.49	31336.49	31336.49	31336.49
2-phase	0.0	0.0	0.0	0.0
1-phase	0.0	0.0	0.0	0.0
Total	31336.49	31336.49	31336.49	31336.49

11KV Mandasahi feeder's length has been reduced from 52.3 CKM to 31.3 CKM.

After execution of proposal 11kV Mandasahi feeder Voltage will Improve from 9.7 kV to 10.01 kV and feeder length reduced from 52.3 ckm to 31.3 ckm and voltage of 11kv Jankothi feeder will be 10.1 kV.

Scope of Work:

- Augmentation of 7.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC.
- Construction of 1 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. AAAC.
- Installation of 05 Nos of 11 kV line protecting guarding having span 40 Mtr.
- Installation of 01 No. section boundary meter.

Proposed Cost with Estimate Break-up:

Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 7.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC (Refer PSLD AB, CDE & HI)	9,401,687.65
2	PART B: Construction of 1 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. AAAC (Refer PSLD HI)	2,818,190.33
3	PART C: Installation of 05 Nos of 11 kV line protecting guarding having span 40 Mtr. (Refer PSLD)	152,185.94
4	PART D: Dismantling Portion	462,104.48
5	PART E: Installation of 01 No. section boundary meter (refer PSLD)	92,915.60
6	**Total Amount**	**12,927,084.01**
	Total Amount (In Cr.)	**1.29**
Total estimated cost is Rs. 1.29 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 1.29 Cr. (For detailed BoQ refer Annexure-12.60)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Compliance with the guidelines of voltage regulation in the distribution network.
c) Reduction of electrocution risk and public safety hazards.
d) Safe operation and isolation of the feeder.
e) Protection of electrical assets against lightening and surge related failure.
f) Improvement in operational safety for maintenance personnel and public.

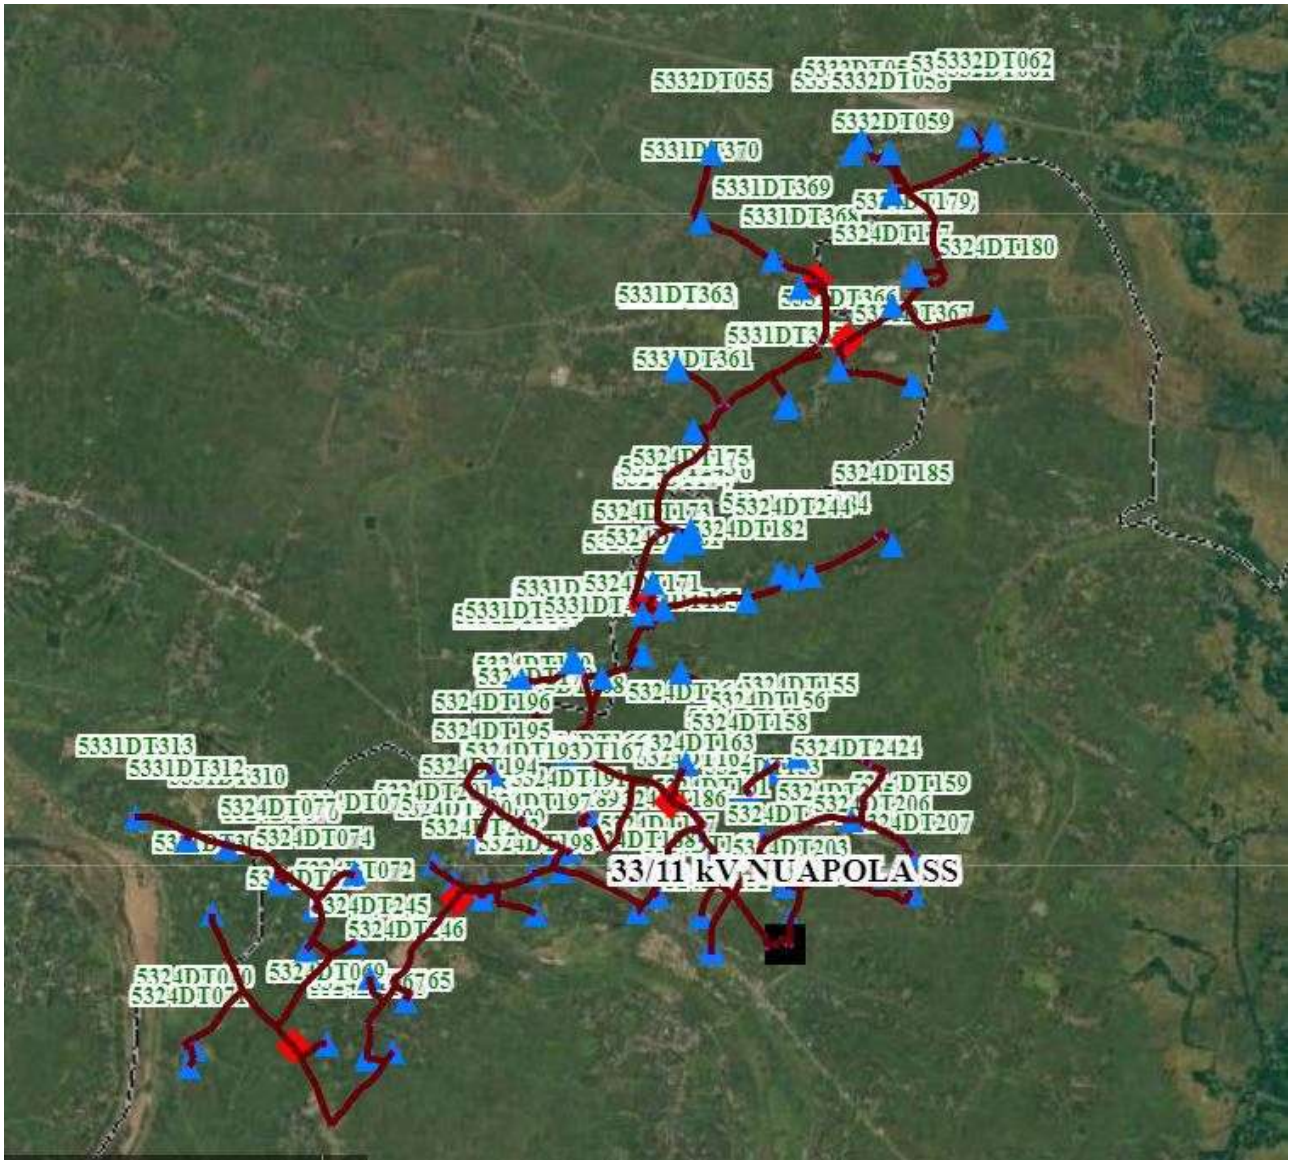
Benefit to the system and consumers:

- 11KV Mandasahi feeder length will be reduced from 52.3 CKM to 31.33 CKM to comply Hon'ble OERC directive to keep 11KV feeder length below 50 Ckt.KM.
- 11KV Mandasahi feeder's tail end voltage improved from 9.5 KV to 10.01 KV & will improve power quality of the all connected consumers to the 11KV feeder.
- Ring connectivity is established between 11KV Mandasahi feeder and 11 kV Jankothi feeder which will be helpful for power supply restorations during breakdown and maintenance works.

61.0 Proposal for Reliability improvement of 11kV Tarikund Feeder:

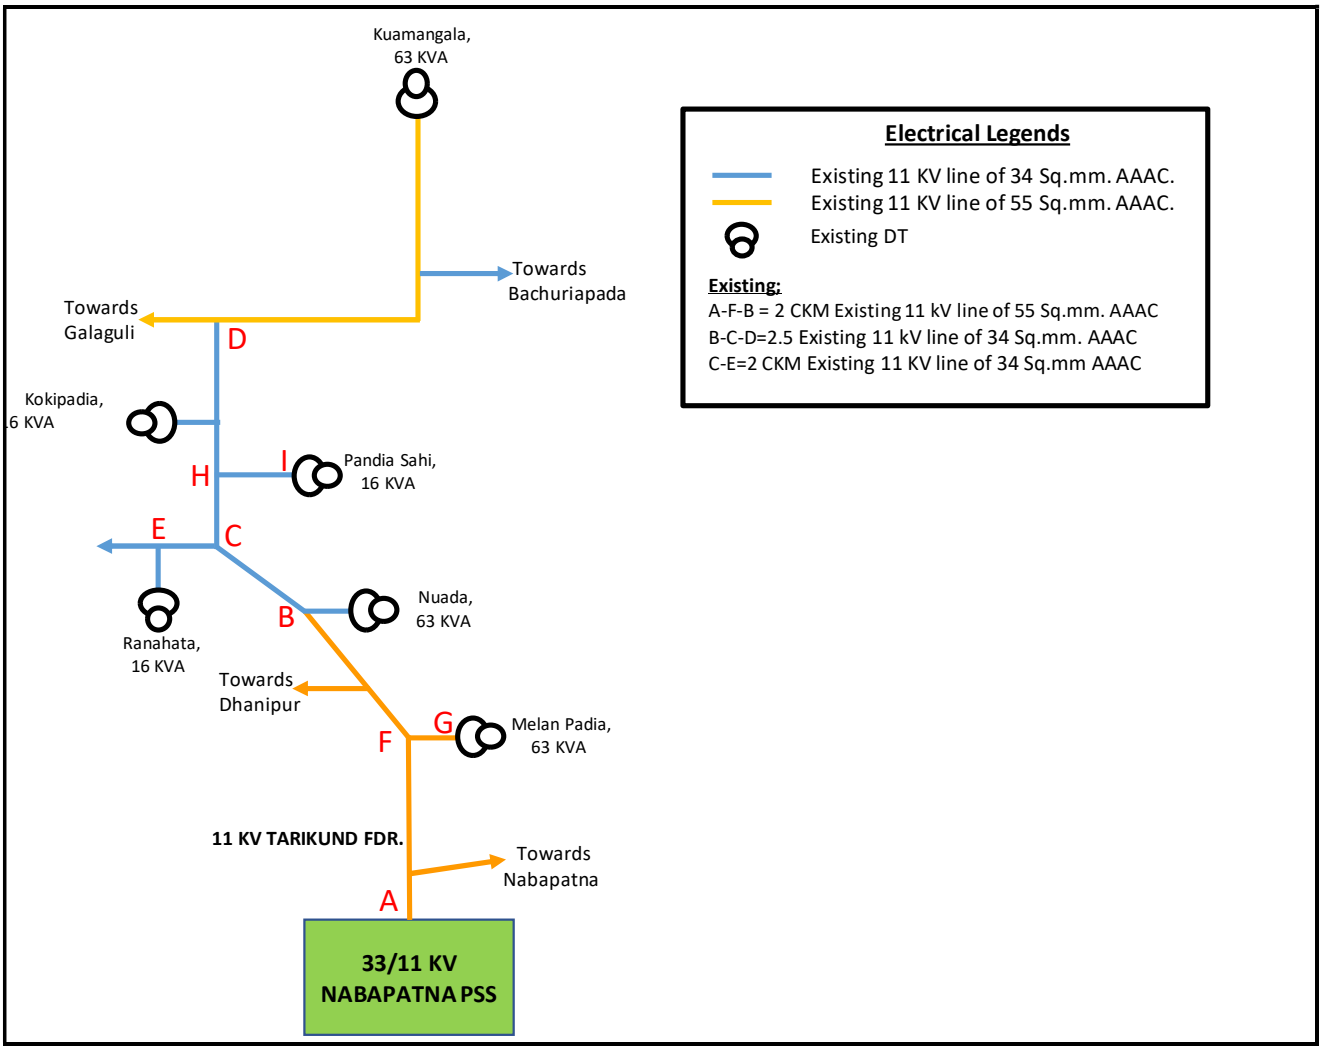
Proposal:

Proposal for augmentation/refurbishment of 11 kV Tarikund feeder for length 4.5 CKM for improvement of reliability.



Requirement/ Need of the proposal:

Objective: Reliability improvement of 11kV Tarikund Feeder.



Existing Scenario:

- At present, 11kV Tarikund feeder is emanating from 33/11kV Nabapatna PSS. The total length of 11kV Tarikund feeder is 41.3 km and peak load is 2.74 MVA.
- Frequent tripping is observed in the 11KV Tarikund feeder due to lower size and aged conductor.
- At present frequent shutdowns are required for connecting feeder restoration.

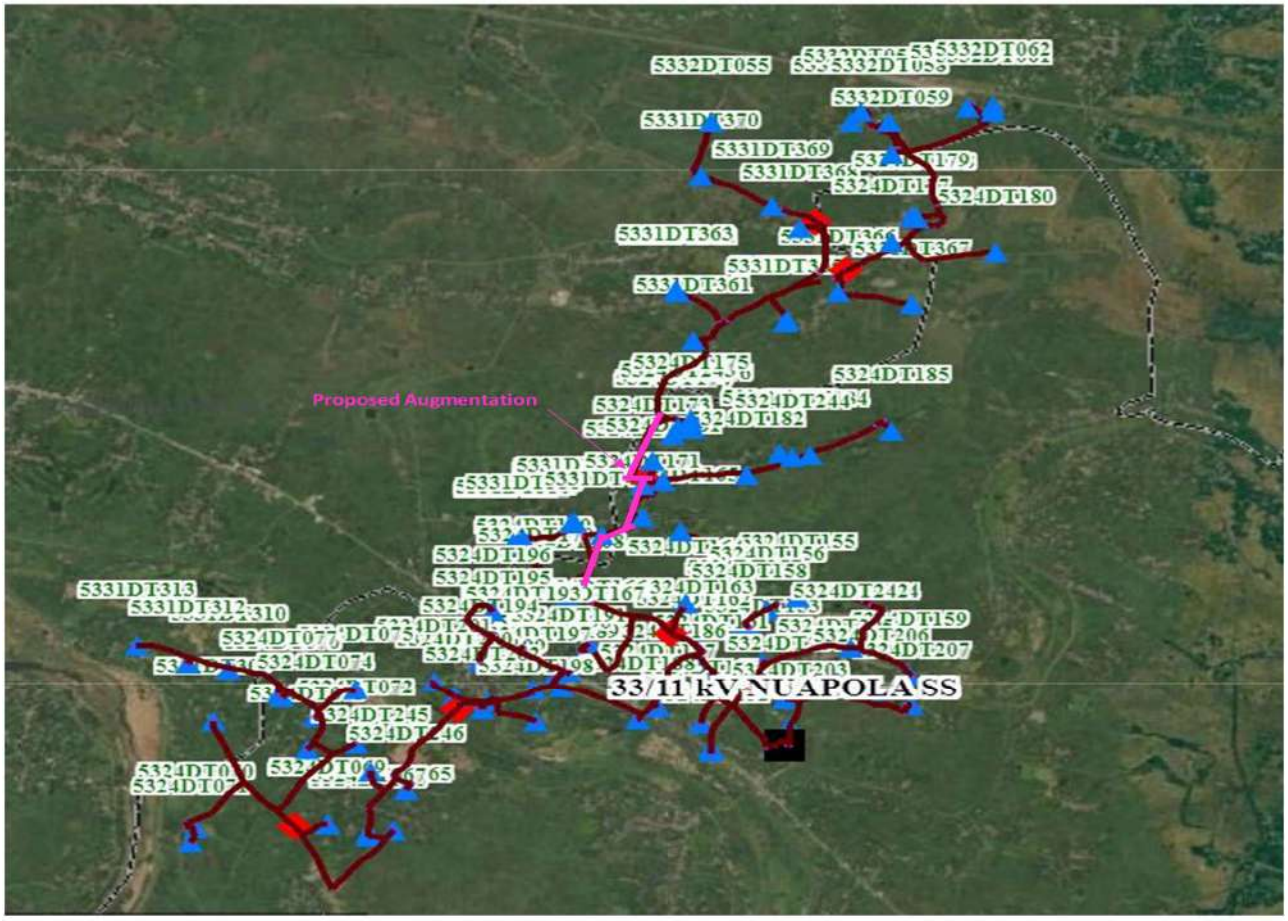
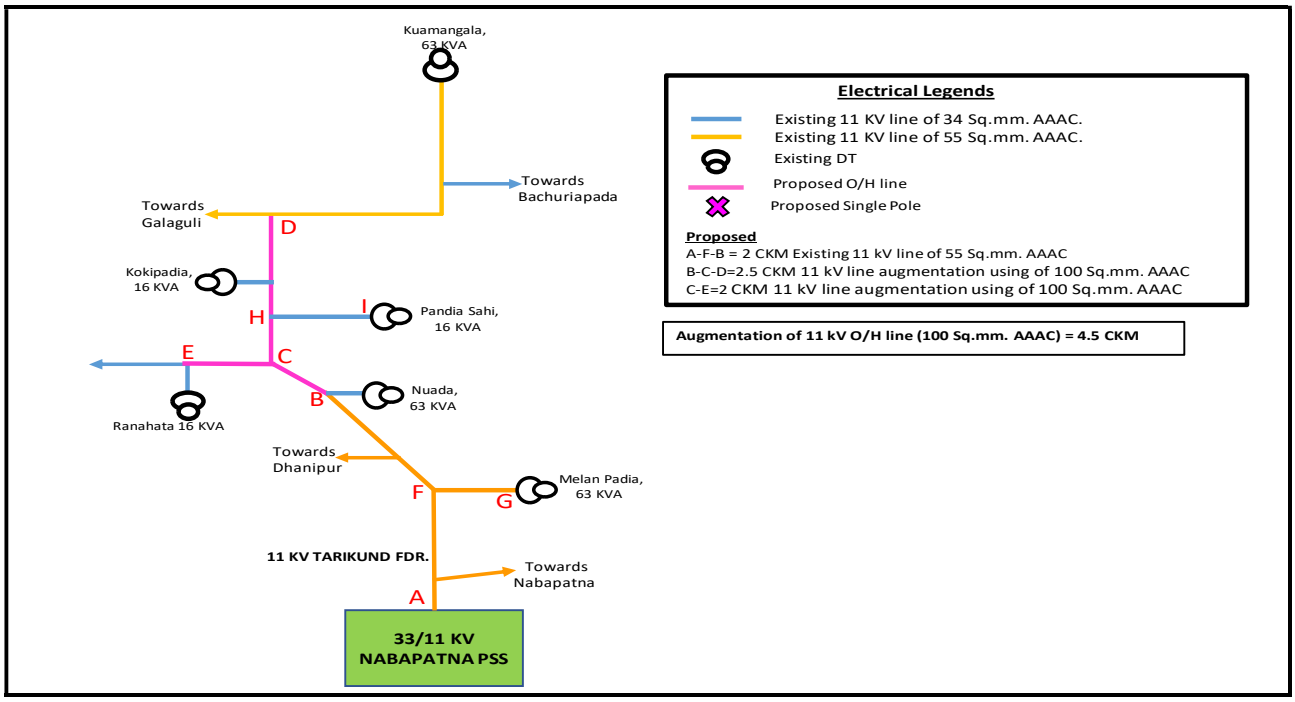
33/11 kV NUAPOLA SS

Existing SLD:



Priority and Timeline of the Project:

Priority: Since the 11kV Tarikund feeder caters to rural area and is experiencing frequent interruptions due to feeder tripping, ageing network and repeated shutdown for restoration and maintenance activities. Total 4138 No's consumer connected to the 11KV Tarikund feeder. No of 11KV feeder tripping in FY26 is 152 No's & 148 No's till July 26. In addition, substantial vegetation growth along the feeder corridor and ageing conductors increases the risk of faults, conductor snapping and supply interruptions, posing potential safety hazards to both the public and operating personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.



Proposed Scenario:

- Augmentation of 4.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC for strengthening of 11 kV Tarikund feeder.
- Installation of 04 Nos 11 kV line protecting guarding for road crossing.

GIS Map Proposed:-

Proposed SLD:

Scope of Work:

- Augmentation of 4.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC.
- Installation of 04 Nos of 11 kV line protecting guarding having span 30 Mtr.

Proposed Cost with Estimate Break-up:

ANNEXURE-12.61

Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 4.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC (Refer PSLD BCD & CE)	6,149,159.59
2	PART B: Installation of 04 Nos of 11 kV line protecting guarding having span 30 Mtr. (Refer PSLD)	117,377.25
3	PART C: Dismantling Portion	191,879.80
4	**Total Amount**	**6,458,416.64**
	Total Amount (In Cr.)	**0.65**
Total estimated cost is Rs. 0.65 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 0.65 Cr. (For detailed BoQ refer Annexure-12.61)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

- Reliability will be improved for 11 kV Tarikund feeder.
- Feeder restoration will be quick.
- Helps maintain voltage levels and reduce technical losses.
- Enables easier switching operations during faults or planned outages.
- The above arrangement will help to release power supply to upcoming potential consumers.

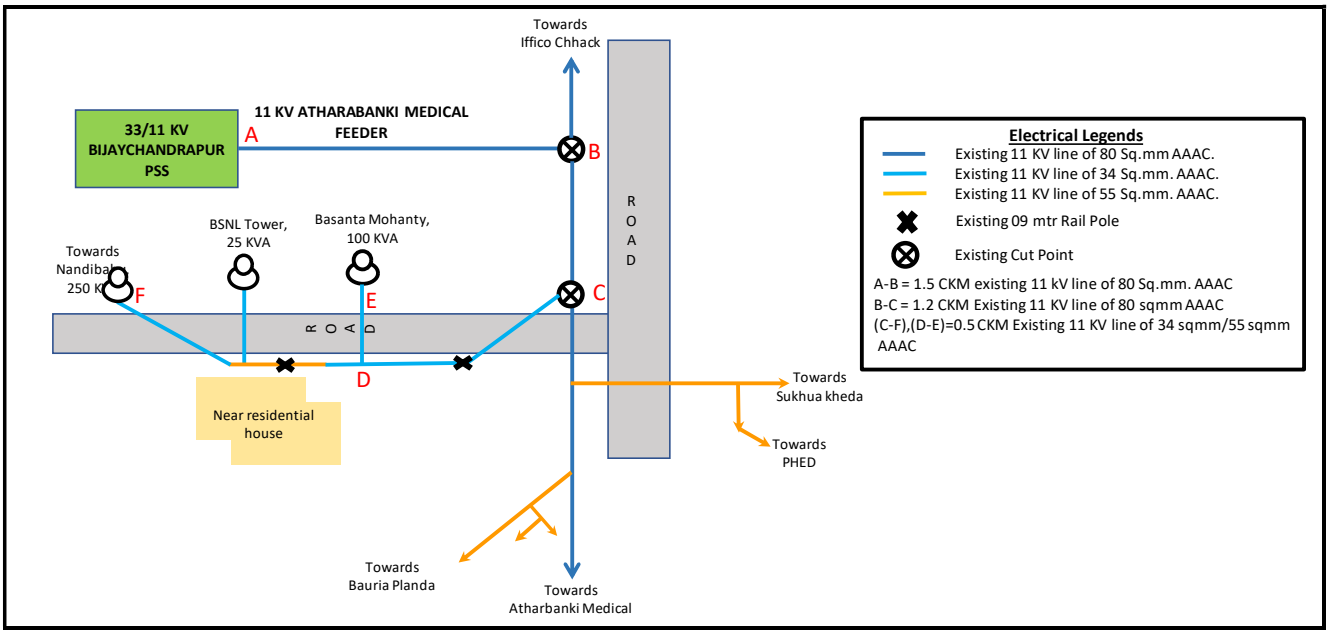
62.0 Proposal for Reliability improvement of 11kV Atharbanki Medical Feeder:

Proposal:

Proposal for augmentation/refurbishment of 11 kV Atharbanki Medical feeder for length 0.5 CKM for improvement of reliability.

Requirement/ Need of the proposal:

Objective: Reliability improvement of 11kV Atharbanki Medical Feeder.

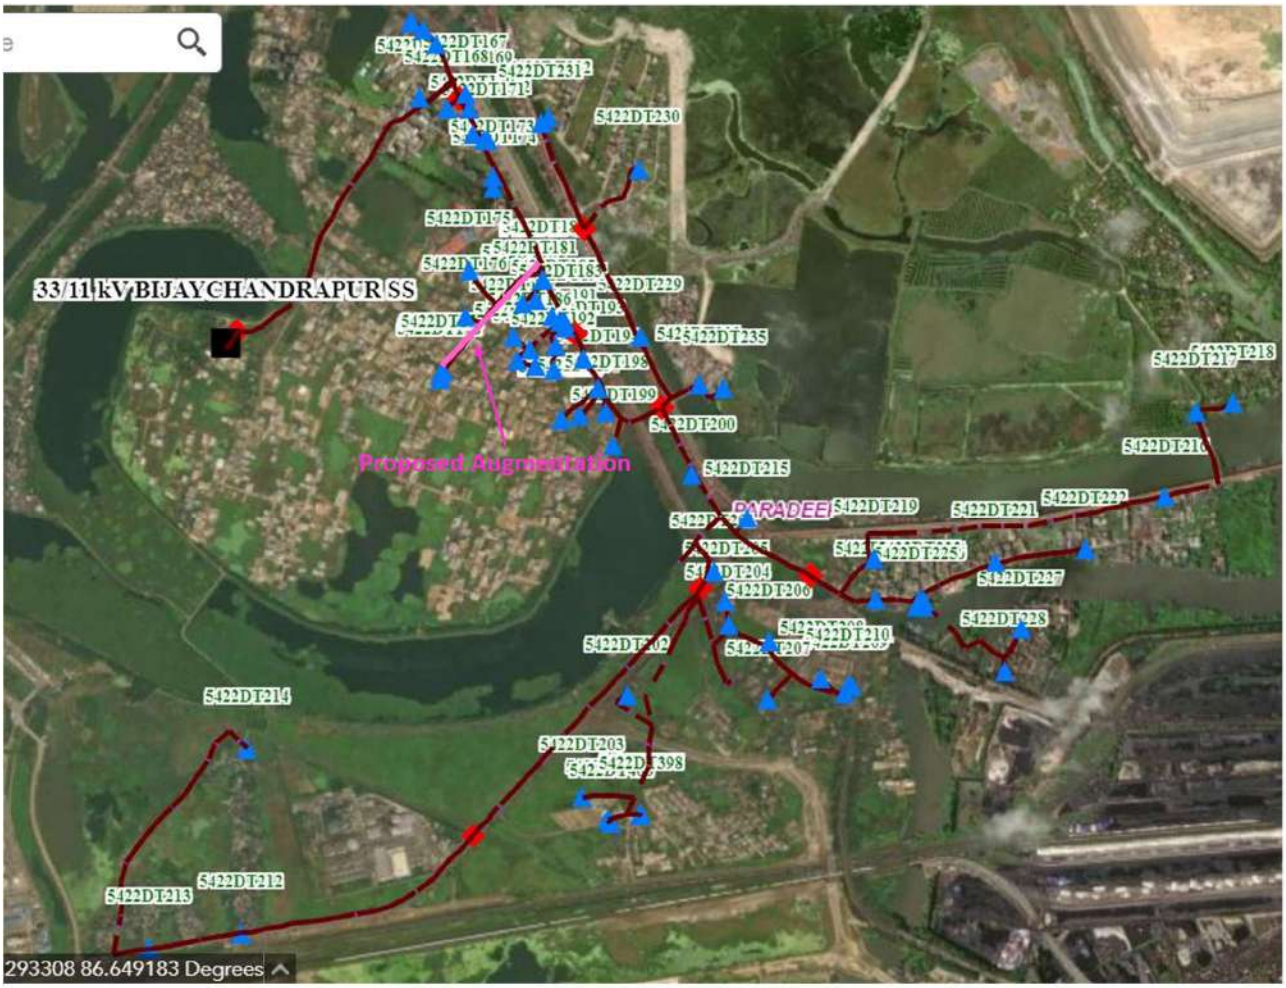


Existing Scenario:

- At present, 11kV Atharbanki Medical feeder is emanating from 33/11kV Bijaychandrapur PSS. The total length of 11kV Atharbanki Medical feeder is 12.7 km and peak load is 3.37 MVA.
- Frequent tripping is observed in the 11KV Atharbanki Medical feeder due to lower size and aged bare conductor besides residential area.
- At present frequent shutdowns are required for connecting feeder restoration.

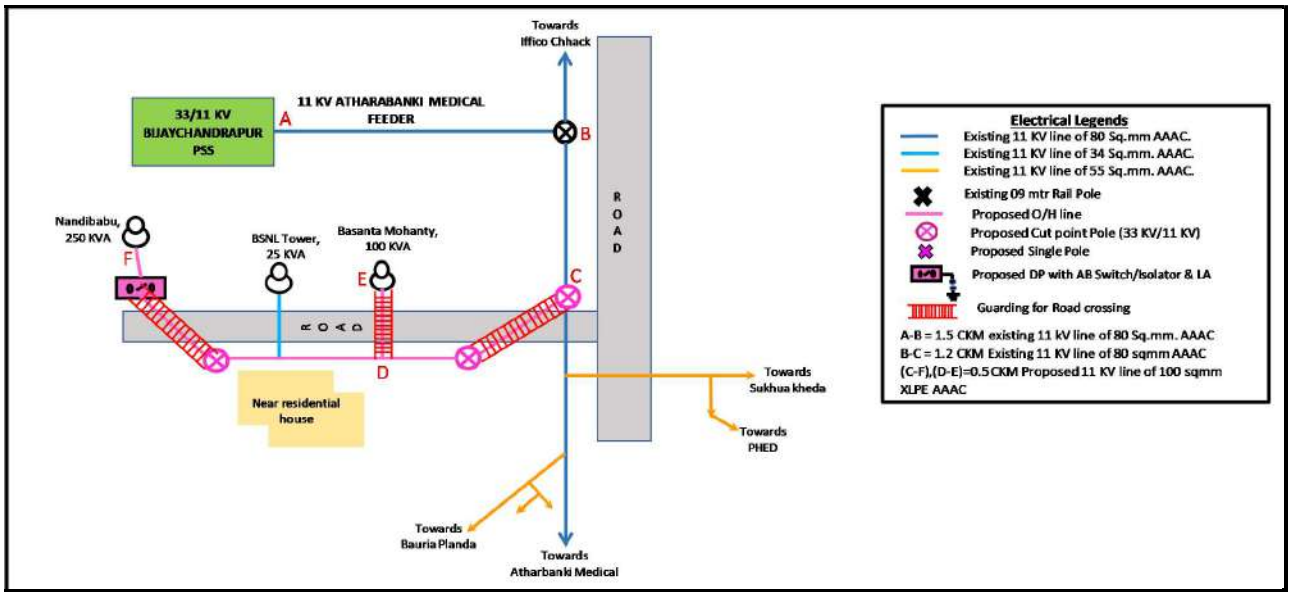
GIS MAP

Existing SLD:



Priority and Timeline of the Project:

Priority: Since the 11kV Atharbanki Medical feeder caters to urban area and is experiencing frequent interruptions due to feeder tripping, ageing network and repeated shutdown for restoration and maintenance activities. Total 4500 No's consumer connected to the 11KV Atharbanki Medical feeder. No of 11KV feeder tripping in FY26 is 184 No's & 67 No's till July 26. In addition, unsafe condition in habitation area along the feeder corridor and ageing conductors increases the risk of faults, conductor snapping and supply interruptions, posing potential safety hazards to both the public and operating personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.



Proposed Scenario:

- Augmentation of 0.5 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. XLPE AAAC for strengthening of 11 kV Atharbanki Medical feeder.
- Installation of 03 Nos 11 kV line protecting guarding for road crossing.

TPCODL	
Name of the Division :-	BED
Name of the Sub-Division : -	TEMPLE
Name of the Section : -	OT-1
Name of the Feeder: -	11kV Gangua Feeder
Name of the Work :-	Proposal for augmentation for 3kms O/H line from Gangotri Nagar Lane-3 to Airtel Tower
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-A:- 1. Installation of 2 no. of Line DP with AB Switch 2. Augmentation of 3Kms O/H line due to dense vegetation area and damaaged conductor.	45,34,974.47
2	PART-C:- Dismantling	1,02,850.61
3	**Total Gross**	**46,37,825.08**
Total estimated cost is Rs. 0.46Cr.		

PART-A:-

1. Installation of 2 no. of Line DP with AB Switch

2. Augmentation of 3Kms O/H line due to dense vegetation area and damaaged conductor.

Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART-A:- Installation of 1no of DP with Isolator with Earth Switch at Uttara PSS.	10,30,036.56
2	PART-B:- Proposed 1.1km U/G cable for 11kV KEC,Sardeipur and Dhauli feeder due to unsafe condition	94,00,713.31
3	PART-C:- Installation of 1 no 11 KV DP With AB Switch for U/G Cable Raising	2,51,873.57
4	PART-D:- Installation of 1no cable rising pole	1,19,198.11
5	PART-E:- Dismantling	47,052.42
6	**Total Gross**	**1,08,48,873.97**
Total estimated cost is Rs. 1.08Cr.		

PART-A:-

Installation of 1no of DP with Isolator with Earth Switch at Uttara PSS.

No. of 11 KV DP required With AB Switch for U/G Cable Raising (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8045)	3

MATERIALS OF DP With AB Switch

Sl. No.	***Description of Materials***	***Unit***	***Unit Rate***	***Total Quantity***	***Total Amount***
1	WPB (GI) Pole 160x152 11 Mtr. Long for DP	EA	28,835.00	6	1,73,010.00
2	GI Channel, angle & flat of different size	KG	78.00	1043.841	81,419.60
3	DMC Insulator for LA (70/10)	EA	113.50	24	2,724.00
4	Danger Plate	EA	180.00	6	1,080.00
5	H.T. Stay clamp	EA	260.00	12	3,120.00
6	H.T. Stay set (Complete)	SET	1,434.00	12	17,208.00
7	H.T. Stay Insulator Type-C	EA	87.00	12	1,044.00
8	7/10 SWG Stay Wire	KG	77.00	180	13,860.00
9	Gi Pipe Earthing 40mm. 3 Mtr. Long	EA	1,300.00	6	7,800.00
10	GI barbed wire anticlimbing device	KG	74.00	18	1,332.00
11	Lightning Arrester(12KV,10KA) (Station Class,class-2)	EA	1,960.00	9	17,640.00
12	11 KV 630 Amp Motorized Isolator with Earth Switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	SET	67,097.00	3	2,01,291.00
14	11 KV pin insulator polymer	EA	140.00	3	420.00
15	NON METALLIC TIES-11KV 100 SQMM CVRD AAAC	EA	110.00	3	330.00
16	IPC for 100 sq.mm AAA conductor (For covered conductor)-11 kV	EA	550.00	6	3,300.00
17	Dead end assembly with accessories for 100 Sq.mm. AAAC	EA	2,500.00	6	15,000.00
	Disc insulator (B&S) 70 KN polymer	EA	150.00	6	900.00
18	100 SQ.MM. AAAC XLPE Covered Conductor-11kV	M	131.00	36	4,716.00
19	HDPE Pipe 200 mm Dia, PE 80 PN-8 for U/G acble raising	M	812.00	36	29,232.00
20	GI Nut , Bolt & Washer of different sizes	KG	74.00	37.404	2,767.90
A1				**Total Cost of materials**	**5,78,194.49**
A2				**Applicable Taxes to make it Landed Cost @18%**	**1,04,075.01**
A				**Total landed Cost (A=A1 + A2)**	**6,82,269.50**
B				Stock, Storage & Insurance i.e 3% of A	20,468.09
C				**Sub Total (A+B)**	**7,02,737.59**

PART-B:-
Proposed 1.1km U/G cable for 11kV KEC,Sardeipur and Dhauli feeder due to unsafe condition

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1100***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	1100	2,375.00	26,12,500.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	1	15,950.00	15,950.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	9	2,900.00	26,100.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1100.00	812.00	8,93,200.00
	Sub Total (Supply Portion) (in Rs.)				**35,47,750.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	1100	110.00	1,21,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	10	2,000.00	20,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	0	2,970.00	-
1.4	Laying of 200**mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	1100.00	195.00	2,14,500.00
	Sub Total (Erection Portion) (in Rs.)				**3,55,500.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	500		
1.1.a	Earth work excavation of **soil**	M3	420	716.03	3,00,732.60
1.1.b	Earth work excavation of **hard rock**	M3	180	1,759.39	3,16,690.20
1.2	Back filling with excavated soil outside and above the trench	M3	600	220.00	1,32,000.00
1.3	Road Repair and restoration charges	KM	0.2	92,94,727.82	18,58,945.56
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM	**50**	16,703.11	8,35,155.74
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	37	1,035.17	38,301.29
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	1.1	10,470.00	11,517.00
	Sub Total (Civil Portion) (in Rs.)				**34,93,342.39**

Name of the Section : -	OT-3
Name of the Feeder: -	11kV Mahavir Cottage Feeder
Name of the Work :-	Proposal for installation of 2nos of RMU for reliability
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-A:- Installation of 11kV 4way RMU- 2 Nos near Reliancemart and Mahatab road for linking of Mahavir Cottage feeder with Mulapadia and Kapileshwar feeder for backfeeding purpose	65,58,367.70
2	PART-B:- Installation of 2nos of DP with AB switch near Mahavir Cottage and Premlata Apartment	10,19,118.20
3	Part-C:- Dismantling	3,291.55
4	**Total Gross**	**75,80,777.45**

Total estimated cost is Rs. 0.76Cr.

PART-A:-

Installation of 11kV 4way RMU- 2 Nos near Reliancemart and Mahatab road for linking of Mahavir Cottage feeder with Mulapadia and Kapileshwar feeder for backfeeding purpose

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***600***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	600	2,375.00	14,25,000.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	6	8,260.00	49,560.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	6	2,900.00	17,400.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	100.00	812.00	81,200.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***2***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	12,62,647.00	25,25,294.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**41,05,713.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	600	110.00	66,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	12	2,000.00	24,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	15,000.00	30,000.00
	Sub Total (Erection Portion) (in Rs.)				**1,39,500.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	100		
1.1.a	Earth work excavation of **soil**	M3	84	716.03	60,146.52
1.1.b	Earth work excavation of **hard rock**	M3	36	1,759.39	63,338.04
1.2	Back filling with excavated soil outside and above the trench	M3	120	220.00	26,400.00
3	**RMU Civil works**				
3.1	RMU Plinth	EA	2	1,71,056.00	3,42,112.00
4	**Fencing**				
a	**GI Chain link**	EA	**2**		
4.1	GI chain link fencing for RMU	RM	36	4,167.57	1,50,032.60
5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	4	3,784.73	15,138.92
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	20	1,035.17	20,703.40
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	2	1,000.00	2,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	0.6	10,470.00	6,282.00
	Sub Total (Civil Portion) (in Rs.)				**6,86,153.48**

A1	**Sub Total (Supply Portion)**	**41,05,713.20**
A2	**Applicable Taxes to make it Landed Cost @18%**	**7,39,028.38**
A	**Total Landed Cost (A=A1 + A2)**	**48,44,741.58**
B	Stock, Storage & Insurance @ 3 % of A	1,45,342.25

C	**Sub Total (A+B)**	**49,90,083.82**
D	Contingency @ 3 % of C	1,49,702.51
E	Tools & Plants Charges @ 2% of C (considered for earthing items)	50.06
F	Transportation @ 7.5% of C	3,74,256.29
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)	250.28
H	**Total (C+D+E+F+G)**	**55,14,342.95**
I1	Sub Total (Erection Portion + Civil Portion)	8,25,653.48
I2	**Applicable Taxes to make it Landed Cost @18%**	**1,48,617.63**
I	**Total landed Cost (I=I1+ I2)**	**9,74,271.11**
J	**Total Cost (H+I)**	**64,88,614.06**
K	Other Overhead /(including Supervision Charges) @ 6 % of J	
L	**Total Estimated Capital Cost i.e. (J+K)**	**64,88,614.06**
M	CESS 1% of L	64,886.14
N	**Grand Total (L+M)**	**65,53,500.20**
O	Inspection Fee of UG Line (HT) - Rs. 375 upto 1 KM.	375.00
P	Inspection Fee of UG Line (HT) - Rs. 225/ Additional Km	
Q	Inspection Fee of RMU - Rs. 1500/ RMU	3,000.00
R	Inspection Fee of Drawing Checking and Approval	750.00
S	Total Inspection Fees (O+P+Q+R)	**4,125.00**
T	GST @ 18% on Total Inspection Fees (S)	742.50
U	Total Inspection Fees including GST (S+T)	4,867.50
V	**Gross Total Material, Services and Inspection Fees (N+U)**	**65,58,367.70**

PART-B:-

Installation of 2nos of DP with AB switch near Mahavir Cottage and Premlata Apartment

No. of DP required With AB Switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8039)	2

MATERIALS OF DP With AB Switch

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*

ANNEXURE- 12.4

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	BED
Name of the Sub-Division : -	TEMPLE
Name of the Section : -	OT-1
Name of the Feeder: -	11kV Kua Khai Feeder
Name of the Work :-	Proposal for Augmentation of 3KM line strengthening for improving reliability of 11kV Shakti Nagar Feeder and installation of 1 no RMU for backfeeding of 11kV Sai and Sishupalagada feeder with Kuakhai Feeder
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-A:- Installation of 1 no 11kV 4way RMU near Kantilal DSS to divert Basudev Nagar Load under 11kV Kuakhai Feeder to Sishupalgada Feeder and linking with 11kV Sai feeder for backfeeding	1,44,06,502.21
2	PART-B:- 1. Installation of 4 nos. of Line DP with AB Switch 2. Augmentation of 3Kms O/H line due to dense vegetation area and damagaed conductor	53,11,388.88
3	PART-C:- Dismantling	1,07,619.54
4	**Total Gross**	**1,98,25,510.63**

Total estimated cost is Rs. 1.98Cr.(On TPCODL CAPEX Scheme)

PART-A:-

Installation of 1 no 11kV 4way RMU near Kantilal DSS to divert Basudev Nagar Load under 11kV Kuakhai Feeder to Sishupalgada Feeder and linking with 11kV Sai feeder for backfeeding

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**

TPCODL

Name of the Division :-	BED
Name of the Sub-Division : -	TEMPLE
Name of the Section : -	DHAULI
Name of the Feeder: -	11kV Panchagaon Feeder
Name of the Work :-	Proposal for Augmentation of 1.5KM line strengthening for improving reliability and installation of 1 no RMU for backfeeding
Names of Schemes: -	**CAPEX 26-27**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-A:- Installation of 11kV 4way RMU- 1Nos near Sumitra Realcon for linking of Panchagaon feeder with Pradhan Sahi feeder for backfeeding purpose	28,71,326.59
2	PART-B:- 1. Installation of 2 nos. of Line DP with AB Switch 2. Augmentation of 1.5Kms O/H line due to dense vegetation area and damagaed conductor	29,93,388.37
3	PART-C:- Dismantling	60,781.80
4	**Total Gross**	**59,25,496.76**

Total estimated cost is Rs. 0.59Cr.

PART-A:-
Installation of 11kV 4way RMU- 1Nos near Sumitra Realcon for linking of Panchagaon feeder with Pradhan Sahi feeder for backfeeding purpose

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***150***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	150	2,375.00	3,56,250.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	0	15,950.00	-
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	3	8,260.00	24,780.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	3	2,900.00	8,700.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	100.00	812.00	81,200.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**17,37,206.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	150	110.00	16,500.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	6	2,000.00	12,000.00
1.4	Laying of 200mm dia PE 80-PN8, **HDPE pipe** inside open trench.	M	100.00	195.00	19,500.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**63,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	70		
1.1.a	Earth work excavation of **soil**	M3	58.8	716.03	42,102.56
1.1.b	Earth work excavation of **hard rock**	M3	25.2	1,759.39	44,336.63
1.2	Back filling with excavated soil outside and above the trench	M3	84	220.00	18,480.00
3	**RMU Civil works**				
3.1	RMU Plinth	EA	1	1,71,056.00	1,71,056.00
4	**Fencing**				
a	**GI Chain link**	EA	**1**		
4.1	GI chain link fencing for RMU	RM	18	4,167.57	75,016.30

5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	2	3,784.73	7,569.46
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	5	1,035.17	5,175.85
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	1	1,000.00	1,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	0.15	10,470.00	1,570.50
	Sub Total (Civil Portion) (in Rs.)				**3,66,307.30**
A1	**Sub Total (Supply Portion)**				**17,37,206.60**
A2	**Applicable Taxes to make it Landed Cost @18%**				**3,12,697.19**
A	**Total Landed Cost (A=A1 + A2)**				**20,49,903.79**
B	Stock, Storage & Insurance @ 3 % of A				61,497.11
C	**Sub Total (A+B)**				**21,11,400.90**
D	Contingency @ 3 % of C				63,342.03
E	Tools & Plants Charges @ 2% of C (considered for earthing items)				25.03
F	Transportation @ 7.5% of C				1,58,355.07
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)				125.14
H	**Total (C+D+E+F+G)**				**23,33,248.16**
I1	Sub Total (Erection Portion + Civil Portion)				4,29,307.30
I2	**Applicable Taxes to make it Landed Cost @18%**				**77,275.31**
I	**Total landed Cost (I=I1+ I2)**				**5,06,582.62**
J	**Total Cost (H+I)**				**28,39,830.78**
K	Other Overhead /(including Supervision Charges) @ 6 % of J				
L	**Total Estimated Capital Cost i.e. (J+K)**				**28,39,830.78**
M	CESS 1% of L				28,398.31
N	**Grand Total (L+M)**				**28,68,229.09**
O	Inspection Fee of UG Line (HT) - Rs. 375 upto 1 KM.				375.00
P	Inspection Fee of UG Line (HT) - Rs. 225/ Additional Km				
Q	Inspection Fee of RMU - Rs. 1500/ RMU				1,500.00
R	Inspection Fee of Drawing Checking and Approval				750.00
S	Total Inspection Fees (O+P+Q+R)				**2,625.00**
T	GST @ 18% on Total Inspection Fees (S)				472.50
U	Total Inspection Fees including GST (S+T)				3,097.50
V	**Gross Total Material, Services and Inspection Fees (N+U)**				**28,71,326.59**

PART-B:-

1. Installation of 2 nos. of Line DP with AB Switch

2. Augmentation of 1.5Kms O/H line due to dense vegetation area and damagaed conductor

No. of DP required With AB Switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8039)	1

TPCODL

Name of the Division :-	BED
Name of the Sub-Division : -	RASULGARH
Name of the Section : -	LAXMISAGAR
Name of the Feeder: -	11kV Mangaraj Point Feeder
Name of the Work :-	Proposal for Augmentation of 0.8KM line strengthening for improving reliability
Names of Schemes: -	**CAPEX 26-27**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART-B:- 1. Installation of 1nos. of Line DP with AB Switch 2. Augmentation of 0.8Kms O/H line due to damagaed conductor	13,68,995.80
2	PART-B:- Dismantling	32,774.50
4	**Total Gross**	**14,01,770.30**

Total estimated cost is Rs. 0.14Cr.

PART-B:-

1. Installation of 1nos. of Line DP with AB Switch

2. Augmentation of 0.8Kms O/H line due to damagaed conductor

No. of DP required With AB Switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8039)	1

Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length- 2 CKM using 3Cx400mm2 XLPE UG cable from kharvel nagar PSS to Kumuda Plaza RMU. 2. Installation of 2 Nos. of RMU in 11kV Ashok nagar Feeder in differen location.	2,11,08,403.20
2	Part-B:-Augmentation of 11kV Ashok Nagar Feeder of length 2 CKM.	41,35,173.50
3	Part-C Dismantling.	98,037.47
4	**Total Gross**	**2,53,41,614.16**
Total estimated cost is Rs. 2.53 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length- 2 CKM using 3Cx400mm2 XLPE UG cable from kharvel nagar PSS to Kumuda Plaza RMU.

2. Installation of 2 Nos. of RMU in 11kV Ashok nagar Feeder in differen location.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1000***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***1000***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	2000	2,375.00	47,50,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	7	15,950.00	1,11,650.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	8	8,260.00	66,080.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	6	2,900.00	17,400.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1000.00	812.00	8,12,000.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***2***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	12,62,647.00	25,25,294.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**82,89,683.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	2000	110.00	2,20,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	21	2,000.00	42,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	1000	2,970.00	29,70,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	1000.00	195.00	1,95,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	15,000.00	30,000.00
	Sub Total (Erection Portion) (in Rs.)				**34,57,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				

1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	952

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Cicle :-	BBSR-2
Name of the Division :-	PED
Name of the Sub-Division : -	PURI-I
Name of the Section : -	Swargadwar-1
Name of the Work :-	Proposal for construction of a new 11 kV feeder of 0.82 CKM length, to bifurcate the load of the 11 kV Swargadwar-1 Feeder to enhance the reliability as well as to mitigate the overloading issue.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Construction of One No. 11 kV Indoor Bay	32,73,345.56
2	PART B: Suppply & Laying of 11kV 1C, 630sqmm UG Cable of lenth= 0.08 KM with one run spare.	2,99,987.03
3	PART C: Supply & laying of 11kV 3CX400sqmm UG Cable of length= 0.82 km without spare run.	1,77,94,210.18
5	**Total Gross**	**2,13,67,542.76**

Total estimated cost is Rs. 2.14 Cr.

PART A: Construction of One No. 11 kV Indoor Bay

No. of Bay requirement (Indoor)	1

MATERIALS OF 11 kV Bay

Sl. No.	Description of Materials	Unit	Unit Rate	Total Quantity	Total Amount
1	Gi Pipe Earthing 40mm. 3 Mtr. Long	EA	1,300.00	2	2,600.00
2	GI Flat	KG	78.00	70.8	5,522.40
3	Supply of 11 kV extension Panel (O/G Feeder) as per the existing drawing (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	18,00,000.00	1	18,00,000.00
4	SMART ENERGY METER, 3P4W, 11 KV/110V-/5A	EA	7,389.11	1	7,389.11

H				Erection Charges @ 10% of C (except Trf/Breaker/WPB/ H-Pole/HT stay set/GI Pipe/PSC pole/GI Pipe earthing) (With Applicable Taxes @ 18% to make it Landed Cost)	1,569.26
I				Erection Charges @ 20% of PSC pole (With Applicable Taxes @ 18% to make it Landed Cost)	-
J				**Sum of (C to I)**	**25,93,286.34**

Civil & Services

Sl. No.	Description of Materials	Unit	Unit Rate	Total Quantity	Total Amount
1	Construction of Earthing chamber incuding earthing pipe and civil works	EA	3,784.73	2	7,569.46
2	**RCC Cable Trench :**	Qty			
2.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	69	16,008.00
2.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	4.6	6,808.00
2.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	4.6	23,138.00
2.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	9.2	69,000.00
2.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	8.4	63,000.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	112	30,240.00
2.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	1982.8	2,02,245.60
2.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	2.4	19,080.00
2.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	1060.4	1,10,281.60

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-I
Name of the Sub-Division : -		SDO-3
Name of the Section : -		Unit-9 Flat
Name of the Feeder: -		11kV JP RMU-37
Name of the Work :-		Proposal for Bifurcation of 11kV JP RMU-37 Feeder for mitigation of overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:-	1,43,36,345.91
2	Part-B:-Augmentation of 11kV JP RMU-37 Feeder	12,02,989.59
3	Part-C Dismantling.	25,791.74
4	**Total Gross**	**1,55,65,127.24**
Total estimated cost is Rs. 1.56 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length- 0.65 CKM using 3Cx400mm2 XLPE UG cable from Shantipalli PSS to IDBI Square.

2. Laying of 11kV UG cable of length- 0.3 CKM using 3Cx400mm2 XLPE UG cable from Rupali Square to Rupali LABS for LILO arrangements.

2. Installation of 2 Nos. of RMU in 11kV JPRMU-37 Feeder (Near Rupali LABS & JPRMU 38).

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***820***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***200***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	1020	2,375.00	24,22,500.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	4	15,950.00	63,800.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	8	8,260.00	66,080.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	2	2,900.00	5,800.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	820.00	812.00	6,65,840.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***2***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	12,62,647.00	25,25,294.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**57,56,573.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	1020	110.00	1,12,200.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	14	2,000.00	28,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	200	2,970.00	5,94,000.00
1.4	Laying of 200**mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	820.00	195.00	1,59,900.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	15,000.00	30,000.00
	Sub Total (Erection Portion) (in Rs.)				**9,24,100.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)

1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	804		
1.1.a	Earth work excavation of **soil**	M3	675.36	716.03	4,83,578.02

ANNEXURE-12.13		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Khandagiri
Name of the Section : -		Bharat Pur
Name of the Feeder: -		11kV Bharat Pur
Name of the Work :-		Proposal for Bifurcation of existing 11kV Bharat Pur feeder & augmentation for mitigation reliability improvement.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length-3 CKM using 3Cx400mm2 XLPE UG cable from Bharat Pur PSS to Lokayukta Bhawan. 2. Installation of 2 Nos. of RMU near Lokayukta Bhawan & Studio Chowk.	2,79,00,458.68
2	Part-B:-Augmentation of 11kV Bharat Pur feeder Branch Line of length 6.1 CKM(GA Colony Branch & Hanuman Basti Sampur Area Branch) 2. Construction of 11kV O/H Linking line of length 1.05 CKM using 100mm2 XLPE Covered conductor(Refer Proposed SLD A-B, C-D, E-F)	1,17,88,054.32
3	Part-C Dismantling.	3,13,472.60
4	**Total Gross**	**4,00,01,985.60**
Total estimated cost is Rs. 4 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length-3 CKM using 3Cx400mm2 XLPE UG cable from Bharat Pur PSS to Lokayukta Bhawan.

2. Installation of 2 Nos. of RMU near Lokayukta Bhawan & Studio Chowk.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***2350***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***1000***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	3350	2,375.00	79,56,250.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	11	15,950.00	1,75,450.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	9	8,260.00	74,340.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	9	2,900.00	26,100.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	2350.00	812.00	19,08,200.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***2***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	12,62,647.00	25,25,294.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	26.40	78.00	2,059.20
3.2	Pipe Earthing 40mm. GI Pipe	EA	4	1,300.00	5,200.00
	Sub Total (Supply Portion) (in Rs.)				**1,26,72,893.20**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	3350	110.00	3,68,500.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	29	2,000.00	58,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	1000	2,970.00	29,70,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	2350.00	195.00	4,58,250.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	2	15,000.00	30,000.00
	Sub Total (Erection Portion) (in Rs.)				**38,84,750.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	2278		
1.1.a	Earth work excavation of **soil**	M3	1913.52	716.03	13,70,137.73
1.1.b	Earth work excavation of **hard rock**	M3	820.08	1,759.39	14,42,840.55

1.2	Back filling with excavated soil outside and above the trench	M3	2733.6	220.00	6,01,392.00
1.3	Road Repair and restoration charges	KM	0.11	92,94,727.82	10,22,420.06
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM		16,703.11	-
2.2	Cable Trench with Brick Wall	RM		13,124.93	-
3	**RMU Civil works**				
3.1	RMU Plinth	EA	2	1,71,056.00	3,42,112.00
4	**Fencing**				
a	**GI Chain link**	EA	**2**		
b	**Boundary Wall**	EA			
4.1	GI chain link fencing for RMU	RM	36	4,167.57	1,50,032.60
4.2	Boundary wall Fencing for RMU	RM	0	11,173.88	-
5	Construction of Earthing chamber incuding earthing pipe and civil works	EA	4	3,784.73	15,138.92
6	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	112	1,035.17	1,15,939.04
7	GIS coordinate mapping, drawing preparation and submission of the same for RMU.	EA	2	1,000.00	2,000.00
8	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	3.35	10,470.00	35,074.50
	Sub Total (Civil Portion) (in Rs.)				**50,97,087.40**
A1	**Sub Total (Supply Portion)**				**1,26,72,893.20**
A2	**Applicable Taxes to make it Landed Cost @18%**				**22,81,120.78**
A	**Total Landed Cost (A=A1 + A2)**				**1,49,54,013.98**
B	Stock, Storage & Insurance @ 3 % of A				4,48,620.42
C	**Sub Total (A+B)**				**1,54,02,634.40**
D	Contingency @ 3 % of C				4,62,079.03
E	Tools & Plants Charges @ 2% of C (considered for earthing items)				50.06
F	Transportation @ 7.5% of C				11,55,197.58
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)				250.28
H	**Total (C+D+E+F+G)**				**1,70,20,211.34**
I1	Sub Total (Erection Portion + Civil Portion)				89,81,837.40
I2	**Applicable Taxes to make it Landed Cost @18%**				**16,16,730.73**
I	**Total landed Cost (I=I1+ I2)**				**1,05,98,568.13**
J	**Total Cost (H+I)**				**2,76,18,779.46**

ANNEXURE-12.14		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Khandagiri
Name of the Section : -		Khandagiri
Name of the Feeder: -		11kV Kolathia
Name of the Work :-		Proposal for Bifurcation of existing 11kV Kolathia feeder & conductor augmentation for Reliability improvement.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length-3.5 CKM using 3Cx400mm2 XLPE UG cable from Bharat Pur PSS to Manipal Hospital. 2. Installation of 1 No. of RMU near Manipal Hospital.	2,80,27,297.79
2	Part-B:-Augmentation of 11kV Kolathia Feder Branch Line of length 6.5 CKM(Refer proposed SLD)	1,16,71,994.31
3	Part-C Dismantling.	3,22,495.12
4	**Total Gross**	**4,00,21,787.22**
Total estimated cost is Rs. 4 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length-3.5 CKM using 3Cx400mm2 XLPE UG cable from Bharat Pur PSS to Manipal Hospital.

2. Installation of 1 No. of RMU near Manipal Hospital.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***2060***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***1500***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	3560	2,375.00	84,55,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	13	15,950.00	2,07,350.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	5	8,260.00	41,300.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	2,900.00	11,600.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	2060.00	812.00	16,72,720.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**1,16,54,246.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	3560	110.00	3,91,600.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	22	2,000.00	44,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	1500	2,970.00	44,55,000.00
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	2060.00	195.00	4,01,700.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**53,07,300.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	2028		
1.1.a	Earth work excavation of **soil**	M3	1703.52	716.03	12,19,771.43
1.1.b	Earth work excavation of **hard rock**	M3	730.08	1,759.39	12,84,495.45
1.2	Back filling with excavated soil outside and above the trench	M3	2433.6	220.00	5,35,392.00
1.3	Road Repair and restoration charges	KM	0.16	92,94,727.82	14,87,156.45
2	**Civil works for U/G Cable laying in Trench**				
2.1	Cable Trench with RCC Wall	RM		16,703.11	-

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Khandagiri
Name of the Section : -		Bharat Pur
Name of the Feeder: -		11kV PHD
Name of the Work :-		Proposal for augmentation of 11kV PHD Feeder for reliability improvement.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length-2.4 CKM using 3Cx400mm2 XLPE UG cable from Bharat Pur PSS to 78 Dreams Ghatikia. 2. Installation of 3 Nos. of RMU in 11kV PHD Feeder in differen location.	2,81,87,767.90
2	Part-B:-Augmentation of 11kV PHD feeder Branch Line of length 4.5 CKM(Ghatikia Village Branch) 2. Construction of 11kV O/H Linking line of length 0.2 CKM using 100mm2 XLPE Covered conductor(Refer Proposed SLD A-B)	73,60,908.74
3	Part-C Dismantling.	2,08,964.25
4	**Total Gross**	**3,57,57,640.90**
Total estimated cost is Rs. 3.58 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length-2.4 CKM using 3Cx400mm2 XLPE UG cable from Bharat Pur PSS to 78 Dreams Ghatikia.

2. Installation of 3 Nos. of RMU in 11kV PHD Feeder in differen location.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***1590***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***1000***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	2590	2,375.00	61,51,250.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	9	15,950.00	1,43,550.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	11	8,260.00	90,860.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	7	2,900.00	20,300.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	1590.00	812.00	12,91,080.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***3***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	3	12,62,647.00	37,87,941.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	39.60	78.00	3,088.80
3.2	Pipe Earthing 40mm. GI Pipe	EA	6	1,300.00	7,800.00

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Periphery
Name of the Section : -		CS Pur-2
Name of the Feeder: -		11kV HB-3
Name of the Work :-		Proposal for Augmentation of existing 11kV HB-3 feeder using 100mm2 XLPE Covered conductor & installation of RMU for reliability improvement.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 1. Laying of 11kV UG cable of length-0.1 KM using 3Cx400mm2 XLPE UG cable near Sailashree Vihar Tarini Temple for avoid unsafe Road Crossing. 2. Installation of 2 Nos. of RMU in different location of 11kV HB-3 Feeder.	71,69,294.13
2	Part-B:-Augmentation of 11kV HB-3 feeder of length 2.5CKM.	51,17,317.47
3	Part-C Dismantling.	1,21,057.09
4	**Total Gross**	**1,24,07,668.69**
Total estimated cost is Rs. 1.24 Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

1. Laying of 11kV UG cable of length-0.1 KM using 3Cx400mm2 XLPE UG cable near Sailashree Vihar Tarini Temple for avoid unsafe Road Crossing.

2. Installation of 2 Nos. of RMU in different location of 11kV HB-3 Feeder.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Cicle :-	BBSR-1
Name of the Division :-	NED
Name of the Sub-Division : -	Nimapada
Name of the Section : -	Kakatpur-2 & Astaranga
Name of the Work :-	Proposal for construction of 2 Nos. of new 11 kV feeders of 3.5 CKM and 0.5 CKM lengths to bifurcate the load of the existing 11 kV Kakatpur-2 Feeder, mitigate the overloading of the 11 kV Kakatpur Feeder and the 8 MVA PTR-1 at Kakatpur PSS, and bifurcate the lengthy 11 kV Juinty Feeder.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Construction of Two No of 11 KV Line Bay (Outdoor)	57,19,805.47
2	PART B : Installation of 2 Nos. DP with Isolator & earthswitch for feeder outgoing.	4,30,356.69
3	PART C: Construction 11kV 3Ph 3W O/H Line of Length= 5 CKM, with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor & 11 Mtr. H-Pole for Pin-Points and Cut-Points & 11 Mtr WPB Pole for DP.	1,71,45,409.91
4	PART D- Supply and Laying of 11kV 3C, 400sqmm UG Cable of length = 0.7 KM, with one run spare.	67,61,082.36
5	PART E: Construction of 11kV Line Protecting Guarding on Single Pole for Road Crossing	56,502.88
6	PART F: Dismantling of Materials	98,177.44
7	**Total Gross**	**3,02,11,334.75**

Total estimated cost is Rs. 3.02 Cr.

PART A: Construction of Two No of 11 KV Line Bay (Outdoor)					
No. of BAY requirement				2	
No. of VCB Requirement				2	
MATERIALS OF 11 kV Bay					
Sl. No.	**Description of Materials**	**Unit**	**Unit Rate**	**Total Quantity**	**Total Amount**
1	WPB (GI) Pole 160x152 11 Mtr. Long for 4-Pole	EA	28,835.00	8	2,30,680.00
2	GI Channel, angle & flat of different size (1 Nos. Extra for existing bus refurbishment)	KG	78.00	3123.081	2,43,600.32
3	DMC Insulator for LA (70/10)	EA	113.50	16	1,816.00
4	Danger Plate, 2 no's.	EA	180.00	4	720.00
5	Gi Pipe Earthing 40mm. 3 Mtr. Long	EA	1,300.00	29	37,700.00
6	GI barbed wire anticlimbing device	KG	74.00	24	1,776.00
7	Lightning Arrester(12KV,10KA) (Station Class,class-2)	EA	1,960.00	6	11,760.00
8	11 KV 630 Amp Motorized Isolator with Earth Switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	67,097.00	3	2,01,291.00
9	11 KV 630 Amp Motorized Isolator without Earth Switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided) (Extra 2 Nos. for existing bus isolation)	EA	29,328.00	4	1,17,312.00
10	1250 A 11 kV O/D VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	1,95,397.00	2	3,90,794.00
11	CR PANEL FOR FDR PROTECTION 11KV VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,70,500.00	2	5,41,000.00
12	CT 11KV OILCOOLED 200-400-800/1-1-1	EA	33,220.00	6	1,99,320.00
13	11KV OIL COOL PT 3P/3P/.2 CLS 100VA BRDN	EA	16,198.00	6	97,188.00
14	Control Cable 12Core x 2.5 mm2	Mtr	329.00	100	32,900.00
15	Control Cable 16Core x 2.5 mm2	Mtr	426.00	100	42,600.00
16	Control Cable 4Core x 2.5 mm2	Mtr	124.00	100	12,400.00
17	Control Cable 7Core x 2.5 mm2	Mtr	196.00	100	19,600.00
18	11 KV pin insulator polymer	EA	140.00	12	1,680.00
19	H W fitting(B&S) 70KN, 3Bolt	EA	412.00	36	14,832.00
20	Disc insulator (B&S) 70 KN polymer	EA	150.00	36	5,400.00
21	WEDGE CONNECTOR FOR 100 SQ MM CONDUCTOR.	EA	138.00	36	4,968.00
22	100 sq.mm AAA conductor	M	78.41	60.00	4,704.60
23	GI Nut , Bolt & Washer of different sizes	KG	74.00	100	7,400.00
24	1 Core x 16 mm2 Aluminium cable from Battery to Battery Charger & Battery Charger to DCDB	M	147.00	40	5,880.00
25	200 AH maintenance free VRLA Battery (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	Set	64,569.00	0	-
26	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	No	2,49,965.00	0	-
27	SMART ENERGY METER, 3P4W, 11 KV/110V-/5A	EA	7,389.11	2	14,778.22

Sl. No.	**Description of Materials**	**Unit**	**Unit Rate**	**Total Quantity**	**Total Amount**
1	Concreting of Pole @ 1:1.5:3(M-20 Grade)	M3	6,648.85	3.6	23,935.86
2	Couping of Pole @ 1:1.5:3(M-20 Grade)	M3	6,648.85	0.9	5,983.97
3	Construction of Earthing chamber incuding earthing pipe and civil works	EA	3,784.73	29	1,09,757.17
4	**VCB Foundation**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	14.56	7,178.66
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
4.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.6825	698.13
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.91	4,775.20

4.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.65	37,566.00
4.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	26.5	8,159.09
4.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
5	**CT & PT Foundation**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
5.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67
5.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
5.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
5.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
6	**RCC Cable Trench :**	Qty			
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	207	48,024.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	13.8	20,424.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	13.8	69,414.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	27.6	2,07,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	25.2	1,89,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	336	90,720.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	5948.4	6,06,736.80

6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	7.2	57,240.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	3181.2	3,30,844.80
8	**Land Leveling & Compaction/ Gravels sprading :**				
8.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
8.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00
K1				**Total Civil & Services**	**20,04,025.26**
K2				**Applicable Taxes to make it Landed Cost @18%**	**3,60,724.55**

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Cicle :-	BBSR-1
Name of the Division :-	NED
Name of the Sub-Division : -	Nimapada
Name of the Section : -	Nimapada-1
Name of the Work :-	Proposal for augmentation & Bifurcation of 11kV Patapur feeder using RMU to mitigate overloading issue & improve reliability.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A- Supply and Laying of 11kV 1C, 630sqmm UG Cable of length = 0.06 KM, 3 run without spare run.	31,57,361.26
2	PART B: Construction of 11kV Feeder outgoing DP with isolator & Earth switch.	2,92,205.32
3	PART C- Supply and Laying of 11kV 3C, 400sqmm UG Cable of length = 0.83 KM, with one run spare.	66,09,700.83
4	PART D: Construction of 3Ph, 3W ,11kV Line of Length= 0.5 CKM with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor.	14,82,406.92
5	**Total Gross**	**1,15,41,674.32**

Total estimated cost is Rs. 1.15 Cr.

PART A- Supply and Laying of 11kV 1C, 630sqmm UG Cable of length = 0.06 KM, 3 run without spare run.

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 1Core, 630sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 1C, 630sqmm cable (open trench)***	***M***	***60***		
1.1	Supply of 11kV, 1Core, 630sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	240	1,037.00	2,48,880.00
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 630sqmm, HT UG Cable kits	EA	8	7,220.00	57,760.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 630sqmm, HT UG Cable kits	EA	8	7,390.00	59,120.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 110mm diameter, PE 80- PN8 for laying of 11kV U/G cable	M	240.00	261.00	62,640.00
2	**Supply of 11kV RMU**

Name of the Division :-	PED
Name of the Sub-Division : -	PURI-II
Name of the Section : -	Sunamuhin
Name of the Work :-	Proposal for refurbishment and augmentation of 11kV Brahmagiri feeder 3 CKM in Dadra kund and Gada rodanga by using 100 SQ.MM. AAA to enhance reliability.
Names of Schemes: -	**CAPEX 27-28**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Construction 11kV 3Ph 3W O/H Line of Length= 3 CKM, with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor & 11 Mtr. H-Pole for Pin-Points and Cut-Points & 11 Mtr WPB Pole for DP.	92,98,729.19
2	PART B: Installation of 14Mtr H-pole for 11kV & 33kV Crossing.	11,28,869.72
3	PART C: Dismantling of Materials	1,48,151.64
4	PART D: Construction of 11kV Line Protecting Guarding on Single Pole for Road Crossing	60,874.38
6	**Total Gross**	**1,06,36,624.93**

Total estimated cost is Rs. 1.06 Cr.

PART A: Construction 11kV 3Ph 3W O/H Line of Length= 3 CKM, with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor & 11 Mtr. H-Pole for Pin-Points and Cut-Points & 11 Mtr WPB Pole for DP.

No. of DP required Without AB switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8035)	4

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BAED
Name of the Sub-Division : -		Balugaon
Name of the Section : -		Balugaon-1
11kV feeder name : -		11kV Singheswar feeder
Name of the Work :-		Proposal for refurbishment and augmentation of existing 11 KV Singheswar Feeder from Lambodarpur to khandewallkot to enhance reliability.
Names of Schemes: -		**CAPEX 27-28**
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part A: Augmentation of existing 11kV Line Length of 2.5 CKM with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor & 11 Mtr. H-Pole for Pin-Points and Cut-Points & 11 Mtr WPB Pole for DP	49,69,062.47
4	Part B: Dismantling of Materials	85,213.70
5	**Total Gross**	**50,54,276.17**
Total estimated cost is Rs. 0.51 Cr. (On TPCODL CAPEX Scheme)		

Part A: Augmentation of existing 11kV Line Length of 2.5 CKM with 40 Mtr. Span using 100 SQ.MM. -XLPE AAA Covered Conductor & 11 Mtr. H-Pole for Pin-Points and Cut-Points & 11 Mtr WPB Pole for DP

No. of DP required With AB Switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8039)	3

A1				**Sub Total (Civil Portion) (in Rs.)**	**1,16,250.00**
A2				**Applicable Taxes to make it Landed Cost @18%**	**20,925.00**
A				**Total landed Cost (A=A1+ A2)**	**1,37,175.00**
B				**Other Overhead /(including Supervision Charges) @ 6 % of B**	
C				**Gross Total Estimated Cost i.e. (A+B)**	1,37,175.00
D				**CESS @ 1% of C**	1,371.75
E				**Grand Total (C+D)**	1,38,546.75

Annexure-12.24		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		NYED
Name of the Sub-Division :-		Daspalla
Name of the Section : -		Gania
Name of the Work :-		Proposal for construction of a new 11 KV Feeder from 33/11 KV Gania PSS and interlink with existing 11kV Kuska Feeder to bifurcate the length of the 11 KV Kuska Feeder.
Names of Schemes: -		**CAPEX 27-28**
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part A: Construction of One No of 11 KV Line Bay (Outdoor)	20,47,132.35
2	Part B: Refubrishment of 11KV Line length of 4 CKM using 100 SQMM AAAC and 11 mtr WPB Pole	26,97,974.37
3	Part C: Refubrishment of 11KV Line length of 2.5 CKM using 100 SQMM XLPE covered AAAC and 11 mtr WPB Pole	12,88,203.89
3	**Total Gross**	**60,33,310.61**
Total estimated cost is Rs. 0.60 Cr.		

Part A: Construction of One No of 11 KV Line Bay (Outdoor)					
No. of BAY requirement				1	
No. of VCB Requirement				1	
MATERIALS OF 11 kV Bay					
Sl. No.	**Description of Materials**	**Unit**	**Unit Rate**	**Total Quantity**	**Total Amount**
1	WPB (GI) Pole 160x152 11 Mtr. Long for 4-Pole	EA	28,835.00	4	1,15,340.00
2	GI Channel, angle & flat of different size	KG	78.00	1041.027	81,200.11
3	DMC Insulator for LA (70/10)	EA	113.50	8	908.00
4	Danger Plate, 2 no's.	EA	180.00	2	360.00
5	Gi Pipe Earthing 40mm. 3 Mtr. Long	EA	1,300.00	13	16,900.00
6	GI barbed wire anticlimbing device	KG	74.00	12	888.00
7	Lightning Arrester(12KV,10KA) (Station Class,class-2)	EA	1,960.00	3	5,880.00
8	11 KV 630 Amp Motorized Isolator with Earth Switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	67,097.00	1	67,097.00
9	11 KV 630 Amp Motorized Isolator without Earth Switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	29,328.00	1	29,328.00
10	1250 A 11 kV O/D VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	1,95,397.00	1	1,95,397.00
11	CR PANEL FOR FDR PROTECTION 11KV VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,70,500.00	1	2,70,500.00
12	CT 11KV OILCOOLED 200-400-800/1-1-1	EA	33,220.00	3	99,660.00
13	11KV OIL COOL PT 3P/3P/.2 CLS 100VA BRDN	EA	16,198.00	3	48,594.00
14	Control Cable 12Core x 2.5 mm2	Mtr	329.00	50	16,450.00
15	Control Cable 16Core x 2.5 mm2	Mtr	426.00	50	21,300.00
16	Control Cable 4Core x 2.5 mm2	Mtr	124.00	50	6,200.00
17	Control Cable 7Core x 2.5 mm2	Mtr	196.00	50	9,800.00
18	11 KV pin insulator polymer	EA	140.00	6	840.00
19	H W fitting(B&S) 70KN, 3Bolt	EA	412.00	18	7,416.00
20	Disc insulator (B&S) 70 KN polymer	EA	150.00	18	2,700.00
21	WEDGE CONNECTOR FOR 100 SQ MM CONDUCTOR.	EA	138.00	18	2,484.00
22	100 sq.mm AAA conductor	M	78.41	30.00	2,352.30
23	GI Nut , Bolt & Washer of different sizes	KG	74.00	50	3,700.00
24	1 Core x 16 mm2 Aluminium cable from Battery to Battery Charger & Battery Charger to DCDB	M	147.00	0	-
25	200 AH maintenance free VRLA Battery (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	Set	64,569.00	0	-
26	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	No	2,49,965.00	0	-
27	SMART ENERGY METER, 3P4W, 11 KV/110V-/5A	EA	7,389.11	1	7,389.11
A1				**Total Cost of materials**	**10,12,683.52**
A2				**Applicable Taxes to make it Landed Cost @18%**	**1,82,283.03**

Civil & Services					
Sl. No.	**Description of Materials**	**Unit**	**Unit Rate**	**Total Quantity**	**Total Amount**
1	Concreting of Pole @ 1:1.5:3(M-20 Grade)	M3	6,648.85	1.8	11,967.93
2	Couping of Pole @ 1:1.5:3(M-20 Grade)	M3	6,648.85	0.45	2,991.98
3	Construction of Earthing chamber incuding earthing pipe and civil works	EA	3,784.73	13	49,201.49
4	**VCB Foundation**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.28	3,589.33
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4	880.00
4.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.34125	349.06
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.455	2,387.60

4.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.825	18,783.00
4.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	13.25	4,079.54
4.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	140	15,610.00
5	**CT & PT Foundation**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	7.96875	3,928.91
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	4.5	990.00
5.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.363	371.31
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.363	1,904.83
5.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	2.3625	15,707.91
5.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	14.94	4,599.88
5.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	122.43	13,650.95
6	**RCC Cable Trench :**	Qty			
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	34.5	8,004.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	2.3	3,404.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	2.3	11,569.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.6	34,500.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	4.2	31,500.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	56	15,120.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	991.4	1,01,122.80

6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	1.2	9,540.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	530.2	55,140.80
8	**Land Leveling & Compaction/ Gravels sprading :**				
8.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	21.6	14,040.00
8.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	7.2	21,600.00

ANNEXURE-12.28		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	CDD-2	
Name of the Sub-Division : -	Jobra	
Name of the Section : -	Kandarpur	
Name of the Work :-	Proposal for refurbishment of 1.8 CKM O/H line of 11 kV AIR Fdr. along with construction of 2.26 CKM new line for reliability improvement & safety issue mitigation.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 2.32 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD A-B-C)	48,17,763.57
2	PART B: Construction of 1.8 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) & 100 Sq.mm. XLPE AAAC (Refer PSLD C-D)	25,25,419.44
3	PART C: Installation 02 Nos of 11 kV line protecting guarding on single pole for canal crossing having span 30 Mtr. each (Refer PSLD)	58,688.63
4	PART D: Installation 01 No of 11 kV line protecting guarding on DP for canal crossing (Refer PSLD)	33,364.17
5	PART E: Dismantling of Materials	1,45,399.60
6	**Total Amount**	**75,80,635.41**
	Total Amount (In Cr.)	**0.76**
Total estimated cost is Rs. 0.76 Crore. (On TPCODL Capex Scheme)		

PART A: Construction of 2.32 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD A-B-C)

Name of the Sub-Division : -	SALEPUR	
Name of the Section : -	ERKANA	
Name of the Work :-	Proposal for bifurcation of 11 kV Laxminarayanpur Fdr by constraction of 01 No. of new 11 kV Indoor Bay at 33/11 kV Erkana PSS.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of One No. of 11 KV Line Bay (indoor) at 33/11 kV Erkana PSS (Refer PSLD)	27,90,844.25
2	PART B: Construction of 1 no. of 11 KV DP with Isolator with Earth Switch inside Erkana PSS (DC Voltage- 48 V) (Refer PSLD)	3,15,854.45
3	PART C: Supply and laying of 11 kV 3C X 400 sqmm XLPE UG cable of 80 Mtr. length without spare at 33/11 kV ERKANA PSS.(Refer PSLD). (In existing RCC trench)	2,90,443.70
	Total Amount	**33,97,142.41**
	Total Amount (In Cr.)	**0.34**
Total estimated cost is Rs. 0.34 Crore. (On TPCODL Capex Scheme)		

PART A: Construction of One No. of 11 KV Line Bay (indoor) at 33/11 kV Erkana PSS (Refer PSLD)

No. of Bay requirement (Indoor)	1

MATERIALS OF 11 kV Bay

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	Gi Pipe Earthing 40mm. 3 Mtr. Long	EA	1,300.00	2	2,600.00
2	GI Flat	KG	78.00	70.8	5,522.40
3	Supply of 11 kV extension Panel (O/G Feeder) as per the existing drawing (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	18,00,000.00	1	18,00,000.00
4	SMART ENERGY METER, 3P4W, 11 KV/110V-/5A	EA	7,389.11	1	7,389.11
A1				**Total Cost of materials**	**18,15,511.51**
A2				**Applicable Taxes to make it Landed Cost @18%**	**3,26,792.07**
A				**Total landed Cost (A=A1 + A2)**	**21,42,303.58**
B				Stock, Storage & Insurance i.e 3% of A	64,269.11

D				Contigency @ 3% of C	66,197.18
E				Tools & Plants @ 2% of C (Except HT Stay Set / GI Pipe earthing)	44,068.25
F				Transportation @ 7.5% of C	1,65,492.95
G				Erection Charges @ 5% on Trf/Breaker/WPB/ H-Pole (With Applicable Taxes @ 18% to make it Landed Cost)	1,09,386.00
H				Erection Charges @ 10% of C (except Trf/Breaker/WPB/ H-Pole/HT stay set/GI Pipe/PSC pole/GI Pipe earthing) (With Applicable Taxes @ 18% to make it Landed Cost)	1,569.26
I				Erection Charges @ 20% of PSC pole (With Applicable Taxes @ 18% to make it Landed Cost)	-
J				**Sum of (C to I)**	**25,93,286.34**

Civil & Services

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	Construction of Earthing chamber incuding earthing pipe and civil works	EA	3,784.73	2	7,569.46
2	**RCC Cable Trench :**	Qty			
2.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	17.25	4,002.00
2.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	1.15	1,702.00
2.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	1.15	5,784.50
2.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	2.3	17,250.00
2.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	2.1	15,750.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	28	7,560.00
2.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	495.7	50,561.40
2.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	0.6	4,770.00
2.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	265.1	27,570.40

ANNEXURE-12.34

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	CED
Name of the Sub-Division : -	GOPALPUR
Name of the Section : -	BALIKUDA
Name of the Work :-	Proposal for construction of 1.39 CKM 11 kV line along with augmentation of 1.55 CKM 11 kV O/H line for N-1 connectivity between 11 kV Baranga & Phulnakhra feeder and 11 kV Pratapnagari & Uttampur feeder for reliability improvement.
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Construction New Line of 1.55 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) & 148 Sq.mm. AAAC (Refer PSLD B-C & C-D)	25,73,894.74
2	PART B: Construction New Line of 0.95 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 148 Sq.mm. AAAC (Refer PSLD F-G,H-I,J-K)	25,77,821.98
3	PART C: Construction of 1 no. of 11 KV DP with Isolator with Earth Switch inside Balikuda PSS (Refer PSLD)	3,15,854.45
4	Part D: 1. Supply and Laying of 11KV 3CX400 Sqmm XLPE U/G Cable with line length of 440 MTR Without Spare . (Refer Proposed SLD point A-B,E1-F, E2-H, D-E,I-J) 2. Installation of 01 No. of 11 kV 4-way RMU (LLVV) (refer PSLD)	56,33,548.25
5	PART E: Installation of 3 Nos of 11 kV line protecting guarding on single pole for road crossing(Refer PSLD)	84,754.31
6	Part F: Dismantling	30,033.36
7	**Total Amount**	**1,12,15,907.09**
	Total Amount (In Cr.)	**1.12**

Total estimated cost is Rs. 1.12 Crore. (On TPCODL Capex Scheme)

PART A: Construction New Line of 1.55 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) & 148 Sq.mm. AAAC (Refer PSLD B-C & C-D)

No. of DP required With AB Switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8039)	3

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	SED	
Name of the Sub-Division : -	SALEPUR	
Name of the Section : -	ORIKANTA	
Name of the Work :-	Proposal for augmentation of of 5 CKM O/H line of 11 kV Bilahata Fdr. using 100 Sq.mm AAA Conductor & 11 Mtr. WPB Pole (interposing).	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 2 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) using 100 Sq.mm. XLPE AAAC (Refer PSLD)	26,85,656.09
2	PART B: Augmentation of 3 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor (Refer PSLD)	39,14,580.12
3	PART C: Installation of 04 Nos of 11 kV line protecting guarding on Single Pole for Road Crossing having span 20 Mtr. each(Refer PSLD)	1,13,005.75
4	Part D: Dismantling	1,25,139.00
5	**Total Amount**	**68,38,380.96**
	Total Amount (In Cr.)	**0.68**
Total estimated cost is Rs. 0.68 Crore. (On TPCODL Capex Scheme)		

PART A: Augmentation of 2 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) using 100 Sq.mm. XLPE AAAC (Refer PSLD)

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	KED-2
Name of the Sub-Division : -	MARSHAGHAI
Name of the Section : -	MARSHAGHAI
Name of the Work :-	Proposal for Augmentation of 3 CKM line of 11 Kv Angulai Fdr. from 34/55 Sq.mm. AAAC to 100 Sq.mm. AAAC along with construction of 2.5 CKM linking line for N-1 reliability with 11 kV Kurtanga Fdr.
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: Augmentation of 1 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. XLPE AAA Conductor (Refer PSLD A-C)	1,735,610.97
2	PART-B : 1.Construction of the 2.5 CKM 11 kV O/H line using 11 m WPB poles (interposing) and 100 sq. mm AAA conductor (refer to PSLD E-B1 and G-J) 2. Augmentation of the 2 CKM 11 kV O/H line using 11 m WPB poles (interposing) and 100 sq. mm AAA conductor (refer to PSLD D-E)	5,789,965.32
3	PART-C: Installation of 11 KV line protecting guarding of 2 Nos having span 30 Mtr. Each (Refer PSLD)	58,688.63
4	PART D: Dismantling Portion	192,219.11
	Total Amount	**7,776,484.03**
	Total Amount (In Cr.)	**0.78**

Total estimated cost is Rs. 0.78 Crore. (On TPCODL Capex Scheme)

ANNEXURE-12.47		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	KED-II	
Name of the Sub-Division : -	Mahakalpada	
Name of the Section : -	Mahakalpada	
Name of the Work :-	Proposal for construction of 0.9 CKM 11 KV line using 100 Sq.mm AAA Conductor for N-1 connectivity between 11 kV Jamboo & Marine Fdr. for reliability improvement.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 0.9 CKM 11 kV O/H line using 11 Mtr. H-Pole & 100 Sq.mm. AAAC (Refer PSLD)	2,466,126.18
2	PART B: 1. Installation of 01 No. of 4-Pole without AB Switch (Refer PSLD) 2. Installation of 01 No. of 4-Pole with 01 No. of AB Switch (Refer PSLD)	792,437.71
3	PART C: Installation of 01 No. section boundary meter (refer PSLD)	92,915.60
	Total Amount	**3,351,479.49**
	Total Amount (In Cr.)	**0.34**
Total estimated cost is Rs. 0.34 Crore. (On TPCODL Capex Scheme)		

PART A: Construction of 0.9 CKM 11 kV O/H line using 11 Mtr. H-Pole & 100 Sq.mm. AAAC (Refer PSLD)					
No. of DP required With AB Switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8039)			1

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	KED-I	
Name of the Sub-Division : -	Aul	
Name of the Section : -	Rajkanika	
Name of the Work :-	Proposal for refurbishment of 6 CKM O/H line of 11 kV Jaynagar Fdr. using 100 Sq.mm AAA Conductor & 11 Mtr. WPB Pole for reliability improvement.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC (Refer PSLD BC, EF, GH & IJ)	8,780,295.38
2	PART B: Installation of 04 Nos of 11 kV line protecting guarding having span 30 Mtr. (Refer PSLD)	117,377.25
3	PART C: Dismantling Portion	298,675.98
4	**Total Amount**	**9,196,348.62**
	Total Amount (In Cr.)	**0.92**
Total estimated cost is Rs. 0.92 Crore. (On TPCODL Capex Scheme)		

PART A: Augmentation of 6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAAC (Refer PSLD BC, EF, GH & IJ)

ANNEXURE-12.49		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	KED-I	
Name of the Sub-Division : -	Kendrapara	
Name of the Section : -	Indupur	
Name of the Work :-	Proposal for refurbishment of 7.5 CKM 11 KV line of 11 kV Bairi Fdr. using 100 Sq.mm AAA Conductor & 11 Mtr. WPB Pole for reliability improvement.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: 1. Construction of 3.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC (Refer PSLD CD & EF) 2. Augmentation of 1.5 CKM 11 kV O/H line using 100 Sq.mm. AAAC & 11 Mtr. WPB Pole (interposing) (Refer PSLD A-B-C) 3. Augmentation of 1.5 CKM 11 kV O/H line using 100 Sq.mm. AAAC(Pole is not required) (Refer PSLD G-H) 4. Installation of 10 Nos interposing pole in existing line (refer PSLD F-G)	8,721,642.86
2	PART B: Augmentation of 1 CKM 11 kV O/H line using 11 Mtr. WPB Pole(interposing) & 100 Sq.mm. XLPE AAAC (Refer PSLD DE)	1,652,525.03
3	PART C: Installation of 02 Nos of 4-Pole without AB Switch (Refer PSLD)	775,938.53
4	PART D: Installation of 05 Nos of 11 kV line protecting guarding having span 30 Mtr. (Refer PSLD)	146,721.57
5	PART E: Dismantling Portion	312,251.60
	Total Amount	**11,609,079.59**
	Total Amount (In Cr.)	**1.16**
Total estimated cost is Rs. 1.16 Crore. (On TPCODL Capex Scheme)		

PART A:

1. Construction of 3.5 CKM 11 kV O/H line using 11 Mtr. WPB Pole & 100 Sq.mm. AAAC (Refer PSLD CD & EF)

2. Augmentation of 1.5 CKM 11 kV O/H line using 100 Sq.mm. AAAC & 11 Mtr. WPB Pole (interposing) (Refer PSLD A-B-C)

3. Augmentation of 1.5 CKM 11 kV O/H line using 100 Sq.mm. AAAC(Pole is not required) (Refer PSLD G-H)

4. Installation of 10 Nos interposing pole in existing line (refer PSLD F-G)

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-		BCDD-II
Name of the Sub-Division : -		Khandagiri
Name of the Section : -		Khandagiri
Name of the Feeder: -		11kV Asian Plaza
Name of the Work :-		Proposal for Bifurcation of existing 11kV Asian Plaza feeder for mitigation of overloading.
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part-A:- 2. Installation of 1 No. of RMU in MS Nagar T-Off in Asian Plaza Feeder for Linking with 11kV Urbanyx Feeder.	44,72,530.56
2	Part-B:-Augmentation of 11kV Asian Plaza feeder of length 1.5CKM.	27,36,985.77
3	Part-C Dismantling.	72,634.25
4	**Total Gross**	**72,82,150.58**
Total estimated cost is Rs. 0.73Crore. (On TPCODL CAPEX Scheme)		

Part-A:-

2. Installation of 1 No. of RMU in MS Nagar T-Off in Asian Plaza Feeder for Linking with 11kV Urbanyx Feeder.

Standard BoQ and Estimate for 11kV 3C, 400sqmm UG Cable along with 11kV RMU

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***200***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	200	2,375.00	4,75,000.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA		15,950.00	-
1.3	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	3	8,260.00	24,780.00
1.4	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	3	2,900.00	8,700.00
1.5	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	200.00	812.00	1,62,400.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.19	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	12,62,647.00	12,62,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**19,37,156.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	200	110.00	22,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	6	2,000.00	12,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	0	2,970.00	-
1.4	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	200.00	195.00	39,000.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.1	Erection of 11kV RMU 3WAY 630A LLV WITH FRTU & AUX PT	EA	0	12,000.00	-
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
3	**FRTU and OFC for RMU SCADA Automation**				
3.1	Services of FRTU Panel, Communication and Other Supplied System	EA	0.0	6,755.00	-
	Sub Total (Erection Portion) (in Rs.)				**88,000.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				

1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	176

ANNEXURE-12.51

TP CENTRAL ODISHA DISTRIBUTION LIMITED

Name of the Division :-	KED-I
Name of the Sub-Division : -	Kendrapara
Name of the Section : -	Chhata
Name of the Work :-	Proposal for construction of 1.1 CKM 11 KV line using 100 Sq.mm XLPE AAA Conductor for N-1 connectivity between 11 kV Thakurpatna & Chhata Fdr.
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

Abstract of Estimate

Sl. No.	Description	Gross
1	PART A: 1. Construction of 1.1 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD AB) 2. Installation of 10 Nos of 11 Mtr. WPB Pole (interposing) in 11 kV Chhata Fdr.	4,142,866.07
2	PART B: Installation of 01 No. section boundary meter (refer PSLD)	92,915.60
	Total Amount	**4,235,781.67**
	Total Amount (In Cr.)	**0.42**

Total estimated cost is Rs. 0.42 Crore. (On TPCODL Capex Scheme)

PART A:

1. Construction of 1.1 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD AB)

2. Installation of 10 Nos of 11 Mtr. WPB Pole (interposing) in 11 kV Chhata Fdr.

No. of DP required Without AB switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8035)	1

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	KED-I	
Name of the Sub-Division : -	Rajnagar	
Name of the Section : -	Rajnagar-II	
Name of the Work :-	Proposal for construction of 2 CKM 11 kV new line for N-1 connectivity between 11 kV Rajnagar & Balarampur Fdr. along with installation of 01 No. of 11 kV 4-way RMU (LVVV) at Kurundi for improvement of reliability.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: 1. Construction of 2 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. AAAC (Refer PSLD) 2. Installation of 15 Nos 11 Mtr. WPB Pole (interposing) (Refer PSLD)	6,624,115.63
2	PART B: 1. Supply & laying of 0.13 kM 11 kV 3CX400 Sq.mm. XLPE U/G cable with one run spare	3,543,545.14
3	PART C: Installation of 02 Nos of 11 kV line protecting guarding having span 40 Mtr. (Refer PSLD)	60,874.38
	Total Amount	**10,228,535.15**
	Total Amount (In Cr.)	**1.02**
Total estimated cost is Rs. 1.02 Crore. (On TPCODL Capex Scheme)		

PART A:

1. Construction of 2 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. AAAC (Refer PSLD)

2. Installation of 15 Nos 11 Mtr. WPB Pole (interposing) (Refer PSLD)

No. of DP required Without AB switch (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8035)	2

PART B:
1. Supply & laying of 0.13 kM 11 kV 3CX400 Sq.mm. XLPE U/G cable with one run spare in Open Trench method (refer PSLD)
2. Installation of 01 No. 11 kV 4-way RMU (LVVV) (Refer PSLD)

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***130***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	260	2,375.00	617,500.00
1.2	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	8	8,260.00	66,080.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	8	2,900.00	23,200.00
1.4	Supply of materials for High Density Polyethelene (HDPE) pipe 200mm diameter, PE 80- PN8 for laying of 11kV UG cable	M	260.00	812.00	211,120.00
2	**Supply of 11kV RMU**				
s	***No. of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT***	***EA***	***1***		
2.1	Supply of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	1,262,647.00	1,262,647.00
3	**Earthing**				
3.1	Earthing Conductor: 50X6 mm (2.4kg./mtr.) Flat(GI) for equipment, structure etc.)	KG	13.20	78.00	1,029.60
3.2	Pipe Earthing 40mm. GI Pipe	EA	2	1,300.00	2,600.00
	Sub Total (Supply Portion) (in Rs.)				**2,184,176.60**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	260	110.00	28,600.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	16	2,000.00	32,000.00
1.3	Laying of 20**0mm dia** PE 80-PN8, **HDPE pipe** inside open trench.	M	260.00	195.00	50,700.00
2	**Erection, Commissioning, Wiring and Testing of 11kV RMU**				
2.19	Erection of 11KV 4WAY RMU 630A LVVV(1I+3B)+FRTU+AUXPT	EA	1	15,000.00	15,000.00
	Sub Total (Erection Portion) (in Rs.)				**126,300.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Civil works for U/G Cable laying in Open Trench**				
1.1	Earth work excavation of soil (1mtr. width X 1.2mtr. depth)-Route Length	M	66		
1.1.a	Earth work excavation of **soil**	M3	55.44	716.03	39,696.70
1.1.b	Earth work excavation of **hard rock**	M3	23.76	1,759.39	41,803.11

Name of the Division :-	PDP	
Name of the Sub-Division : -	Kujanga	
Name of the Section : -	Chatua	
Name of the Work :-	Proposal for Augmentation of 4.1 CKM O/H line of 11 kV Sandhakuda Fdr. from 80 Sq.mm. AAAC to 100 Sq.mm. XLPE AAAC along with shifting of 1 CKM 11 kV line from water logging area and reliability improvement.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Augmentation of 4.1 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. XLPE AAA Conductor (Refer PSLD B-D,F-G)	6,722,502.79
2	PART B: Construction of 1 CKM 11 kV O/H line using 11 Mtr. H- Pole & 100 Sq.mm. XLPE AAA Conductor (Refer D-E PSLD)	2,891,791.19
3	PART-C: Installation of 11 KV line protecting guarding of 2 Nos having span 30 Mtr. Each (Refer PSLD)	58,688.63
4	PART D: Dismantling Portion	274,471.38
	Total Amount	**9,947,453.99**
	Total Amount (In Cr.)	**0.99**
Total estimated cost is Rs. 0.99 Crore. (On TPCODL Capex Scheme)		

PART A: Augmentation of 4.1 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. XLPE AAA Conductor (Refer PSLD B-D,F-G)

Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART-A: Supply and laying of 11 kV 3C × 400 sq. mm XLPE U/G cable for 0.57 KM without spare run in HDD Method (refer to Point D–E)	4,353,491.23
2	PART B: Construction of 0.04 CKM 11 kV O/H line using 11 mtr. WPB Pole & 100 Sq.mm. XLPE AAA Conductor.(Refer PSLD - E-F)	489,074.54
3	PART C: Dismantling Portion	18,106.71
	Total Amount	**4,860,672.49**
	Total Amount (In Cr.)	**0.49**
Total estimated cost is Rs. 0.49 Crore. (On TPCODL Capex Scheme)		

PART-A: Supply and laying of 11 kV 3C × 400 sq. mm XLPE U/G cable for 0.57 KM without spare run in HDD Method (refer to Point D–E)

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***	***570***		
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	570	2,375.00	1,353,750.00
1.2	Supply of Straight through jointing kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG Cable kits	EA	2	15,950.00	31,900.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	2	2,900.00	5,800.00
	Sub Total (Supply Portion) (in Rs.)				**1,391,450.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	570	110.00	62,700.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	4	2,000.00	8,000.00
1.3	Laying of HDPE pipe (200mm dia, PN8 PE80) by HDD method including supply of HDPE Pipe.	M	570	2,970.00	1,692,900.00
	Sub Total (Erection Portion) (in Rs.)				**1,763,600.00**

Civil Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	Road Repair and restoration charges	KM	0.03	9,294,727.82	278,841.83
2	Supply and Erection of Cable Route Marker along the cable route at an interval of 30mtrs with civil works	EA	19	1,035.17	19,668.23
3	GIS coordinate mapping, drawing preparation and submission of the same for New/Existing line	CKM	0.57	10,470.00	5,967.90
	Sub Total (Civil Portion) (in Rs.)				**304,477.96**

A1	**Sub Total (Supply Portion)**	**1,391,450.00**

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	JED	
Name of the Sub-Division : -	Balikuda	
Name of the Section : -	Balikuda-I	
Name of the Work :-	Proposal for refurbishment of 11.5 CKM O/H line of 11 kV Dengapola Fdr. from 34/55 Sq.mm. AAAC to 100 Sq.mm. AAAC along with construction of 1.5 CKM 11 kV line for N-1 connectivity between 11 kV Govindpur and Dengapola Fdr. for improvement of reliability.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 1.5 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD C1-Y)	4,672,656.02
2	PART B: 1. Augmentation of 7.5 CKM 11 kV O/H line from 34/55 Sq.mm. AAAC to 100 Sq.mm. AAAC & installation of interposing pole (Refer PSLD) 2. Installation of 67 Nos interposing pole in existing line (refer PSLD) 3. Installation of 03 Nos DP with AB Switch for Doluisahi, Amanipatna & Bhagawanpur DSS (Refer PSLD)	13,129,989.28
3	PART C: Augmentation of 4 CKM 11 kV O/H line from 34/55 Sq.mm. AAAC to 100 Sq.mm. XLPE AAAC & installation of interposing pole (Refer PSLD)	4,905,337.50
4	PART D: Renovation of existing 4-Pole	169,752.57
5	PART E: Installation of 7 Nos of 11 kV line protecting guarding having span 30 Mtr. (Refer PSLD)	205,410.19
6	PART F: Dismantling Portion	473,058.13
7	PART G: Installation of 01 No. section boundary meter (refer PSLD)	92,915.60
8	**Total Amount**	**23,649,119.29**
	Total Amount (In Cr.)	**2.36**
Total estimated cost is Rs. 2.36 Crore. (On TPCODL Capex Scheme)		

PART A: Construction of 1.5 CKM 11 kV O/H line using 11 Mtr. H Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD C1-Y)

TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	JED	
Name of the Sub-Division : -	JAGATSINGHPUR	
Name of the Section : -	JAGATSINGHPUR NO-2	
Name of the Work :-	Proposal for refurbishment of 6.1 CKM line of 11 kV Chhapada Fdr. from 34/55 Sq.mm. AAAC to 100 Sq.mm. XLPE AAAC for reliability improvement.	
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**	
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	PART A: Construction of 0.1 CKM 11 kV O/H line using 14 Mtr. H-Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD)	352,020.51
2	PART B: Augmentation of 6 CKM 11 kV O/H line using 11 Mtr. WPB Pole (interposing) & 100 Sq.mm. AAA Conductor (Refer PSLD C-D,E-F)	9,000,609.53
3	PART-C: Installation of 11 KV line protecting guarding of 4 Nos having span 30 Mtr. Each (Refer PSLD)	117,377.25
4	PART D: Dismantling Portion	262,943.79
	Total Amount	**9,732,951.09**
	Total Amount (In Cr.)	**0.97**
Total estimated cost is Rs. 0.97 Crore. (On TPCODL Capex Scheme)		

PART A: Construction of 0.1 CKM 11 kV O/H line using 14 Mtr. H-Pole & 100 Sq.mm. XLPE AAAC (Refer PSLD)

TP CENTRAL ODISHA DISTRIBUTION LIMITED

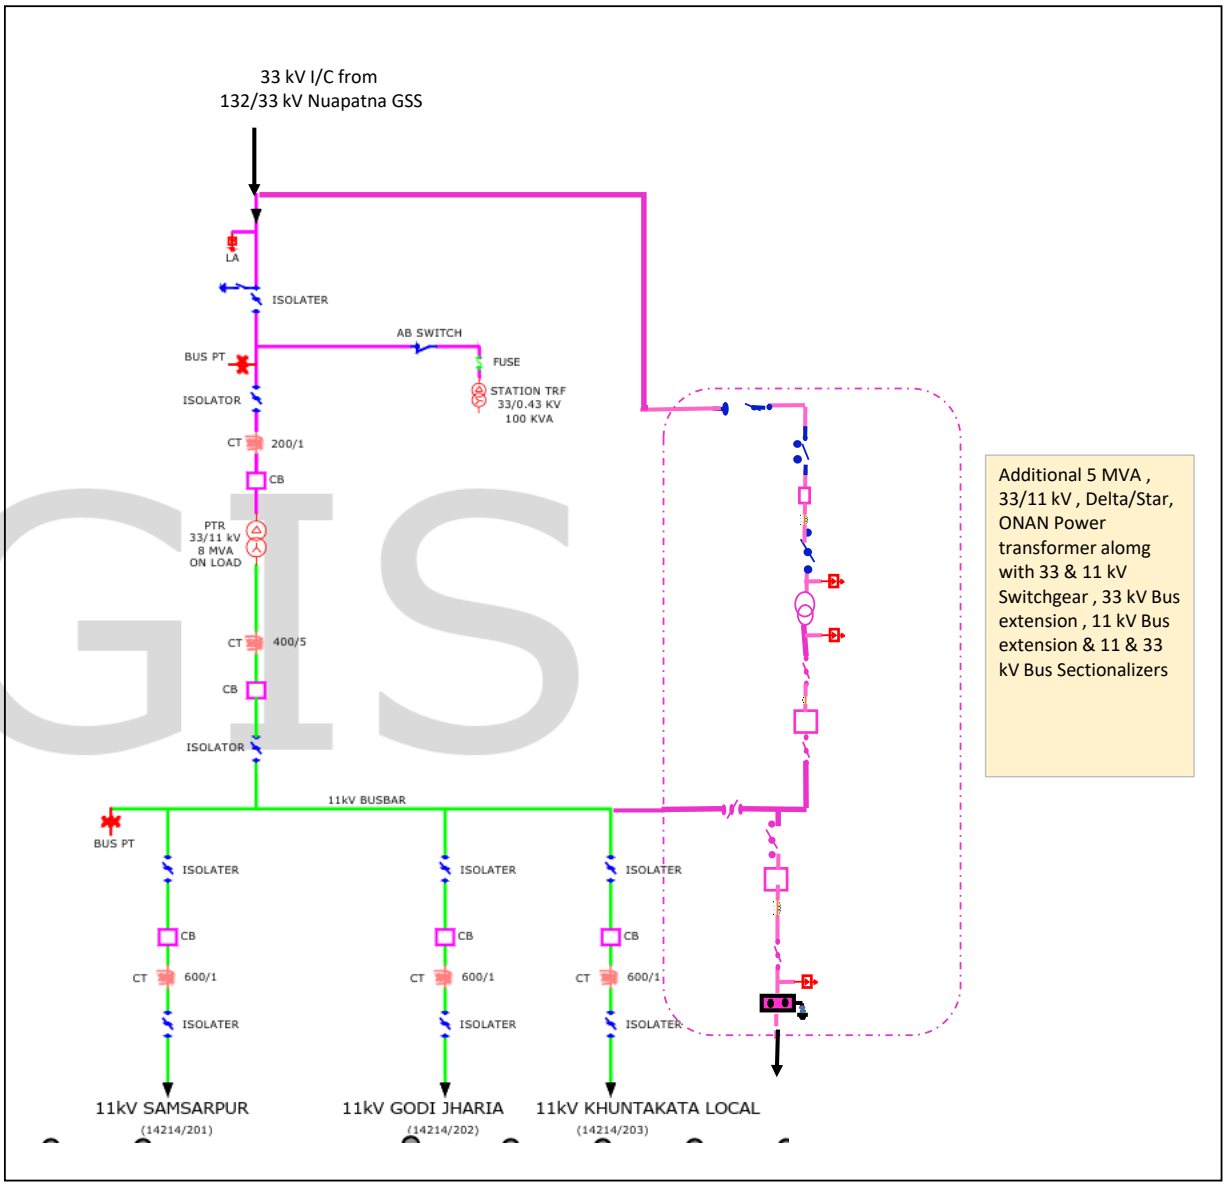
Name of the Circle :-	**CUTTACK**
Name of the Division : -	AED
Name of the Work :-	Proposal for installation of 2nd PTR (5 MVA) at Khuntakanta PSS along with 33 kV Bay and 11 kV Bays
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

ABSTRACT OF ESTIMATE



Sl. No.	Description	Amount
1	Part-A: a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.	69,32,475.44
2	Part-B: Extension of 11 kV Bus to connect new additional PTR Bay	7,35,764.69
3	Part-C: Construction of One No of 11 kV Outdoor Bay at PTR Incomer side and One No. Feeder outgoing Bay.	45,26,914.92
4	Part-D: Installation of Additional 33/11 kV , 5 MVA PTR (PTR Cost not considered in the estimate, existing PTR to be re-used)	80,42,301.67
5	PART E: a. Construction of 0.1 CKM 11kV Line using 100 SQ.MM. -AAA Conductor to connect the existing 11 KV Feeder. b. Installation of 1 No. of DP with Isolator and Earth switch at PSS.	4,32,161.08
6	PART-F- Dismantling of Materials	25,287.63
	Total Amount	**2,06,94,905.43**
	Total Amount (In Cr.)	**2.07**

Total estimated cost is Rs. 2.07 Crore. (On TPCODL Capex Scheme)

EXISTING SLD

PROPOSED SLD

Part-A:

a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line

b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.

No. of BAY requirement	2
No. of VCB Requirement	2

No. of Bus isolator requirement

3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	102.6195	50,595.52
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	48	10,560.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	4.2	22,039.40
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	28.35	1,88,494.90
4.v	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	179.28	55,198.52
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	1469.16	1,63,811.34
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	18.9	9,318.46
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.134	5,950.64

5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	11.4	75,796.89
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	59.76	18,399.51
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	489.72	54,603.78
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	138	32,016.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	9.2	13,616.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	9.2	46,276.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	18.4	1,38,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	16.8	1,26,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	224	60,480.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	3965.6	4,04,491.20
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	4.8	38,160.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2120.8	2,20,563.20

7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00
K1				**Total Civil & Services**	**20,87,048.45**

2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**RCC Cable Trench :**	Qty			
4.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	172.5	40,020.00
4.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	11.5	17,020.00
4.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	11.5	57,845.00
4.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	23	1,72,500.00
4.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	21	1,57,500.00
4.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	280	75,600.00
4.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	4957	5,05,614.00
4.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	6	47,700.00
4.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2651	2,75,704.00
5	**Land Leveling & Compaction/ Gravels sprading :**				
5.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
5.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00

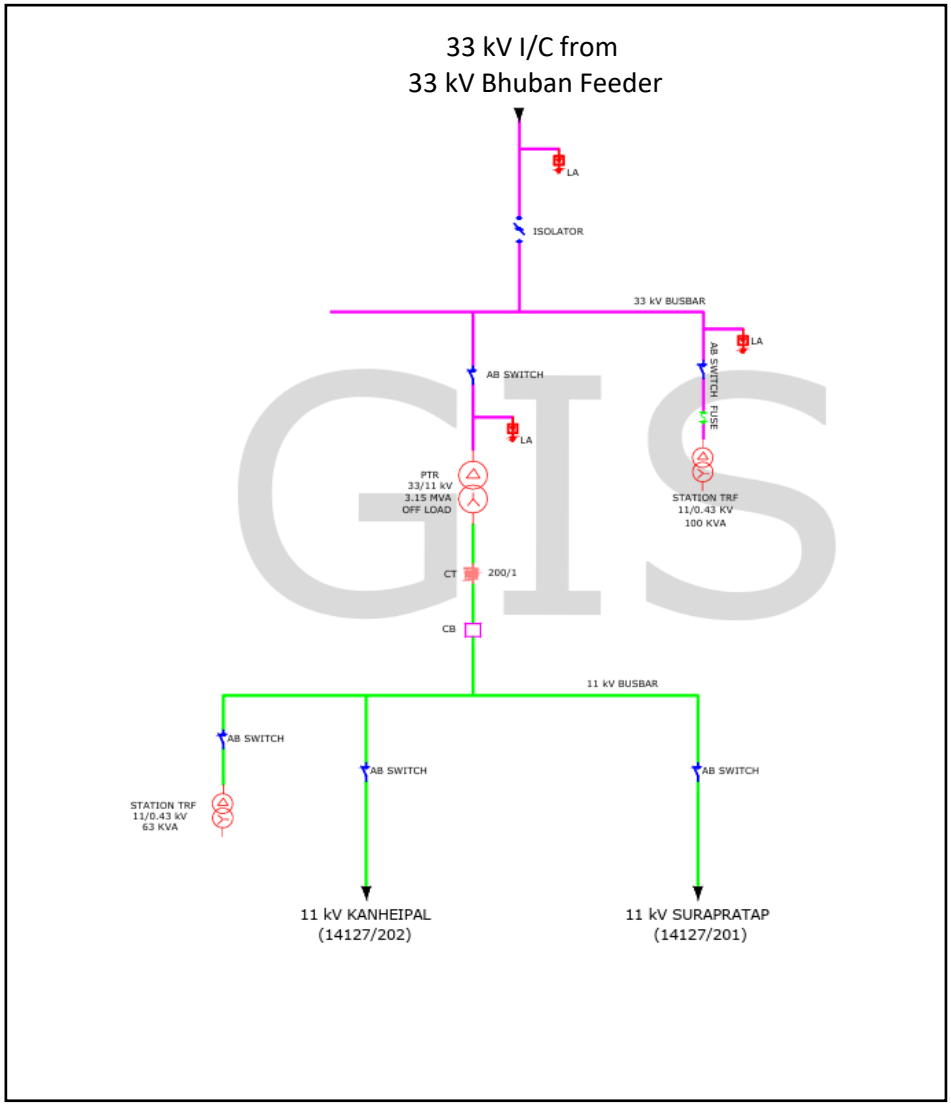
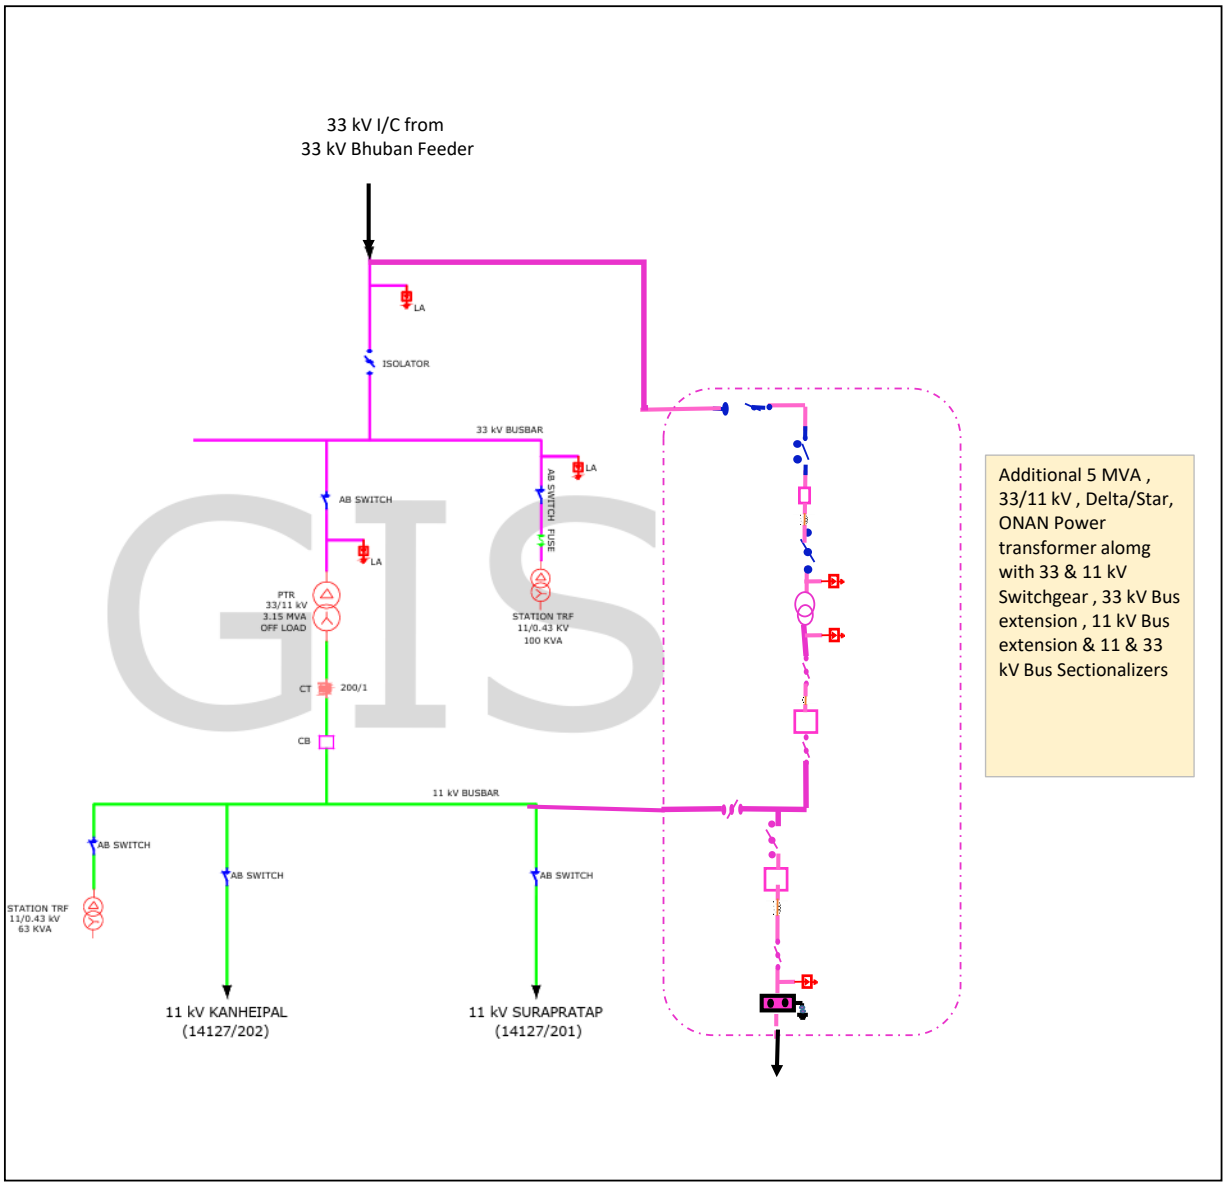
Annexure-15.2

TP CENTRAL ODISHA DISTRIBUTION LIMITED



Name of the Circle :-	**Dhenkenal**
Name of the Division : -	DED
Name of the Work :-	Proposal for installation of 2nd PTR (3.15 MVA) at Dahanbil PSS along with 33 kV Bay and 11 kV Bays
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

ABSTRACT OF ESTIMATE



Sl. No.	Description	Amount
1	Part-A: a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.	69,32,475.44
2	Part-B: Extension of 11 kV Bus to connect new additional PTR Bay	7,35,764.69
3	Part-C: Construction of One No of 11 kV Outdoor Bay at PTR Incomer side and One No. Feeder outgoing Bay.	45,26,914.92
4	Part-D: Installation of Additional 33/11 kV , 3.15 MVA PTR (PTR Cost not considered in the estimate, existing PTR to be re-used)	80,42,301.67
5	PART E: a. Construction of 0.1 CKM 11kV Line using 100 SQ.MM. -AAA Conductor to connect the existing 11 KV Feeder. b. Installation of 1 No. of DP with Isolator and Earth switch at PSS.	4,32,161.08
6	PART-F- Dismantling of Materials	25,287.63
	Total Amount	**2,06,94,905.43**
	Total Amount (In Cr.)	**2.07**

Total estimated cost is Rs. 2.07 Crore. (On TPCODL Capex Scheme)

EXISTING SLD

PROPOSED SLD

Part-A:

a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line

b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.

No. of BAY requirement	2
No. of VCB Requirement	2

No. of Bus isolator requirement

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	T-1 GI Column(7.25 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI)) for 33kV incoming line, Nominal Unit Wt - 0.35 MT/column	KG	78.00	700	54,600.00
2	T-2 GI Column (7.25mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI)) for 33kV incoming line -1 no, Nominal Unit Wt - 0.42 MT/column	KG	78.00	840	65,520.00
3	T-1A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.31 MT/column (0.31x2=0.62MT)	KG	78.00	1240	96,720.00
4	T-2A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.37 MT/column (0.37x2=0.74MT)	KG	78.00	1480	1,15,440.00
5	G-3 GI Beam(5.05mtr long, consisting of 2 Nos 150X75 X5.7mm) for 33kV incoming line - (2 nos. Beam- one for Surge Arrester and other for Isolator, Nominal Unit Wt - 0.2 MT/Beam	KG	78.00	400	31,200.00
6	G-2 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	700	54,600.00
7	G-1 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	700	54,600.00
8	Equipment Structures (GI) For 33 KV Isolator (Unit Wt of Equipment Structures per set - 0.33 MT)	KG	78.00	1320	1,02,960.00
9	GI Spikes with cone and GI (2 nos) base plate 10mm (50x3000 mm GI pipe) (Unit Wt=0.035 MT) (0.035x6 = 0.21 MT)	KG	78.00	420	32,760.00
10	GI Pipe Earthing 40mm. 3 Mtr. Long	No.	1,300.00	28	36,400.00
11	50x6mm Flat(GI) for earthing, 2.36kg/mtr.	KG	78.00	991	77,313.60
12	232 sq.mm AAAC for 33kV side jumpering and Bus Formation etc.	M	181.65	100	18,165.00
13	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator with earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	1,01,652.00	1	1,01,652.00
14	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator without earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	86,858.00	3	2,60,574.00
15	33KV Outdoor VCB-1250 A, 25 KV/3 sec Gang operated type (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,63,629.00	2	5,27,258.00
16	Indoor CR PANEL FOR Feeder(IC/OG) PROTECTION 33KV Outdoor VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,70,500.00	1	2,70,500.00
17	Indoor CR PANEL FOR Transformer PROTECTION 33KV Outdoor VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	4,49,000.00	1	4,49,000.00
18	33KV, Single Phase, Outdoor, OILCOOLED CT , 25KA/3sec CTR-200-400-800/1-1-1 A(Accuracy Class-PS/0.2S/5P20,Burden -/30VA/30VA	EA	40,551.00	6	2,43,306.00
19	33KV, Single Phase, Outdoor, OILCOOLED PT 33000/V3/110/V3 Volt (Accuracy class 3P/3P/0.2, Burden-100/100/100 VA	EA	24,028.00	6	1,44,168.00
20	Lightning Arrester(30KV,10KA) (Station Class,class-2)	EA	4,443.00	3	13,329.00
21	Lightening arrester 33 kV, 10 kV, CL III. (with surge counter)	EA	11,900.00	3	35,700.00
22	Control Cable 12Core x 2.5 mm^2	Mtr	329.00	100	32,900.00

J	**Sum of (C to I)**	**43,97,614.95**

Civil & Services

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	Construction Earthing chamber including installation of earthing pipe.Making earthing chamber including excavation , soil treatment with bentonide powder , calculation of earth resistance, including Installation of 3Mtr GI Pipe 40mm/50mm including welding of Flat(GI) around pipe .	No.	3,784.73	28	1,05,972.44
2	**VCB Foundation**				
2.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	14.56	7,178.66
2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.6825	698.13
2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.91	4,775.20
2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.65	37,566.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	26.5	8,159.09
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	102.6195	50,595.52
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	48	10,560.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	4.2	22,039.40
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	28.35	1,88,494.90
4.v	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	179.28	55,198.52
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	1469.16	1,63,811.34
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	18.9	9,318.46
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.134	5,950.64

5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	11.4	75,796.89
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	59.76	18,399.51
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	489.72	54,603.78
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	138	32,016.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	9.2	13,616.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	9.2	46,276.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	18.4	1,38,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	16.8	1,26,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	224	60,480.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	3965.6	4,04,491.20
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	4.8	38,160.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2120.8	2,20,563.20

7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00
K1				**Total Civil & Services**	**20,87,048.45**
K2				**Applicable Taxes to make it Landed Cost @18%**	**3,75,668.72**
K				**Total landed Cost (K=K1+ K2)**	**24,62,717.17**
L				**Total Material +services (J+K)**	**68,60,332.12**
M				Other overheads (Including 6% supervision charges)	
N				**Sub-Total (L+M)**	**68,60,332.12**
O				CESS 1% of (N)	68,603.32
P				**Total (N+O)**	69,28,935.44
Q				Inspection Fee of VCB - Rs. 1500/ VCB	3,000.00
R				GST @ 18% on Total Inspection Fees (Q)	540.00
S				Total Inspection Fees including GST (Q+R)	3,540.00
T				**Gross Total Material, Services and Inspection Fees (P+S)**	**69,32,475.44**

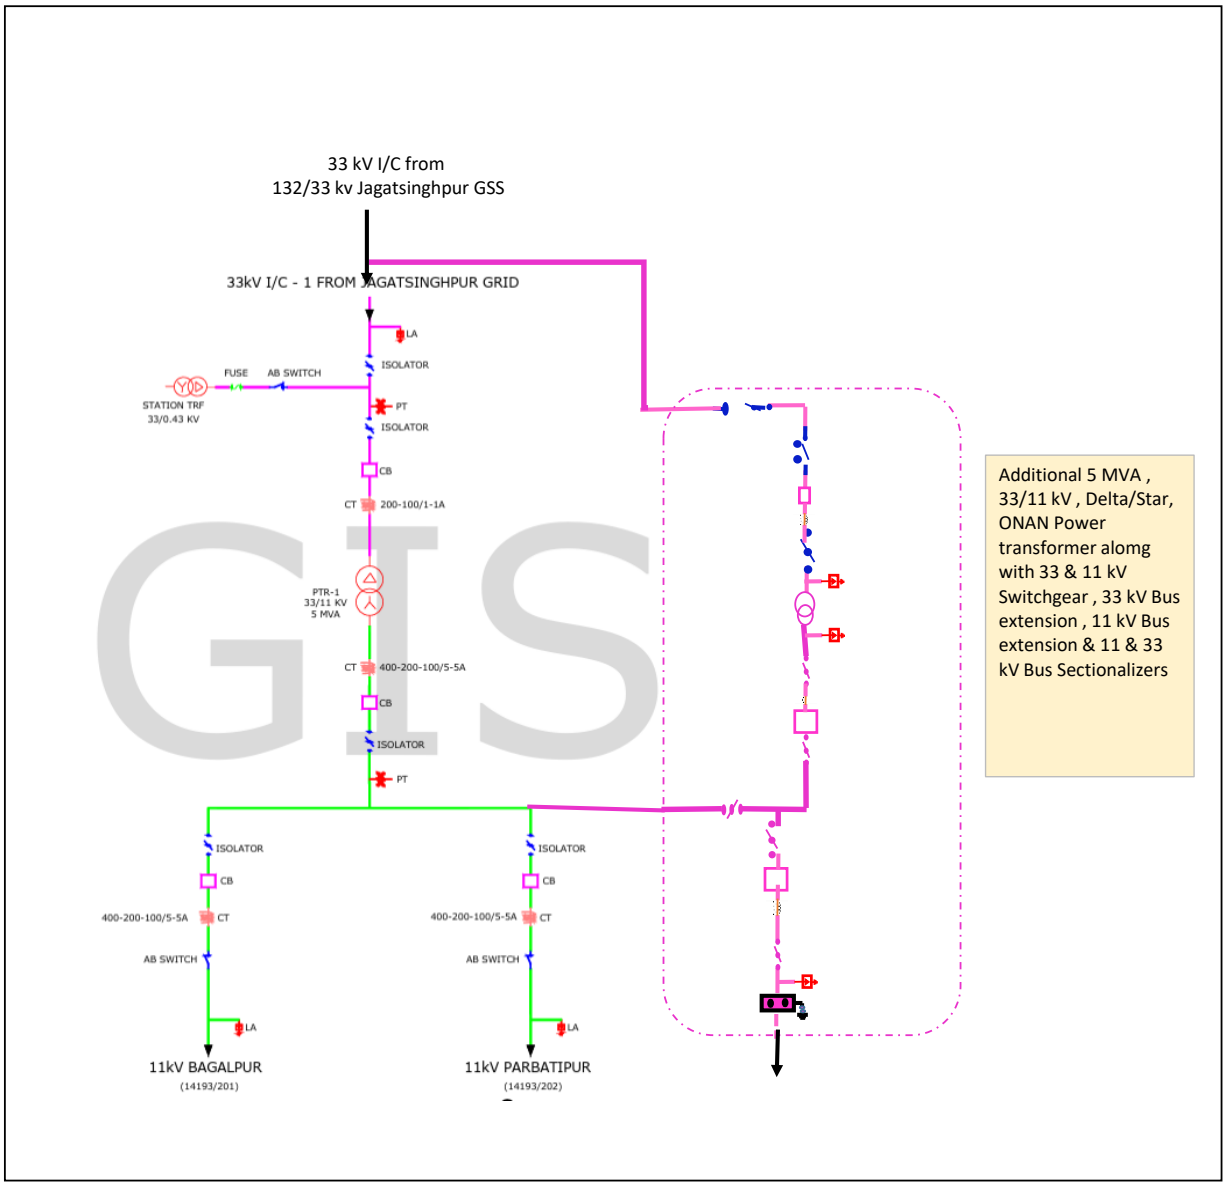
Name of the Circle :-	**Paradeep**
Name of the Division : -	JED
Name of the Work :-	Proposal for installation of 2nd PTR (5 MVA) at 22 Mouza PSS along with 33 kV Bay and 11 kV Bays
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

ABSTRACT OF ESTIMATE



Sl. No.	Description	Amount
1	Part-A: a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.	69,32,475.44
2	Part-B: Extension of 11 kV Bus to connect new additional PTR Bay	7,35,764.69
3	Part-C: Construction of One No of 11 kV Outdoor Bay at PTR Incomer side and One No. Feeder outgoing Bay.	45,26,914.92
4	Part-D: Installation of Additional 33/11 kV , 5 MVA PTR (PTR Cost not considered in the estimate, existing PTR to be re-used)	80,42,301.67
5	PART E: a. Construction of 0.1 CKM 11kV Line using 100 SQ.MM. -AAA Conductor to connect the existing 11 KV Feeder. b. Installation of 1 No. of DP with Isolator and Earth switch at PSS.	4,32,161.08
6	PART-F- Dismantling of Materials	25,287.63
	Total Amount	**2,06,94,905.43**
	Total Amount (In Cr.)	**2.07**

Total estimated cost is Rs. 2.07 Crore. (On TPCODL Capex Scheme)

EXISTING SLD

PROPOSED SLD

3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	102.6195	50,595.52
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	48	10,560.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	4.2	22,039.40
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	28.35	1,88,494.90
4.v	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	179.28	55,198.52
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	1469.16	1,63,811.34
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	18.9	9,318.46
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.134	5,950.64

5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	11.4	75,796.89
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	59.76	18,399.51
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	489.72	54,603.78
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	138	32,016.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	9.2	13,616.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	9.2	46,276.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	18.4	1,38,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	16.8	1,26,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	224	60,480.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	3965.6	4,04,491.20
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	4.8	38,160.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2120.8	2,20,563.20

7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00

Cum	6,648.85	5.65	37,566.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	26.5	8,159.09
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**RCC Cable Trench :**	Qty			
4.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	172.5	40,020.00
4.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	11.5	17,020.00
4.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	11.5	57,845.00
4.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	23	1,72,500.00
4.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	21	1,57,500.00
4.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	280	75,600.00
4.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	4957	5,05,614.00
4.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	6	47,700.00
4.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2651	2,75,704.00
5	**Land Leveling & Compaction/ Gravels sprading :**				
5.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
5.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00

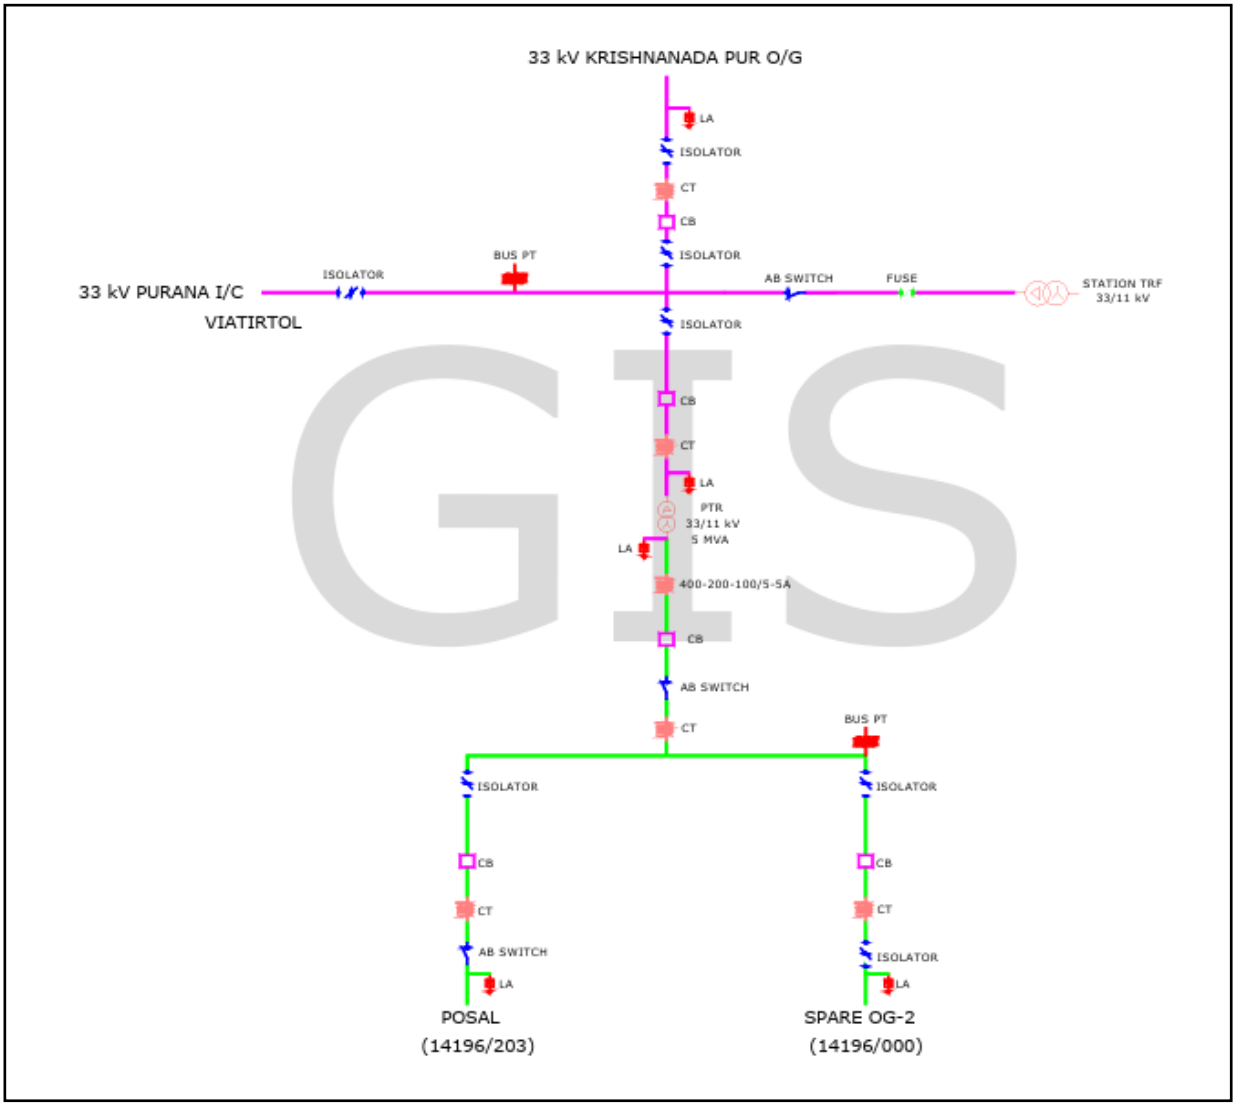
E				**Grand Total (C+D)**	25,287.63

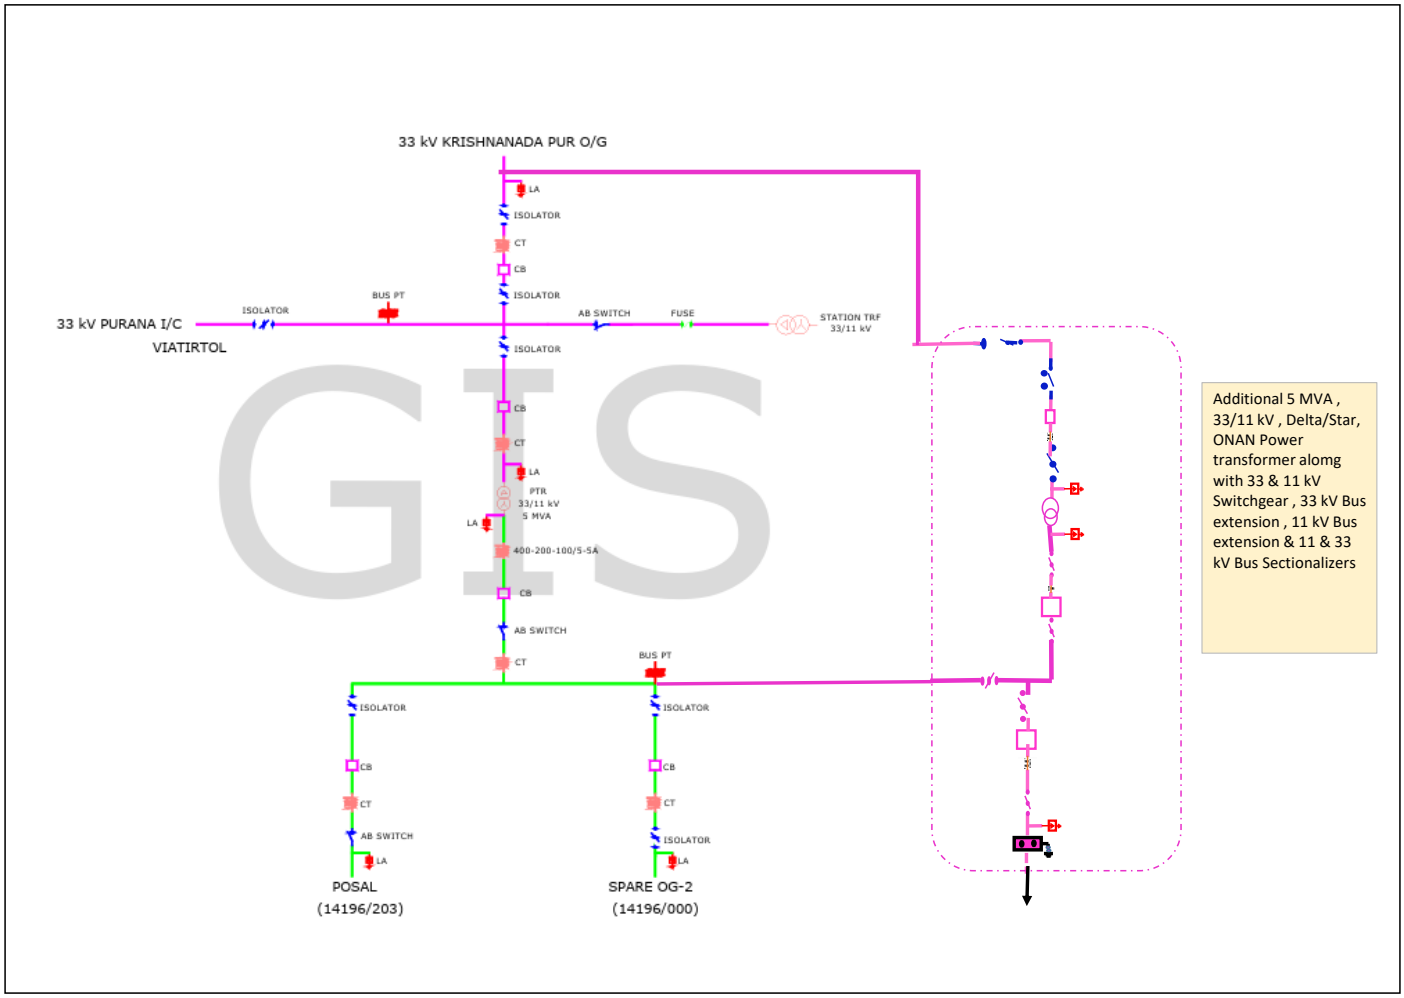
Annexure-15.4

TP CENTRAL ODISHA DISTRIBUTION LIMITED



Name of the Circle :-	**Paradeep**
Name of the Division : -	PDP
Name of the Work :-	Proposal for installation of 2nd PTR (3.15 MVA) at Paruna PSS along with 33 kV Bay and 11 kV Bays
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

ABSTRACT OF ESTIMATE



Sl. No.	Description	Amount
1	Part-A: a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.	69,32,475.44
2	Part-B: Extension of 11 kV Bus to connect new additional PTR Bay	7,35,764.69
3	Part-C: Construction of One No of 11 kV Outdoor Bay at PTR Incomer side and One No. Feeder outgoing Bay.	45,26,914.92
4	Part-D: Installation of Additional 33/11 kV , 3.15 MVA PTR (PTR Cost not considered in the estimate, existing PTR to be re-used)	80,42,301.67
5	PART E: a. Construction of 0.1 CKM 11kV Line using 100 SQ.MM. -AAA Conductor to connect the existing 11 KV Feeder. b. Installation of 1 No. of DP with Isolator and Earth switch at PSS.	4,32,161.08
6	PART-F- Dismantling of Materials	25,287.63
	Total Amount	**2,06,94,905.43**
	Total Amount (In Cr.)	**2.07**

Total estimated cost is Rs. 2.07 Crore. (On TPCODL Capex Scheme)

EXISTING SLD

PROPOSED SLD

Part-A:

a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line

b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.

No. of BAY requirement	2
No. of VCB Requirement	2

No. of Bus isolator requirement

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	T-1 GI Column(7.25 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI)) for 33kV incoming line, Nominal Unit Wt - 0.35 MT/column	KG	78.00	700	54,600.00
2	T-2 GI Column (7.25mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI)) for 33kV incoming line -1 no, Nominal Unit Wt - 0.42 MT/column	KG	78.00	840	65,520.00
3	T-1A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.31 MT/column (0.31x2=0.62MT)	KG	78.00	1240	96,720.00
4	T-2A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.37 MT/column (0.37x2=0.74MT)	KG	78.00	1480	1,15,440.00
5	G-3 GI Beam(5.05mtr long, consisting of 2 Nos 150X75 X5.7mm) for 33kV incoming line - (2 nos. Beam- one for Surge Arrester and other for Isolator, Nominal Unit Wt - 0.2 MT/Beam	KG	78.00	400	31,200.00
6	G-2 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	700	54,600.00
7	G-1 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	700	54,600.00
8	Equipment Structures (GI) For 33 KV Isolator (Unit Wt of Equipment Structures per set - 0.33 MT)	KG	78.00	1320	1,02,960.00
9	GI Spikes with cone and GI (2 nos) base plate 10mm (50x3000 mm GI pipe) (Unit Wt=0.035 MT) (0.035x6 = 0.21 MT)	KG	78.00	420	32,760.00
10	GI Pipe Earthing 40mm. 3 Mtr. Long	No.	1,300.00	28	36,400.00
11	50x6mm Flat(GI) for earthing, 2.36kg/mtr.	KG	78.00	991	77,313.60
12	232 sq.mm AAAC for 33kV side jumpering and Bus Formation etc.	M	181.65	100	18,165.00
13	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator with earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	1,01,652.00	1	1,01,652.00
14	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator without earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	86,858.00	3	2,60,574.00
15	33KV Outdoor VCB-1250 A, 25 KV/3 sec Gang operated type (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,63,629.00	2	5,27,258.00
16	Indoor CR PANEL FOR Feeder(IC/OG) PROTECTION 33KV Outdoor VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	2,70,500.00	1	2,70,500.00
17	Indoor CR PANEL FOR Transformer PROTECTION 33KV Outdoor VCB (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	4,49,000.00	1	4,49,000.00
18	33KV, Single Phase, Outdoor, OILCOOLED CT , 25KA/3sec CTR-200-400-800/1-1-1 A(Accuracy Class-PS/0.2S/5P20,Burden -/30VA/30VA	EA	40,551.00	6	2,43,306.00
19	33KV, Single Phase, Outdoor, OILCOOLED PT 33000/V3/110/V3 Volt (Accuracy class 3P/3P/0.2, Burden-100/100/100 VA	EA	24,028.00	6	1,44,168.00
20	Lightning Arrester(30KV,10KA) (Station Class,class-2)	EA	4,443.00	3	13,329.00
21	Lightening arrester 33 kV, 10 kV, CL III. (with surge counter)	EA	11,900.00	3	35,700.00
22	Control Cable 12Core x 2.5 mm^2	Mtr	329.00	100	32,900.00

J	**Sum of (C to I)**	**43,97,614.95**

Civil & Services

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	Construction Earthing chamber including installation of earthing pipe.Making earthing chamber including excavation , soil treatment with bentonide powder , calculation of earth resistance, including Installation of 3Mtr GI Pipe 40mm/50mm including welding of Flat(GI) around pipe .	No.	3,784.73	28	1,05,972.44
2	**VCB Foundation**				
2.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	14.56	7,178.66
2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.6825	698.13
2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.91	4,775.20
2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.65	37,566.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	26.5	8,159.09
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	102.6195	50,595.52
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	48	10,560.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	4.2	22,039.40
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	28.35	1,88,494.90
4.v	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	179.28	55,198.52
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	1469.16	1,63,811.34
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	18.9	9,318.46
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.134	5,950.64

5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	11.4	75,796.89
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	59.76	18,399.51
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	489.72	54,603.78
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	138	32,016.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	9.2	13,616.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	9.2	46,276.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	18.4	1,38,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	16.8	1,26,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	224	60,480.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	3965.6	4,04,491.20
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	4.8	38,160.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2120.8	2,20,563.20

7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00
K1				**Total Civil & Services**	**20,87,048.45**
K2				**Applicable Taxes to make it Landed Cost @18%**	**3,75,668.72**
K				**Total landed Cost (K=K1+ K2)**	**24,62,717.17**
L				**Total Material +services (J+K)**	**68,60,332.12**
M				Other overheads (Including 6% supervision charges)	
N				**Sub-Total (L+M)**	**68,60,332.12**
O				CESS 1% of (N)	68,603.32
P				**Total (N+O)**	69,28,935.44
Q				Inspection Fee of VCB - Rs. 1500/ VCB	3,000.00
R				GST @ 18% on Total Inspection Fees (Q)	540.00
S				Total Inspection Fees including GST (Q+R)	3,540.00
T				**Gross Total Material, Services and Inspection Fees (P+S)**	**69,32,475.44**

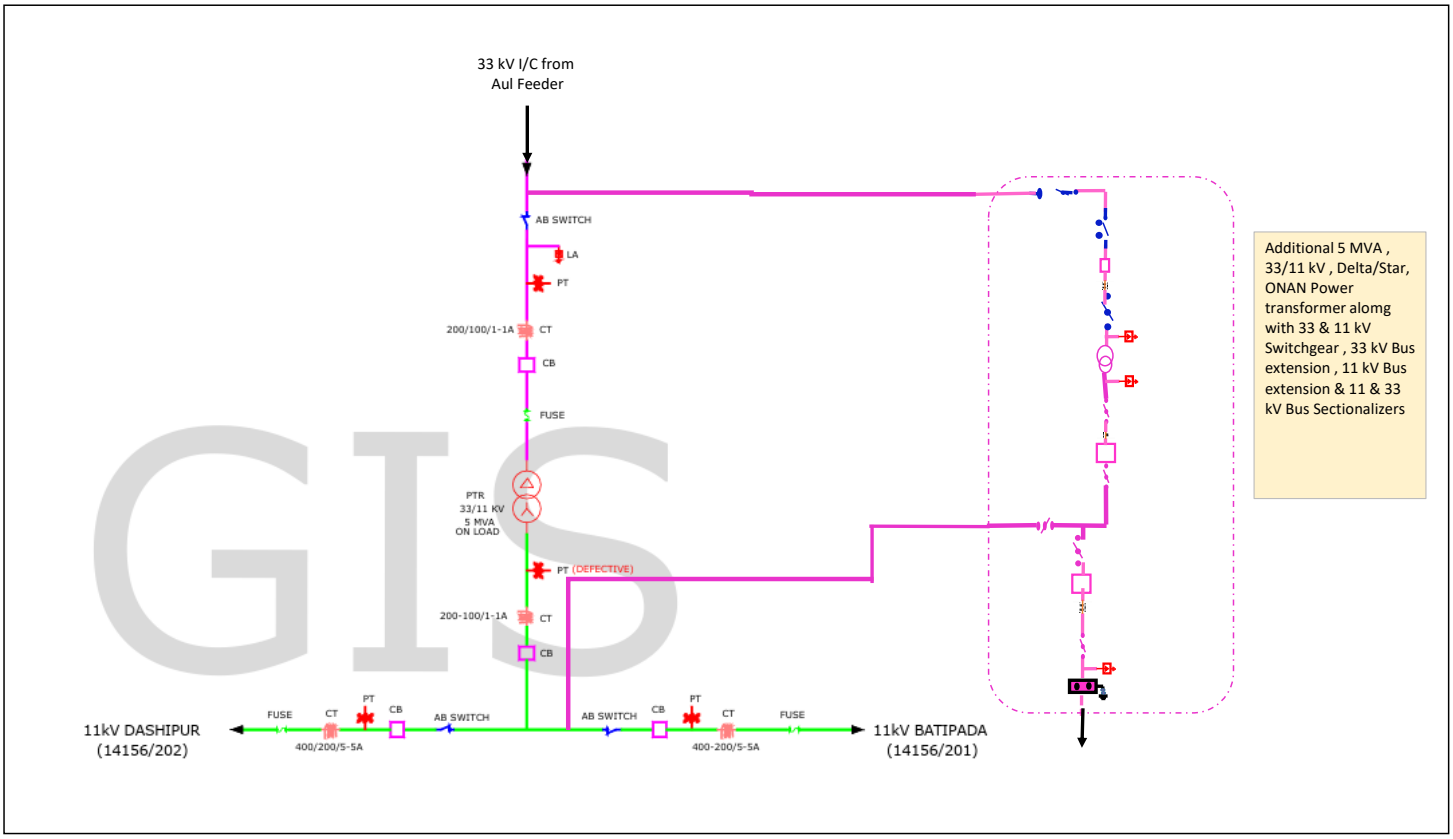
Name of the Circle :-	**Paradeep**
Name of the Division : -	KED-1
Name of the Work :-	Proposal for installation of 2nd PTR (5 MVA) at Patrapur PSS along with 33 kV Bay and 11 kV Bays
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

ABSTRACT OF ESTIMATE



Sl. No.	Description	Amount
1	Part-A: a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.	69,32,475.44
2	Part-B: Extension of 11 kV Bus to connect new additional PTR Bay	7,35,764.69
3	Part-C: Construction of One No of 11 kV Outdoor Bay at PTR Incomer side and One No. Feeder outgoing Bay.	45,26,914.92
4	Part-D: Installation of Additional 33/11 kV , 5 MVA PTR (PTR Cost not considered in the estimate, existing PTR to be re-used)	80,42,301.67
5	PART E: a. Construction of 0.1 CKM 11kV Line using 100 SQ.MM. -AAA Conductor to connect the existing 11 KV Feeder. b. Installation of 1 No. of DP with Isolator and Earth switch at PSS.	4,32,161.08
6	PART-F- Dismantling of Materials	25,287.63
	Total Amount	**2,06,94,905.43**
	Total Amount (In Cr.)	**2.07**

Total estimated cost is Rs. 2.07 Crore. (On TPCODL Capex Scheme)

EXISTING SLD

2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.65	37,566.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	26.5	8,159.09
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**Column as per Drawing Schedule-**				
4.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	102.6195	50,595.52
4.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	48	10,560.00
4.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	4.2	22,039.40
4.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	28.35	1,88,494.90
4.v	Centring and shuttering including strutttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	179.28	55,198.52
4.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	1469.16	1,63,811.34
5	**Isolator**				
5.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	18.9	9,318.46
5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.134	5,950.64

5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	11.4	75,796.89
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	59.76	18,399.51
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	489.72	54,603.78
6	**RCC Cable Trench :**				
6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	138	32,016.00
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	9.2	13,616.00
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	9.2	46,276.00
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	18.4	1,38,000.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	16.8	1,26,000.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	224	60,480.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	3965.6	4,04,491.20
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	4.8	38,160.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2120.8	2,20,563.20

7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00

2.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
2.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.6825	698.13
2.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.91	4,775.20
2.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	5.65	37,566.00
2.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	26.5	8,159.09
2.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	280	31,220.00
3	**CT & PT Foundation**				
3.i	BA will excavate & remove the debris. BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	493.04	15.9375	7,857.83
3.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	9	1,980.00
3.iii	Supplying and spreading, filling other works with fine sand under floors,ground etc as per EIC instruction. Scope of work also includes watering, ramming, consolidating and dressing complete and other works if required at site .	Cum	1,022.90	0.726	742.63
3.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	0.726	3,809.67

3.v	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	4.725	31,415.82
3.vi	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	29.88	9,199.75
3.vii	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	244.86	27,301.89
4	**RCC Cable Trench :**	Qty			
4.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	172.5	40,020.00
4.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	11.5	17,020.00
4.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	11.5	57,845.00
4.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	23	1,72,500.00
4.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	21	1,57,500.00
4.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	280	75,600.00
4.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	4957	5,05,614.00
4.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	6	47,700.00
4.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	2651	2,75,704.00
5	**Land Leveling & Compaction/ Gravels sprading :**				
5.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
5.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00

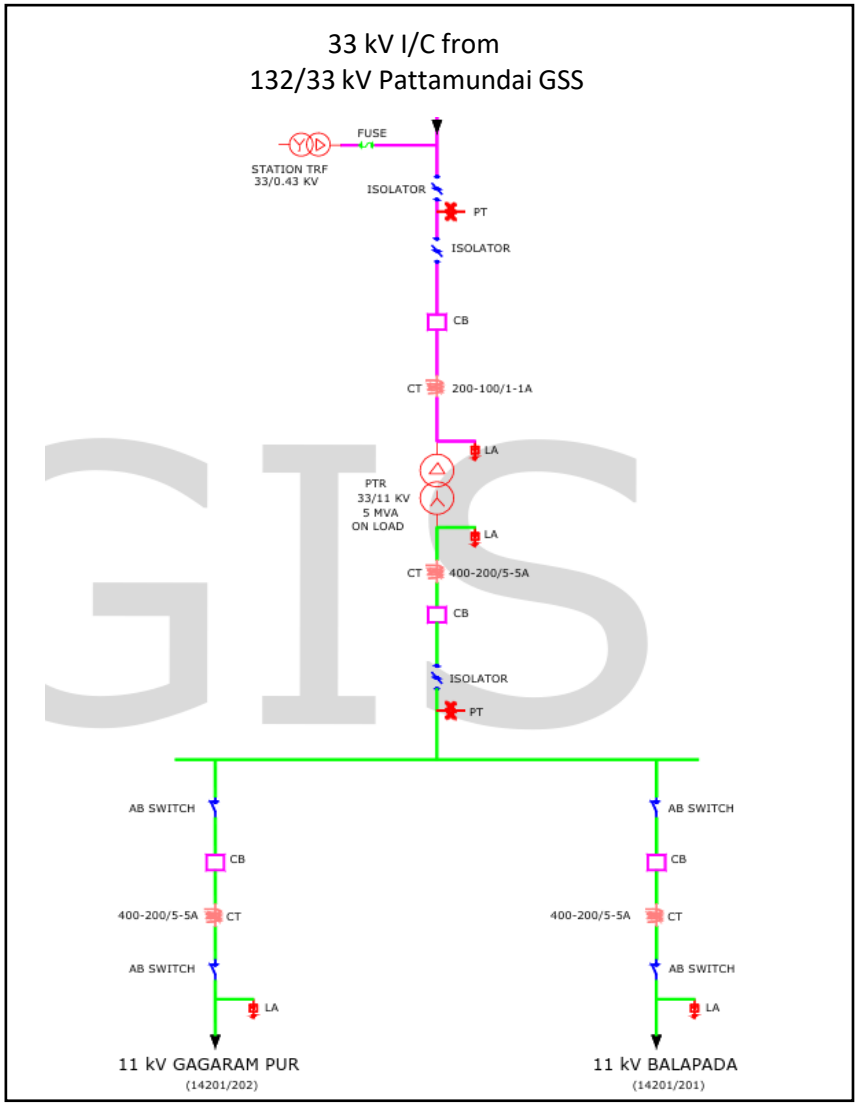
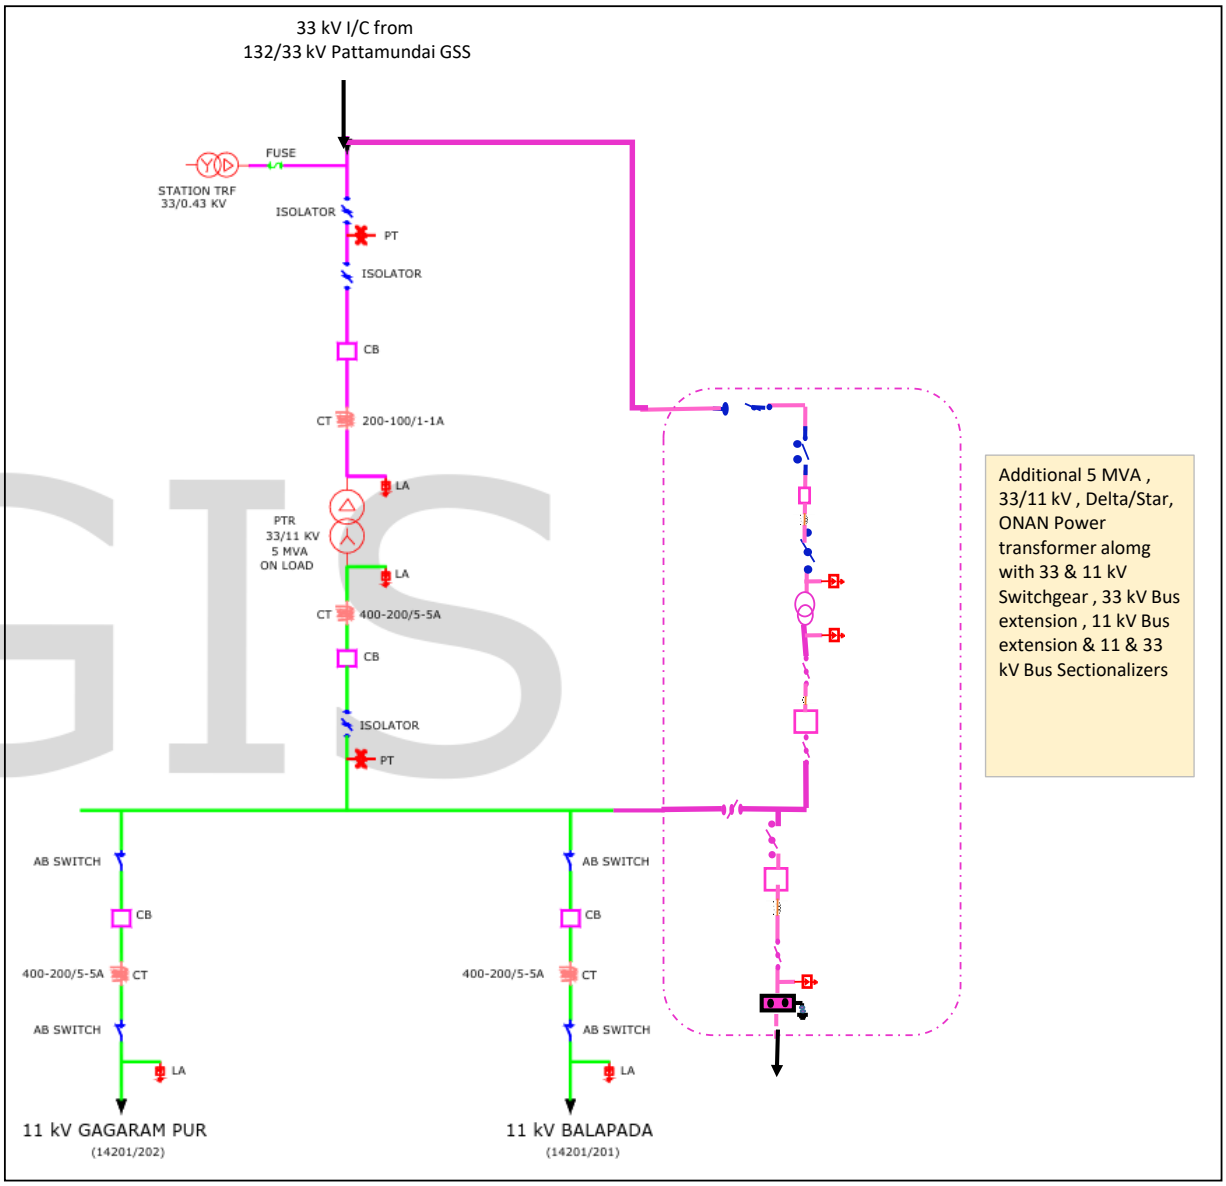
TP CENTRAL ODISHA DISTRIBUTION LIMITED



Name of the Circle :-	**Paradeep**
Name of the Division : -	KED-1
Name of the Work :-	Proposal for installation of 2nd PTR (5 MVA) at Sahupada PSS along with 33 kV Bay and 11 kV Bays
Names of Schemes: -	**TPCODL CAPEX (FY 27-28)**

ABSTRACT OF ESTIMATE



Sl. No.	Description	Amount
1	Part-A: a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.	64,17,807.39
2	Part-B: Extension of 11 kV Bus to connect new additional PTR Bay	7,35,764.69
3	Part-C: Construction of One No of 11 kV Outdoor Bay at PTR Incomer side and One No. Feeder outgoing Bay.	38,83,579.85
4	Part-D: Supply and Installation of Additional 33/11 kV 5 MVA PTR with accessories.	1,94,85,943.67
5	PART E: a. Construction of 0.1 CKM 11kV Line using 100 SQ.MM. -AAA Conductor to connect the existing 11 KV Feeder. b. Installation of 1 No. of DP with Isolator and Earth switch at PSS.	4,32,161.08
6	PART-F- Dismantling of Materials	25,287.63
	Total Amount	**3,09,80,544.30**
	Total Amount (In Cr.)	**3.10**

Total estimated cost is Rs. 3.10 Crore. (On TPCODL Capex Scheme)

EXISTING SLD

PROPOSED SLD

Part-A:

a. Construction of One No of 33 kV Outdoor Bay for Incomer 33 kV Line

b. Construction of One No of 33 kV Outdoor Bay for Power Transformer.

No. of BAY requirement	2
No. of VCB Requirement	2

No. of Bus isolator requirement

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	T-1 GI Column(7.25 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI)) for 33kV incoming line, Nominal Unit Wt - 0.35 MT/column	KG	78.00	700	54,600.00
2	T-2 GI Column (7.25mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI)) for 33kV incoming line -1 no, Nominal Unit Wt - 0.42 MT/column	KG	78.00	840	65,520.00
3	T-1A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos of 150X76X6.5 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.31 MT/column (0.31x2=0.62MT)	KG	78.00	1240	96,720.00
4	T-2A GI Column (for 33 kv Bus) (6 mtr long, consisting of 2 Nos 175X75X6 mm Channel(GI) jointed by plates) Nominal Unit Wt - 0.37 MT/column (0.37x2=0.74MT)	KG	78.00	1480	1,15,440.00
5	G-3 GI Beam(5.05mtr long, consisting of 2 Nos 150X75 X5.7mm) for 33kV incoming line - (2 nos. Beam- one for Surge Arrester and other for Isolator, Nominal Unit Wt - 0.2 MT/Beam	KG	78.00	400	31,200.00
6	G-2 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	700	54,600.00
7	G-1 GI Beam (6.1 mtr long, consisting of 2 Nos 125X65 X5.3 mm Channel(GI) jointed by plates) for 33kV Bus Stringing , Nominal Unit Wt - 0.175 MT)/Beam (0.175x2 = 0.35 MT)	KG	78.00	700	54,600.00

5.ii	BA will Back fill the excvated site with same earth.BA will provide necessary Tools,Machinery & Manpower for the activity.	Cum	220.00	8	1,760.00
5.iii	Providing and laying Plain Cement Concrete (PCC) of proportion (1:3:6(M-10 Grade)) in foundations, Trench and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	5,247.48	1.134	5,950.64
5.iv	Providing and laying Plain Cement Concrete (PCC) of proportion (1:1.5:3(M-20 Grade)) in foudations and plinths using approved quality of cement, 20mm size hard crusher broken granite stone metal and screened, washed sharp sand for mortar of approved quality and from approved quarry, including hoisting, lowering, laying concrete, ramming, watering and curing etc. complete to required levels in layers not exceeding 15cm thick in each layer including cost, conveyance, loading, unloading, royalties and taxes, cess, of all materials & cost of all labours, sundries, T&P and all other machinaries required for the work etc., as directed by Engineer-in-Charge.	Cum	6,648.85	11.4	75,796.89
5.v	Centring and shuttering including struttting , propping etc.and removal of form for Foundations, footings, bases of columns etc. for mass concrete	Sqm	307.89	59.76	18,399.51
5.vi	Reinforcement for R.C.C. work including straightening, cutting, bending, placing in position and binding all copmplete, cold twisted bars/TMT as per TPCODL specification (Scope also include supply of material)	Kg	111.50	489.72	54,603.78
6	**RCC Cable Trench :**				

6.i	Earth work in excavation in ordinary soil,soft/weathered rock by mechanical (Hydraulic excavator) /manual means in foundation, trenches or drains including dressing of sides and ramming of bottoms, lift upto 1.5 m, including vegetation removal, getting out the excavated soil, back filling layer of 230-300 mm in depth, compacting and disposal of surplus excavated soil as directed, within a lead of 50 mas per direction of Engineer-in-charge.	Cum	232.00	82.8	19,209.60
6.ii	Supplying and filling in plinth with River sand under floors including, watering, ramming, consolidating and dressing complete.	Cum	1,480.00	5.52	8,169.60
6.iii	Providing and laying in position cement concrete of specified grade excluding the cost of centring and shuttering- All work upto plinth level: 1:3:6 (1 cement : 3 coarse sand (zone-III) : 6 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	5,030.00	5.52	27,765.60
6.iv	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	11.04	82,800.00
6.v	Providing and laying in position specified grade of reinforced cement concrete excluding the cost of centring, shuttering and reinforcement- All work upto plinth level 1:1.5:3 (1 cement: 1.5 coarse sand (zone-III) : 3 graded stone aggregate 20 mm nominal size) as directed by EIC.	Cum	7,500.00	10.08	75,600.00
6.vi	Centring and shuttering including struttting , propping etc.and removal of form with proper finishing for : Walls (any thickness) including attached plaster, buttresses, plinth and string courses etc as directed by EIC.	M2	270.00	134.4	36,288.00
6.vii	Steel reinforcement for R.C.C. work including Shifting, straightening, cutting, bending, placing in position and binding all complete upto plinth level. Cold twisted bars / Thermo-Mechanically Treated bars of approved make as directed by EIC.	Kg	102.00	2379.36	2,42,694.72
6.viii	Providing and fixing precast reinforced concrete cable trench covers, drain covers, fencing post, etc. of class M25 concrete w/c 0.5 (max) leaving cut-outs/ pockets, placing of inserts/ embedments,etc.,complete all as per drawing including shuttering, vibrating, machine mixing, providing lifting arrangements, placing inserts curing handling, transporting, etc. complete but excluding the cost of providing reinforcement, inserts / embedments, with 30 mm downgraded aggregates as directed by EIC. (Cement consumption 7.9 Bag/M3)	Cum	7,950.00	2.88	22,896.00
6.ix	Structural steel work in single section, fixed with or without connecting plate including cutting, hoisting, fixing in position and applying a priming coat of approved steel primer all complete.	Kg	104.00	1272.48	1,32,337.92
7	**Land Leveling & Compaction/ Gravels sprading :**				
7.i	BA will supply all materials required for backfilling and has to carry out the job of backfilling with earth, as per TPCODL standards	Cum	650.00	43.2	28,080.00
7.ii	Supplying, Laying, spreading and compacting with hand roller stone aggregate of specified sizes: 63 mm to 45 mm size stone aggregate to WBM specifications in uniform thickness, hand picking to proper grade and camber, applying and brooming requisite type of screening / binding material to fill up interstices of coarse aggregate, watering and compacting to the required density . .Scope of work also includes of jungle such as grass,small tree,plant etc.	Cum	3,000.00	14.4	43,200.00
K1				**Total Civil & Services**	**16,55,207.49**
K2				**Applicable Taxes to make it Landed Cost @18%**	**2,97,937.35**
K				**Total landed Cost (K=K1+ K2)**	**19,53,144.84**
L				**Total Material +services (J+K)**	**63,50,759.79**
M				Other overheads (Including 6% supervision charges)	
N				**Sub-Total (L+M)**	**63,50,759.79**
O				CESS 1% of (N)	63,507.60
P				**Total (N+O)**	64,14,267.39
Q				Inspection Fee of VCB - Rs. 1500/ VCB	3,000.00
R				GST @ 18% on Total Inspection Fees (Q)	540.00
S				Total Inspection Fees including GST (Q+R)	3,540.00

ANNEXURE-22

POWER TRANSFORMER AUGMENTATION

ANNEXURE-22

Power Transformer Augmentation

Overloading of Power Transformers is an alarming issue and need immediate attention for implementing overloading mitigation proposals. PTR overloading issue can be mitigated by below measures:

1) 11kV Feeder load diversion to lightly loaded PTR.
2) 11kV Feeder swapping with lightly loaded feeder in other lightly loaded PTR.
3) PTR Swapping with higher rating PTR.
4) Augmentation of existing PTR with higher rating of PTR.

We have conducted load flow analysis taking into consideration the peak load experienced during Summer'26. As per the load flow analysis, the overloading of PTRs under TPCODL jurisdiction has been identified. Since the priority of Power transformer overloading mitigation is crucial, we have prioritized & considered PTR overloading mitigation wherein PTR loading exceeds 80% in Summer'26 which will be subsequently overloaded in Summer'28 with load growth.

Additionally, 1no. proposal considered for supply and installation of 11kV Switchgear panel board for enabling 11kV power evacuation from Delta PSS and 1no. proposal considered for installation of 11kV Switchgear panel board for enabling 11kV power evacuation from Gurujanga PSS and installation of 33kV Switchgear panel board.

As per the trend, load growth year-on-year basis for BCDD-1, NED and ANED has been considered as 10%, BCDD-2 and BED have been considered as 15%, PED and CDD-2 have been considered as 13%, KHD and BAED have been considered as 12%, CDD-1, KED-1, KED-2 and PDP have been considered as 11%, JED has been considered as 9%, AED, DED and TED load growth has been considered as 8%, CED has been considered as 7%, NYED and SED have been considered as 6%.

As per the PTR loading analysis, 62nos. PTRs are loaded beyond 80% in Summer'26 as follows:

In order to mitigate the overloading of the PTRs, instead of considering the PTR augmentation of all the overloaded PTRs, we have considered optimum utilization of our existing assets. This is achieved by 11kV load transfer or 11kV feeder swapping or PTR swapping schemes undertaken in OPEX. The PTRs which are getting augmented under CAPEX schemes are further utilized under PTR Swapping (OPEX) scheme to mitigate overloading of the transformers.

Out of 62nos. overloaded PTRs only 7nos. PTRs are proposed for augmentation under CAPEX FY:27-28 for overloading mitigation. The PTR mitigation plan scheme wise is given in the below table:

Proposal	Schemes						Total
	CAPEX FY: 2025-26 (WIP)	CAPEX FY: 2026-27 (WIP)	CAPEX FY: 2027-28	Govt Funded	OPEX	Others	
11kV Feeder Load diversion	9	4	2	5	3		23
11kV Feeder Swapping					13		13
PTR Swapping					13		13
PTR Augmentation		5	7			1	13
Total	**9**	**9**	**9**	**5**	**29**	**1**	**62**

The approx. costing for PTR overloading mitigation is given below:

Summary of Proposal Details for PTR Overloading Mitigation and Reliability Improvement:

Sl. No.	Name of Circle	Name of Division	Name of 33/11kV PSS	PTR No.	Proposal Details	Amount (in cr.)	Annex.

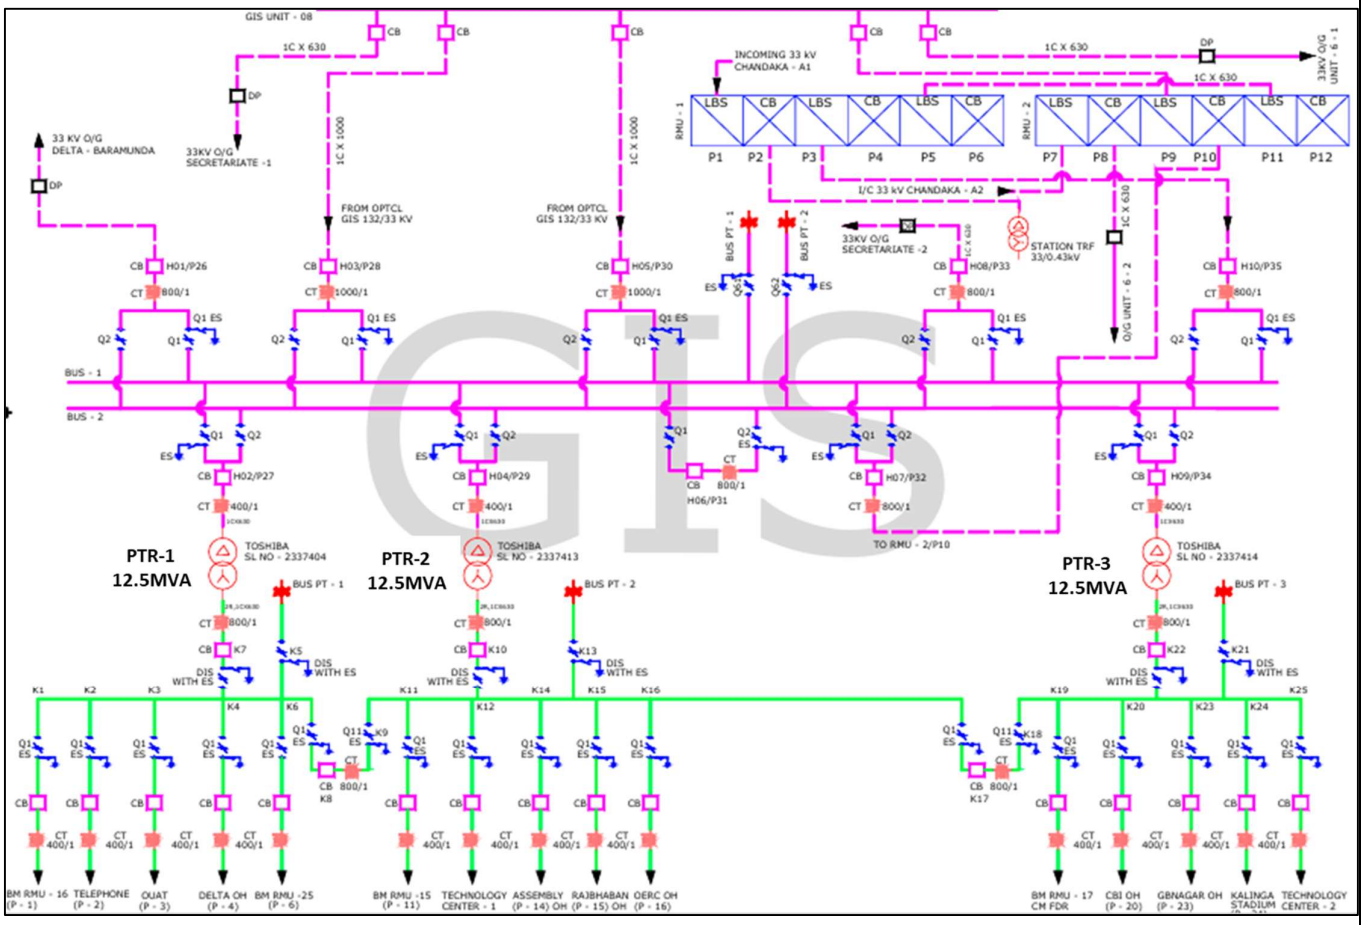
1.0 Power Transformer overloading mitigation at UNIT-8 Substation

Proposal:

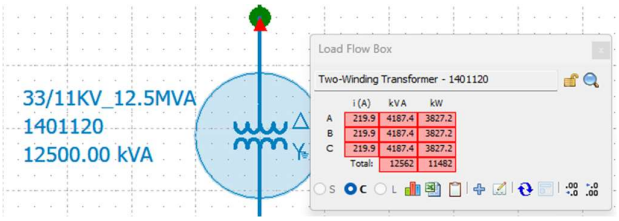
Augmentation of existing 1no. 33/11kV 12.5MVA Power Transformer (PTR-2) to 1no. 20/25MVA at Unit-8 33/11kV Substation in BCDD-1 division of BBSR-1 circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Unit-8 PTR-1, 2 and 3 are 7.54MVA, 10.436MVA and 9.07MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (10% load growth per year for 2years), the projected loading of Summer'28 for PTR-1, 2 and 3 would be 9.12MVA, 12.54MVA and 10.97MVA respectively.
- PTR-2 will be loaded up to 100.3%, w.r.t, the existing transformer capacity of 12.5MVA in Summer'28.



Existing Summer'26 Loading and projected load at Unit-8 PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @10%) Summer'28		
				Peak Load	%Loading	%Loading Range	Peak Load	%Loading	%Loading Range
1	Unit-8	PTR-1	12.5	7.54	60%	50%-70%	9.12	73%	70%-90%
2		PTR-2	12.5	10.4	83%	70%-90%	12.54	100.3%	≥100%
3		PTR-3	12.5	9.07	73%	70%-90%	10.97	88%	70%-90%

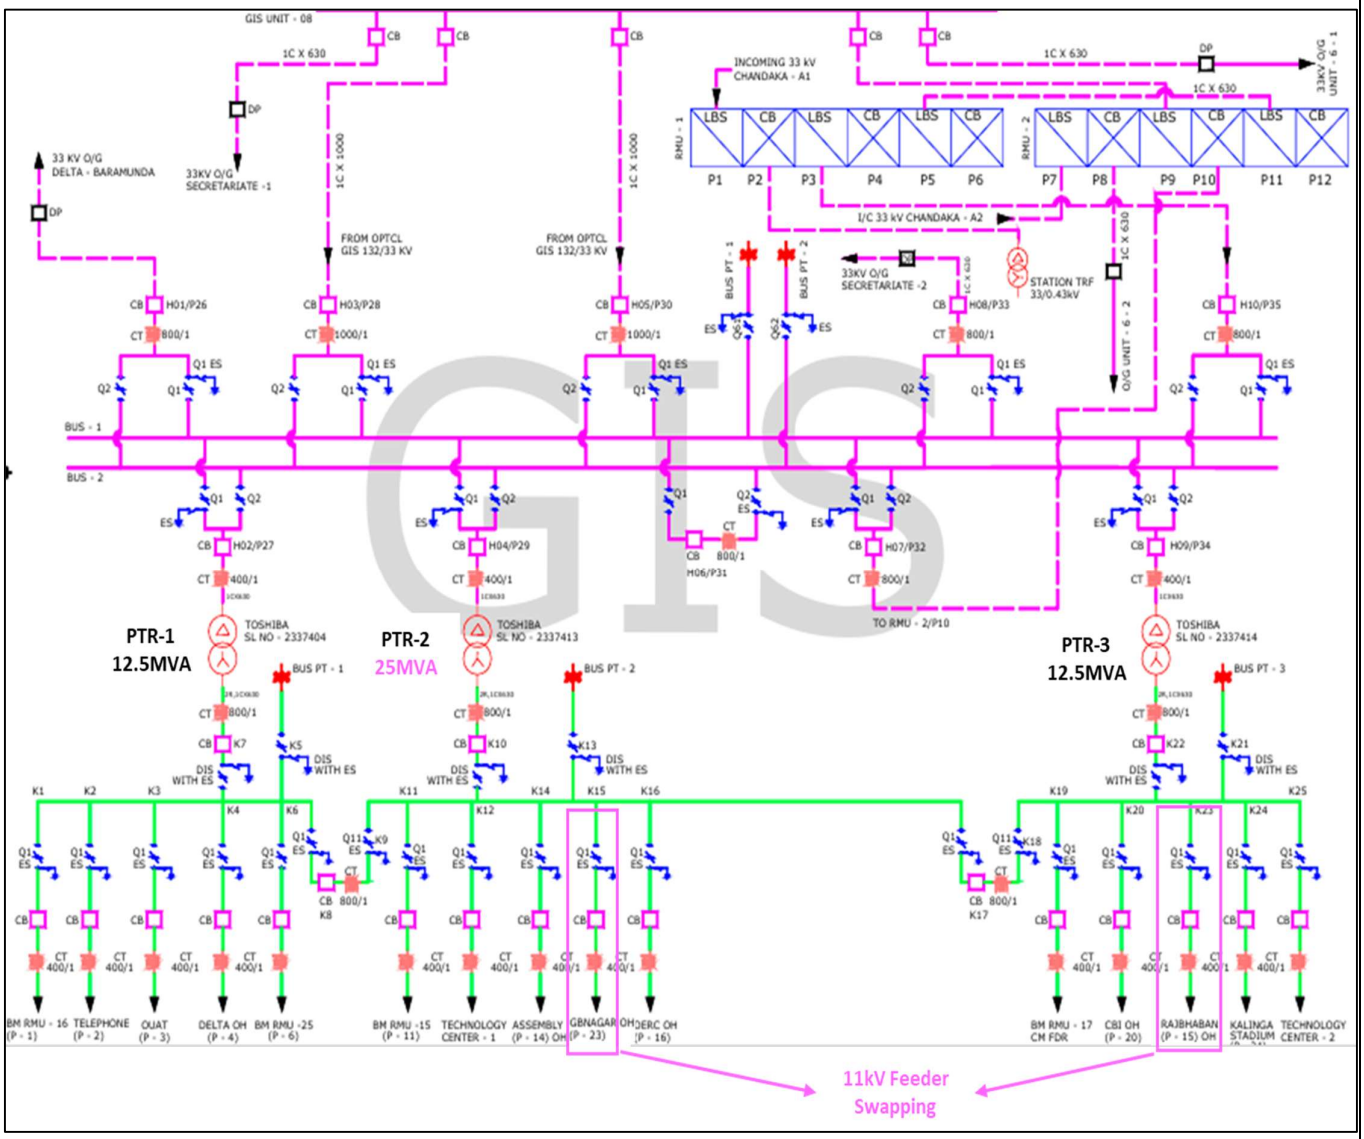
Existing SLD of UNIT-8 33/11kV PSS:

Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

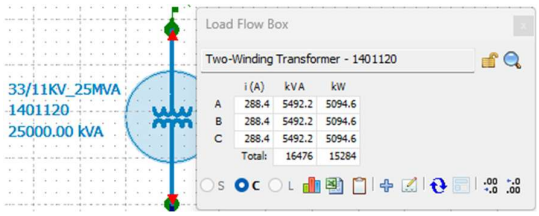
Priority: The existing 33/11kV PTR-2 is presently loaded to 83% under the AS-IS scenario and is projected to reach 100.3% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 2,200 consumers during peak demand periods.

Technical Justification



- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 3nos. PTRs and the PTR loading are 60%, 83% and 73% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-2 from 12.5MVA to 20/25MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.

Proposed Scenario:



- Augmentation of PTR-2 from 12.5MVA to 20/25MVA at Unit-8 PSS is proposed to meet the full load of Unit-8 PSS at peak load condition after 2years load growth.
- The existing 11kV CTs in the PTR GIS panel are rated 800/1 A. In order to accommodate the PTR capacity of 25MVA and the corresponding full-load current, the CT ratio is proposed to be upgraded.
- 11kV feeder swapping between Rajbhawan feeder (0.23MVA load at PTR-2) and GB Nagar feeder (3.43MVA load at PTR-3) is proposed to mitigate the anticipated overloading of PTR-3 due to load growth over the next two years and to achieve better load balancing between the PTRs.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @10%) Summer'28			Projected Load (5yrs. Load Growth @10% for 5years) Summer'31		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Unit-8	PTR-1	12.5	9.12	73%	70%-90%	12.14	97%	90%-100%
2		PTR-2	25	16.41	66%	50%-70%	21.84	87%	70%-90%
3		PTR-3	12.5	7.10	57%	70%-90%	9.45	76%	70%-90%

Proposed SLD of UNIT-8 33/11kV PSS:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 1no. PTR (PTR-2) from 12.5MVA to 20/25MVA.
- Installation of 1no. 11kV CT suitable for existing GIS panel board.

Proposed Cost with Estimate Break-up:

Name of the Circle :-	BBSR-1
Name of the Division :-	BCDD-1
Name of the Sub-Division : -	Sub Division-1
Name of the Section : -	Power House-1
Name of the Work :-	Augmentation of Power Transformer (PTR-2) from 12.5 MVA to 20/25 MVA and upgradation of 11kV Indoor CT suitable for existing GIS panel board along with accessories at 33/11kV Unit-8 PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Augmentation of Power Transformer (PTR-2) from 12.5 MVA to 20/25 MVA along with accessories at 33/11kV Unit-8 PSS.	3,58,92,317.10
PART B: Dismantling Portion	1,33,029.04
Total Amount	**₹ 3,60,25,346.14**
Total Amount (in Cr.)	**₹ 3.60**
Total estimated cost is Rs. 3.60 Crore. (On TPCODL CAPEX Scheme)	

Cost Estimate: ₹ 3.60cr. (For detailed BoQ refer Annexure-22.1).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Enhanced network reliability and safety.

c) Compliance with load growth requirements.

d) Protection of electrical assets and personnel.

e) Maintain statutory voltage and quality standards.

Cost Benefit Analysis:

Load in Summer' 26 (MVA)	Load in Summer' 28 (MVA)	Additional load due to load growth (in MVA)	Total Load Added (in MW)	Benefit on account of Fixed Charges from New Loads (in INR)	Benefit on account of Energy Charges from New Loads (in INR) with Load Factor 10%	Total Benefit (in INR)	Calculations	Value	Unit

							Pay Back Period of Scheme (H=Total Project Cost/G)	**2.86**	Years
							% Rate of Return	34.91	%

Benefit to the System and Consumers:

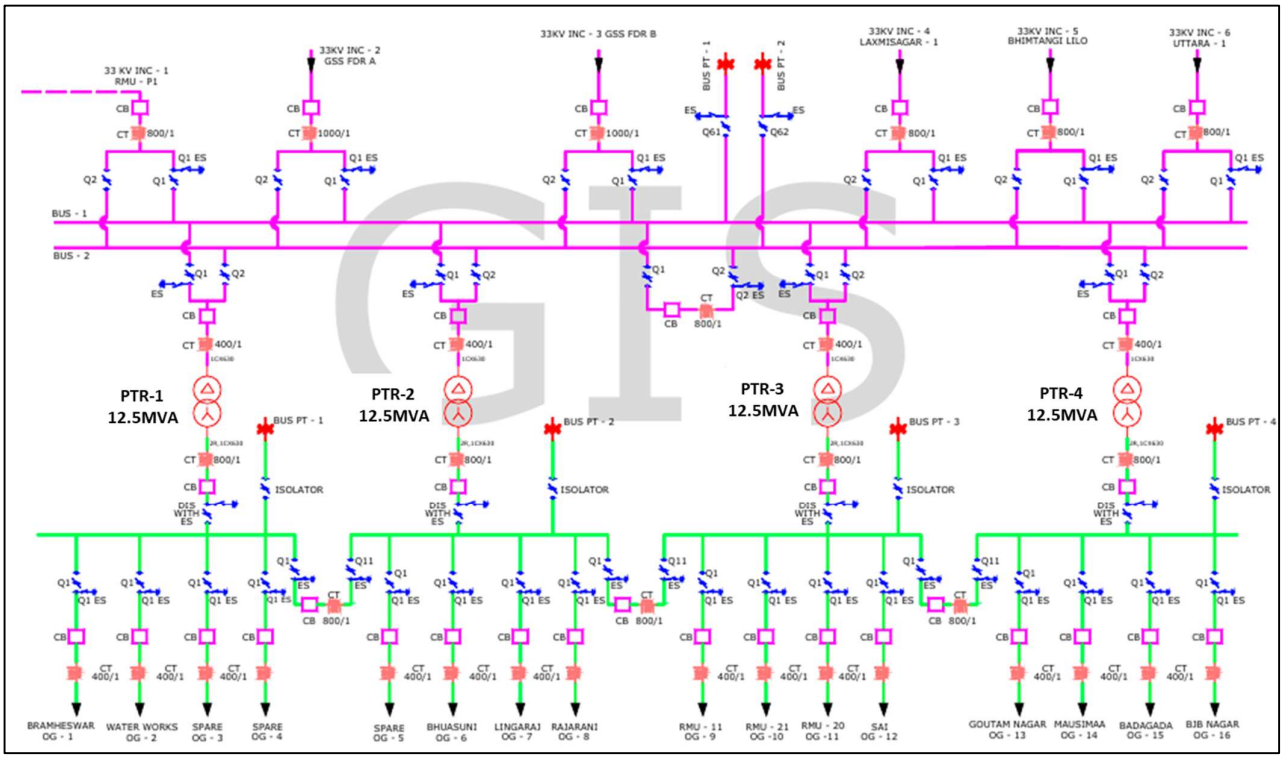
- To mitigate overloading condition on power transformers.
- To cater future load growth of the consumers.
- To ensure reliable power supply to the consumers.

2.0 Power Transformer overloading mitigation at BADAGADA Substation

Proposal:

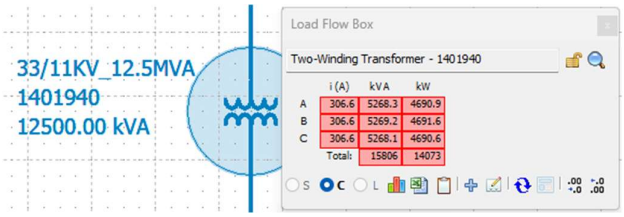
Augmentation of existing 1no. 33/11kV 12.5MVA Power Transformer (PTR-1) to 1no. 20/25MVA at Badagada 33/11kV Substation in BED division of BBSR-1 circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Badagada PTR-1, 2, 3 and 4 are 11.96MVA, 8.84MVA, 7.62MVA and 9.22MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (15% load growth per year for 2years), the projected loading of Summer'28 for PTR-1, 2, 3 and 4 would be 15.82MVA, 11.69MVA, 10.08MVA and 12.19MVA respectively.
- PTR-2 will be loaded up to 127%, w.r.t, the existing transformer capacity of 12.5MVA in Summer'28.



Existing Summer'26 Loading and projected load at Badagada PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @15%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range

4		PTR-4	12.5	9.22	74%	70%-90%	12.19	98%	90%-100%

Existing SLD of Badagada 33/11kV PSS:

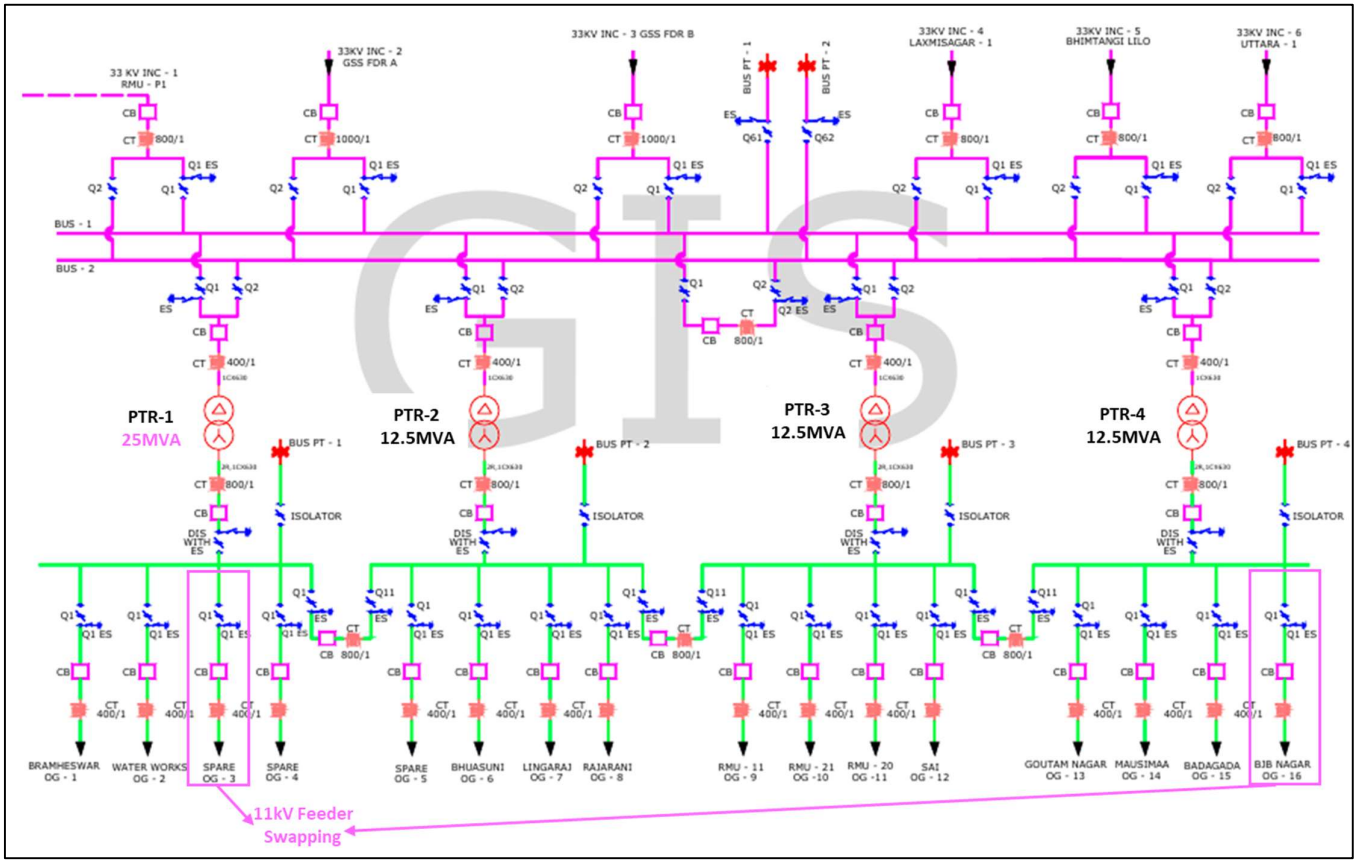
Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

Priority: The existing 33/11kV PTR-1 is presently loaded to 96% under the AS-IS scenario and is projected to reach 127% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 7,700 consumers during peak demand periods.

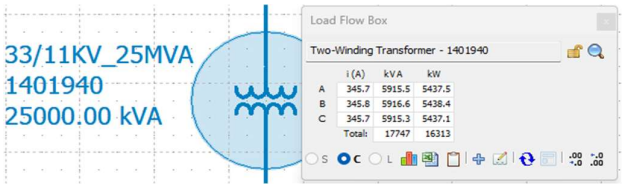
Technical Justification

- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 4nos. PTRs and the PTR loading are 96%, 71%, 61% and 74% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-1 from 12.5MVA to 20/25MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.



Proposed Scenario:

- Augmentation of PTR-1 from 12.5MVA to 20/25MVA at Badagada PSS is proposed to meet the full load of Badagada PSS at peak load condition after 2years load growth.
- The existing 11kV CTs in the PTR GIS panel are rated 800/1 A. In order to accommodate the PTR capacity of 25MVA and the corresponding full-load current, the CT ratio is proposed to be upgraded.
- 11kV feeder swapping of 11kV B.J.B Nagar feeder (1.45MVA load at PTR-4) to available spare feeder at PTR-1 is proposed to mitigate the anticipated overloading of PTR-4 due to load growth over the next two years and to achieve better load balancing between the PTRs.



- Further, it is proposed to divert 1MVA load from 11kV Rajarani feeder (PTR-2) to 11kV Lewis Road feeder (PTR-2) of 33/11kV Nageswar Tangi PSS under ODSSP ph-IV.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @15%) Summer'28			Projected Load (5yrs. Load Growth @10% for 5years) Summer'31

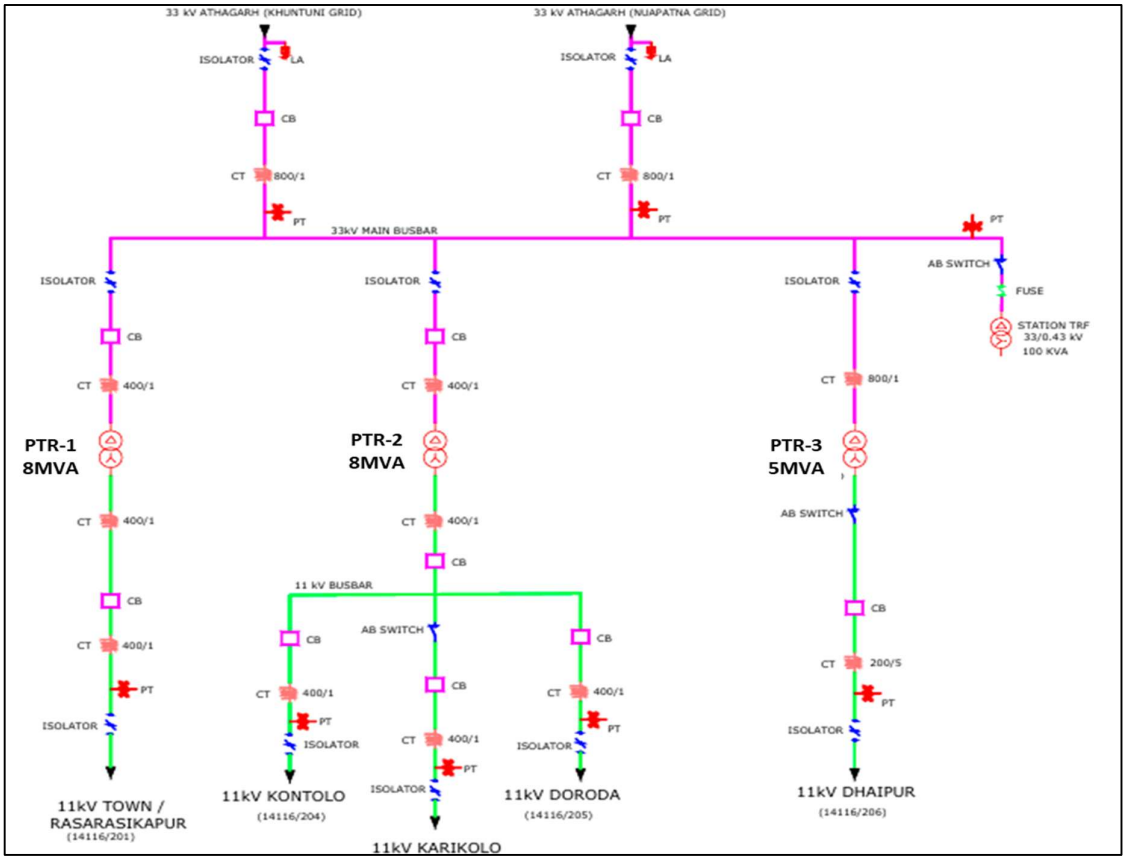
3.0 Power Transformer overloading mitigation at ATHAGARH Substation

Proposal:

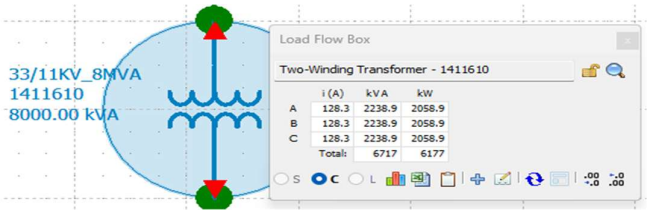
Augmentation of existing 1no. 33/11kV 8MVA Power Transformer (PTR-1) to 1no. 12.5/16MVA at Athagarh 33/11kV Substation in AED division of Cuttack circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Athagarh PTR-1, 2 and 3 are 6.7MVA, 5.94MVA and 1.48MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (8% load growth per year for 2years), the projected loading of Summer'28 for PTR-1, 2 and 3 would be 7.82MVA, 6.93MVA and 1.72MVA respectively.
- PTR- will be loaded up to 98%, w.r.t, the existing transformer capacity of 8MVA in Summer'28.



Existing Summer'26 Loading and projected load at Unit-8 PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @8%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Athagarh	PTR-1	8	6.70	84%	70%-90%	7.82	98%	90%-100%
2		PTR-2	8	5.94	74%	70%-90%	6.93	87%	70%-90%
3		PTR-3	5	1.48	30%	0-50%	1.72	34%	0-50%

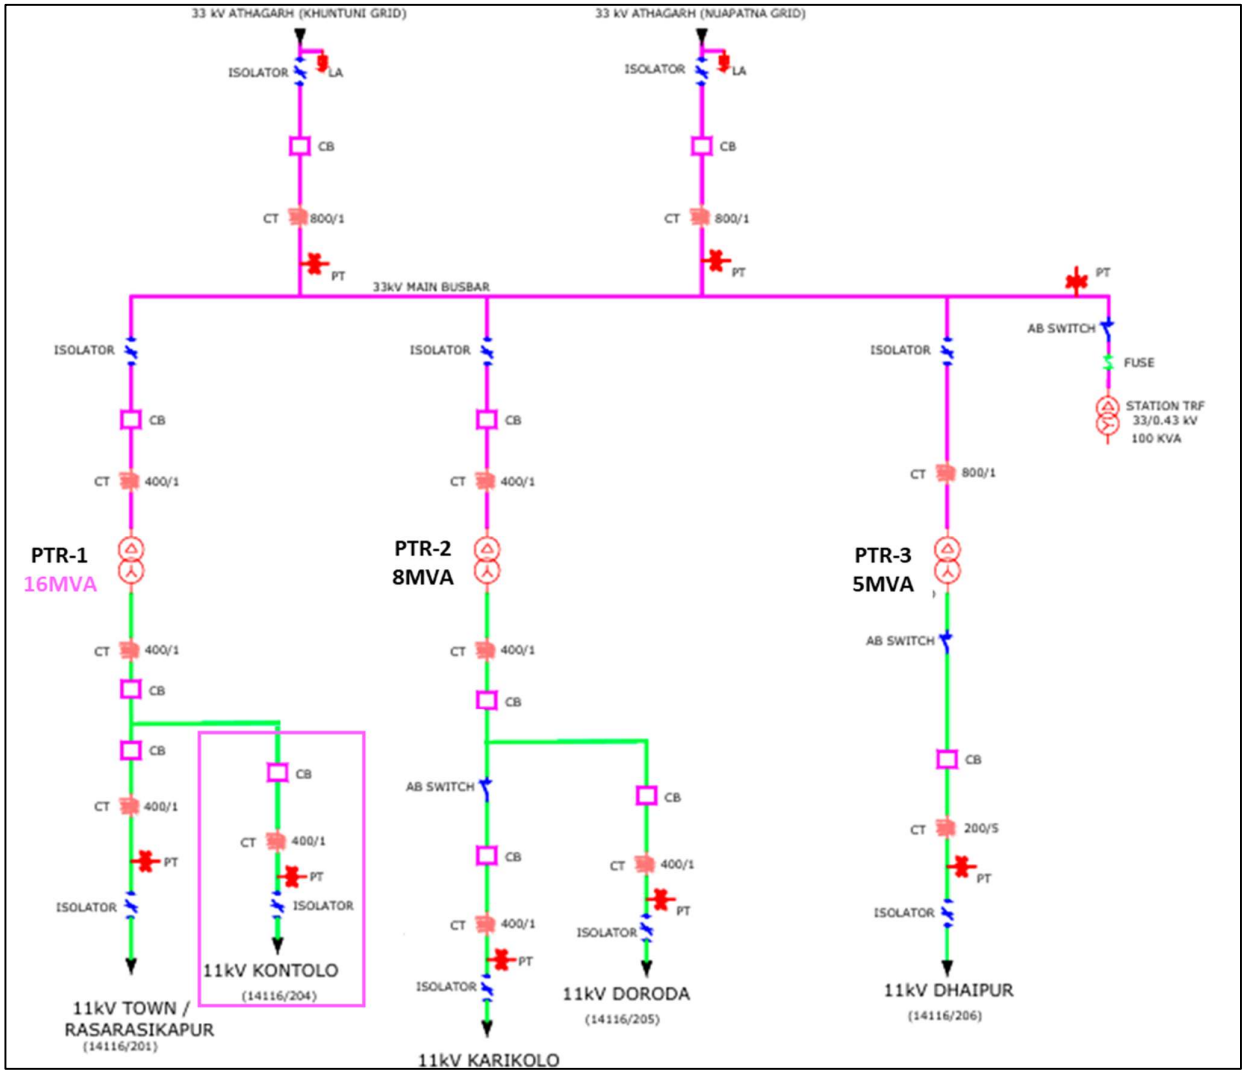
Existing SLD of ATHAGARH 33/11kV PSS:

Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

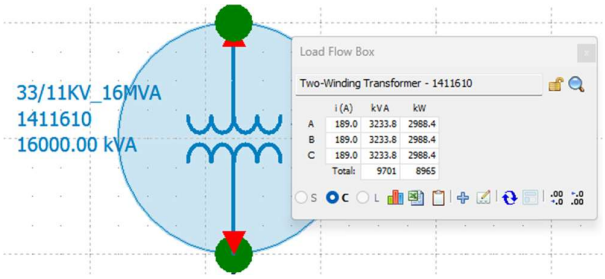
Priority: The existing 33/11kV PTR-1 is presently loaded to 84% under the AS-IS scenario and is projected to reach 98% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 7,300 consumers during peak demand periods.

Technical Justification



- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 3nos. PTRs and the PTR loading are 84%, 74% and 30% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth, the PTRs will be reaching to 98% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-1 from 8MVA to 12.5/16MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.

Proposed Scenario:



- Augmentation of PTR-1 from 8MVA to 12.5/16MVA at Athagarh PSS is proposed to meet the full load of Athagarh PSS at peak load condition after 2years load growth.
- In order to accommodate the PTR capacity of 16MVA and the corresponding full-load current, the CT ratio is proposed to be upgraded.
- 11kV feeder swapping of 11kV Kontolo feeder (1.6MVA load) from PTR-2 to PTR-1 is proposed to mitigate the anticipated overloading of PTR-2 due to load growth over the next two years and to achieve better load balancing between the PTRs.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @8%) Summer'28			Projected Load (5yrs. Load Growth @8% for 5years) Summer'31		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range

Proposed SLD of ATHAGARH 33/11kV PSS:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 1no. PTR (PTR-1) from 8MVA to 12.5/16MVA.
- Supply and installation of 1no. 11kV Outdoor CT (Set).

Proposed Cost with Estimate Break-up:

Name of the Circle :-	Cuttack
Name of the Division :-	AED
Name of the Sub-Division : -	Athagarh
Name of the Section : -	Athagarh-1
Name of the Work :-	Augmentation of Power Transformer (PTR-1) from 8 MVA to 12.5/16 MVA along with accessories at Athagarh PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Augmentation of Power Transformer (PTR-1) from 8 MVA to 12.5/16 MVA along with accessories at Athagarh PSS.	3,19,47,230.96
PART B: Supply & laying of 11 kV 3C, 400sqmm U/G Cable without spare run for O/G Feeders.	10,42,276.53
PART C: Dismantling portion	1,54,415.58
Total Amount	**₹ 3,31,43,923.06**
Total Amount (in Cr.)	**₹ 3.31**
Total estimated cost is Rs. 3.31 Crore. (On TPCODL CAPEX Scheme)	

Cost Estimate: ₹ 3.31cr. (For detailed BoQ refer Annexure 22.3).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Enhanced network reliability and safety.

c) Compliance with load growth requirements.

d) Protection of electrical assets and personnel.

e) Maintain statutory voltage and quality standards.

Cost Benefit Analysis:

Load in Summer '26 (MVA)	Load in Summer '28 (MVA)	Additional load due to load growth (in MVA)	Total Load Added (in MW)	Benefit on account of Fixed Charges from New Loads (in INR)	Benefit on account of Energy Charges from New Loads (in INR) with Load Factor 10%	Total Benefit (in INR)	Calculations	Value	Unit
A	B	C=B-A	D=Cx0.95	E=Dx1000x12xFixed Charges for 1 kW(Rs)	F=Dx1000x365x24x0.1x(Avg. Selling Price - Avg. Purchase Price)	G=E+F			
14.13	16.48	2.35	2.23	₹ 5,35,918	₹ 46,83,619	₹ 52,19,538	Total Scheme Cost (incl. Taxes)	3.31	Cr.
							Pay Back Period of Scheme (H=Total Project Cost/G)	6.35	Years
							% Rate of Return	15.75	%

Benefit to the System and Consumers:

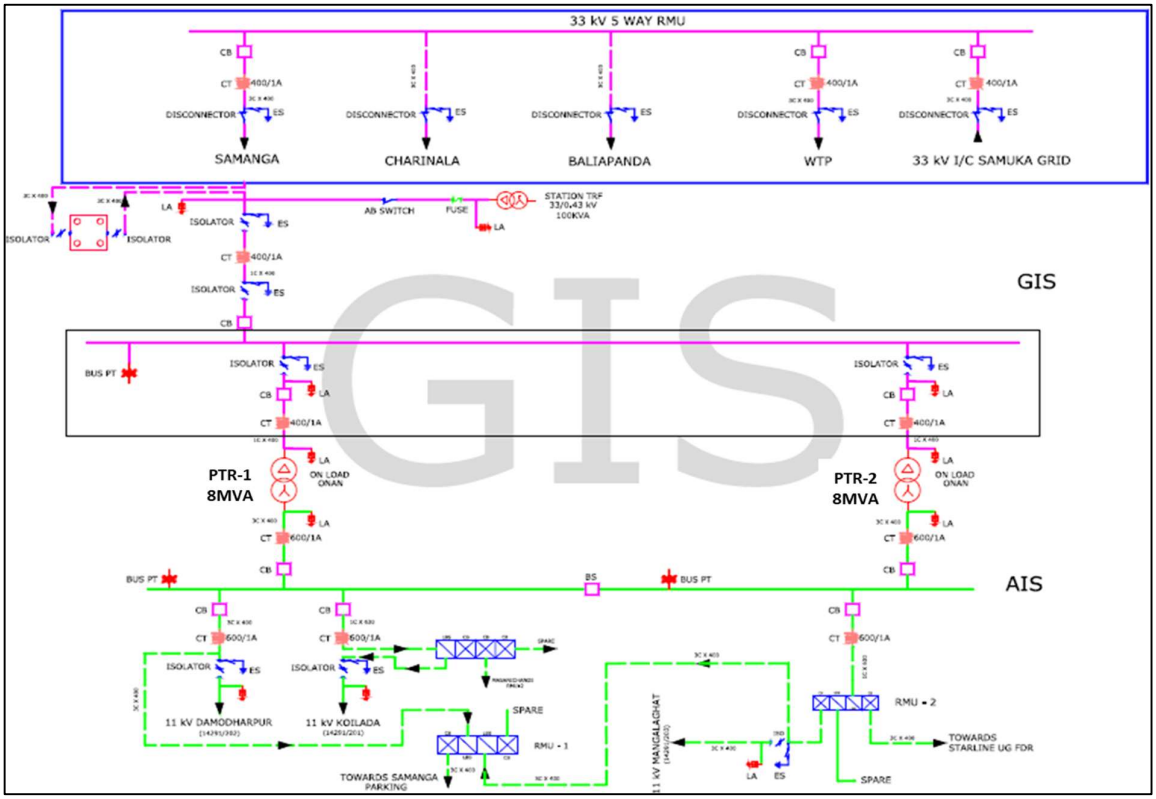
- To mitigate overloading condition on power transformers.
- To cater future load growth of the consumers.
- To ensure reliable power supply to the consumers.

4.0 Power Transformer overloading mitigation at SAMANGA Substation

Proposal:

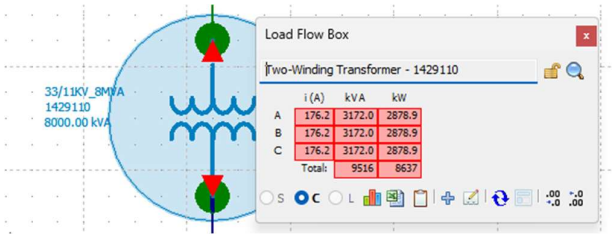
Augmentation of existing 1no. 33/11kV 8MVA Power Transformer (PTR-1) to 1no. 16/20MVA at Samanga 33/11kV Substation in PED division of BBSR-2 circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Samanga PTR-1 and 2 are 6.40MVA and 5.71MVA respectively at peak load condition of Summer'26.
- Further, new high value consumers are upcoming in the area like M/s Hayat regency (1.33MVA load), M/s. Sea Rose (1.5MVA load) in the area near Samanga PSS.
- Considering load growth for 2years (13% load growth per year for 2years), the projected loading of Summer'28 for PTR-1 and 2 would be 9.51MVA and 8.80MVA respectively.
- PTR-1 and PTR-2 will be loaded up to 119% and 110% respectively, w.r.t, the existing transformer capacity of 8MVA in Summer'28.



Existing Summer'26 Loading and projected load at Samanga PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @13%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Samanga	PTR-1	8	6.40	80.0%	70%-90%	9.51	119%	≥100%
2		PTR-2	8	5.71	71%	70%-90%	8.80	110%	≥100%

Existing SLD of Samanga 33/11kV PSS:

Load Flow Study in Cyme Software:

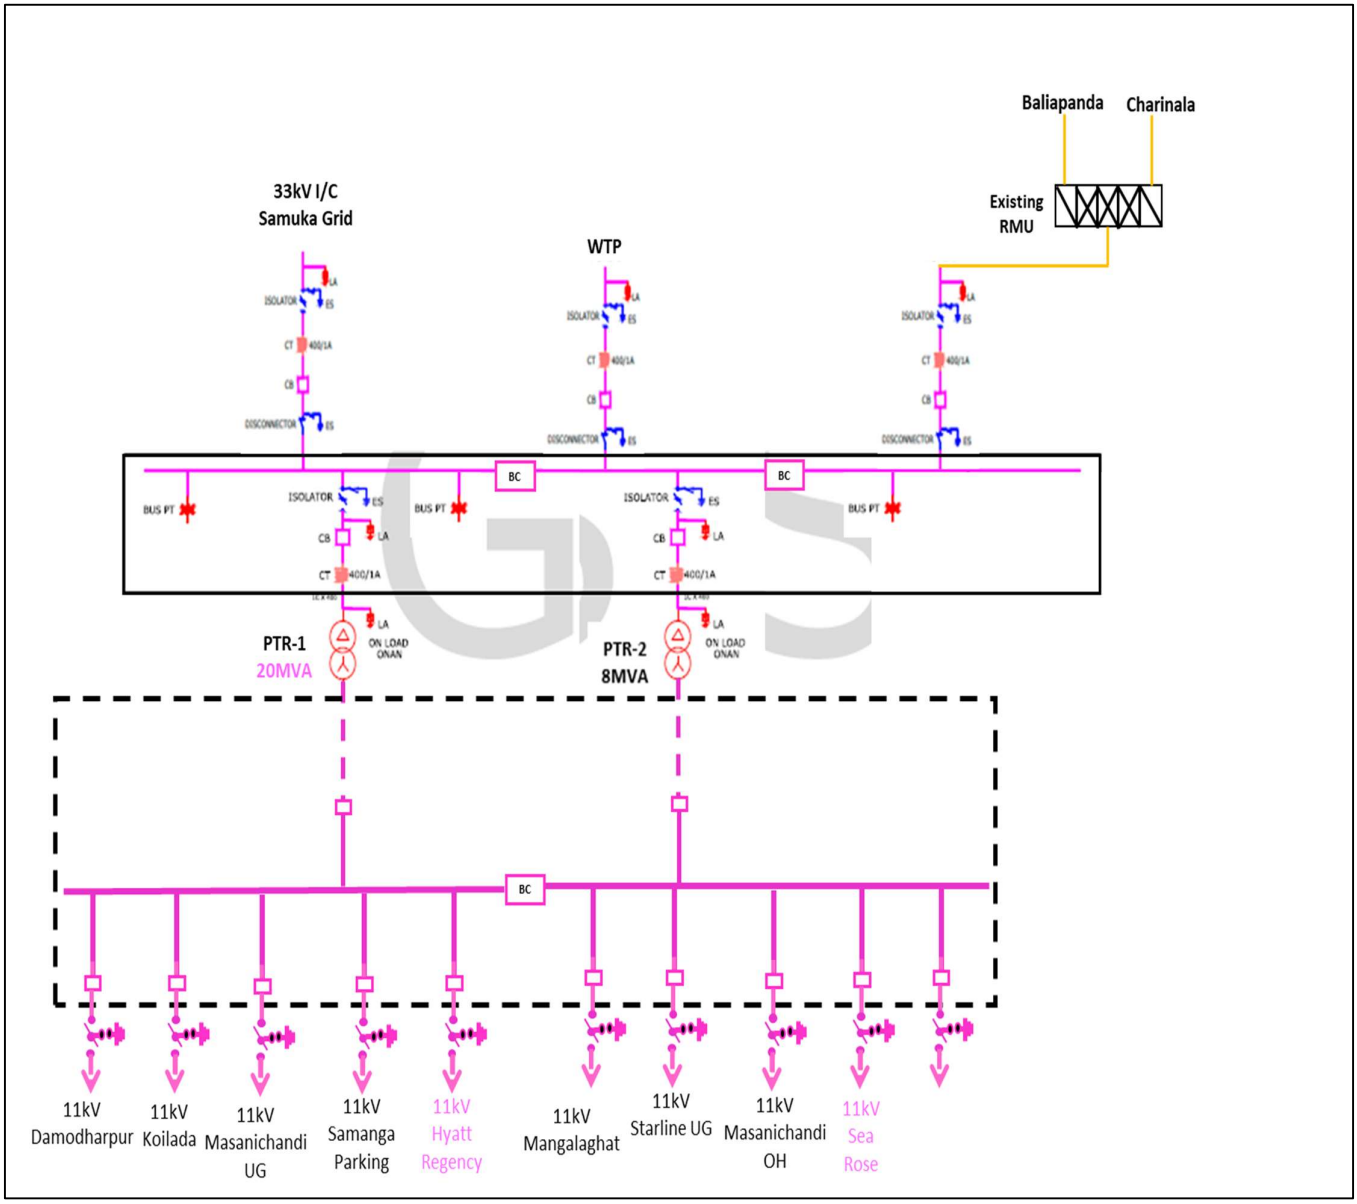
Priority and Timeline of the Project:

Priority: The existing 33/11kV PTR-1 is presently loaded to 80% under the AS-IS scenario and is projected to reach 119% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 3,600 consumers during peak demand periods.

Technical Justification

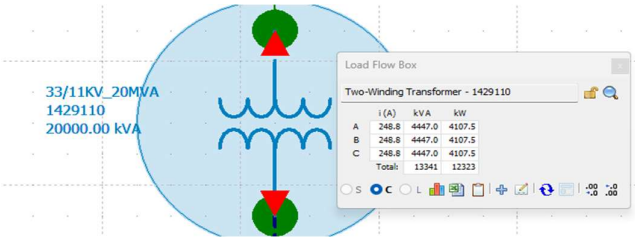
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 2nos. PTRs and the PTR loading are 80% and 71% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth and upcoming high value consumer loads, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous

sustained overloading, it is proposed to augment the PTR-1 from 8MVA to 16/20MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.



- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.

Proposed Scenario:



- Augmentation of PTR-1 from 8MVA to 16/20MVA at Samanga PSS is proposed to meet the full load of Samanga PSS at peak load condition after 2years load growth.
- To address the constraint of single 33kV bus arrangement and enhance network redundancy along with operational reliability, it is proposed to install a new 33kV switchgear panel board.
- Since existing control room is not having sufficient space for addition of new 11kV switchgear panels therefore, extension of control room is proposed to accommodate new switch panel boards. Moreover, the existing 11kV panels are of lower capacity which cannot meet to the current rating of new transformers.
- 11kV Switch panel board is proposed to be installed for power evacuation from 11kV feeders.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @13%) Summer'28			Projected Load (5yrs. Load Growth @13% for 5years) Summer'31		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Samanga	PTR-1	20	13.34	67%	50%-70%	19.24	96%	90%-100%
2		PTR-2	8	4.97	62%	50%-70%	7.17	90%	70%-90%

Proposed SLD of SAMANGA 33/11kV PSS:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 1no. PTR-1 from 8MVA to 16/20MVA.
- Installation of 11kV Switch panel board.
- Installation of 33kV Switch panel board.
- Extension of existing Control Room.

Proposed Cost with Estimate Break-up:

Name of the Circle :-	BBSR-2
Name of the Division :-	PED
Name of the Sub-Division : -	Puri S/D-2
Name of the Section : -	Sadar
Name of the Work :-	Installation of 1 No. of 16/20 MVA PTR along with expansion of existing Control Room Building at Samanga PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Installation of 1 No. of 16/20 MVA PTR along with expansion of existing Control Room Building at Samanga PSS.	8,53,61,181.95
PART B: Supply & laying of 0.4 KM 11 kV 3C, 400sqmm U/G Cable without spare run for 11 kV O/G Feeders.	14,21,551.91
PART C: Dismantling portion	6,68,607.41
Total Amount	**₹ 8,74,51,341.28**
Total Amount (in Cr.)	**₹ 8.75**
Total estimated cost is Rs. 8.75 Crore. (On TPCODL CAPEX Scheme)	

Cost Estimate: ₹ 8.75cr. (For detailed BoQ refer Annexure-22.4).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Enhanced network reliability and safety.

c) Compliance with load growth requirements.

d) Protection of electrical assets and personnel.

e) Maintain statutory voltage and quality standards.

Cost Benefit Analysis:

							Pay Back Period of Scheme (H=Total Project Cost/G)	6.37	Years
							% Rate of Return	15.71	%

Benefit to the System and Consumers:

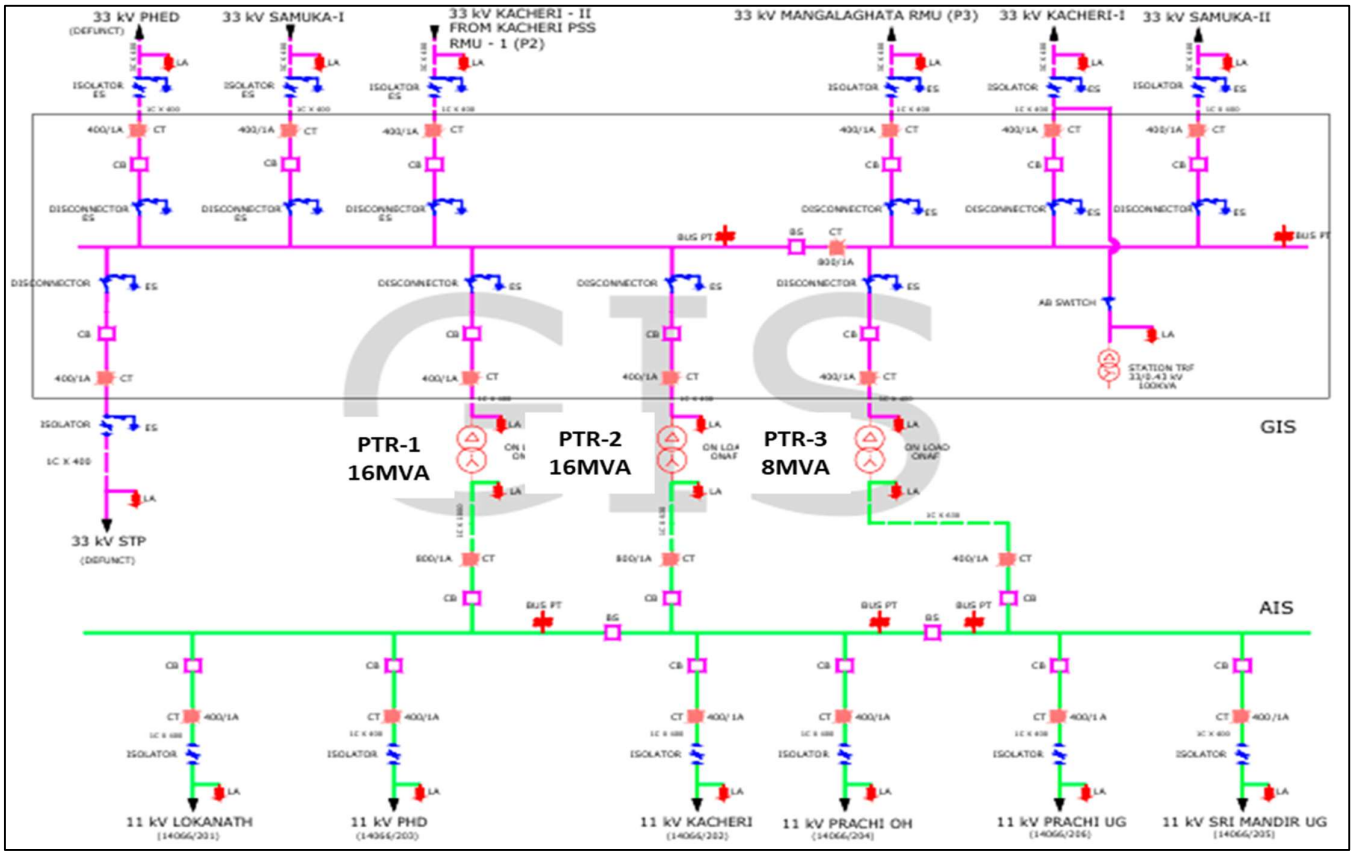
- To mitigate overloading condition on power transformers.
- To cater future load growth of the consumer.
- To ensure reliable power supply to the consumers.

5.0 Power Transformer overloading mitigation at BALIAPANDA Substation

Proposal:

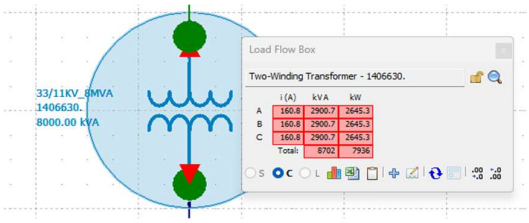
Augmentation of existing 1no. 33/11kV 8MVA Power Transformer (PTR-1) to 1no. 16/20MVA at Baliapanda 33/11kV Substation in PED division of BBSR-2 circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Baliapanda PTR-1, 2 and 3 are 6.29MVA, 11.58MVA and 6.82MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (13% load growth per year for 2years), the projected loading of Summer'28 for PTR-1, 2 and 3 would be 8.03MVA, 14.79MVA and 8.71MVA respectively.
- PTR-3 will be loaded up to 109%, w.r.t, the existing transformer capacity of 8MVA in Summer'28.



Existing Summer'26 Loading and projected load at Baliapanda PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @13%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Baliapanda	PTR-1	16	6.29	39%	0-50%	8.03	50%	50%-70%
2		PTR-2	16	11.58	72%	70%-90%	14.79	92%	90%-100%
3		PTR-3	8	6.82	85%	70%-90%	8.71	109%	≥100%

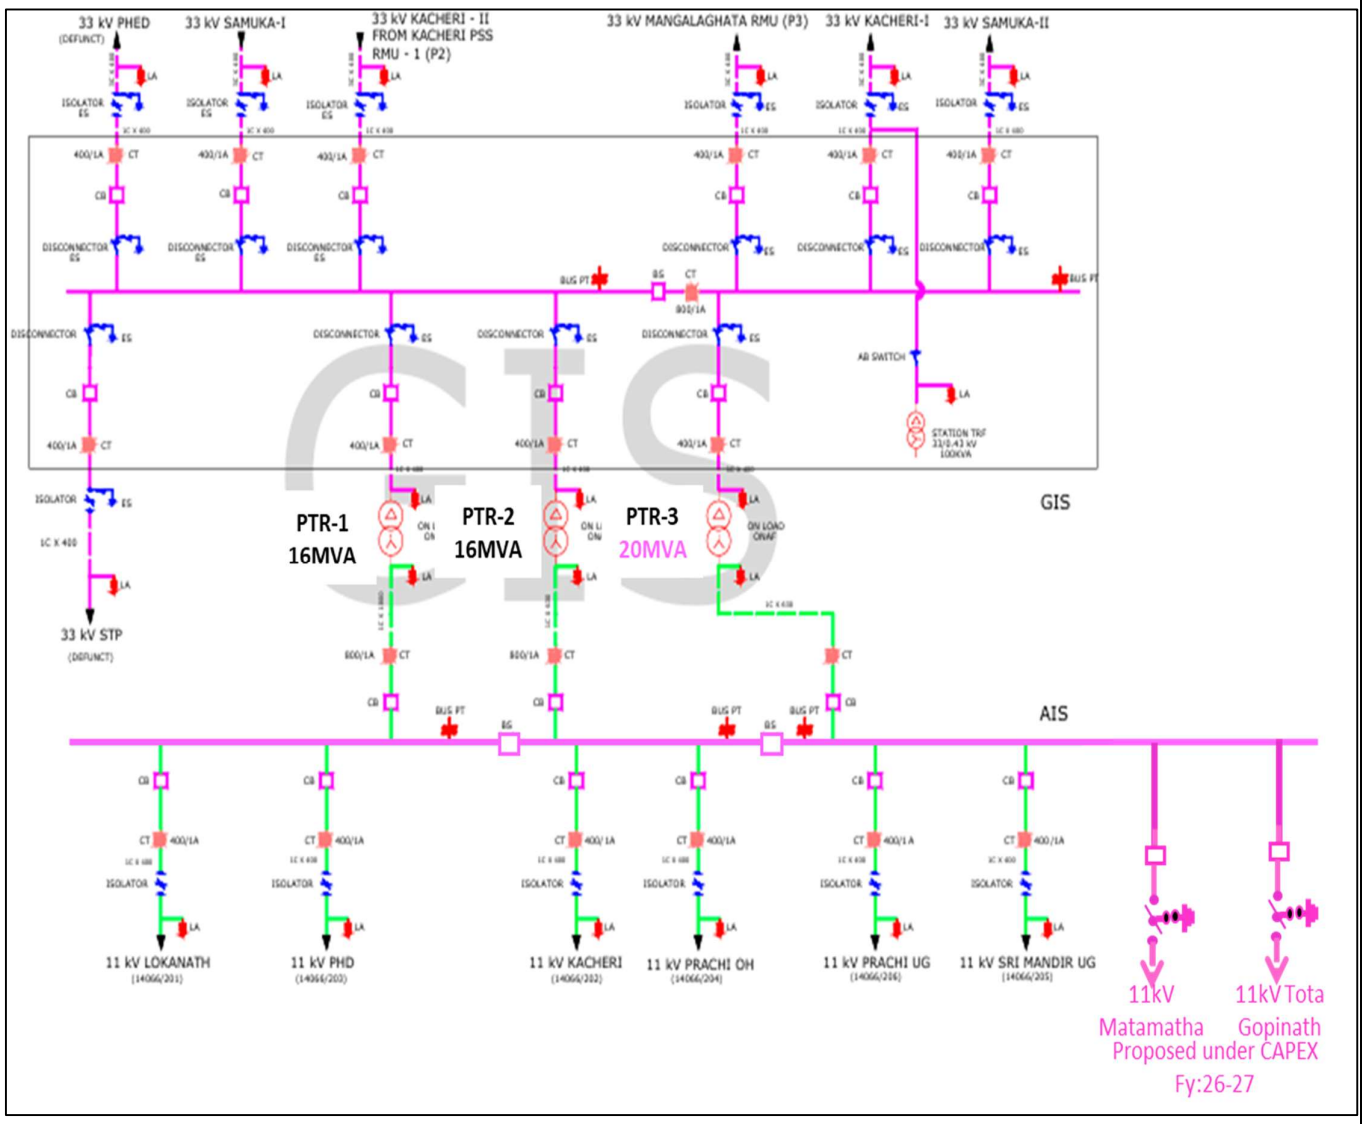
Existing SLD of Baliapanda 33/11kV PSS:

Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

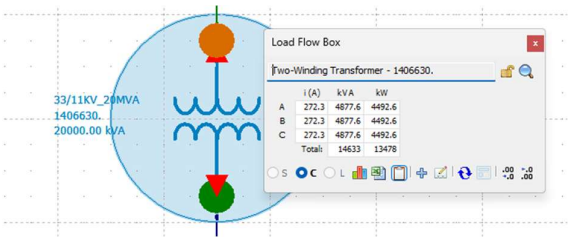
Priority: The existing 33/11kV PTR-3 is presently loaded to 85% under the AS-IS scenario and is projected to reach 109% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 4,700 consumers during peak demand periods.

Technical Justification



- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 3nos. PTRs and the PTR loading are 39%, 72% and 85% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth and upcoming high value consumer loads, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-1 from 8MVA to 16/20MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.

Proposed Scenario:



- Augmentation of PTR-3 from 8MVA to 16/20MVA at Baliapanda PSS is proposed to meet the full load of Baliapanda PSS at peak load condition after 2years load growth.
- The existing 11kV CTs in the PTR GIS panel are rated 400/1 A. In order to accommodate the PTR capacity of 20MVA and the corresponding full-load current, the CT ratio is proposed to be upgraded.
- After the bifurcation of 11kV Kacheri feeder (proposed under CAPEX FY: 2026-27), the 11kV proposed Tota Gopinath feeder (1.71MVA) will be fed from PTR-3 (20MVA) and after the bifurcation of 11kV Prachi OH feeder (proposed under CAPEX FY: 2026-27), the 11kV proposed Matamatha feeder (2.93MVA) will be fed from PTR-3 (20MVA) of Baliapanda PSS.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @13%) Summer'28			Projected Load (5yrs. Load Growth @13% for 5years) Summer'31		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Baliapanda	PTR-1	16	8.03	50%	50%-70%	10.68	67%	50%-70%
2		PTR-2	16	8.86	55%	90%-100%	11.80	74%	70%-90%
3		PTR-3	20	14.63	73%	0-50%	19.48	97%	90%-100%

Proposed SLD of BALIAPANDA 33/11kV PSS:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 1no. PTR-3 from 8MVA to 16/20MVA.
- Supply and installation of 1no. 11kV Outdoor CT (Set).

							% Rate of Return	46.08	%

Benefit to the System and Consumers:

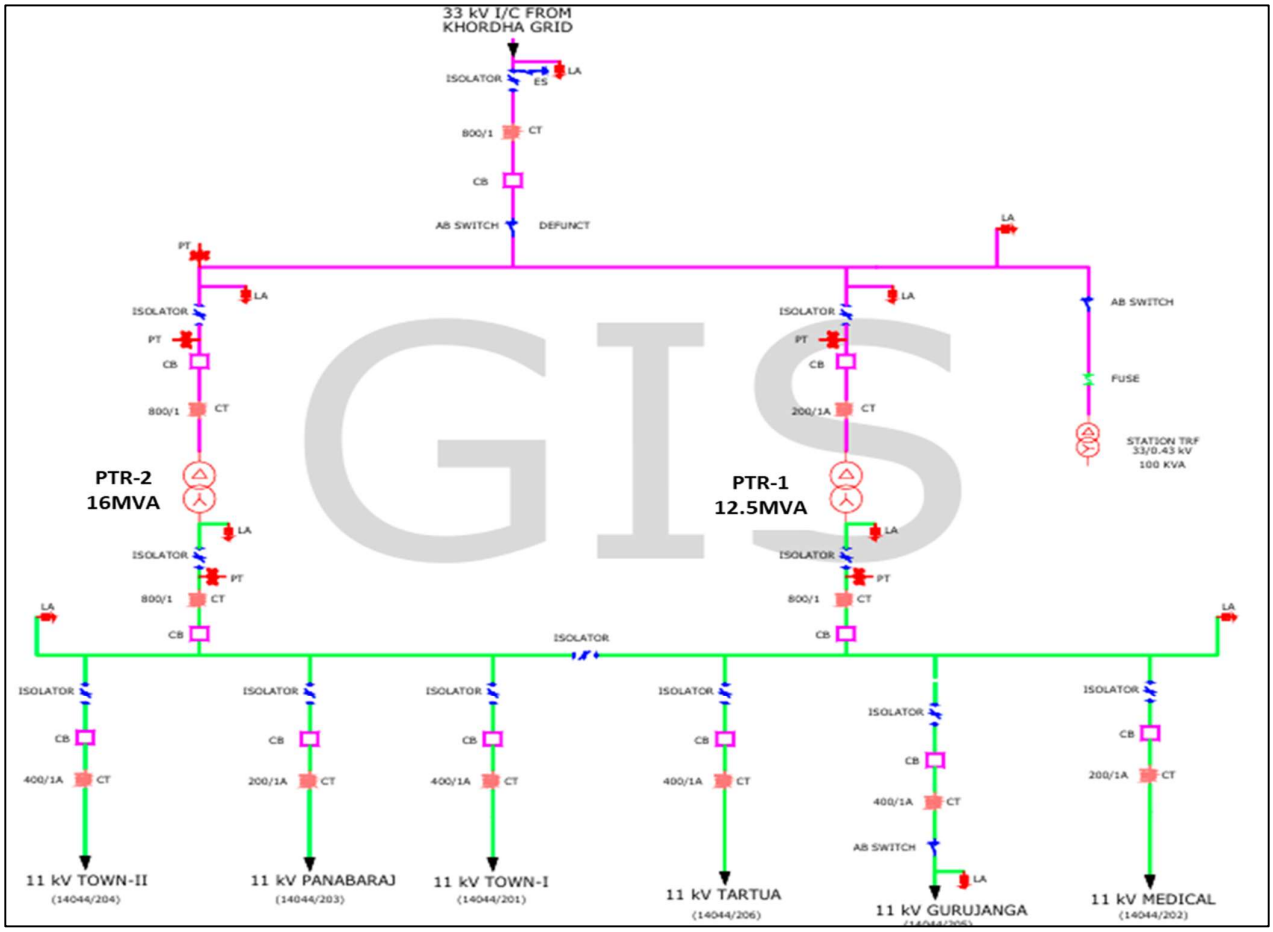
- To mitigate overloading condition on power transformers.
- To cater future load growth of the consumer.
- To ensure reliable power supply to the consumers.

6.0 Power Transformer overloading mitigation at Khordha Town/ 10-Pole Substation

Proposal:

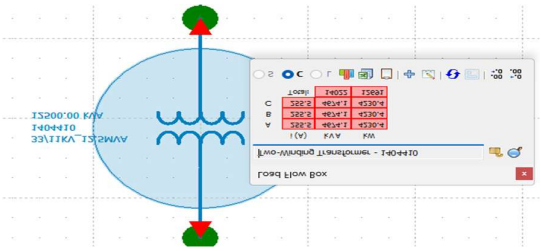
Augmentation of existing 1no. 33/11kV 12.5MVA Power Transformer (PTR-1) to 1no. 20/25MVA at Khordha Town/ 10-Pole 33/11kV Substation in KHD division of BBSR-2 circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Khordha Town/ 10-Pole PTR-1 and 2 are 11.20MVA and 11.43MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (12% load growth per year for 2years), the projected loading of Summer'28 for PTR-1 and 2 would be 14.05MVA and 14.34MVA respectively.
- PTR-1 will be loaded up to 112%, w.r.t, the existing transformer capacity of 12.5MVA in Summer'28.



Existing Summer'26 Loading and projected load at Khordha Town/ 10-Pole PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @12%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Khordha Town/ 10-Pole	PTR-1	12.5	11.20	90%	90%-100%	14.05	112%	≥100%
2		PTR-2	16	11.43	71%	70%-90%	14.34	90%	90%-100%

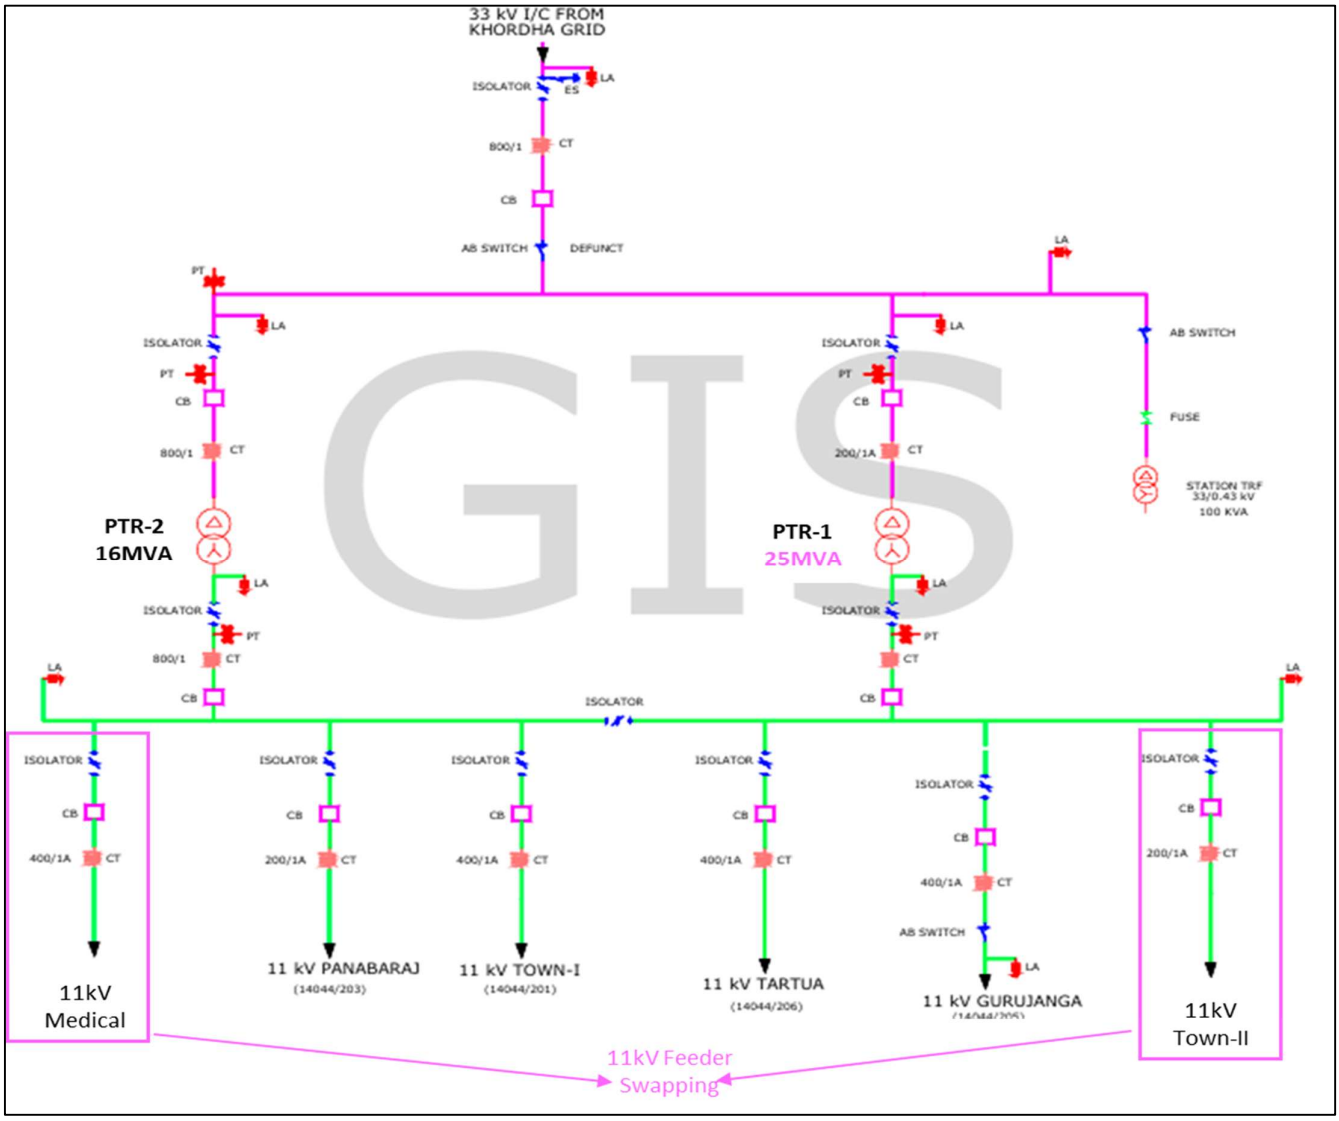
Existing SLD of Khordha Town/ 10-Pole 33/11kV PSS:

Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

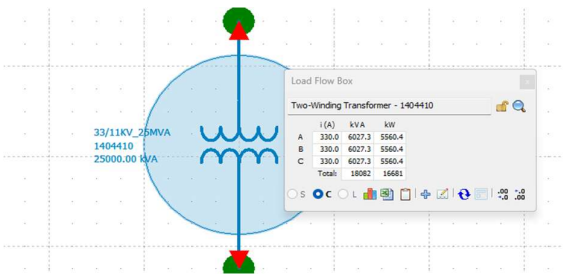
Priority: The existing 33/11kV PTR-1 is presently loaded to 90% under the AS-IS scenario and is projected to reach 112% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 6,500 consumers during peak demand periods.

Technical Justification



- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 2nos. PTRs and the PTR loading are 90% and 71% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth and upcoming high value consumer loads, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-1 from 12.5MVA to 20/25MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.

Proposed Scenario:



- Augmentation of PTR-1 from 12.5MVA to 20/25MVA at Khordha Town/ 10-Pole PSS is proposed to meet the full load of Khordha Town/ 10-Pole PSS at peak load condition after 2years load growth.
- In order to accommodate the PTR capacity of 25MVA and the corresponding full-load current, the CT ratio is proposed to be upgraded.
- 11kV feeder swapping of 11kV Town-2 feeder (3.43MVA load) from PTR-2 with 11kV Medical feeder (0.23MVA load) from PTR-1 is proposed to mitigate the anticipated overloading of PTR-2 due to load growth over the next two years and to achieve better load balancing between the PTRs.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @12%) Summer'28			Projected Load (5yrs. Load Growth @12% for 5years) Summer'31

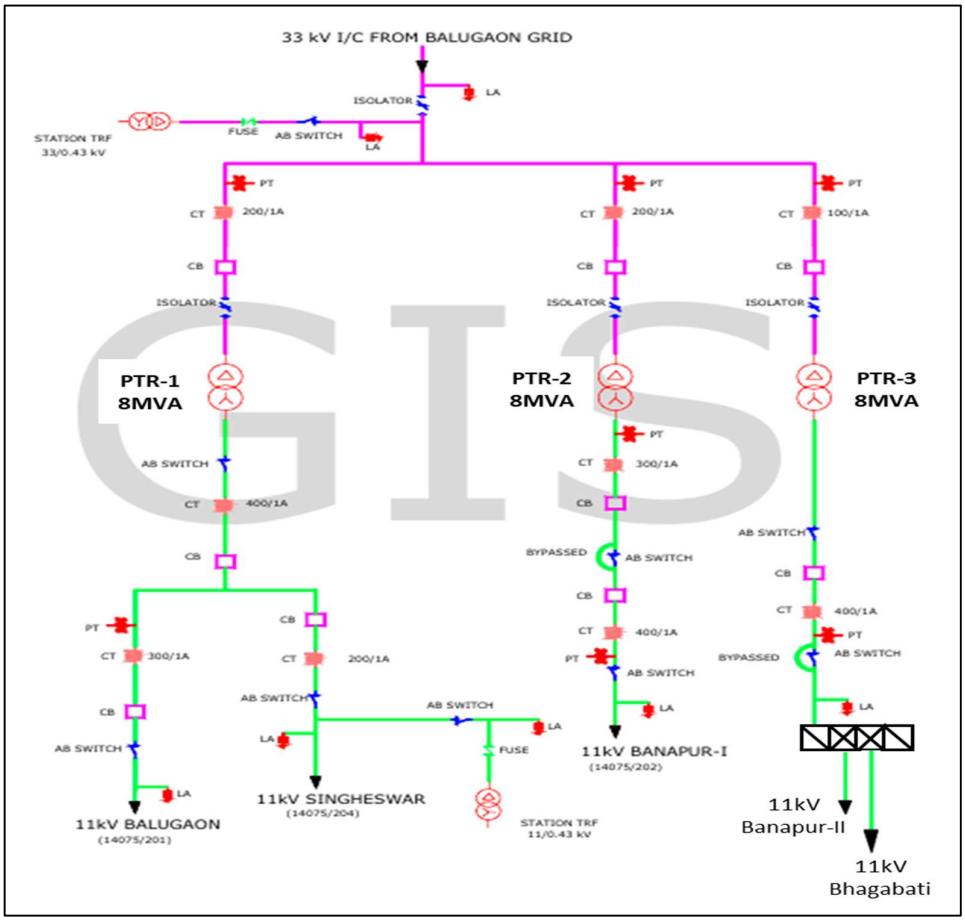
- To cater future load growth of the consumer.
- To ensure reliable power supply to the consumers.

7.0 Power Transformer overloading mitigation at Balugaon Substation

Proposal:

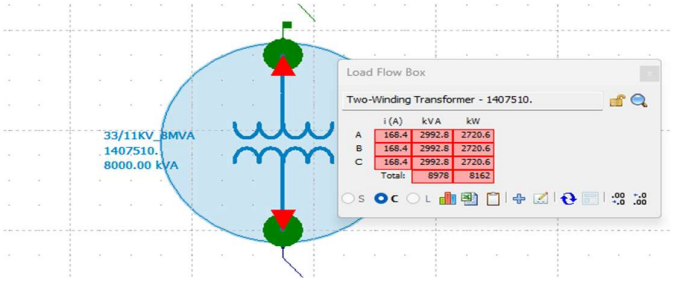
Augmentation of existing 1no. 33/11kV 8MVA Power Transformer (PTR-1) to 1no. 12.5/16MVA at Balugaon 33/11kV Substation in BAED division of BBSR-2 circle to mitigate overloading condition.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Balugaon substation PTR-1, 2 and 3 are 7.16MVA, 2.36MVA and 6.10MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (12% load growth per year for 2years), the projected loading of Summer'28 for PTR-1, 2 and 3 would be 8.98MVA, 2.96MVA and 7.65MVA respectively.
- PTR-1 will be loaded up to 112%, w.r.t, the existing transformer capacity of 8MVA in Summer'28.



Existing Summer'26 Loading and projected load at Balugaon PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @12%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Balugaon	PTR-1	8	7.16	89.5%	70%-90%	8.98	112%	≥100%
2		PTR-2	8	2.36	30%	0-50%	2.96	37%	0-50%
3		PTR-3	8	6.10	76%	50%-70%	7.65	96%	90%-100%

Existing SLD of Balugaon 33/11kV PSS:

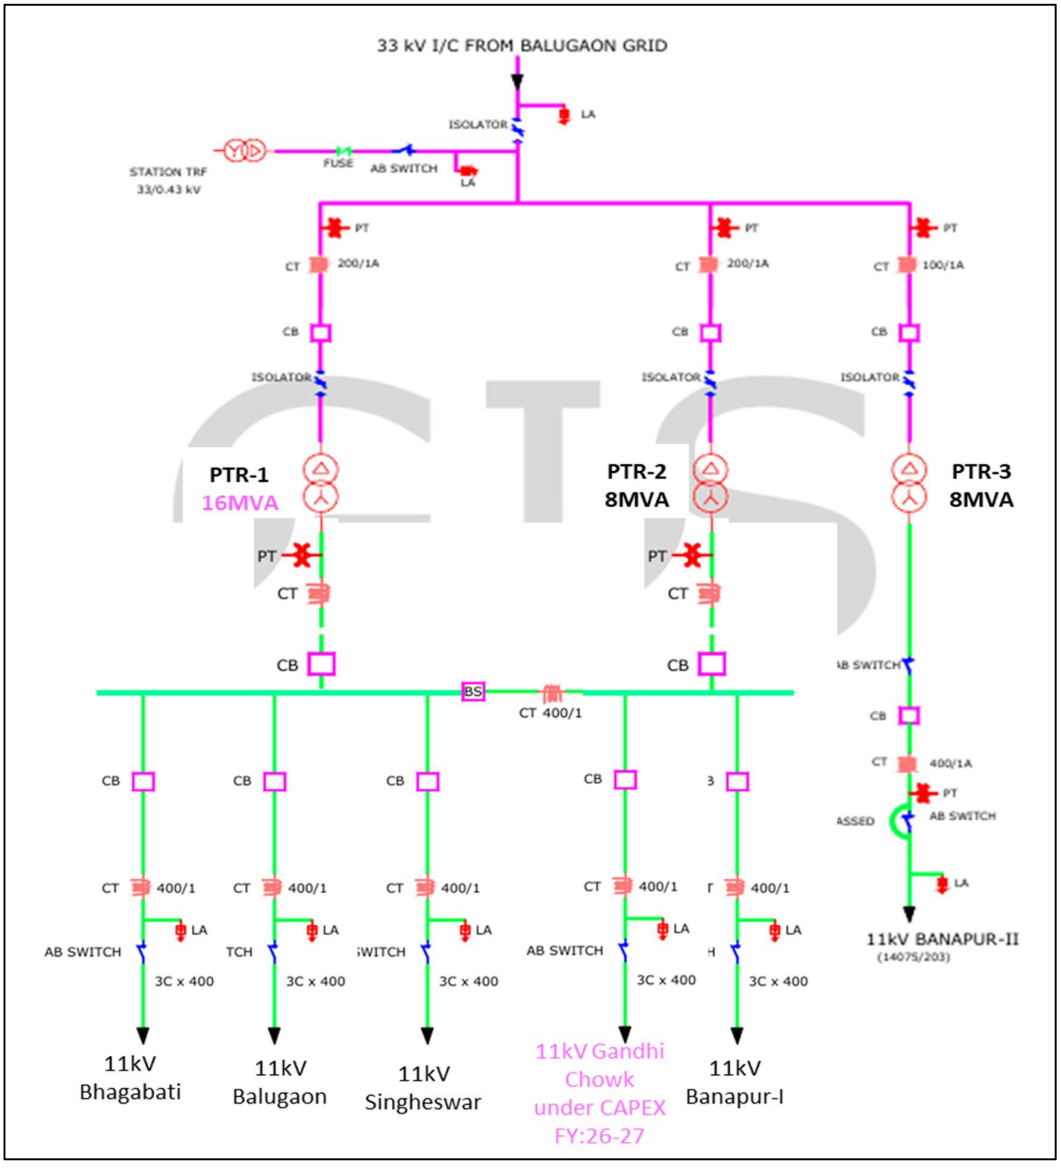
Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

Priority: The existing 33/11kV PTR-1 is presently loaded to 89.5% under the AS-IS scenario and is projected to reach 112% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 12,500 consumers during peak demand periods.

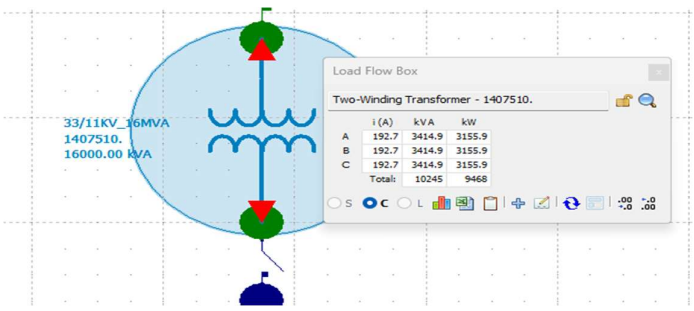
Technical Justification

- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, there are 3nos. PTRs and the PTR loading are 89.5%, 30% and 76% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth and upcoming high value consumer loads, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-1 from 8MVA to 12.5/16MVA. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.



Proposed Scenario:

- Augmentation of PTR-1 from 8MVA to 12.5/16MVA at Balugaon PSS is proposed to meet the full load of Balugaon PSS at peak load condition after 2years load growth.
- In order to accommodate the PTR capacity of 12.5/16MVA and the corresponding full-load current, the CT ratio is proposed to be upgraded.
- Due to the unavailability of spare 11kV feeder panel at Balugaon substation, it is proposed for swapping of 11kV feeder panel from 33/11kV Delta PSS.



- 11kV feeder swapping of 11kV Bhagabati feeder (3MVA) from PTR-3 (under RMU) to PTR-1 along with 11kV Balugaon feeder bifurcation (under CAPEX FY:2026-27) and swapping of proposed 11kV Gandhi Chowk feeder (2MVA) to PTR-2 is proposed to mitigate the anticipated overloading of PTR-3 due to load growth over the next two years and to achieve better load balancing between the PTRs.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @12%) Summer'28			Projected Load (5yrs. Load Growth @12% for 5years) Summer'31		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Balugaon	PTR-1	16	10.24	64%	70%-90%	14.38	90%	90%-100%
2		PTR-2	8	5.47	68%	0-50%	7.69	96%	0-50%
3		PTR-3	8	3.88	49%	50%-70%	5.45	68.2%	70%-90%

Proposed SLD of Balugaon 33/11kV PSS:

Load Flow Study of proposed scenario in Cyme Software:

Scope of Work:

- Augmentation of 1no. PTR-1 from 8MVA to 12.5/16MVA.
- Supply and installation of 1no. 11kV Outdoor CT (Set).

Proposed Cost with Estimate Break-up:

Abstract of Estimate	
Description	**Total**
PART A: Augmentation of Power Transformer (PTR-1) from 8 MVA to 12.5/16 MVA along with accessories at Balugaon PSS.	4,34,08,056.48
PART B: Supply & laying of 0.3 KM 11 kV 3C, 400sqmm U/G Cable without spare run for O/G Feeders.	11,25,671.41
PART C: Dismantling portion	1,54,415.58
Total Amount	**₹ 4,46,88,143.46**
Total Amount (in Cr.)	**₹ 4.47**
Total Estimated Cost is Rs. 4.47 Cr. (On TPCODL CAPEX Scheme)	

Cost Estimate: ₹ 4.47cr. (For detailed BoQ refer Annexure-22.7).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Enhanced network reliability and safety.

c) Compliance with load growth requirements.

d) Protection of electrical assets and personnel.

e) Maintain statutory voltage and quality standards.

Cost Benefit Analysis:

Load in Summer'26 (MVA)	Load in Summer'28 (MVA)	Additional load due to load growth (in MVA)	Total Load Added (in MW)	Benefit on account of Fixed Charges from New Loads (in INR)	Benefit on account of Energy Charges from New Loads (in INR) with Load Factor 10%	Total Benefit (in INR)	Calculations	Value	Unit
A	B	C=B-A	D=Cx 0.95	E=Dx1000x12xFixed Charges for 1 kW(Rs)	F=Dx1000x365x24x0.1x (Avg. Selling Price - Avg. Purchase Price)	G=E+F			
15.62	19.59	3.97	3.77	₹ 9,05,955	₹ 79,17,526	₹ 88,23,481	Total Scheme Cost (incl. Taxes)	4.47	Cr.
							Pay Back Period of Scheme (H=Total Project Cost/G)	5.06	Years
							% Rate of Return	19.74	%

Benefit to the System and Consumers:

- To mitigate overloading condition on power transformers.
- To cater future load growth of the consumer.
- To ensure reliable power supply to the consumers.

8.0 Supply and Installation of 11kV Switchgear Panel Board at Delta Substation for power evacuation through 11kV feeders

Proposal:

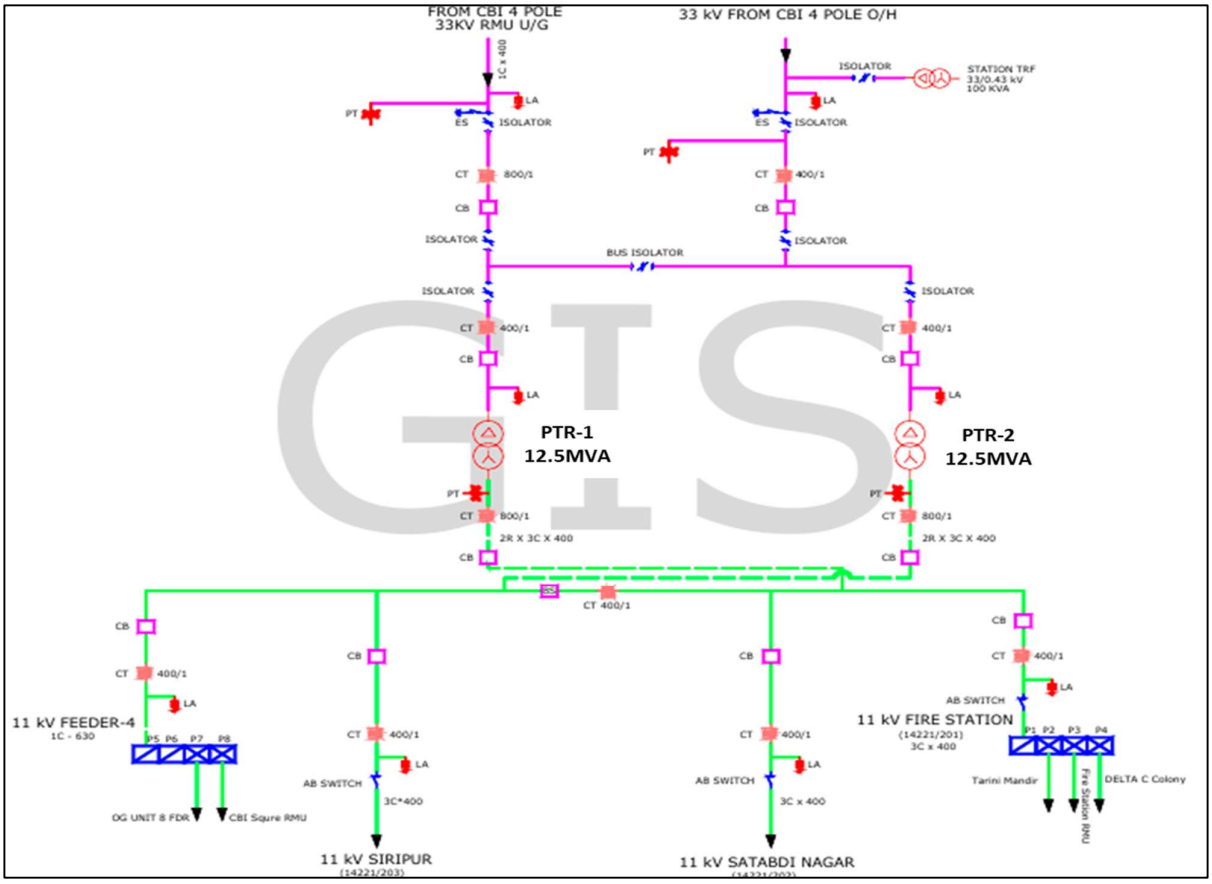
Proposal for Supply and Installation of 11kV switchgear panel board (15nos. Panels- 2 incoming, 10 Outgoing, 1 Bus coupler, 2 Bus PT) at Delta 33/11kV Substation in BCDD-1 for power evacuation through 11kV feeders. Construction of 1no. new 11kV feeder (2.4Ckm UG line from Delta PSS to Sushree Villa) from Delta PSS through proposed 11kV bay for load diversion of existing 11kV Baramunda-Delta Feeder load emanating from 33/11kV Baramunda PSS.

Construction of 1no. new 11kV feeder (2Ckm UG line from Delta PSS to Bhamara Petrol Pump) from Delta PSS through proposed 11kV bay for load diversion of 11kV IRC-3 Feeder load emanating from 33/11kV Nayapalli PSS.

Requirement/ Need of the Proposal:

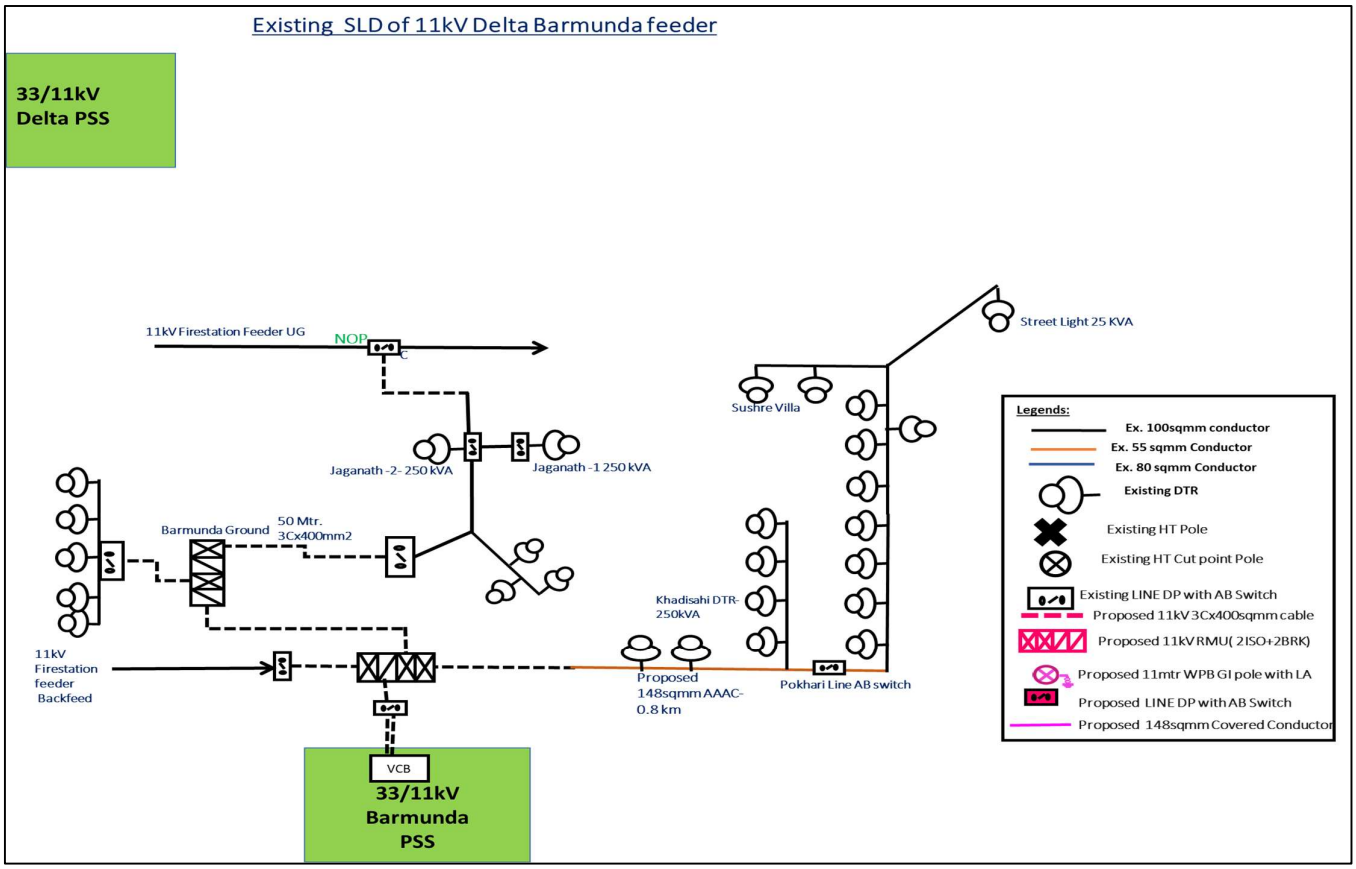
Existing Scenario:

- Loading of 33/11kV Delta substation PTR-1 and 2 are 8.15MVA and 5.10MVA respectively at peak load condition of Summer'26. Considering load growth for 2years (10% load growth per year for 2years), the projected loading of Summer'28 for PTR-1 and 2 would be 9.86MVA and 6.18MVA respectively.
- In Summer'26, under PTR swapping scheme 2nos. PTRs are already augmented from 8MVA to 12.5MVA under OPEX. However, the existing switch boards have no spare 11kV feeder bay panels available for the other outgoing feeders for power evacuation. Therefore, in the interim arrangement, feeder splitting is done through RMU arrangement at the substation.
- In CAPEX FY: 27-28, additional feeders are proposed for power evacuation from Delta PSS. Additionally, 1no. feeder is proposed for new consumer (OB&CC) connection for which 11kV feeder bay panels are not available at the substation.
- 11kV Baramunda-Delta feeder is emanating from 33/11kV Baramunda PSS. Total length of this feeder is 5.2Ckm and the peak load is 4.19MVA. Conductor size of 11kV Baramunda-Delta feeder is 100sq.mm & the feeder is 81% loaded w.r.t the current carrying capacity of the conductor and 107% loaded considering 15% load growth for urban feeders.
- 11kV IRC-3 feeder is emanating from 33/11kV Nayapalli PSS. Total length of this feeder is 6.7Ckm and the peak load is 6.29MVA. Conductor size of 11kV IRC-3 feeder is 100sq.mm & the feeder is 121% loaded w.r.t the current carrying capacity of the conductor and 161% loaded considering 15% load growth for urban feeders.
- This feeder is completely feeding urban consumers, several breakdowns on 11kV feeder is encountered which hampers the reliability of power supply and also considering future load growth of the residential building, bifurcation of this feeder is proposed to mitigate overloading issue.



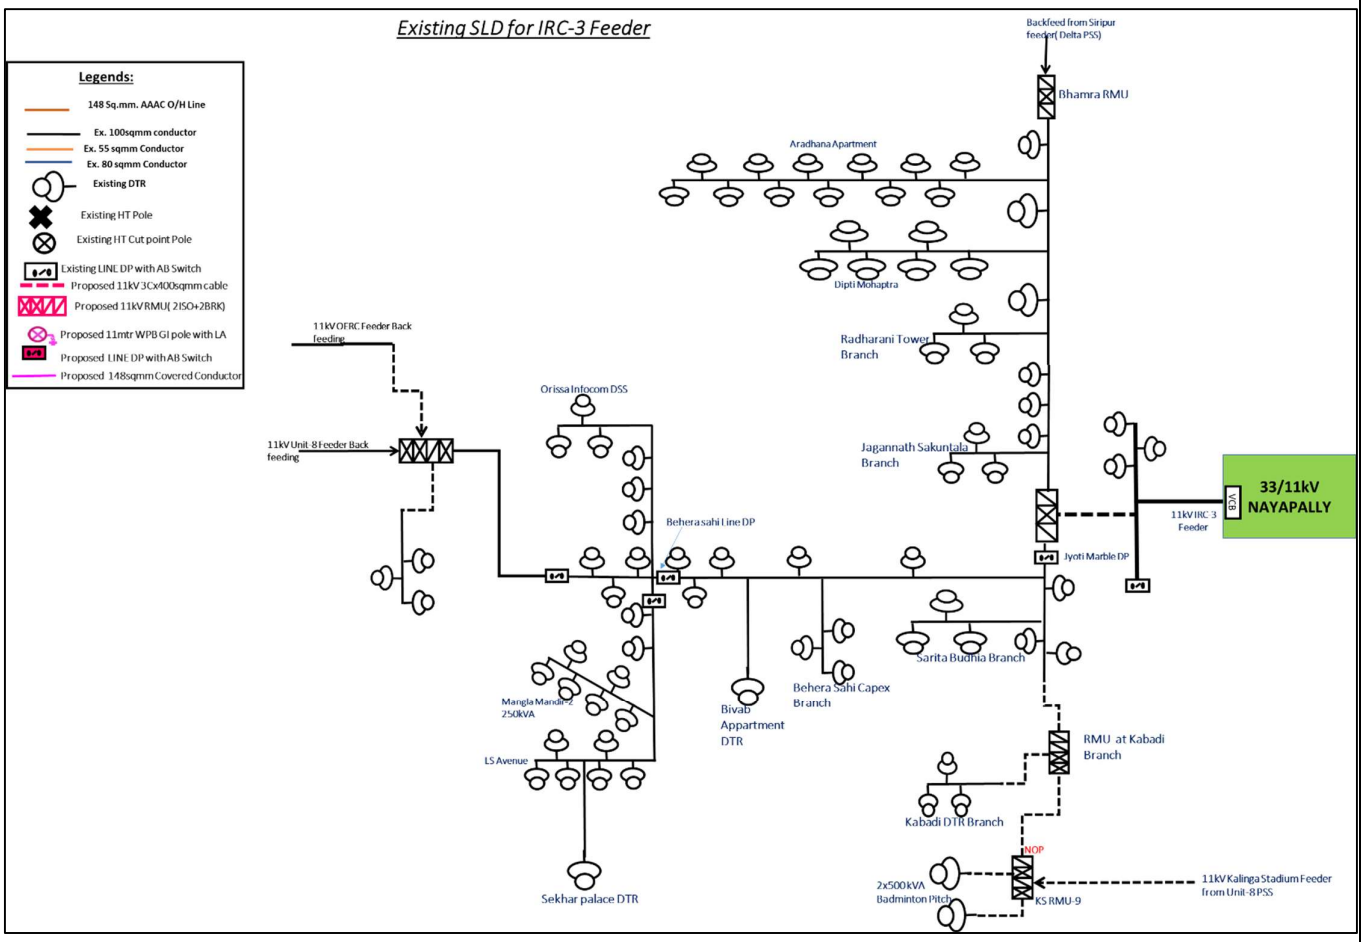
Existing Summer'26 Loading and projected load at Delta PTR, 11kV Baramunda-Delta Feeder and 11kV IRC-3 Feeder:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @10%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Delta	PTR-1	8	8.15	102%	≥100%	12.16	152%	≥100%
2		PTR-2	8	5.10	64%	50%-70%	11.14	139%	≥100%

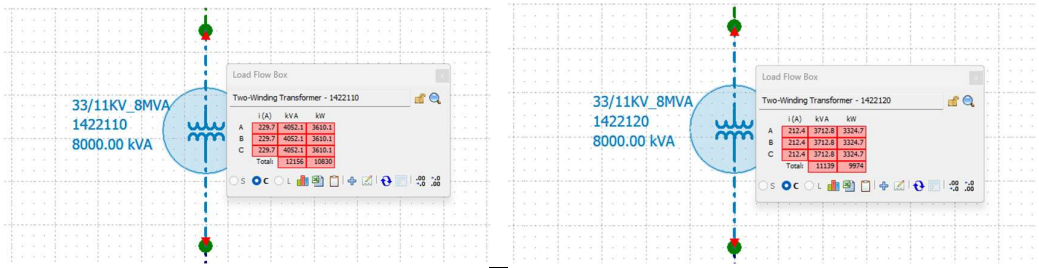


Name of the PSS	11kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer'26 (MVA)	% Loading	Projected load Summer'28 (MVA)	% Loading	Feeder Over loading Status
Baramunda	Baramunda-Delta	5.18	4.19	81%	5.54	107%	Overload

Name of the PSS	11kV Feeder Name	Feeder Capacity (MVA)	Peak Loading Summer'26 (MVA)	% Loading	Projected load Summer'28 (MVA)	% Loading	Feeder Over loading Status
Nayapalli	IRC-3	5.18	6.29	121%	8.32	161%	Overload



Existing SLD of Delta 33/11kV PSS:



Existing SLD of 11kV Baramunda-Delta Feeder:

Existing SLD of 11kV IRC-3 Feeder:

Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

Priority: Due to loading of PTR in Summer'26, the 2nos. PTRs were overloaded. In order to mitigate the overloading issue, nos. 8MVA PTRs were swapped with 12.5MVA PTRs under OPEX scheme. However, the switchgear panel board is not adequate for power evacuation of 11kV feeders. So, the switchgear panel and associated accessories are taken under CAPEX to enable power evacuation from the substation. Additionally, 2nos. new 11kV feeders are proposed for power evacuation from Delta substation for overloading mitigation and 1no. 11kV feeder is proposed to cater the load of new consumer. In order to enable the power evacuation from the substation, switchgear panel board and associated accessories are proposed.

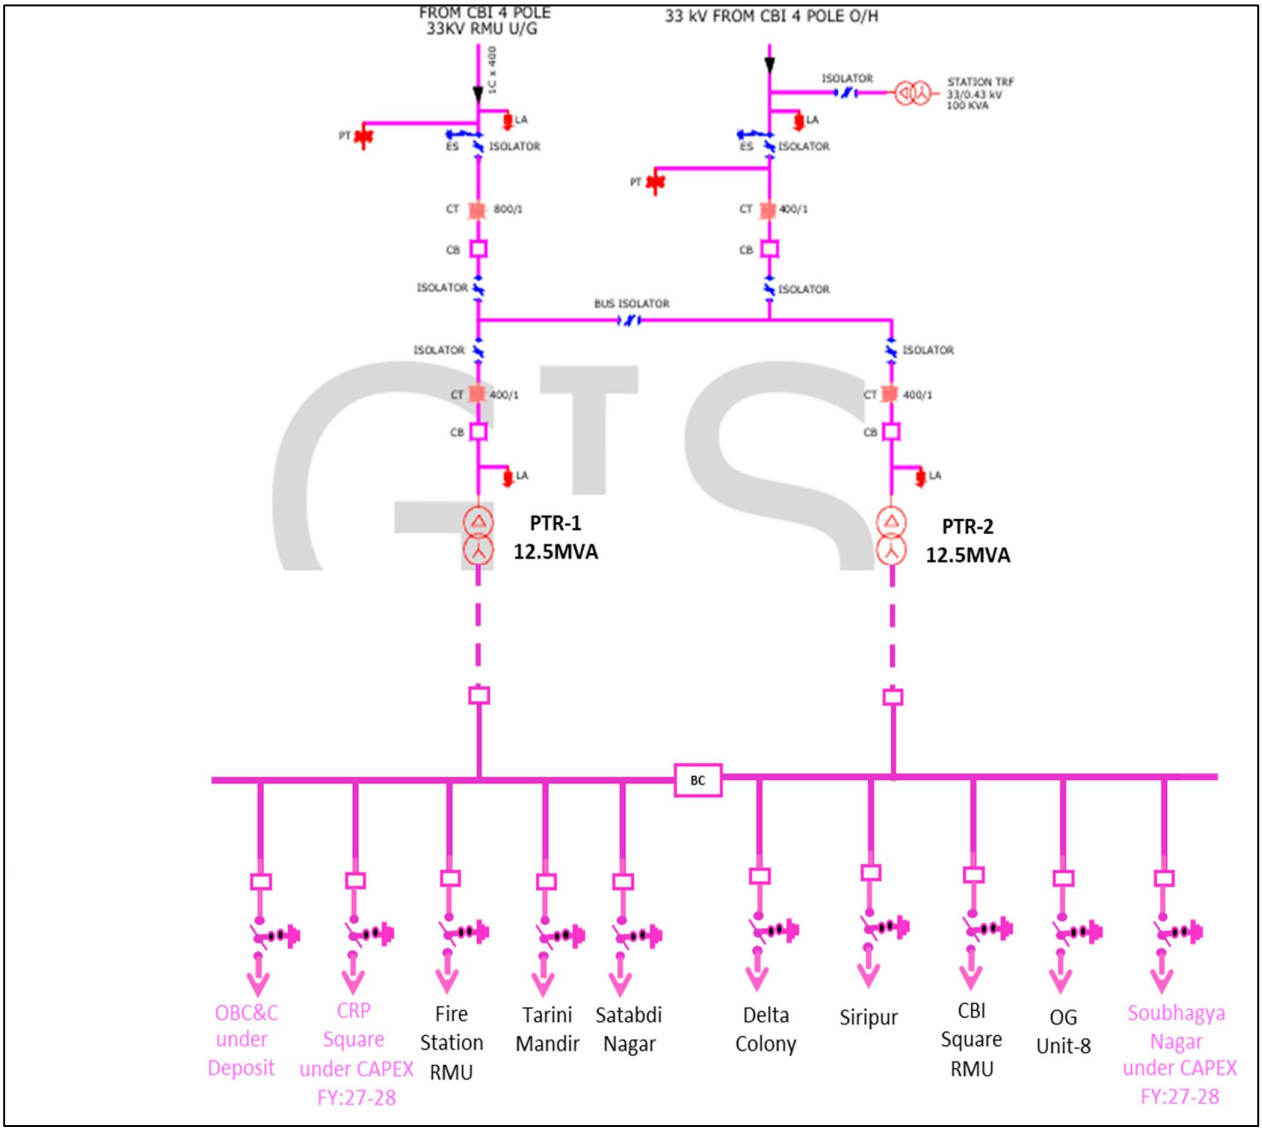
Since the 11kV Baramunda-Delta feeder and 11kV IRC-3 feeder loading has reached 81% and 121% loading respectively in ASIS scenario, with load growth In Summer'28, the feeder loading will reach 107% and 161% respectively. In case the issue is not addressed, there will be load shedding of 5600nos. consumers for prolonged period.

Technical Justification

- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- Due to loading of PTR in Summer'26, the 2nos. PTRs were overloaded. In order to mitigate the overloading issue, nos. 8MVA PTRs were swapped with 12.5MVA PTRs under OPEX scheme. However, the switchgear panel board is not adequate for power evacuation of 11kV feeders. So, the switchgear panel and associated accessories are taken under CAPEX to enable power evacuation from the substation. Additionally, 2nos. new 11kV feeders are proposed for power evacuation from Delta substation for overloading mitigation and 1no. 11kV feeder is proposed to cater the load of new consumer. In order to enable the power evacuation from the substation, switchgear panel board and associated accessories are proposed.
- In AS IS scenario, PTR-2 loading is 86% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-2 from 5MVA to 8MVA (under OPEX) and PTR-1 from 5MVA to 12.5MVA (under OPEX). After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.

- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.
- The current carrying capacity as per CEA Distribution Planning Manual for recommended current carrying capacity. As per IS:398-4 (1994) or OEM recommendation for AAAC conductors.
- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, feeder loaded more than 70% without N-1 condition is required for augmentation / new feeder.
- In AS IS scenario, the 11kV Baramunda-Delta feeder is 81% loaded w.r.t the current carrying capacity and 11kV IRC-3 feeder is 121% loaded w.r.t the current carrying capacity. The feeder loadings are not N-1 complaint.

Proposed Scenario:



- For power evacuation in existing scenario there is no spare 11kV bay is available at Delta PSS. 11kV switchgear panel board is required to be installed at Delta PSS to facilitate power evacuation through existing and proposed 11kV outgoing feeders from the 33/11kV substation.
- Since existing control room cannot accommodate new switchgear panel, it is proposed for extension of existing control room to accommodate the switchgear panel.
- 2nos. new 11kV feeders are proposed under CAPEX FY: 2027-28, to mitigate the overloading of the 11kV feeders IRC-3 feeder (emanating from Nayapalli PSS) and 11kV Delta-Baramunda feeder (emanating from Baramunda PSS).
- It is proposed to construct of 2.4Ckm new line using 3Cx400sqmm UG cable from Delta PSS to Sushree Villa and 2Ckm new line using 3Cx400sqmm UG cable from Delta PSS to Bhamara Petrol Pump.
- 1no. new consumer of OBC&C (0.875MVA load) is proposed from new 11kV feeder bay.
- 11kV feeder reconfiguration is done to achieve better load balancing between the PTRs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Enhanced network reliability and safety.

c) Compliance with load growth requirements.

d) Reduction of electrocution risk and public safety hazards.

e) Safe operation and isolation of the feeder.

f) Protection of electrical assets and personnel.

g) Maintain voltage and quality standards.

Benefit to the System and Consumers:

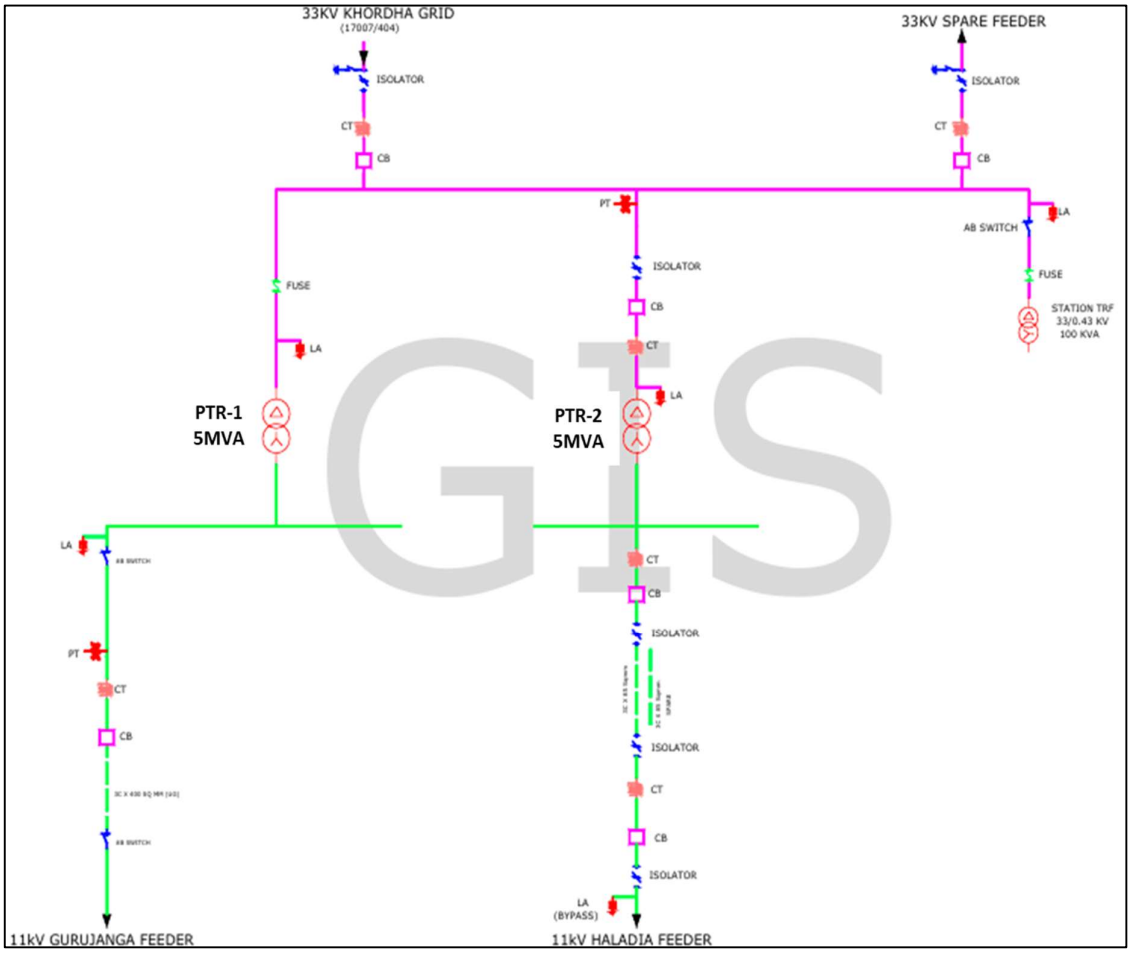
- Improved Reliability thereby overloading mitigation.
- To cater future load growth of the consumer.
- Consumers will get Quality & Reliable power supply with fever interruptions thereby improving their overall capability to use stable, quality & reliable power supply.
- The above arrangement will help to release power supply to upcoming potential consumers.

9.0 Power Transformer overloading mitigation at Gurujanga Substation

Proposal:

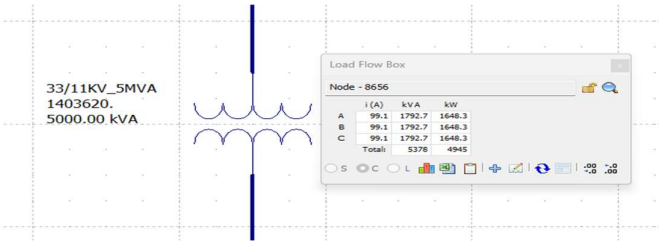
Proposal for overloading mitigation of PTR-2 at Gurujanga PSS along with installation of 33kV and 11kV indoor switchgear panel board at Gurujanga 33/11kV Substation in KHD.

Requirement/ Need of the Proposal:



Existing Scenario:

- Loading of 33/11kV Gurujanga substation PTR-2 is 4.29MVA at peak load condition of Summer'26. Considering load growth for 2years (12% load growth per year for 2years), the projected loading of Summer'28 for PTR-2 would be 5.38MVA.
- PTR-2 will be loaded up to 108%, w.r.t, the existing transformer capacity of 5MVA in Summer'28.
- The PTR-1, 5MVA is sick and faulty.



Existing Summer'26 Loading and projected load at Gurujanga PTR:

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	AS IS (Summer'26)			Projected Load (2yrs. Load Growth @12%) Summer'28		
				Peak Load (MVA)	%Loading	%Loading Range	Peak Load (MVA)	%Loading	%Loading Range
1	Gurujanga	PTR-1	5	0.00	0%	0-50%	0.00	0%	0-50%
2		PTR-2	5	4.29	86%	70%-90%	5.38	108%	≥100%

Existing SLD of Gurujanga 33/11kV PSS:

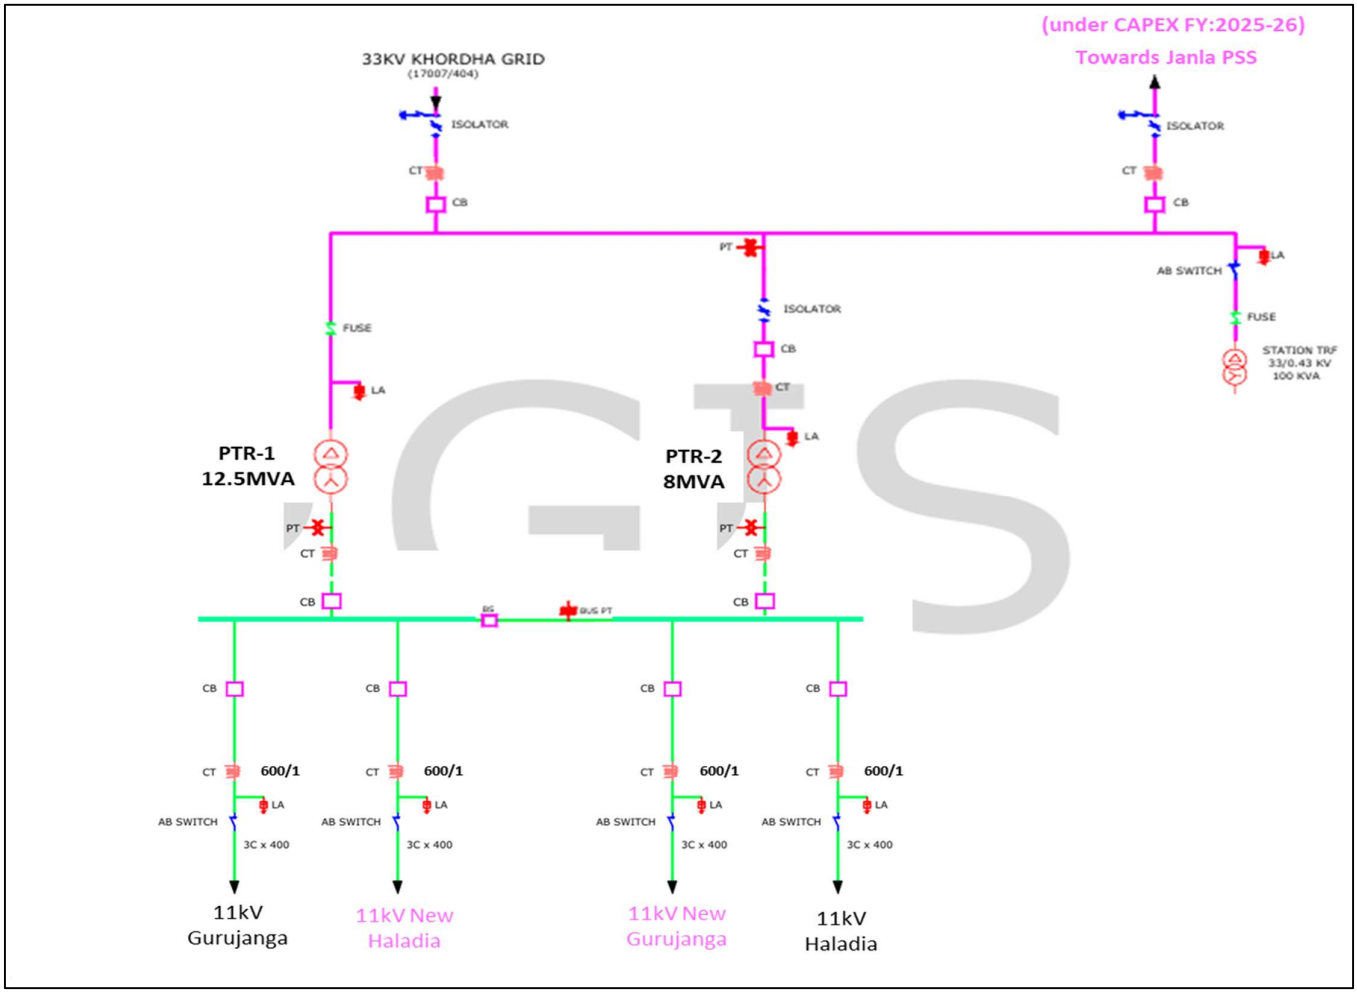
Load Flow Study in Cyme Software:

Priority and Timeline of the Project:

Priority: The existing 33/11kV PTR-2 is presently loaded to 86% under the AS-IS scenario and is projected to reach 108% by Summer-2028 considering the anticipated load growth. Sustained operation at such high loading levels may result in excessive thermal stress, accelerated ageing of insulation, reduced transformer service life and increased risk of operational failures. Failure to address the projected overloading may necessitate prolonged load shedding affecting approximately 6,200 consumers during peak demand periods.

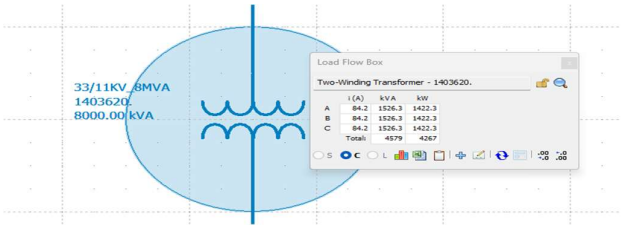
Technical Justification

- As per clause no. 4.5 of CEA Distribution Planning Manual recommendation, Power Transformer "Loading above 70% after load sharing within substation without N-1 conditions or with nearby sub-station" is required for augmentation.
- In AS IS scenario, PTR-2 loading is 86% against the installed capacity. There is no scope available for further load transfer to other PTR in the same PSS and to the nearby PSS. Moreover, with 2years load growth, the PTRs will be loaded more than 100% w.r.t the rated capacity. To avoid the overloading and failure of PTR due to continuous sustained overloading, it is proposed to augment the PTR-2 from 5MVA to 8MVA (under OPEX) and PTR-1 from 5MVA to 12.5MVA (under OPEX) along with 11kV feeder load diversion. After commissioning, other loaded PTRs load will be balanced to keep the PTR loading within limit.
- Overloading of a 33/11kV power transformer leads to excessive heating of windings and insulating oil, accelerating insulation deterioration, increasing technical losses, causing voltage drops and reducing transformer life. It can also result in frequent relay tripping, interruption of power supply, damage to associated equipment and increased risk of fire or catastrophic transformer failure. Therefore, transformer augmentation is essential to ensure reliable operation, maintain safety standards and accommodate present and future load demand.



Proposed Scenario:

- PTR-2 is proposed for PTR swapping from 5MVA to 8MVA (under OPEX) and PTR-1 is proposed for PTR swapping from 5MVA to 12.5MVA (under OPEX). For power evacuation in existing scenario there is no spare 11KV bay is available at Gurujanga PSS. 11kV switchgear panel board is required to install at Gurujanga PSS to facilitate power evacuation through proposed 11kV outgoing feeders from the 33/11kV substation.
- It is proposed for swapping of 33kV switchgear panel board and 11kV switchgear panel board from 33/11kV Samanga PSS to Gurujanga PSS.



- Since existing control room cannot accommodate new switchgear, it is proposed for construction of Control Room Building to accommodate the switchgear panel.
- It is proposed to divert the load of 11kV Gurujanga feeder emanating from 33/11kV Khordha Town/ 10-Pole substation (PTR-1, 12.5MVA) of 5.03MVA load to Gurujanga PSS (under OPEX) with 2nos. feeders namely 11kv Gurujanga feeder and 11kV New Gurujanga feeder.
- Further, it is proposed for 11kV Haladia feeder bifurcation by construction 1no. new 11kV Feeder (3.5MVA) from Gurujanga PSS in order to mitigate 11kV Haladia feeder overloading mitigation (under CAPEX FY: 2026-27).
- 11kV feeder reconfiguration is done to achieve better load balancing between the PTRs.

Sl. No.	Name of 33/11kV PSS	PTR No.	PTR Rating (MVA)	Projected Load (2yrs. Load Growth @12%) Summer'28			Projected Load (5yrs. Load Growth @12% for 5years) Summer'31

c) Compliance with load growth requirements.

d) Protection of electrical assets and personnel.

e) Maintain statutory voltage and quality standards.

Benefit to the System and Consumers:

- To mitigate overloading condition on power transformers.
- To cater future load growth of the consumers.
- To ensure reliable power supply o the consumers.

Name of the Work :-	Augmentation of Power Transformer (PTR-2) from 12.5 MVA to 20/25 MVA and upgradation of 11kV Indoor CT suitable for existing GIS panel board along with accessories at 33/11kV Unit-8 PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Augmentation of Power Transformer (PTR-2) from 12.5 MVA to 20/25 MVA along with accessories at 33/11kV Unit-8 PSS.	3,58,92,317.10
PART B: Dismantling Portion	1,33,029.04
Total Amount	**₹ 3,60,25,346.14**
Total Amount (in Cr.)	**₹ 3.60**
Total estimated cost is Rs. 3.60 Crore. (On TPCODL CAPEX Scheme)	

ANNEXURE-22.1

PART A:

Augmentation of Power Transformer (PTR-2) from 12.5 MVA to 20/25 MVA along with accessories at 33/11kV Unit-8 PSS.

SUPPLY OF FOLLOWING EQUIPMENT & MATERIALS (As per Technical Specification)					
Sl. No.	**DESCRIPTION OF ITEMS**	**UNIT**	**Quantity**	**Basic Unit price (In Rs.)**	**Total (In Rs.)**
1	**Transformer and Accessories**				-
1.1	20/25 MVA, 33/11kV Power Transformer DYn11 (Outdoor Installation) with Accessories including NIDS System	EA	1.00	2,35,73,775.89	2,35,73,775.89
2	**Substation Earthing System GI**				-
2.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	Kg	900.00	71.94	64,746.00
2.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	Kg	200.00	71.94	14,388.00
2.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	8.00	1,300.00	10,400.00
3	**33kV and 11kV Power and Control, XLPE cables**				-
3.1	33kV, 1Core, 630sqmm Aluminium, XLPE insulation U/G Cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	200.00	1,278.81	2,55,762.00
3.2	Indoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core (Touch Proof)	EA	3.00	7,280.00	21,840.00
3.3	Outdoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core	EA	3.00	7,521.00	22,563.00
3.4	11kV, 1Core, 1000sqmm Aluminium, XLPE insulation UG Cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	300.00	1,438.00	4,31,400.00
3.5	Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	6.00	8,260.00	49,560.00
3.6	Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	6.00	8,518.00	51,108.00
4	**Control Cables (Copper Armoured)**				-
4.1	4 Core x 2.5 mm^2	M	50.00	126.69	6,334.50
4.2	7 Core x 2.5 mm^2	M	50.00	203.16	10,158.00
4.3	10 Core x 2.5 mm^2	M	50.00	273.73	13,686.50

A2				**Applicable Taxes to make it Landed Cost @18%**	**23,321.70**
A				**Total landed Cost (A=A1+ A2)**	**1,52,886.71**
B				**Other Overhead /(including Supervision Charges) @ 6 % of B**	
C				**Gross Total Estimated Cost i.e. (A+B)**	1,52,886.71
D				**CESS @ 1% of C**	1,528.87
E				**Grand Total (C+D)**	1,54,415.58

ANNEXURE-22.4	
TP CENTRAL ODISHA DISTRIBUTION LTD.	
Name of the Circle :-	BBSR-2
Name of the Division :-	PED
Name of the Sub-Division : -	Puri S/D-2
Name of the Section : -	Sadar
Name of the Work :-	Installation of 1 No. of 16/20 MVA PTR, 33kV and 11kV Switchgear Panel Board along with expansion of existing Control Room Building at Samanga PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Installation of 1 No. of 16/20 MVA PTR, 33kV and 11kV Switchgear Panel Board along with expansion of existing Control Room Building at Samanga PSS.	8,53,61,181.95
PART B: Supply & laying of 0.4 KM 11 kV 3C, 400sqmm U/G Cable without spare run for 11 kV O/G Feeders.	14,21,551.91
PART C: Dismantling portion	6,68,607.41
Total Amount	**₹ 8,74,51,341.28**
Total Amount (in Cr.)	**₹ 8.75**
Total estimated cost is Rs. 8.75 Crore. (On TPCODL CAPEX Scheme)	

ANNEXURE-22.4

PART A:

Installation of 1 No. of 16/20 MVA PTR, 33kV and 11kV Switchgear Panel Board along with expansion of existing Control Room Building at Samanga PSS.

SUPPLY OF FOLLOWING EQUIPMENT & MATERIALS (As per Technical Specification)					
Sl. No.	**DESCRIPTION OF ITEMS**	**UNIT**	**Quantity**	**Basic Unit price (In Rs.)**	**Total (In Rs.)**
1	**33 kV Indoor Switch Panel Board**				
1.1	33 kV 1250 A Indoor AIS Panel Board with 12 nos. of Switchgear Panel (3 Nos. for incoming, 2 Nos. of PTR, 2 Nos. for Bus Coupler, 3 Nos. for Bus PT) as per technical specification	EA	1.00	1,10,43,128.00	1,10,43,128.00
2	**11 kV Indoor Switch Panel Board**				-
2.1	11kv 2000A VCB with 16 panel board Switchgear (2 incoming, 10 Outgoing, 1 Bus coupler, 2 Bus PT) as per technical specification	EA	1.00	1,16,19,630.00	1,16,19,630.00
3	**SCADA**		1.00		-
4.1	Pre-Wired RTU Panel	EA	1.00	2,72,297.17	2,72,297.17
4.2	Managed Layer2 Ethernet Switch (RTU Panel)	EA	2.00	1,43,000.00	2,86,000.00
4.3	Networking Accessories	Set	1.00	8,682.24	8,682.24
4.4	Signal Interface Panel (4G Modem cum Router)	EA	1.00	55,123.45	55,123.45
4.5	CMR with Mounting Base for Digital Inputs	EA	16.00	437.04	6,992.64
4.6	Interposing Relay for Digital Output	EA	8.00	437.04	3,496.32
4.7	Instrumentation Cable 12 C X 0.5 mm2, Armored cable for Status and Indications	M	200.00	150.01	30,002.00
4.8	Instrumentation Cable 7 C X 1.5 mm2, Armored for Control Output	M	50.00	184.93	9,246.50
4.9	Twisted Pair Shielded & Over all shielded Instrumentation Cable 5 P X 1.0 mm2, Armored for Analog Input	M	50.00	200.18	10,009.00
4.10	4 C X 4 mm2 Copper cable for extension of CT & PT	M	60.00	161.23	9,673.80
4.11	2 C X 4 mm2 Cable for DC Power Supply	M	100.00	139.78	13,978.00
4.12	4P X 0.36 mm2, Armored Communication Cable for MFM	M	100.00	110.17	11,017.00
4.13	Armored CAT6 UTP Cable	M	100.00	73.97	7,397.00
4.14	Un-Armored CAT6 UTP Cable	M	200.00	33.35	6,670.00
4.15	Electronic Earthing and Earth Pit	Set	1.00	15,290.42	15,290.42
4.16	Multi Function Meter	EA	4.00	8,118.36	32,473.44
4.17	Industrial grade Serial Server	EA	1.00	50,591.61	50,591.61
5	**Transformer and Accessories**				-
6	16/20 MVA, 33/11kV Power Transformer DYn11 (Outdoor Installation) with Accessories including NIDS System	EA	1.00	2,16,61,981.00	2,16,61,981.00
5.1	RTCC UNIT DC 24-48V	EA	2.00	3,00,000.00	6,00,000.00
6	**Substation Earthing System GI**				-
6.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	Kg	20615.00	71.94	14,83,043.10
6.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	Kg	3600.00	71.94	2,58,984.00
6.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	40.00	1,300.00	52,000.00
7	**33, 11 and Station Trf Structure**				-
7.1	(125x70x5) mm GI joist 5Mtr (13.3kg / Mtr) (04 nos for one Power Transformer) for supporting of 33kV Cable & 11kV cable (Unit Wt=0.0665 MT) & 10 mm thick MS plate size 250X250 mm at the bottom of the RS Joist duly welded & the MS plate to be suitably grouted to the floor for the rigidity.	Kg	532.00	77.62	41,293.84
7.2	(100 x 50 x5) mm GI Channel (9.56kg / Mtr) (2Mtr - 06 nos for one Power Transformer) for supporting of 33kV & 11kV power Cable (Unit Wt=0.01912 MT)	Kg	229.44	77.62	17,809.13
7.3	GI Nuts & Bolts etc. for column and beam & Equipment Structures	Kg	500.00	90.00	45,000.00
7.4	High Density Polyethylene (HDPE) pipe 160 mm diameter.	M	10.00	613.86	6,138.60
7.5	LTDB for 100KVA, 33/0.433kV Station Transformer	EA	1.00	32,714.34	32,714.34

8	**33 and 11 kv Power and Control, XLPE cables**				-
8.1	33kV, 1Core, 630sqmm Aluminium, XLPE insulation U/G Cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	600.00	1,278.81	7,67,286.00
8.2	Indoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core (Touch Proof)	EA	9.00	7,280.00	65,520.00
8.3	Outdoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core	EA	9.00	7,521.00	67,689.00
8.4	Supply of 33kV, 3Core, 95sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 9kA and SC rating of Armour in kA- 9kA) For Station Trf	M	50.00	1,757.00	87,850.00
8.5	Supply of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG Cable kits For Station Trf	EA	2.00	2,060.00	4,120.00
8.6	Supply of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG Cable kits For Station Trf (Touchproof)	EA	2.00	1,830.00	3,660.00
8.7	11kV, 1Core, 1000sqmm Aluminium, XLPE insulation UG Cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	600.00	1,438.00	8,62,800.00
8.8	Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	8,260.00	74,340.00
8.9	Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	8,518.00	76,662.00
9	**Control Cables (Copper Armoured)**				-
9.1	4 Core x 2.5 mm^2	M	200.00	126.69	25,338.00
9.2	7 Core x 2.5 mm^2	M	200.00	203.16	40,632.00
9.3	10 Core x 2.5 mm^2	M	200.00	273.73	54,746.00
9.4	12 Core x 2.5 mm^2	M	200.00	344.91	68,982.00
9.5	16 Core x 2.5 mm2	M	200.00	400.00	80,000.00
9.6	1 Core x 16 mm2 Aluminium cable from Battery to Battery Charger & Battery Charger to DCDB	M	200.00	147.00	29,400.00
10	**1.1 kV XLPE Power Cables**				-
10.1	XLPE 4 Core x 150 mm2	M	50.00	805.08	40,254.00
10.2	XLPE 4 Core x 95 mm2	M	50.00	499.41	24,970.50
10.3	XLPE 4 Core x 35 mm2	M	50.00	268.02	13,401.00
10.4	XLPE 4 Core 16 mm2	M	50.00	125.29	6,264.50
10.5	XLPE 2 Core 16 mm2	M	50.00	62.53	3,126.50
11	**Battery & Battery Charger**				-
11.1	200 AH maintenance free VRLA Battery (Based on the site requirement 48V or 24V will be provided)	Set	1.00	70,875.00	70,875.00
11.2	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48V or 24V will be provided)	No	1.00	5,42,122.50	5,42,122.50
	Sub-Total for SUPPLY OF EQUIPMENT & MATERIALS (In Rs.)				**5,07,00,701.60**
ERECTION, TESTING & COMMISSIONING WORKS OF FOLLOWING EQUIPMENT (As per Technical Specification)					-
1	**Erection, Commissioning, Testing of 33kV Equipment for (INDOOR Sub-Station)**				-
1.1	33 kV 1250 A Indoor AIS Panle Board with 12 nos. of Switchgear Panel (3 Nos. for incoming, 2 Nos. of PTR, 2 Nos. for Bus Coupler, 3 Nos. for Bus PT) as per technical specification	EA	1.00	9,60,000.00	9,60,000.00
3	**Erection, Commissioning, Testing of 11kV Equipment (Indoor Type)**				-
3.1	11kv 2000A VCB with 16 panel board Switchgear (2 incoming, 10 Outgoing, 1 Bus coupler, 2 Bus PT) as per technical specification	EA	1.00	12,32,000.00	12,32,000.00
4	**Erection, Commissioning, Testing of SCADA**				-
4.1	SCADA FOR Primary Substation	LUM	1.00	59,661.56	59,661.56
5	**Erection, Commissioning, Testing of Transformer and RMU**				-
5.1	7.5/ 8 MVA, 33/11kV Power Transformer (Outdoor Installation) with Accessories	EA	1.00	3,00,000.00	3,00,000.00
5.2	20/25 MVA, 33/11kV Power Transformer (Outdoor Installation) with Accessories		1.00	3,40,000.00	3,40,000.00
5.2	100 KVA 11/0.433kV Energy efficient Station Transformer along with HT & LT cable connection	EA	1.00	10,229.00	10,229.00
5.3	ITC RTCC UNIT DC 24-48V	EA	1.00	10,000.00	10,000.00

5.4	Services of FRTU Panel, Communication and Other Supplied System	EA	1.00	6,755.00	6,755.00
6	**Erection, Laying of Substation Earthing System GI**				-
6.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	KM	3.50	43,660.00	1,52,810.00
6.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	KM	1.50	43,660.00	65,490.00
6.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	40.00	3,784.73	1,51,389.20
7	**Erection of System GI 33, 11 and Station Trf Structure**				-
7.1	(125x70x5) mm GI joist 5Mtr (13.3kg / Mtr) (04 nos for one Power Transformer) for supporting of 33kV Cable & 11kV cable (Unit Wt=0.0665 MT) & 10 mm thick MS plate size 250X250 mm at the bottom of the RS Joist duly welded & the MS plate to be suitably grouted to the floor for the rigidity.	Kg	532.00	13.50	7,182.00
7.2	(100 x 50 x6) mm GI Channel (9.56kg / Mtr) (2Mtr - 06 nos for one Power Transformer) for supporting of 33kV & 11kV power Cable (Unit Wt=0.01912 MT)	Kg	229.44	27.62	6,337.13
7.3	GI Nuts & Bolts etc. for column and beam & Equipment Structures	Kg	500.00	135.00	67,500.00
7.4	Supply & Erection of GI Pipe of dia. 150mm, Class-B	M	200.00	1,496.91	2,99,382.00
7.5	High Density Polyethylene (HDPE) pipe 160 mm diameter.	M	10.00	306.87	3,068.70
7.6	LTDB for 100KVA, 33/0.433kV Station Transformer along with all cable connection & fixing	EA	1.00	748.76	748.76
8	**Laying of 11kV 33 and 11 kv Power and Control cables**				-
8.1	33kV, 1Core, 630sqmm Aluminium, XLPE insulation U/G Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	600.00	96.66	57,996.00
8.2	Indoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core (Touch Proof)	EA	9.00	2,129.37	19,164.33
8.3	Outdoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core	EA	9.00	2,129.37	19,164.33
8.4	Laying, Commissioning & Testing of 33kV, 3Core, 1Run, 95sqmm, XLPE insulation (extruted type) UG cable with spare by open trench method.	M	50.00	100.17	5,008.50
8.5	Erection of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG cable kits	EA	2.00	1,944.33	3,888.66
8.6	Erection of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG cable kits	EA	2.00	1,944.33	3,888.66
8.7	11kV, 1Core, 1000sqmm Aluminium, XLPE insulation UG Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	600.00	96.66	57,996.00
8.8	Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	2,129.37	19,164.34
8.9	Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	2,129.37	19,164.34
9	**Control Cables (Copper Armoured)**				-

9.5	16 Core x 2.5 mm2	M	200.00	16.57	3,314.00
9.6	1 Core x 16 mm2 Aluminium cable from Battery to Battery Charger & Battery Charger to DCDB	M	200.00	47.87	9,574.00
10	**Laying of 1.1 kV XLPE Power Cables**				-
10.1	XLPE 4 Core x 150 mm2	M	50.00	73.65	3,682.50
10.2	XLPE 4 Core x 95 mm2	M	50.00	47.87	2,393.50
10.3	XLPE 4 Core x 35 mm2	M	50.00	47.87	2,393.50
10.4	XLPE 4 Core 16 mm2	M	50.00	47.87	2,393.50
10.5	XLPE 2 Core 16 mm2	M	50.00	47.87	2,393.50
11	**Erection, Commissioning , Wiring & Testing of Battery & Battery Charger**				-
11.1	200 AH maintenance free VRLA Battery (Based on the site requirement 48V or 24V will be provided)	EA	1.00	3,375.00	3,375.00
11.2	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48V or 24V will be provided)	EA	1.00	4,050.00	4,050.00

13	**Fire Detection Alarm System**				-
13.1	SITC of Main Fire ALARM Control Panel (Ul /FM /Ulc/Vds Approved),Intelligent Addressable Modular Fire Alarm Control Panel based on 32 bit microprocessors including the following as per specification.,A. Battery charger,B SMF Batteries for 72 Hrs. back-up,C Enclosure,D. min.240 character LCD display,(Other specification as mentioned),E. The panel should be modular,decentralized, with CPU /master control unit, loop cards, relay and interface card by means of duplicated electronics means hardware redundancy with full functionality.,,F. The panel must provide MODBUS/ RS485 port for integration with SCADA.G. The loop should be capable to have at least 50 elements / devices.,	EA	1.00	2,22,643.20	2,22,643.20
13.2	SITC of Intelligent Addressable multi sensor Detector- (Smoke + Fixed Tempt. + Rate of rise tempt.) For ceiling (UL /FM /ULC/Vds Approved) inclusive base and other installation accessories. (must have inbuilt short circuit isolator,)	EA	6.00	3,980.66	23,883.96
13.3	SITC of Intelligent Addressable multi sensor Detector- (Smoke + Fixed Tempt. + Rate of rise tempt.) For trench (UL /FM /ULC/Vds Approved) inclusive base and other installation accessories. (must have inbuilt short circuit isolator,)	EA	2.00	4,078.95	8,157.90
13.4	SITC of Response Indicator (Twin LED transparent type)	EA	2.00	200.11	400.22
13.5	SITC of Addressable manual Call Point (must have inbuilt short circuit isolator,) (UL /FM /ULC/Vds Approved)	EA	1.00	4,207.05	4,207.05
13.6	SITC of Electronic Hooter/Multi tone sounder (must have inbuilt short circuit isolator,) (UL /FM /ULC/Vds Approved) Indoor type.	EA	1.00	4,078.72	4,078.72
13.7	SITC of 2 Core X 1.5 sq.mm copper conductor, armored, RED colour FRLS PVC sheathed signal Cable confirming to IS standards and specifications	M	150.00	1,080.50	1,62,075.72
13.8	SITC of Supply & erection of 4C*2.5sqmm copper armoured FRLS cable confirming to IS standard with accessories (Gland, lug, saddle, etc.)	M	15.00	176.67	2,650.11
13.9	SITC of Supply & erection of steel wire reinforced flexible conduct pipe (16MM) with all accessories.	M	15.00	141.10	2,116.50
13.10	SITC of Supply & erection of Surge Arrester.	EA	1.00	5,457.90	5,457.90
13.11	SITC of Lightning arrester Rod in Top of PSS Building along with all accessories	EA	1.00	1,800.00	1,800.00
	Sub-Total for ERECTION,TESTING & COMMISSIONING WORKS (In Rs.)				**43,62,285.29**
					-
Civil Works with supply of all materials like Cement, MS tor rod, Brick, Coarse & Fine Agregrates & Labour,T&P etc.					-
1	Construction of 100kVA 11/0.4 kV station Trf. Plinth	EA	1.00	2,15,000.00	2,15,000.00
2	Extension of existing Control Room	LS	1.00	50,00,000.00	50,00,000.00
3	PTR Foundation suitable for 20 MVA Power Transformer	EA	1.00	8,00,000.00	8,00,000.00

ANNEXURE-22.4

PART B: Supply & laying of 0.4 KM 11 kV 3C, 400sqmm U/G Cable without spare run for 11 kV O/G Feeders.

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***400***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	400	2,375.00	9,50,000.00
1.2	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	8,260.00	33,040.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	2,900.00	11,600.00
	Sub Total (Supply Portion) (in Rs.)				**9,94,640.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	400	110.00	44,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	8	2,000.00	16,000.00
	Sub Total (Erection Portion) (in Rs.)				**60,000.00**
	Sub Total (Civil Portion) (in Rs.)				**-**
A1	**Sub Total (Supply Portion)**				**9,94,640.00**
A2	**Applicable Taxes to make it Landed Cost @18%**				**1,79,035.20**
A	**Total Landed Cost (A=A1 + A2)**				**11,73,675.20**
B	Stock, Storage & Insurance @ 3 % of A				35,210.26
C	**Sub Total (A+B)**				**12,08,885.46**
D	Contingency @ 3 % of C				36,266.56
E	Tools & Plants Charges @ 2% of C (considered for earthing items)				-
F	Transportation @ 7.5% of C				90,666.41
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)				-
H	**Total (C+D+E+F+G)**				**13,35,818.43**

I1	Sub Total (Erection Portion + Civil Portion)	60,000.00
I2	**Applicable Taxes to make it Landed Cost @18%**	**10,800.00**
I	**Total landed Cost (I=I1+ I2)**	**70,800.00**
J	**Total Cost (H+I)**	**14,06,618.43**
K	Other Overhead /(including Supervision Charges) @ 6 % of J	
L	**Total Estimated Capital Cost i.e. (J+K)**	**14,06,618.43**
M	CESS 1% of L	14,066.18
N	**Grand Total (L+M)**	**14,20,684.61**
O	Inspection Fee of UG Line (HT) - Rs. 375 upto 1 KM.	375.00
P	Inspection Fee of UG Line (HT) - Rs. 225/ Additional Km	360.00
Q	Inspection Fee of RMU - Rs. 1500/ RMU	-
R	Inspection Fee of Drawing Checking and Approval	
S	Total Inspection Fees (O+P+Q+R)	**735.00**
T	GST @ 18% on Total Inspection Fees (S)	132.30
U	Total Inspection Fees including GST (S+T)	867.30
V	**Gross Total Material, Services and Inspection Fees (N+U)**	**14,21,551.91**

ANNEXURE-22.4

PART C: Dismantling portion

SL. No.	Description	Unit	Quantity	Rate	Amount
1	Dismantling / Removal of MS Channel. from Double Pole Structure /pole	KG	5000	8.10	40,506.84
2	Dismantling of existing 11/0.4kV, 33/0.4KV, Three Phase Distribution Transformer below 100KVA including removal of HT/LT leads, earth connections and unloading by crane if required.	EA	1	3,262.64	3,262.64
3	Dismantling of 12.5/8MVA 33/11kV PTR	EA	2	1,10,000.00	2,20,000.00
4	Dismantling of faulty Equipmet like CB, CT, PT , Isolator	EA	11	18,003.04	1,98,033.44
5	Demolishing stone rubble masonry manually/ RCC/BRICK WORK/ by mechanical means	M3	50	1,794.47	89,723.67
6	Dismantling of 11 kV /33KV GO/AB Switch/Isolator/DD fuse/fuse set	SET	5	1,200.00	6,000.00
7	Dismantling of all sizes(All Core and all dia) control Cable	M	300	5.11	1,534.35
8	Dismantling of Lightening Arrester(LA	EA	12	162.12	1,945.44
A1	**Sub Total (Civil Portion) (in Rs.)**				**5,61,006.39**
A2	**Applicable Taxes to make it Landed Cost @18%**				**1,00,981.15**
A	**Total landed Cost (A=A1+ A2)**				**6,61,987.53**
B	**Other Overhead /(including Supervision Charges) @ 6 % of B**				
C	**Gross Total Estimated Cost i.e. (A+B)**				6,61,987.53
D	**CESS @ 1% of C**				6,619.88
E	**Grand Total (C+D)**				6,68,607.41

ANNEXURE-22.5	
TP CENTRAL ODISHA DISTRIBUTION LTD.	
Name of the Circle :-	BBSR-2
Name of the Division :-	PED
Name of the Sub-Division : -	Puri S/D-1
Name of the Section : -	Baliapanda
Name of the Work :-	Augmentation of Power Transformer (PTR-3) from 8 MVA to 16/20 MVA along with accessories at Baliapanda PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Augmentation of Power Transformer (PTR-3) from 8 MVA to 16/20 MVA along with accessories at Baliapanda PSS.	3,27,84,820.84
PART B: Dismantling portion	1,54,415.58
Total Amount	**₹ 3,29,39,236.42**
Total Amount (in Cr.)	**₹ 3.29**
Total Estimated Cost is Rs. 3.29 Cr. (On TPCODL CAPEX Scheme)	

ANNEXURE-22.5

PART A:

Augmentation of Power Transformer (PTR-3) from 8 MVA to 16/20 MVA along with accessories at Baliapanda PSS.

SUPPLY OF FOLLOWING EQUIPMENT & MATERIALS (As per Technical Specification)					
Sl. No.	**DESCRIPTION OF ITEMS**	**UNIT**	**Quantity**	**Basic Unit price (In Rs.)**	**Total (In Rs.)**
1	**Transformer and Accessories**				-
1.1	16/20 MVA, 33/11kV Power Transformer DYn11 (Outdoor Installation) with Accessories including NIDS System	EA	1.00	2,16,61,981.00	2,16,61,981.00
2	**Substation Earthing System GI**				-
2.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	Kg	700.00	71.94	50,358.00
2.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	Kg	150.00	71.94	10,791.00
2.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	8.00	1,300.00	10,400.00
3	**33 and 11 kv Power and Control, XLPE cables**				-
3.1	33kV, 1Core, 630sqmm Aluminium, XLPE insulation U/G Cable (SC rating of cable in kA- 59.4kA and SC rating of Armour in kA-20kA)	M	150.00	1,278.81	1,91,821.50
3.2	Indoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core (Touch Proof)	EA	3.00	7,280.00	21,840.00
3.3	Outdoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core	EA	3.00	7,521.00	22,563.00
3.4	11kV, 1Core, 1000sqmm Aluminium, XLPE insulation UG Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	200.00	1,438.00	2,87,600.00
3.5	Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	6.00	8,260.00	49,560.00
3.6	Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	6.00	8,518.00	51,108.00
4	**Control Cables (Copper Armoured)**				-

C	**Gross Total Estimated Cost i.e. (A+B)**				1,52,886.71
D	**CESS @ 1% of C**				1,528.87
E	**Grand Total (C+D)**				1,54,415.58

ANNEXURE-22.8	
TP CENTRAL ODISHA DISTRIBUTION LTD.	
Name of the Circle :-	BCDD-1
Name of the Division :-	BCDD-1
Name of the Sub-Division : -	Sub division-1
Name of the Section : -	Delta
Name of the Work :-	A. Supply and Installation of 11 kV Panel Board along with Control Room Building extension at Delta PSS B. Proposal for Bifurcation of existing 11kV Baramunda Delta feeder. C. Proposal for Bifurcation of existing 11kV IRC-3 feeder.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
Installation of 11 kV Panel Board along with Control Room Building extension at Delta PSS	1,95,14,569.72
1. Laying of 11kV UG cable of length-2 CKM using 3Cx400mm2 XLPE UG cable from Delta PSS to near Bhamara Petrol Pump. 2. Installation of 1 No. of RMU at Bhamara Petrol Pump.	1,81,49,110.55
1. Laying of 11kV UG cable of length-2.4 CKM using 3Cx400mm2 XLPE UG cable from Delta PSS to near Sushree Villa. 2. Installation of 1 No. of RMU at St. Light DTR near Sushree Villa.	2,18,76,737.54
Total Amount	**5,95,40,417.80**
Total Amount (in Cr.)	**₹ 5.95**
Total Estimated Cost is Rs. 5.95 Cr. (On TPCODL CAPEX Scheme)	

ANNEXURE-22.8

Installation of 11 kV Panel Board along with Control Room Building extension at Delta PSS

Sl. No.	DESCRIPTION OF ITEMS	UNIT	Quantity	Basic Unit price (In Rs.)	Total (In Rs.)
SUPPLY OF FOLLOWING EQUIPMENT & MATERIALS (As per Technical Specification)					
1	**11 kV Indoor Switch Panel Board**				-
1.1	11kv 2000A VCB with 15 panel board Switchgear (2 incoming, 10 Outgoing, 1 Bus coupler, 2 Bus PT, 0 Adapter) as per technical specification	EA	1.00	1,16,19,630.00	1,16,19,630.00
2	**SCADA**		1.00		-
2.1	Pre-Wired RTU Panel	EA	1.00	2,72,297.17	2,72,297.17
2.2	Managed Layer2 Ethernet Switch (RTU Panel)	EA	2.00	1,43,000.00	2,86,000.00
2.3	Networking Accessories	Set	1.00	8,682.24	8,682.24
2.4	Signal Interface Panel (4G Modem cum Router)	EA	1.00	55,123.45	55,123.45
2.5	CMR with Mounting Base for Digital Inputs	EA	16.00	437.04	6,992.64
2.6	Interposing Relay for Digital Output	EA	8.00	437.04	3,496.32
2.7	Instrumentation Cable 12 C X 0.5 mm2, Armored cable for Status and Indications	M	200.00	150.01	30,002.00
2.8	Instrumentation Cable 7 C X 1.5 mm2, Armored for Control Output	M	50.00	184.93	9,246.50
2.9	Twisted Pair Shielded & Over all shielded Instrumentation Cable 5 P X 1.0 mm2, Armored for Analog Input	M	50.00	200.18	10,009.00
2.10	4 C X 4 mm2 Copper cable for extension of CT & PT	M	60.00	161.23	9,673.80
2.11	2 C X 4 mm2 Cable for DC Power Supply	M	100.00	139.78	13,978.00
2.12	4P X 0.36 mm2, Armored Communication Cable for MFM	M	100.00	110.17	11,017.00
2.13	Armored CAT6 UTP Cable	M	100.00	73.97	7,397.00
2.14	Un-Armored CAT6 UTP Cable	M	200.00	33.35	6,670.00
2.15	Electronic Earthing and Earth Pit	Set	1.00	15,290.42	15,290.42
2.16	Multi Function Meter	EA	4.00	8,118.36	32,473.44
2.17	Industrial grade Serial Server	EA	1.00	50,591.61	50,591.61
3	**Substation Earthing System GI**				-
3.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	Kg	600.00	71.94	43,164.00
3.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	Kg	200.00	71.94	14,388.00
3.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	4.00	1,300.00	5,200.00
4	**Control Cables (Copper Armoured)**				-
4.1	4 Core x 2.5 mm^2	M	50.00	126.69	6,334.50
4.2	7 Core x 2.5 mm^2	M	50.00	203.16	10,158.00
4.3	10 Core x 2.5 mm^2	M	50.00	273.73	13,686.50
4.4	12 Core x 2.5 mm^2	M	50.00	344.91	17,245.50
4.5	16 Core x 2.5 mm2	M	50.00	400.00	20,000.00
4.6	1 Core x 16 mm2 Aluminium cable from Battery to Battery Charger & Battery Charger to DCDB	M	50.00	147.00	7,350.00
5	**1.1 kV XLPE Power Cables**				-
5.1	XLPE 4 Core 16 mm2	M	50.00	125.29	6,264.50
5.2	XLPE 2 Core 16 mm2	M	50.00	62.53	3,126.50
6	**Battery & Battery Charger**				-
6.1	200 AH maintenance free VRLA Battery (Based on the site requirement 48V or 24V will be provided)	Set	1.00	70,875.00	70,875.00
6.2	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48V or 24V will be provided)	No	1.00	5,42,122.50	5,42,122.50
	Sub-Total for SUPPLY OF EQUIPMENT & MATERIALS (In Rs.)				**1,32,08,485.59**
ERECTION, TESTING & COMMISSIONING WORKS OF FOLLOWING EQUIPMENT (As per Technical Specification)					-

1	**Erection, Commissioning, Testing of 11kV Equipment (Indoor Type)**				-
1.1	11kv 2000A VCB with 15 panel board Switchgear (2 incoming, 10 Outgoing, 1 Bus coupler, 2 Bus PT, 0 Adapter) as per technical specification	EA	1.00	11,55,000.00	11,55,000.00
2	**Erection, Commissioning, Testing of SCADA**				-
2.1	SCADA FOR Primary Substation	LUM	1.00	59,661.56	59,661.56
3	**Erection, Laying of Substation Earthing System GI**				-
3.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	KM	0.10	43,660.00	4,447.54
3.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	KM	0.08	43,660.00	3,638.33
3.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	4.00	3,784.73	15,138.92

ANNEXURE-22.9	
TP CENTRAL ODISHA DISTRIBUTION LTD.	
Name of the Circle :-	BBSR-2
Name of the Division :-	KHD
Name of the Sub-Division : -	Khordha
Name of the Section : -	Khordha no.-2
Name of the Work :-	Construction of Control Room Building and Installation of 33kV and 11kV Panel Board at Gurujanga PSS.
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)
Abstract of Estimate	
Description	**Total**
PART A: Construction of Control Room Building and Installation of 33 kV and 11 kV Panel Board at Gurujanga PSS.	2,89,66,902.85
PART B: Supply & laying of 0.3 KM 11 kV 3C, 400sqmm U/G Cable with spare run for O/G Feeders.	10,86,285.91
PART- C Construction of 2 nos. of 33 kV DP with Isolator and Earth Switch at PSS.	8,12,293.79
PART- D Construction of 3 no. of 11 kV DP with Isolator and Earth Switch at PSS.	11,67,051.26
PART E: Dismantling portion	9,04,949.85
Total Amount	**3,29,37,483.66**
Total Amount (in Cr.)	**₹ 3.29**
Total Estimated Cost is Rs. 3.29 Cr. (On TPCODL CAPEX Scheme)	

ANNEXURE-22.9

PART A:
Construction of Control Room Building and Installation of 33 kV and 11 kV Panel Board at Gurujanga PSS.

SUPPLY OF FOLLOWING EQUIPMENT & MATERIALS (As per Technical Specification)					
Sl. No.	**DESCRIPTION OF ITEMS**	**UNIT**	**Quantity**	**Basic Unit price (In Rs.)**	**Total (In Rs.)**
1	**Lightning Arrester**				-
1.1	Lightening arrester 33 kV, 10 kV, CL III. (with surge counter) For Transformers - Outdoor type	EA	9.00	13,781.00	1,24,029.00
1.2	12kV, 10kA, Metal Oxide, Class-2 (Station Class), Surge Arrester with out surge counter For Transformers - Outdoor type	EA	9.00	1,960.16	17,641.44
2	**SCADA**		1.00		-
2.1	Pre-Wired RTU Panel	EA	1.00	2,72,297.17	2,72,297.17
2.2	Managed Layer2 Ethernet Switch (RTU Panel)	EA	2.00	1,43,000.00	2,86,000.00
2.3	Networking Accessories	Set	1.00	8,682.24	8,682.24
2.4	Signal Interface Panel (4G Modem cum Router)	EA	1.00	55,123.45	55,123.45
2.5	CMR with Mounting Base for Digital Inputs	EA	16.00	437.04	6,992.64
2.6	Interposing Relay for Digital Output	EA	8.00	437.04	3,496.32
2.7	Instrumentation Cable 12 C X 0.5 mm2, Armored cable for Status and Indications	M	200.00	150.01	30,002.00
2.8	Instrumentation Cable 7 C X 1.5 mm2, Armored for Control Output	M	50.00	184.93	9,246.50
2.9	Twisted Pair Shielded & Over all shielded Instrumentation Cable 5 P X 1.0 mm2, Armored for Analog Input	M	50.00	200.18	10,009.00
2.10	4 C X 4 mm2 Copper cable for extension of CT & PT	M	60.00	161.23	9,673.80
2.11	2 C X 4 mm2 Cable for DC Power Supply	M	100.00	139.78	13,978.00
2.12	4P X 0.36 mm2, Armored Communication Cable for MFM	M	100.00	110.17	11,017.00
2.13	Armored CAT6 UTP Cable	M	100.00	73.97	7,397.00
2.14	Un-Armored CAT6 UTP Cable	M	200.00	33.35	6,670.00
2.15	Electronic Earthing and Earth Pit	Set	1.00	15,290.42	15,290.42
2.16	Multi Function Meter	EA	4.00	8,118.36	32,473.44
2.17	Industrial grade Serial Server	EA	1.00	50,591.61	50,591.61
3	**Transformer and Accessories**				-
3.1	RTCC UNIT DC 24-48V	EA	3.00	3,00,000.00	9,00,000.00
5	**Substation Earthing System GI**				-
5.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	Kg	20615.00	71.94	14,83,043.10
5.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	Kg	3600.00	71.94	2,58,984.00
5.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	40.00	1,300.00	52,000.00
6	**33, 11 and Station Trf Structure**				-
6.1	(125x70x5) mm GI joist 5Mtr (13.3kg / Mtr) (04 nos for one Power Transformer) for supporting of 33kV Cable & 11kV cable (Unit Wt=0.0665 MT) & 10 mm thick MS plate size 250X250 mm at the bottom of the RS Joist duly welded & the MS plate to be suitably grouted to the floor for the rigidity.	Kg	532.00	77.62	41,293.84
6.2	(100 x 50 x5) mm GI Channel (9.56kg / Mtr) (2Mtr - 06 nos for one Power Transformer) for supporting of 33kV & 11kV power Cable (Unit Wt=0.01912 MT)	Kg	229.44	77.62	17,809.13
6.3	GI Nuts & Bolts etc. for column and beam & Equipment Structures	Kg	500.00	90.00	45,000.00
6.4	High Density Polyethylene (HDPE) pipe 160 mm diameter.	M	10.00	613.86	6,138.60
7	LTDB for 100KVA, 33/0.433kV Station Transformer	EA	1.00	32,714.34	32,714.34
8	**33 and 11 kv Power and Control, XLPE cables**				-

8.1	33kV, 1Core, 630sqmm Aluminium, XLPE insulation U/G Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	300.00	1,278.81	3,83,643.00
8.2	Indoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core (Touch Proof)	EA	9.00	7,280.00	65,520.00
8.3	Outdoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core	EA	9.00	7,521.00	67,689.00
8.4	Supply of 33kV, 3Core, 95sqmm Aluminium, XLPE insulation UG Cable with spare (SC rating of cable in kA- 9kA and SC rating of Armour in kA- 9kA) For Station Trf	M	50.00	1,757.00	87,850.00
8.5	Supply of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG Cable kits For Station Trf	EA	2.00	2,060.00	4,120.00
8.6	Supply of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG Cable kits For Station Trf (Touchproof)	EA	2.00	1,830.00	3,660.00
8.7	11kV, 1Core, 1000sqmm Aluminium, XLPE insulation UG Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	450.00	1,438.00	6,47,100.00
8.8	Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	8,260.00	74,340.00
8.9	Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	8,518.00	76,662.00
9	**Control Cables (Copper Armoured)**				-
9.1	4 Core x 2.5 mm^2	M	100.00	126.69	12,669.00

11	**Battery & Battery Charger**				-
11.1	200 AH maintenance free VRLA Battery (Based on the site requirement 48V or 24V will be provided)	Set	1.00	70,875.00	70,875.00
11.2	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48V or 24V will be provided)	No	1.00	5,42,122.50	5,42,122.50
	Sub-Total for SUPPLY OF EQUIPMENT & MATERIALS (In Rs.)				**61,56,757.54**
ERECTION, TESTING & COMMISSIONING WORKS OF FOLLOWING EQUIPMENT (As per Technical Specification)					-
1	**Erection, Commissioning, Testing of 33kV Equipment for (INDOOR Sub-Station)**				-
1.1	33 kV 1250 A Indoor AIS Panel Board	EA	1.00	11,60,000.00	11,60,000.00
2	**Lightning Arrester**				-
2.1	30kV, 10kA, Metal Oxide, Class-2 (Station Class), Surge Arrester (for 33kV Incoming Line, HT side of 2nos. Power Transformers and 33/0.433kV Station Transformer) - Outdoor Type with Surge Counter	EA	9.00	1,847.36	16,626.24
2.2	12kV, 10kA, Metal Oxide, Class-2 (Station Class), Surge Arrester with out surge counter(For Transformers & Out Going Feeders) - Outdoor type	EA	9.00	1,350.00	12,150.00
3	**Erection, Commissioning, Testing of 11kV Equipment (Indoor Type)**				-
3.1	11 kV Indoor Switch Panel Board	EA	1.00	19,25,000.00	19,25,000.00
4	**Erection, Commissioning, Testing of SCADA**				-
4.1	SCADA FOR Primary Substation	LUM	1.00	59,661.56	59,661.56
5	**Erection, Commissioning, Testing of Transformer and RMU**				-
5.1	7.5/ 8 MVA, 33/11kV Power Transformer (Outdoor Installation) with Accessories	EA	1.00	3,00,000.00	3,00,000.00
5.2	12.5/16 MVA, 33/11kV Power Transformer (Outdoor Installation) with Accessories	EA	1.00	3,40,000.00	3,40,000.00
5.3	100 KVA 11/0.433kV Energy efficient Station Transformer along with HT & LT cable connection	EA	1.00	10,229.00	10,229.00

5.4	ITC RTCC UNIT DC 24-48V	EA	3.00	10,000.00	30,000.00
5.5	Services of FRTU Panel, Communication and Other Supplied System	EA	1.00	6,755.00	6,755.00
6	**Erection, Laying of Substation Earthing System GI**				-
6.1	Earthing Conductor 75X10 mm (5.89 Kg/Mtr.) GI Flat for laying (spacing maximum **2m both ways**)	KM	3.50	43,660.00	1,52,810.00
6.2	Earthing Conductor: 50X6 mm (2.4Kg./Mtr.) **GI Flat** for Raiser from the burial earth mat to equipment, structure etc.)	KM	1.50	43,660.00	65,490.00
6.3	Earthing Device & Associated Accessories (Heavy duty GI Perforated Pipe of ID=40mm & OD=50mm with 3000mm long for treated Earth Pit) as per Drawing	EA	40.00	3,784.73	1,51,389.20
7	**Erection of System GI 33, 11 and Station Trf Structure**				-
7.1	(125x70x5) mm GI joist 5Mtr (13.3kg / Mtr) (04 nos for one Power Transformer) for supporting of 33kV Cable & 11kV cable (Unit Wt=0.0665 MT) & 10 mm thick MS plate size 250X250 mm at the bottom of the RS Joist duly welded & the MS plate to be suitably grouted to the floor for the rigidity.	Kg	532.00	13.50	7,182.00
7.2	(100 x 50 x6) mm GI Channel (9.56kg / Mtr) (2Mtr - 06 nos for one Power Transformer) for supporting of 33kV & 11kV power Cable (Unit Wt=0.01912 MT)	Kg	229.44	27.62	6,337.13
7.3	GI Nuts & Bolts etc. for column and beam & Equipment Structures	Kg	500.00	135.00	67,500.00
7.4	Supply & Erection of GI Pipe of dia. 150mm, Class-B	M	200.00	1,496.91	2,99,382.00
7.5	High Density Polyethylene (HDPE) pipe 160 mm diameter.	M	10.00	306.87	3,068.70
7.6	LTDB for 100KVA, 33/0.433kV Station Transformer along with all cable connection & fixing	EA	1.00	748.76	748.76
8	**Laying of 11kV 33 and 11 kv Power and Control cables**				-
8.1	33kV, 1Core, 630sqmm Aluminium, XLPE insulation U/G Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	300.00	96.66	28,998.00
8.2	Indoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core (Touch Proof)	EA	9.00	2,129.37	19,164.33
8.3	Outdoor termination kits Heat Shrinkable type suitable for 33kV, 1Core, 630sqmm, HT U/G Cable kits for 1Core	EA	9.00	2,129.37	19,164.33
8.4	Laying, Commissioning & Testing of 33kV, 3Core, 1Run, 95sqmm, XLPE insulation (extruted type) UG cable with spare by open trench method.	M	50.00	100.17	5,008.50
8.5	Erection of Outdoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG cable kits	EA	2.00	1,944.33	3,888.66
8.6	Erection of Indoor termination kits Heat Shrinkable type suitable for 33kV, 3Core, 95sqmm, HT UG cable kits	EA	2.00	1,944.33	3,888.66
8.7	11kV, 1Core, 1000sqmm Aluminium, XLPE insulation UG Cable (SC rating of cable in kA-59.4kA and SC rating of Armour in kA-20kA)	M	450.00	96.66	43,497.00
8.8	Indoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	2,129.37	19,164.34
8.9	Outdoor termination kits Heat Shrinkable type suitable for 11kV, 1Core, 1000sqmm, HT UG Cable kits for 1Core	EA	9.00	2,129.37	19,164.34
9	**Control Cables (Copper Armoured)**				-
9.1	4 Core x 2.5 mm^2	M	100.00	16.57	1,657.00
9.2	7 Core x 2.5 mm^2	M	100.00	16.57	1,657.00
9.3	10 Core x 2.5 mm^2	M	100.00	16.57	1,657.00
9.4	12 Core x 2.5 mm^2	M	100.00	16.57	1,657.00
9.5	16 Core x 2.5 mm2	M	100.00	16.57	1,657.00
9.6	1 Core x 16 mm2 Aluminium cable from Battery to Battery Charger & Battery Charger to DCDB	M	100.00	47.87	4,787.00
10	**Laying of 1.1 kV XLPE Power Cables**				-
10.1	XLPE 4 Core x 150 mm2	M	100.00	73.65	7,365.00
10.2	XLPE 4 Core x 95 mm2	M	100.00	47.87	4,787.00
10.3	XLPE 4 Core x 35 mm2	M	100.00	47.87	4,787.00
10.4	XLPE 4 Core 16 mm2	M	100.00	47.87	4,787.00
10.5	XLPE 2 Core 16 mm2	M	100.00	47.87	4,787.00
11	**Erection, Commissioning , Wiring & Testing of Battery & Battery Charger**				-

11.1	200 AH maintenance free VRLA Battery (Based on the site requirement 48V or 24V will be provided)	EA	1.00	3,375.00	3,375.00
11.2	Float cum Boost Battery Charger with DCDB (Based on the site requirement 48V or 24V will be provided)	EA	1.00	4,050.00	4,050.00
13	**Fire Detection Alarm System**				-
13.1	SITC of Main Fire ALARM Control Panel (Ul /FM /Ulc/Vds Approved),Intelligent Addressable Modular Fire Alarm Control Panel based on 32 bit microprocessors including the following as per specification.,A. Battery charger,B SMF Batteries for 72 Hrs. back-up,C Enclosure,D. min.240 character LCD display,(Other specification as mentioned),E. The panel should be modular,decentralized, with CPU /master control unit, loop cards, relay and interface card by means of duplicated electronics means hardware redundancy with full functionality.,,F. The panel must provide MODBUS/ RS485 port for integration with SCADA.G. The loop should be capable to have at least 50 elements / devices.,	EA	1.00	2,22,643.20	2,22,643.20
13.2	SITC of Intelligent Addressable multi sensor Detector- (Smoke + Fixed Tempt. + Rate of rise tempt.) For ceiling (UL /FM /ULC/Vds Approved) inclusive base and other installation accessories. (must have inbuilt short circuit isolator,)	EA	6.00	3,980.66	23,883.96
13.3	SITC of Intelligent Addressable multi sensor Detector- (Smoke + Fixed Tempt. + Rate of rise tempt.) For trench (UL /FM /ULC/Vds Approved) inclusive base and other installation accessories. (must have inbuilt short circuit isolator,)	EA	2.00	4,078.95	8,157.90
13.4	SITC of Response Indicator (Twin LED transparent type)	EA	2.00	200.11	400.22
13.5	SITC of Addressable manual Call Point (must have inbuilt short circuit isolator,) (UL /FM /ULC/Vds Approved)	EA	1.00	4,207.05	4,207.05
13.6	SITC of Electronic Hooter/Multi tone sounder (must have inbuilt short circuit isolator,) (UL /FM /ULC/Vds Approved) Indoor type.	EA	1.00	4,078.72	4,078.72
13.7	SITC of 2 Core X 1.5 sq.mm copper conductor, armored, RED colour FRLS PVC sheathed signal Cable confirming to IS standards and specifications	M	150.00	1,080.50	1,62,075.72
13.8	SITC of Supply & erection of 4C*2.5sqmm copper armoured FRLS cable confirming to IS standard with accessories (Gland, lug, saddle, etc.)	M	15.00	176.67	2,650.11
13.9	SITC of Supply & erection of steel wire reinforced flexible conduct pipe (16MM) with all accessories.	M	15.00	141.10	2,116.50
13.10	SITC of Supply & erection of Surge Arrester.	EA	1.00	5,457.90	5,457.90
13.1	SITC of Lightning arrester Rod in Top of PSS Building along with all accessories	EA	1.00	1,800.00	1,800.00
	Sub-Total for ERECTION,TESTING & COMMISSIONING WORKS (In Rs.)				**52,60,749.03**
					-
Civil Works with supply of all materials like Cement, MS tor rod, Brick, Coarse & Fine Agregrates & Labour,T&P etc.					-
1	Construction of 100kVA 11/0.4 kV station Trf. Plinth	EA	1.00	2,15,000.00	2,15,000.00
2	CONTROL ROOM BUILDING ALONG WITH ALL INTERNAL SERVICE (Area 22mtrX12mtr)	EA	1.00	76,00,000.00	76,00,000.00
3	PTR Foundation suitable for 20 MVA Power Transformer	EA	2.00	8,00,000.00	16,00,000.00
4	FIRE WALL	EA	1.00	4,50,000.00	4,50,000.00

Q	**Total Estimate to be deposit (M+P)**	**2,89,66,902.85**

ANNEXURE-22.9

PART B: Supply & laying of 0.3 KM 11 kV 3C, 400sqmm U/G Cable with spare run for O/G Feeders.

Supply Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Supply of materials for 11kV, 3Core, 400sqmm Aluminium, XLPE insulation UG Cable with accessories**				
a	***Length of 11kV 3C, 400sqmm cable (open trench)***	***M***	***300***		
b	***Length of 11kV 3C, 400sqmm cable (HDD)***	***M***			
1.1	Supply of 11kV, 3Core, 400sqmm, XLPE insulation armoured UG cable (SC rating of cable in kA- 37.7kA and SC rating of Armour in kA- 15kA)	M	300	2,375.00	7,12,500.00
1.2	Supply of Indoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	8,260.00	33,040.00
1.3	Supply of Outdoor termination kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, HT UG Cable kits	EA	4	2,900.00	11,600.00
	Sub Total (Supply Portion) (in Rs.)				**7,57,140.00**

Erection Portion

Sl. No.	Description of items	Unit	Quantity	Rate (in Rs.)	Amount (in Rs.)
1	**Erection, Commissioning & Testing of 11kV new line by 3Core, 400sqmm, XLPE UG cable**				
1.1	Laying, Commissioning & Testing of 11kV, 3Core, 400sqmm, XLPE insulation (extruted type) UG cable by open trench method.	M	300	110.00	33,000.00
1.2	Erection of Straight through jointing Kits/Outdoor termination kits/Indoor termination Kits Heat Shrinkable type suitable for 11kV, 3Core, 400sqmm, aluminium UG cable kits	EA	8	2,000.00	16,000.00
	Sub Total (Erection Portion) (in Rs.)				**49,000.00**

A1	**Sub Total (Supply Portion)**	**7,57,140.00**
A2	**Applicable Taxes to make it Landed Cost @18%**	**1,36,285.20**
A	**Total Landed Cost (A=A1 + A2)**	**8,93,425.20**
B	Stock, Storage & Insurance @ 3 % of A	26,802.76
C	**Sub Total (A+B)**	**9,20,227.96**
D	Contingency @ 3 % of C	27,606.84
E	Tools & Plants Charges @ 2% of C (considered for earthing items)	-
F	Transportation @ 7.5% of C	69,017.10
G	Erection Charges @ 10% of earthing items (With Applicable Taxes @ 18% to make it Landed Cost)	-
H	**Total (C+D+E+F+G)**	**10,16,851.89**
I1	Sub Total (Erection Portion + Civil Portion)	49,000.00
I2	**Applicable Taxes to make it Landed Cost @18%**	**8,820.00**
I	**Total landed Cost (I=I1+ I2)**	**57,820.00**
J	**Total Cost (H+I)**	**10,74,671.89**
K	Other Overhead /(including Supervision Charges) @ 6 % of J	
L	**Total Estimated Capital Cost i.e. (J+K)**	**10,74,671.89**

M	CESS 1% of L	10,746.72
N	**Grand Total (L+M)**	**10,85,418.61**
O	Inspection Fee of UG Line (HT) - Rs. 375 upto 1 KM.	375.00
P	Inspection Fee of UG Line (HT) - Rs. 225/ Additional Km	360.00
Q	Inspection Fee of RMU - Rs. 1500/ RMU	-
R	Inspection Fee of Drawing Checking and Approval	
S	Total Inspection Fees (O+P+Q+R)	**735.00**
T	GST @ 18% on Total Inspection Fees (S)	132.30
U	Total Inspection Fees including GST (S+T)	867.30
V	**Gross Total Material, Services and Inspection Fees (N+U)**	**10,86,285.91**

ANNEXURE-22.9

PART- C

Construction of 2 nos. of 33 kV DP with Isolator and Earth Switch at PSS.

No. of 33 KV DP required With Isolator (Ref. Drawing No.- PD-1346-TPCODL-COM-LINE-8050)	2

MATERIALS FOR 33 KV DP With Isolator

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	WPB (GI) Pole 160x152 - 13 Mtr. long for DP	EA	33,970.00	4	1,35,880.00
2	GI Channel,angle & flat of different size	KG	78.00	1106.386	86,298.11
3	DMC Insulator for LA (70/10)	EA	113.50	16	1,816.00
4	Danger Plate	EA	180.00	4	720.00
5	H.T. Stay clamp	EA	260.00	8	2,080.00
6	H.T. Stay set (Complete)	SET	1,434.00	8	11,472.00
7	H.T. Stay Insulator Type-C	EA	87.00	16	1,392.00
8	7/8 SWG Stay Wire	KG	75.00	120	9,000.00
9	Gi Pipe Earthing 40mm. 3 Mtr. Long	EA	1,300.00	4	5,200.00
10	GI barbed wire anticlimbing device	KG	74.00	12	888.00
11	Lightning Arrester(30KV,10KA) (Station Class,class-2)	EA	4,443.00	6	26,658.00
12	33 kV 1250 AMP Double break (Turn & twist center rotating) Motorized isolator with earth switch (Based on the site requirement 48 V or 24 V Control Voltage will be provided)	EA	1,01,652.00	2	2,03,304.00
13	33KV pin insulator polymer	EA	398.00	6	2,388.00
14	H W fitting(B&S) 90KN,4 Bolt	EA	631.00	12	7,572.00
15	Disc insulator (B&S) 90 KN polymer	EA	289.00	12	3,468.00
16	Wedge connector for 232 sq.mm AAA conductor	EA	333.00	12	3,996.00
17	GI Nut , Bolt & Washer of different sizes	KG	74.00	44.456	3,289.74
18	POLYCARBONATE BIRD GUARD	EA	21.00	18	378.00
A1				**Total Cost of materials**	**5,05,799.85**
A2				**Applicable Taxes to make it Landed Cost @18%**	**91,043.97**
A				**Total landed Cost (A=A1 + A2)**	**5,96,843.83**
B				Stock, Storage & Insurance i.e 3% of A	17,905.31
C				**Sub Total (A+B)**	**6,14,749.14**
D				Contigency @ 3% of C	18,442.47
E				Tools & Plants @ 2% of C (Except HT Stay Set / GI Pipe earthing)	11,586.55
F				Transportation @ 7.5% of C	46,106.19
G				Erection Charges @ 5% on Trf/Breaker/WPB/ H-Pole (With Applicable Taxes @ 18% to make it Landed Cost)	8,257.43
H				Erection Charges @ 10% of C (except Trf/Breaker/WPB/ H-Pole/HT stay set/GI Pipe/PSC pole/GI Pipe earthing) (With Applicable Taxes @ 18% to make it Landed Cost)	41,417.90
I				Erection Charges @ 20% of PSC pole- Not to be used for 33kv (With Applicable Taxes @ 18% to make it Landed Cost)	-
J				**Sum of (C to I)**	**7,40,559.67**

Civil & Services

Sl. No.	*Description of Materials*	*Unit*	*Unit Rate*	*Total Quantity*	*Total Amount*
1	Fixing of complete Stay Set with all accessories and civil works	EA	2,301.53	8	18,412.20

ANNEXURE-11

33 kV NETWORK RELIABILITY

33 kV Network Reliability

Summary Of Proposal Details For Reliability Improvement							
Sl. No	***Circle***	***Division***	***GSS Name***	***33kv Feeder Name***	***Proposal Detail***	***Cost (In Cr)***	***Annexure No.***
1	BBSR-I	BCCD-2	Kantabada	Chandaka O/G	Augmentation of 3 CKM line from Bharatpur PSS to Malima Chawk	₹ 0.66	Annexure-11.1
2	BBSR-I	BCCD-1	Satyanagar	Satyanagar to Satyanagar	Construction of 0.6 KM U/G Line from Satyanagar GSS to Satyanagar PSS	₹ 1.60	Annexure-11.2
3	BBSR-I	BCCD-2	Ransinghpur	Assotech	Augmentation of 2 CKM line from AIIMS square to Cosmoplish	₹ 0.51	Annexure-11.3
4	BBSR-I	BCCD-2	Ransinghpur	Kalinganagr to Trident	Augmentation of 2.5 CKM line from Kalinganagr to Trident Galaxy	₹ 0.54	Annexure-11.4
5	BBSR-I	BED	Baliyanta	Baliyanta to Bhingarpur	Construction of New line 10.5 CKM from Baliyanta GSS to Bhingarpur PSS	₹ 6.49	Annexure-11.5
6	BBSR-I	NED	Konark	Sutan	Refurbishment of 33kV Sutan Feeder from Labanya Chhaka to Eco retreat to providing reliable power supply.	₹ 4.50	Annexure-11.6
7	BBSR-I	NED	Dighalo	Dighalo -Gop	Refursbishment and augmentation of 33kV Dighalo-gop Feeder from Dighalo GSS to Gop PSS.	₹ 4.50	Annexure-11.7
8	BBSR-II	BAED	Balugaon	Balugaon	Proposal for augmentation of 33KV Balugaon Feeder from Blaugaon GSS.	₹ 1.53	Annexure-11.8
9	BBSR-II	BAED	Balugaon	Ankulapadar	Provision of 2nd Source to Solari PSS through 33 kV Bay and N-1 Reliability for 33 kV Ankulapadar Feeder	₹ 2.48	Annexure-11.9
10	BBSR-II	BAED	Chandpur	Tangi- Chandpur	Construction of a New 33 kV Interlinking Line between the 33 kV Tangi Feeder and 33 kV Tangi–Chandpur Feeder to Achieve N-1 Connectivity and Improve Network Reliability.	₹ 1.71	Annexure-11.10
11	BBSR-II	PED	Khordha	Delanga	Refurbishment & augmentation of Existing 33kV Delanga feeder.	₹ 7.24	Annexure-11.11
12	BBSR-II	PED	Nayagrah	Binodada	Proposal for refubrishment and augmentation of 33KV Binodpada Feeder.	₹ 0.86	Annexure-11.12
13	BBSR-II	PED	Shamuka	JBPC	Extension of 33kV JBPC feeder from JBPC to Atharnala PSS and Talabania PSS for relibility improvement of Puri town area.	₹ 5.95	Annexure-11.13
14	BBSR-II	NYED	Rajpatana	Dasplla	Refurbishment for 33kV Daspalla feeder from Daspalla PSS to Banigocha PSS, to improve reliability of network and provide quality power supply.	₹ 1.06	Annexure-11.14
15	Cuttack	CED	Phulnakhra	33 kV Phulnakhra Fdr.	Proposal for 33 kV New linking line from Grand Bazar to Dahaliabag PSS-6.5 CKM	₹ 6.04	Annexure-11.15

16	Cuttack	CDD-II	Cuttack	CRRI-1	Proposal for N-1 connectivity for 33/11KV Matagajpur PSS from CRRI-1 Fdr.	₹ 0.74	Annexure-11.16
17	Cuttack	AED	Nuapatna	Tigiria/Athagarh	Proposal for 33 kV linking line of 0.1 KM from Athagarh Fdr. to Tigiria PSS for N-1 connectivity nad augmentation of 2.7 CKM of 33 kV Athagarh Fdr. of Khuntuni GSS.	₹ 1.65	Annexure-11.17
18	Dhenkanal	DED	Gondia	33 kV Nihalprasad Fdr.	Proposal for 33 kV New linking line from 33kv Joranda Fdr to 33kV Nihalprasad Fdr	₹ 0.21	Annexure-11.18
19	Dhenkanal	ANED	Angul	33 kV Angul-2 Fdr.	Proposal for Aug of 33 kV Angul -2 fdr from Angul GSS to Industrial PSS	₹ 0.15	Annexure-11.19
20	Dhenkanal	ANED	Angul	33 kV Ganesh Sponge Fdr.	Proposal for Aug of 33 kV Ganesh Sponge fdr from Angul GSS to Badakera 6-Pole	₹ 2.54	Annexure-11.20
21	Paradeep	KED-II	Kendrapada	New Danpur	Proposal for construction of 13.6 CKM 33 KV line using 232 Sq.mm XLPE AAA Conductor & 1CX630 Sq.mm. XLPE U/G cable for N-1 connectivity between 33/11 kV Korua & Nagaspur PSS	₹ 7.00	Annexure-11.21
22	Paradeep	KED-II	Marsaghai	Mahakalpada	Proposal for construction of 4.8 CKM 33 kV line between 33 kV Luna Fdr. & Thauri Fdr. for N-1 connectivity.	₹ 3.49	Annexure-11.22
23	Paradeep	KED-I	Patamundai	Gogua	Proposal for refurbishment of 6 CKM line of 33 kV Gogua Fdr. and augmentation from 80/100 Sq.mm. AAAC to 232 Sq.mm. AAAC	₹ 2.36	Annexure-11.23
24	Paradeep	PDP	Paradeep	Tirtol	Proposal for refurbishment of 8.3 CKM line of 33 kV Tirtol Fdr. using to 232 Sq.mm. AAAC for N-1 reliability between 33 kV Tirtol & Gorada Fdr.	₹ 3.81	Annexure-11.24
25	Paradeep	JED	Jagatsinghpur	Naugaon	Proposal for construction of 2 CKM 33 kV O/H line using 232 Sq.mm. AAAC and augmentation of 11.5 CKM line of 33 kV Naugaon Fdr. from 100 Sq.mm. AAAC to 232 Sq.mm. AAAC along with strengthening of 7 CKM 33 kV line & installation of 01 No. of 33 kV O/D bay at Bhatpada PSS.	₹ 7.00	Annexure-11.25
26	Paradeep	JED	Jagatsinghpur	Nabapatna	Proposal for construction of 0.9 CKM line of 33 kV Nabapatna Fdr. using 232 Sq.mm. XLPE AAAC for shifting of line from forest area. (forest area)	₹ 0.45	Annexure-11.26
			Total Cost for Reliability Improvement (Cr.)			**₹ 75.07**	

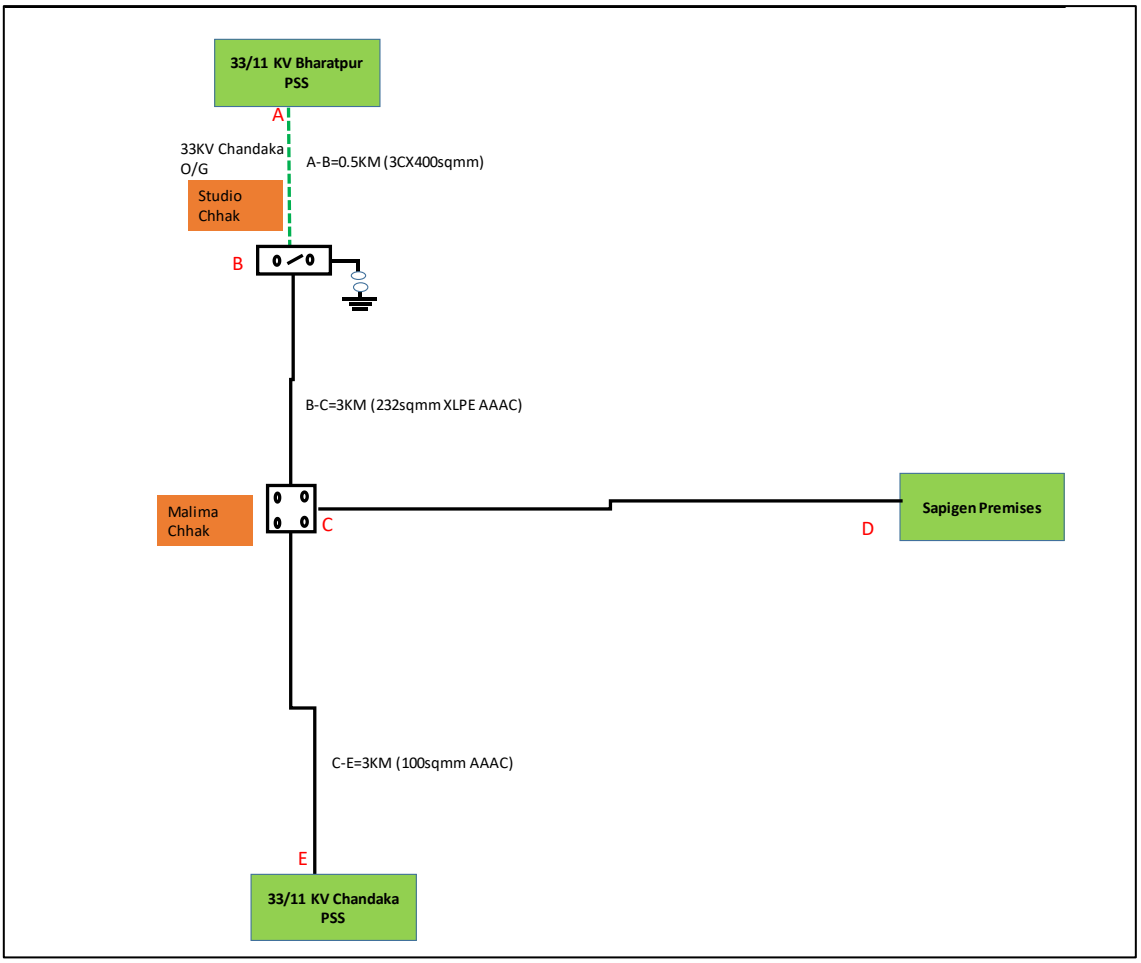
Proposal for 33 kV Network Reliability

1. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Gothapatna feeder from Chandaka PSS to Malima Chhak

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Gothapatna feeder.

Requirement/ Need of the proposal:



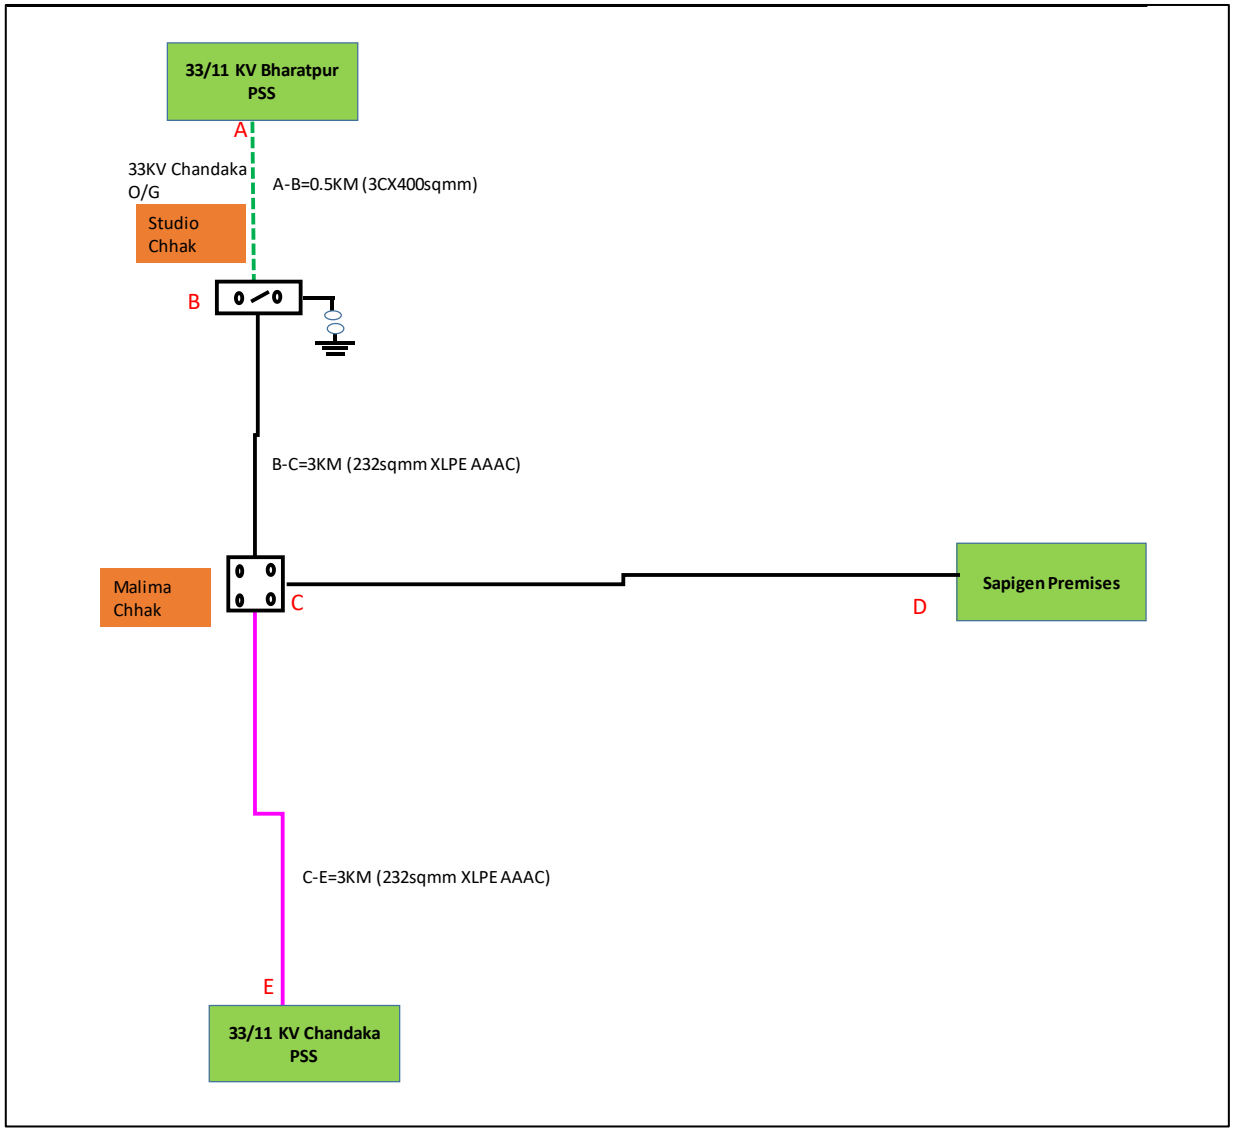
Objective:

To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- Existing 33kV Gothapatna feeder are on U/G+ Bare conductor. The feeder is long and prone to tripping and is in unsafe condition.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.
- In addition, minimum ground clearance has not been maintained in several places over the feeder.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Gothapatna feeder emanating from Mendhasal GSS are serving 6547 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 100 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Gothapatna feeder, to improve safe and reliable power supply.

Proposed SLD:

Scope of Work:

- Augmentation of 33 kV line of 100 Sq.mm. to 232 Sq.mm.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.1			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**BCDD-2 (BBSR-I)**	
Name of the Work :-		**Augmentation of existing 33 kV Chandaka O/G feeder from Chandaka PSS to Malima Chhak**	
Scope of work:-		**Part-A Augmentation of existing 100 sqmm AAAC TO 232sqmm XLPE AAAC existing line- 3KM alongwith intermediate poles.**	
Names of Schemes: -		***TPCODL CAPEX (FY 27-28)***	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	**A**	**Part-A Augmentation of existing 100 sqmm AAAC TO 232sqmm XLPE AAAC existing line- 3KM alongwith intermediate poles.**	**₹ 65,02,503.32**
2	**B**	**Part-B Dismantling**	**₹ 98,746.47**
		Total Amount	**₹ 66,01,249.79**
		Total Amount (In Cr)	**₹ 0.66**
Total estimated cost is Rs. 0.66 Crore. (On TPCODL CAPEX Scheme)			

Cost Estimate: ₹ 0.66 Cr. (For detailed BoQ refer Annexure-11.1).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Reduction of electrocution risk and public safety hazards.
c) Safe operation and isolation of the feeder.
d) Protection of electrical assets against lightening and surge related failure.
e) Improvement in operational safety for maintenance personnel and public

Benefit to the system and consumers:

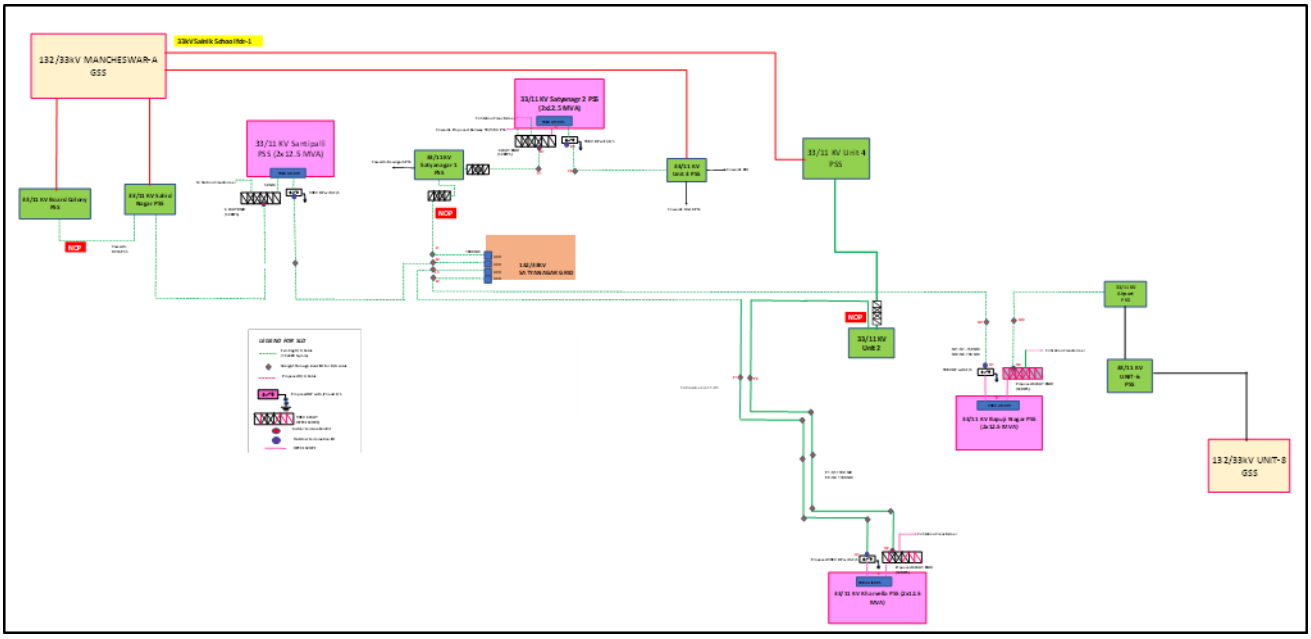
Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.

2. Proposal for reliability improvement through Power evacuation by constructing new 33kv feeder from Satyanagar GSS to Satyanagar PSS

Proposal:

Proposal for construction of New 33kV underground feeder to Satyanagar PSS and Unit-3 PSS, for enabling reliable power supply by power evacuation form Satyanagar GSS and providing addition 33kV source to PSS.

Requirement/ Need of the proposal:



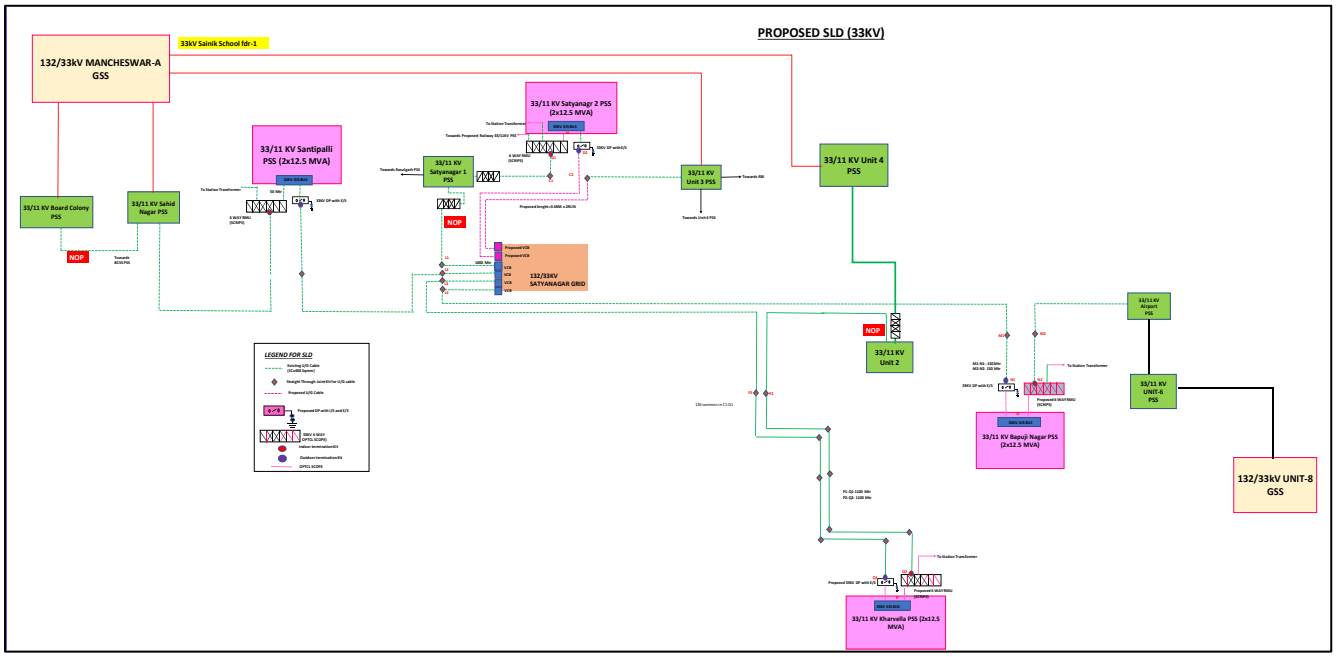
Objective:

To enable reliable power supply by providing additional source connectivity with underground cable and power supply from other GSS to BBSR City Urban Area.

Existing Scenario:

- At present, 33kV Satyanagar feeder is emanating from Satyanagar GSS in underground network providing supply to 33/11kV Satyangar-1 PSS and Satyanagar -2 PSS.
- The feeder is in N-1 condition with 33kv Kharvela Nagar feeder through Unit-3 PSS. Since the feeder is optimally loaded, it is not possible to take the load of 33/11kv Satyanagar -2 PSS in it thereby hampering reliability.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33Kv Satyanagar feeder emanating from Satyanagar GSS are serving 5486 nos. consumers through existing network. The no. of tripping during the last year was 46 nos. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.

Proposed SLD:

Scope of Work:

Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.2			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**BCDD-1 (BBSR-I)**	
Name of the Work :-		Proposal for 33 kV N-1 reliability to Satyanagar and Unit-3 PSS	
Scope of work:-		Part-A : Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.	
Names of Schemes: -		***TPCODL CAPEX (FY 27-28)***	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	Part-A : Supply and laying of 0.6KM U/G line of 3CX400sqmm from Satyanagar GSS to Satyanagar PSS. 2 no.s of new feeder to be emanated from Satyanagar GSS.	₹ 1,59,95,596.26
		Total Amount	**₹ 1,59,95,596.26**
		Total Amount (In Cr)	**₹ 1.60**
Total estimated cost is Rs. 1.60 Crore. (On TPCODL CAPEX Scheme)			

Cost Estimate: ₹ 1.28 Cr. (For detailed BoQ refer Annexure-11.2).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026
ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Reduction of electrocution risk and public safety hazards.
c) Safe operation and isolation of the feeder.
d) Protection of electrical assets against lightening and surge related failure.
e) Improvement in operational safety for maintenance personnel and public

Benefit to the system and consumers:

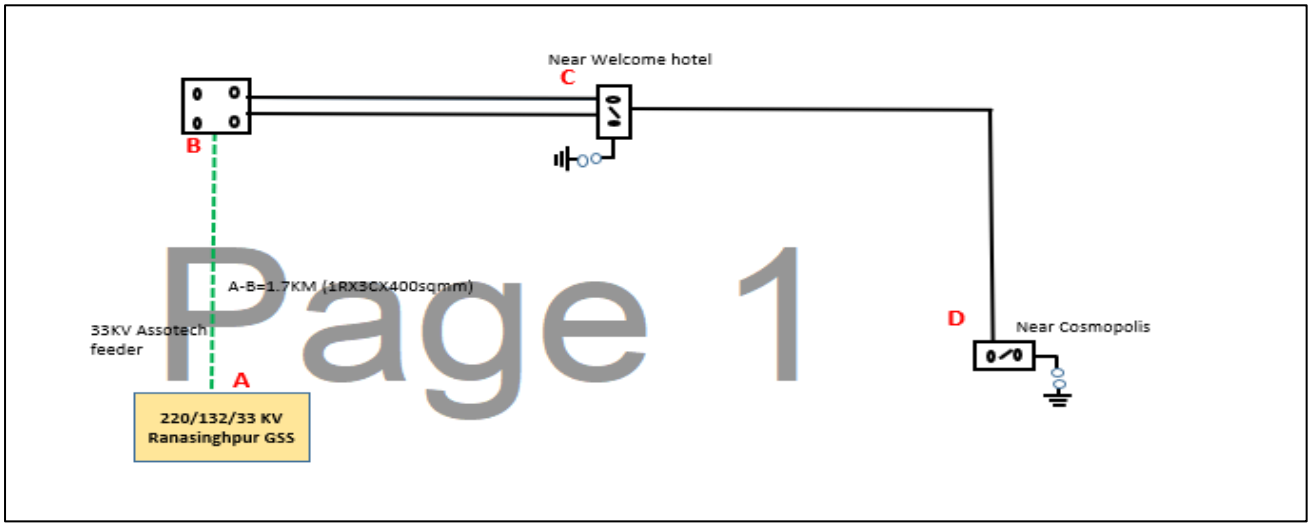
Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.

3. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Assotech feeder

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Assotech feeder.

Requirement/ Need of the proposal:



Objective:

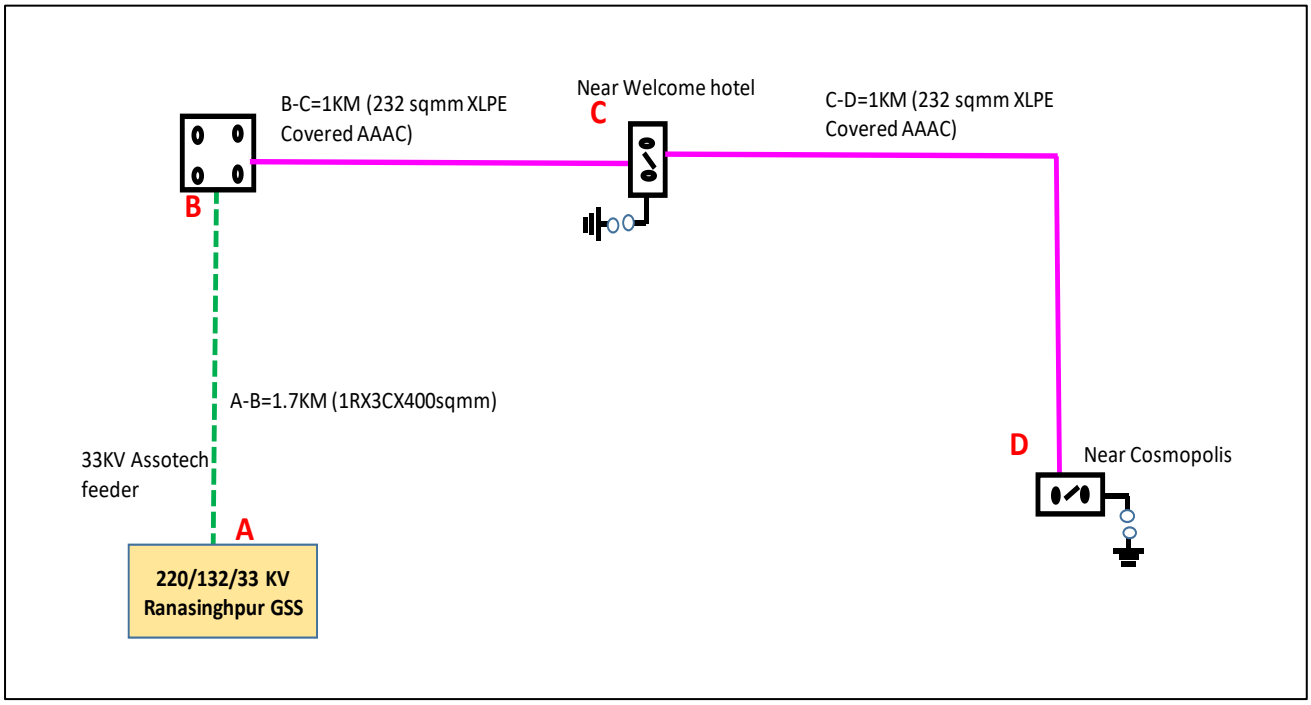
To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- Existing 33kV Assoctech are on Bare conductor passing through dense vegetation. The feeder emanating from Ranasinghpur Grid and is in unsafe condition.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.
- In addition, minimum ground clearance has not been maintained in several places over the feeder.

Existing SLD:

Page 1



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Assotech feeder emanating from Ranasinghpur GSS are serving 10601 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 4 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Assotech feeders from point B to D with XLPE covered conductor to improve safe and reliable power supply.

Proposed SLD:

Scope of Work:

- Augmentation of 2 CKM 33 kV line of 100 Sq.mm. to 232 Sq.mm. XLPE Covered Conductor from 4 pole to Cosmopilis.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.3	
TP CENTRAL ODISHA DISTRIBUTION LIMITED	
Name of the Division :-	**BCDD-2 (BBSR-I)**
Name of the Work :-	Augmentation of existing 33 kv Assotech feeder Bare to XLPE Covered Conductor from Ranasinghpur GSS
Scope of work:-	Part-A Augmentation of existing 100 sqmm AAAC TO 232sqmm XLPE AAAC existing line- 2KM alongwith intermediate poles.
Names of Schemes: -	***TPCODL CAPEX (FY 27-28)***
ABSTRACT OF ESTIMATE	

Sl. No.	Part	Description	Amount
1	A	Part-A Augmentation of existing 100 sqmm AAAC TO 232sqmm XLPE AAAC existing line- 2KM alongwith intermediate poles.	₹ 50,07,287.41
2	B	Part-B Dismantling	₹ 98,746.47
		Total Amount	**₹ 51,06,033.88**
		Total Amount (In Cr)	**₹ 0.51**
Total estimated cost is Rs. 0.51 Crore. (On TPCODL CAPEX Scheme)			

Cost Estimate: ₹ 0.51 Cr. (For detailed BoQ refer Annexure-11.3).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public

Benefit to the system and consumers:

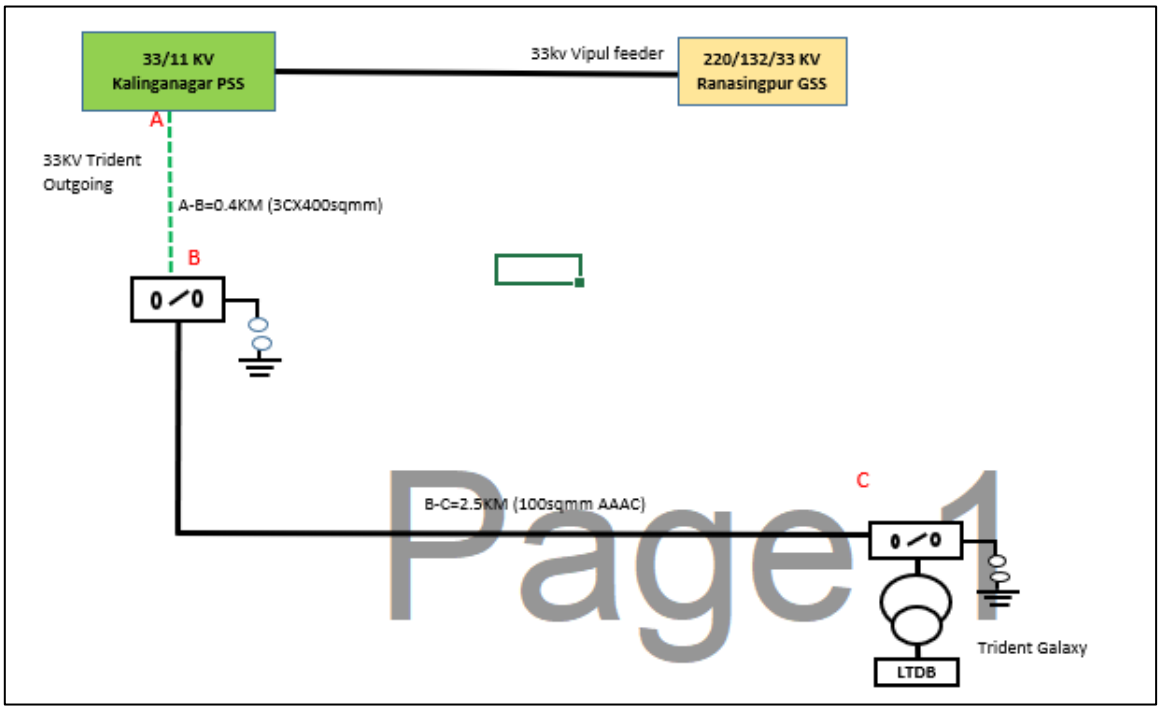
Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.

4. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Vipul feeder from Kalinaganar PSS to Trident Galaxy Apartment

Proposal:

Proposal for augmentation/ Refurbishment of 33kV Vipul feeder.

Requirement/ Need of the proposal:



Objective:

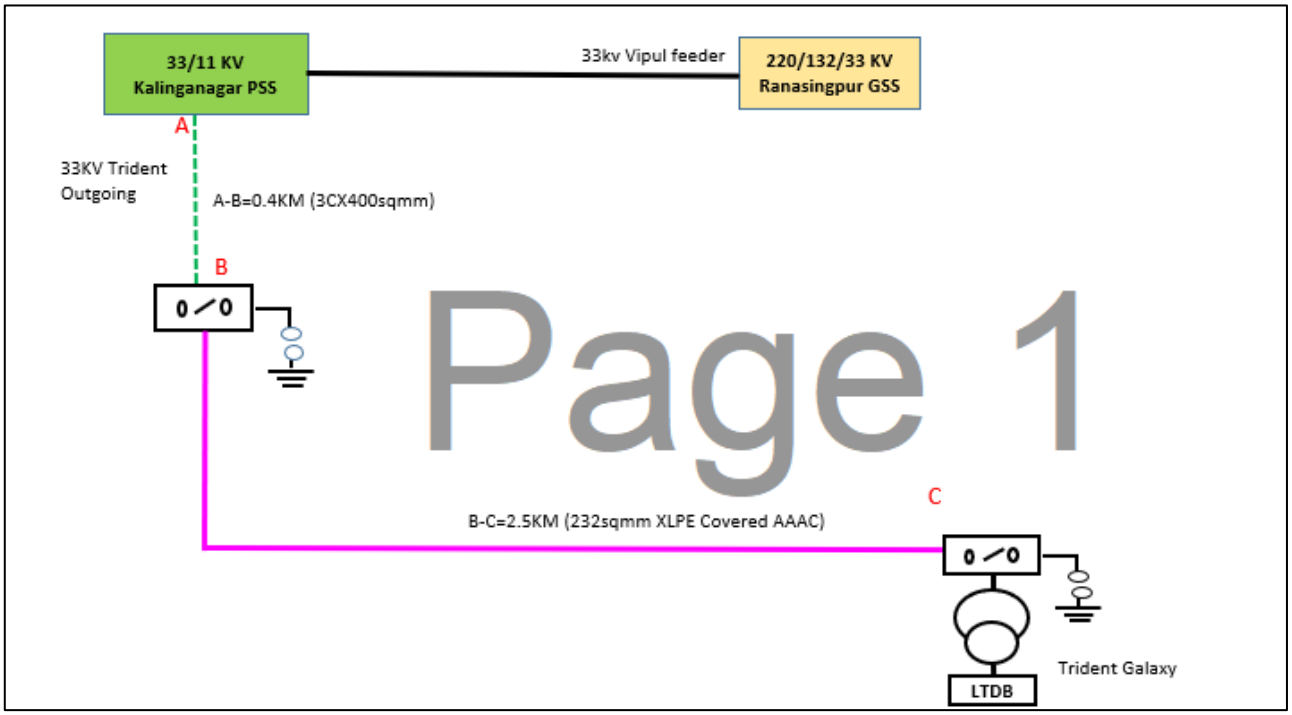
To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- Existing 33kV Vipul feeder are on Bare conductor passing through dense vegetation. The feeder emanating from Ranasinghpur Grid and is in unsafe condition.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.
- In addition, minimum ground clearance has not been maintained in several places over the feeder.

Existing SLD:

Page 1



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Vipul feeder emanating from Ranasinghpur GSS are serving 24993 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of tripping during the last year was 34 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Vipul feeders, to improve safe and reliable power supply.

Proposed SLD:

Scope of Work:

- Augmentation of 2.5 CKM 33 kV line of 100 Sq.mm. to 232 Sq.mm. from Kalinganagar to Trident Galaxy.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.4			
TP CENTRAL ODISHA DISTRIBUTION LIMITED			
Name of the Division :-		**BCDD-2 (BBSR-I)**	
Name of the Work :-		Augmentation of existing 33 kV Vipul feeder from Kalinganagar PSS to Trident Galaxy	
Scope of work:-		Part-A Augmentation of existing 100sqmm AAAC TO 232sqmm XLPE AAAC existing line- 2.5KM alongwith intermediate poles.	
Names of Schemes: -		***TPCODL CAPEX (FY 27-28)***	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	Part-A Augmentation of existing 100sqmm AAAC TO 232sqmm XLPE AAAC existing line- 2.5KM alongwith intermediate poles.	₹ 53,04,561.86

2	B	Part-B Dismantling	₹ 82,288.72
		Total Amount	**₹ 53,86,850.59**
		Total Amount (In Cr)	**₹ 0.54**
Total estimated cost is Rs. 0.54 Crore. (On TPCODL CAPEX Scheme)			

Cost Estimate: ₹ 0.54 Cr. (For detailed BoQ refer Annexure-11.4).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public

Benefit to the system and consumers:

Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.

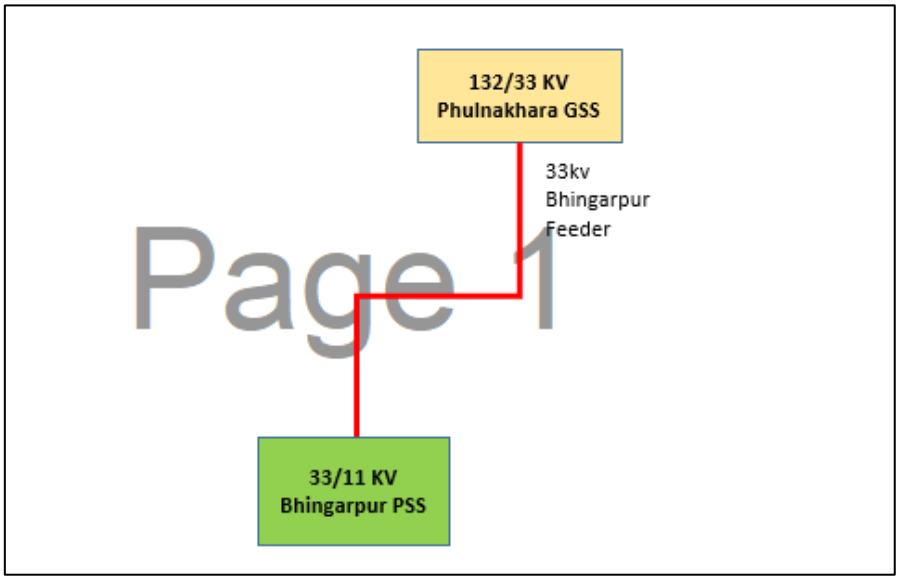
5. Proposal for reliability improvement through Power evacuation by constructing new 33kv feeder from Balianta GSS to Bhingarpur PSS

Proposal:

Proposal for construction of New 33kV underground feeder to Bhingarpur PSS, for enabling reliable power supply by power evacuation form Balianta GSS and providing addition 33kV source to PSS.

Requirement/ Need of the proposal:

Objective:



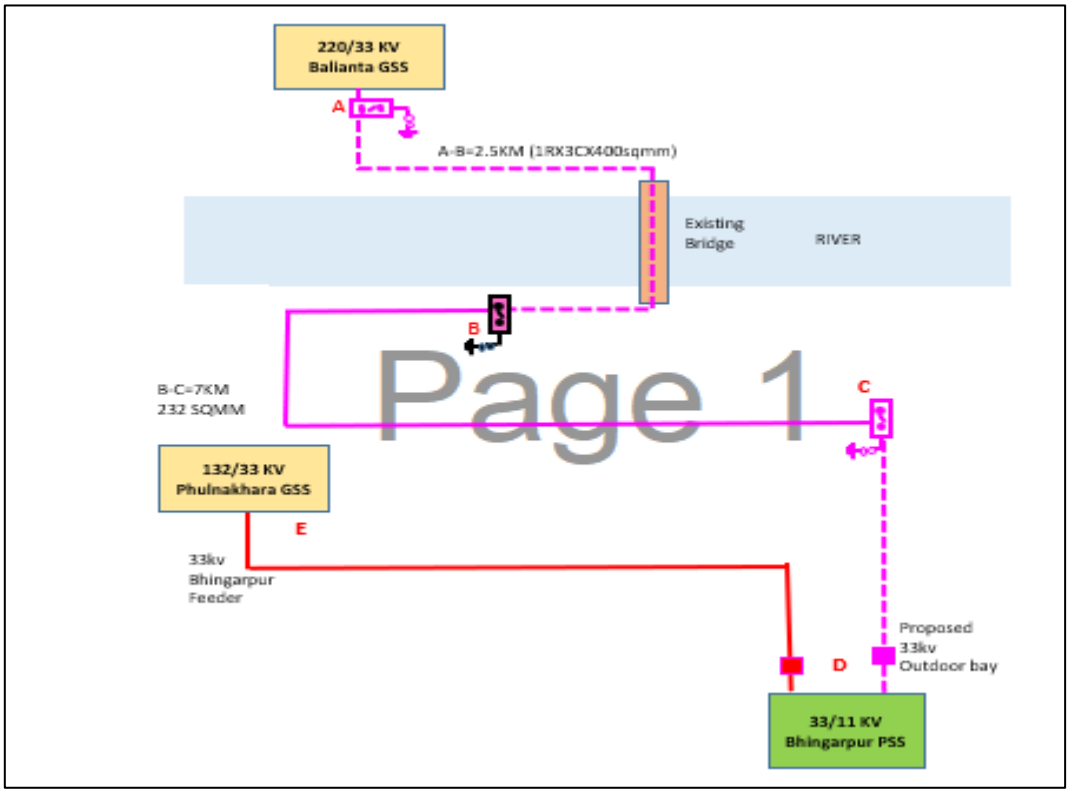
To enable reliable power supply by providing second source connectivity with underground cable and power supply from other GSS to BBSR City Urban Area.

Existing Scenario:

- At present, 33kV Bhingarpur feeder is emanating from Phulnakhara Grid, having 100sq.mm conductor on RSJ Poles. The O/H network is not reliable during inclined whether like Kalbaisakhi and cyclone.
- 33/11kV Bhingarpur PSS having Single 33kV source without n-1 arrangement.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.

- During any breakdown of feeder, the PSS shuts down thereby power failure to all the consumers on the feeder
- In addition, minimum ground clearance has not been maintained in several places over the feeder.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Bhingarpur feeder emanating from Phulnakhara GSS are serving 6760 nos. consumers through existing network having mixed conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 51 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Construction of 3CX400sqmm without spare for length- 3.8KM.
- Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS.
- Construction of 33kv overhead line with 232sqmm for length- 7KM

Proposed SLD:

Page 1

Scope of Work:

- Construction of 3CX400sqmm without spare for length- 3.8KM.
- Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS.
- Construction of 33kv overhead line with 232sqmm for length- 7KM

Proposed Cost with Estimate Break-up:

ANNEXURE-11.5	
TP CENTRAL ODISHA DISTRIBUTION LIMITED	
Name of the Division :-	**BED (BBSR-I)**
Name of the Work :-	New 33kV feeder from Balianta GSS to Bhingarpur PSS, for enabling reliable power supply by power evacuation and providing additional 33kV source to Bhingarpur PSS.
Scope of work:-	1. Construction of 3CX400sqmm without spare for length- 3.8KM 2. Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS Construction of 33kv ovehead line with 232sqmm for length- 7KM
Names of Schemes: -	***TPCODL CAPEX (FY 27-28)***

ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	Part-A 1. Construction of 3CX400sqmm without spare for length-3.8KM	₹ 3,62,59,336.70
2	B	Part-B :- Construction of One No of 33 KV Outdoor Bay at Bhingarpur PSS	₹ 28,09,149.00
2	C	Part-B Construction of 33kv ovehead line with 232sqmm for length-7KM	₹ 2,58,33,900.80
		Total Amount	**₹ 6,49,02,386.51**
		Total Amount (In Cr)	**₹ 6.49**
Total estimated cost is Rs. 6.49 Crore. (On TPCODL CAPEX Scheme)			

Cost Estimate: ₹ 6.49 Cr. (For detailed BoQ refer Annexure-11.5).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Reduction of electrocution risk and public safety hazards.
c) Safe operation and isolation of the feeder.
d) Protection of electrical assets against lightening and surge related failure.
e) Improvement in operational safety for maintenance personnel and public

Benefit to the system and consumers:

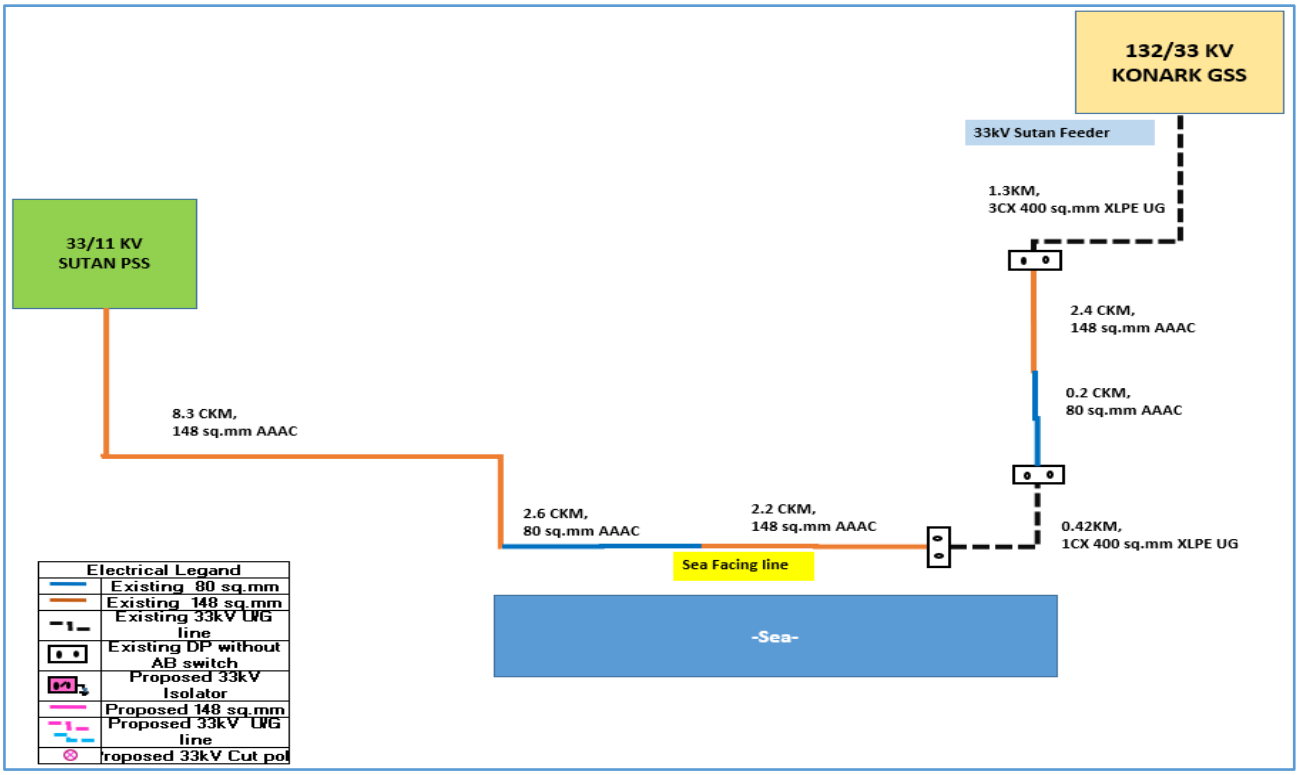
Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.

6. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Sutan Feeder:

Proposal:

Proposal for augmentation and refurbishment of 33kV Sutan feeder.

Requirement/ Need of the proposal:



Objective:

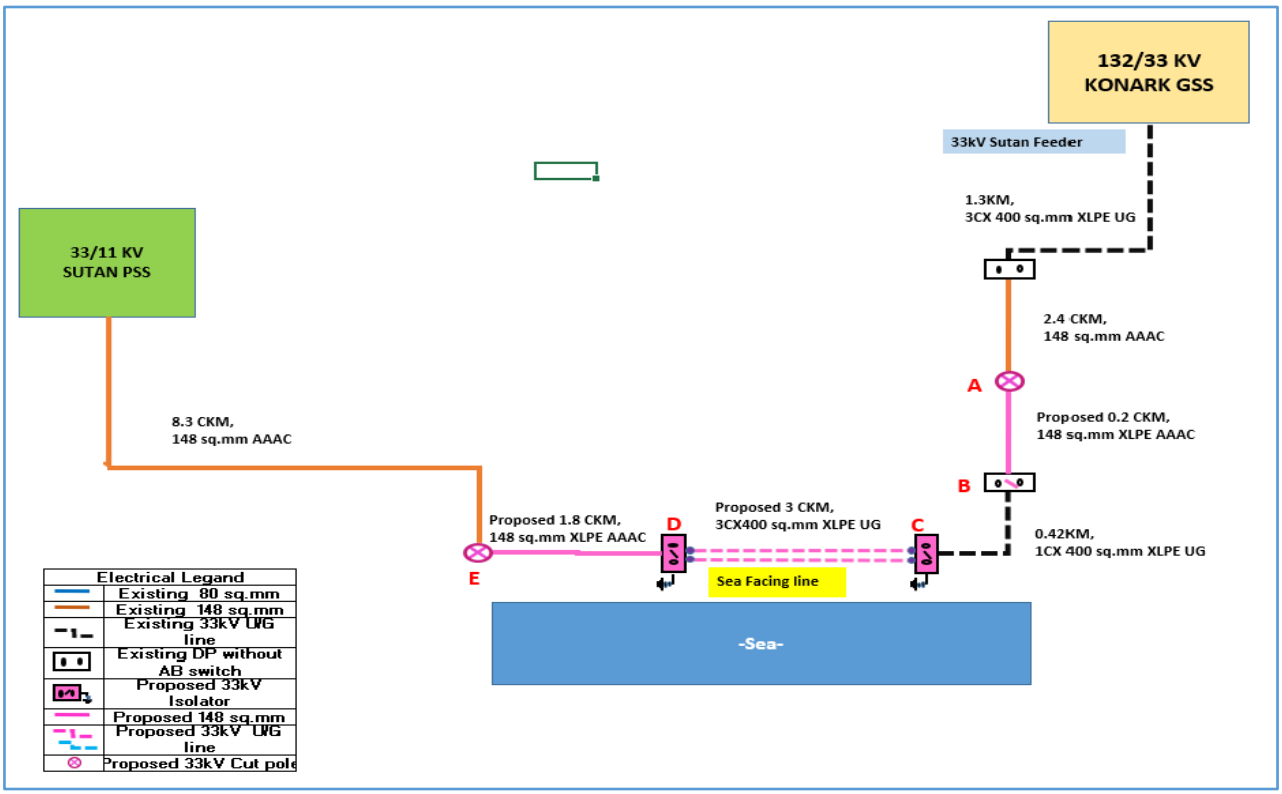
To maintain the reliability of power supply, reduce frequent interruptions and conductor snapping, and strengthen the existing network by augmenting weak sections and replacing undersized conductors.

Existing Scenario:

- The existing 33 kV Sutan Feeder emanates from Konark GSS, has undersized conductors, and is in an unsafe condition. The line passes near the embankment of Chandrabhaga Sea Beach.
- The conductors are very old and in weak condition. Due to ageing and brittleness, frequent conductor snapping incidents are being observed.
- Due to the direct exposure of the 33 kV OH line to the sea, the poles and conductors are getting corroded and damaged.
- Furthermore, corrosion of the poles, high wind speeds, and erosion of the pole foundations have resulted in frequent uprooting of poles, causing prolonged shutdowns of the 33 kV feeder.

Existing SLD:

Site Photographs:



Priority and Timeline of the Project:

Priority: Since at present, the 33 kV Sutan Feeder emanating from Sutan GSS is serving 2,070 consumers through the existing network with lower-size conductors, and further, due to the ageing of the conductors and direct exposure of the 33 kV overhead line to the sea, the poles and conductors are getting corroded and damaged. Multiple joints, frequent faults, and conductor snapping incidents are being observed, affecting the reliability of the power supply. The nos. of tripping during the last year was 56 nos. Additionally, due to vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation of existing overhead section and refurbishment is proposed for 33kV Sutan feeder, from point “A” to “B” and “D” to “E” to improve safe and reliable power supply.
- Conversion of Sea-Facing 33 kV OH Line to UG Cable in between the point “C” to “D” as given in below SLD , to avoid direct exposure of GI poles to the sea side.

Proposed SLD:

Scope of Work:

- Augmentation of 33 kV line using 148 sq.mm XLPE covered AAAC-2CKM.
- Laying of 33kV, 3Cx400sqmm U/G cable - 3KM with one run spare since the feeder is radial in nature.

Proposed Cost with Estimate Break-up:

Annexure-11.6

ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	PART A: Construction of 33kV, 3Ph, 3W OH Line Length= 2CKM, with 40 Mtr. Span on 13 mtr H-Pole for Pin-Points and Cut-Points & 13 Mtr WPB Pole for DP using 148 SQ.MM. -XLPE AAA Covered Conductor	₹ 45,28,040.18
2	B	PART B: Supply & Laying of 33kV 3CX400sqmm XLPE UG Cableof length = 2.95 KM with one run spare.	₹ 4,03,59,741.05
3	C	PART C: Dismantling of Materials	₹ 84,263.65
		Total Amount	**₹ 4,49,72,044.89**
		Total Amount (In Cr)	**4.5**
Total estimated cost is Rs. 4.5 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 4.5 Cr. (For detailed BoQ refer Annexure- 11.6).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

f) Improved reliability of power supply by reducing corrosion-related faults and damage caused by direct exposure to the sea.

Benefit to the system and consumers:

- Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.
- Conversion of the sea-facing 33 kV OH line to UG cable will eliminate frequent faults and conductor damage caused by corrosion due to direct exposure to the sea.

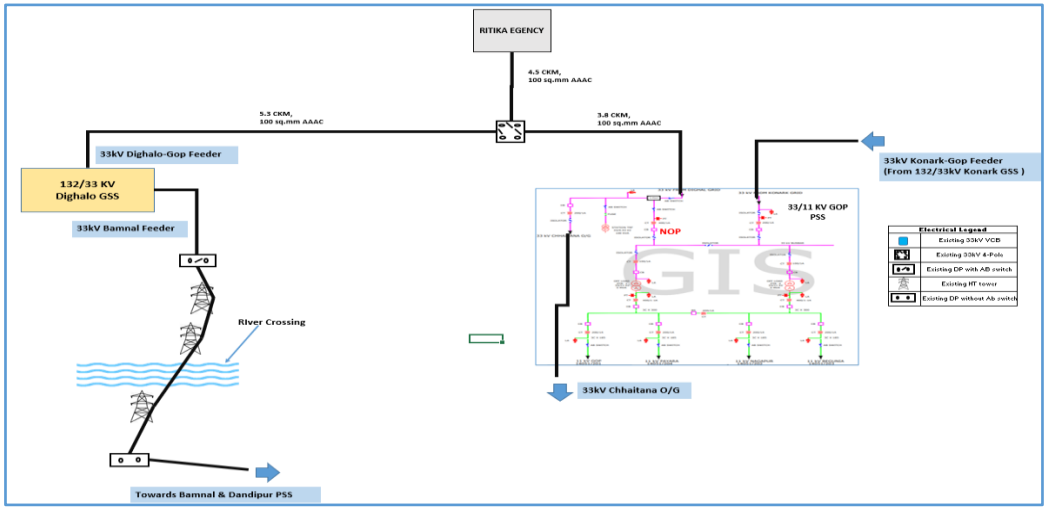
- It will improve the reliability and continuity of power supply by reducing frequent interruptions and conductor snapping.

7. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Dighalo-Gop Feeder:

Proposal:

Proposal for augmentation and refurbishment of 33kV Dighalo-Gop feeder from DIghalo GSS to Gop PSS.

Requirement/ Need of the proposal:



Objective:

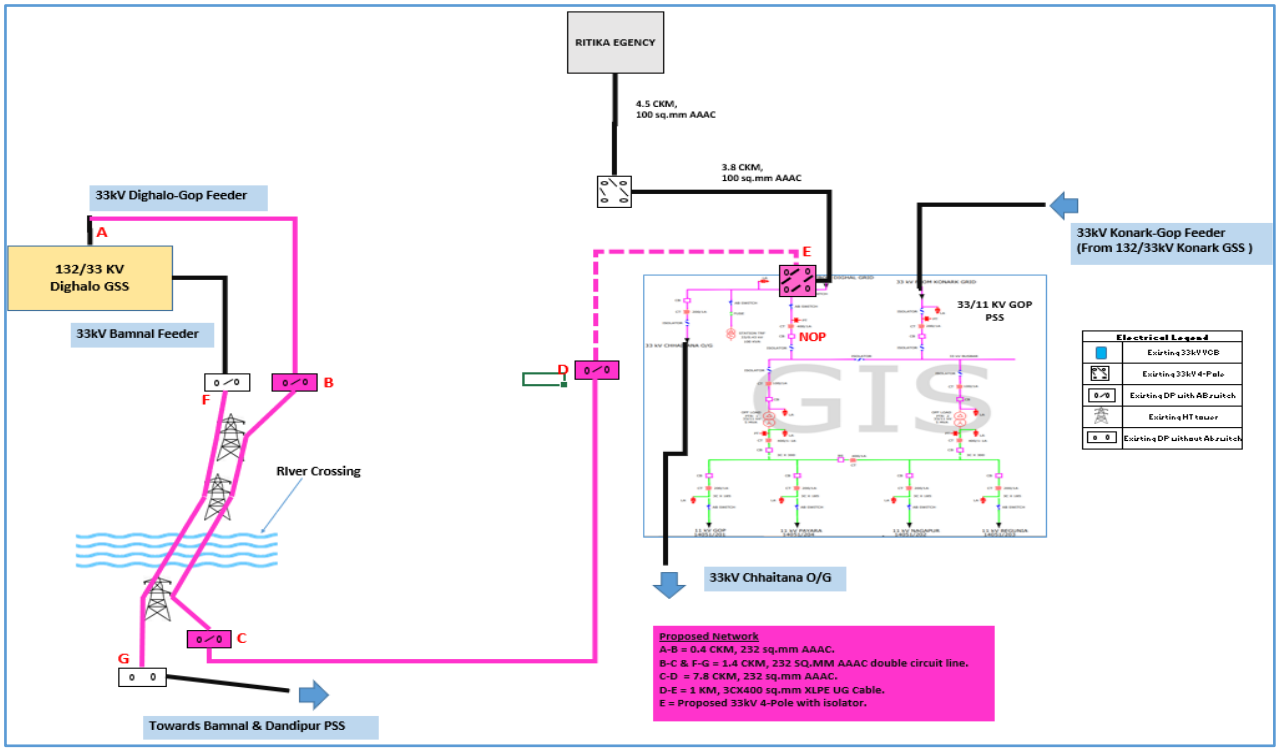
To maintain the reliability of power supply, reduce frequent interruptions in the feeder and conductor snapping, and strengthen the existing network by augmenting weak sections and replacing undersized conductors.

Existing Scenario:

- Existing 33kV Dighalo-Gop Feeder is emanating from Dighalo GSS having lower size conductor and is in unsafe condition.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.
- In addition, minimum ground clearance has not been maintained in several places over the feeder. The line mostly passing through difficult tarrian such as river crossing , paddy fields, dense vegitations causing delay in fault finding and patrolling of the feeder.

Existing SLD:

Priority and Timeline of the Project:



Priority: Since at present, the 33kV Dighalo-Gop feeder emanating from Dighalo GSS are serving 11895 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 64 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the

feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Dighalo-Gop feeder, to improve safe and reliable power supply.

Proposed SLD:

Scope of Work:

- Construction of 33kV , 3Ph, 3W Line Length= 9.6 CKM with 40 Mtr. Span using 232 SQ.MM. -AAA Conductor & 14 Mtr. H-Pole for Pin-Points and Cut-Points & 13 Mtr WPB Pole for DP from Dighalo GSS to Gop PSS along with 1kM UG network near to the market area of Gop PSS.

Proposed Cost with Estimate Break-up:

Annexure-11.7

ABSTRACT OF ESTIMATE	

Sl. No.	Part	Description	Amount
1	A	PART A: Construction of 33kV , 3Ph, 3W Line Length= 9.6 CKM with 40 Mtr. Span using 232 SQ.MM. -AAA Conductor & 14 Mtr. H-Pole for Pin-Points and Cut-Points & 13 Mtr WPB Pole for DP.	₹ 3,28,23,186.01
2	B	PART B: Supply & laying of 33kV 3CX400sqmm UG Cable length = 1 KM without spare run.	₹ 1,11,10,987.24
3	C	PART C: Construction of 33 KV 4 Pole using WPB GI Pole 160x152 (13Mtr. Long) with 3 Nos. of Isolator and LA Set.	₹ 7,27,248.21
4	D	PART D: Dismantling of Materials	₹ 3,28,459.53
		Total Amount	**₹ 4,49,89,881.00**
		Total Amount (In Cr)	**4.50**
Total estimated cost is Rs. 4.5 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 4.5 Cr. (For detailed BoQ refer Annexure- 11.7)

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

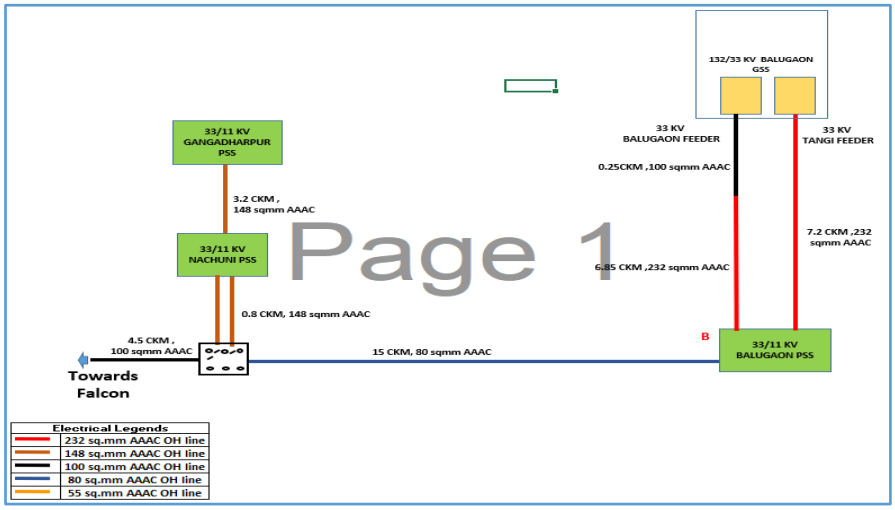
- Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.
- It will improve the reliability and continuity of power supply by reducing frequent interruptions and conductor snapping.

8. Proposal for reliability improvement and overloading mitigation by augmentation and refurbishment 33kV Balugaon Feeder:

Proposal:

Proposal for augmentation and refurbishment of 33kV Balugaon feeder of 2.3 kM from Balugaon GSS to Balugaon PSS.

Requirement/ Need of the proposal:

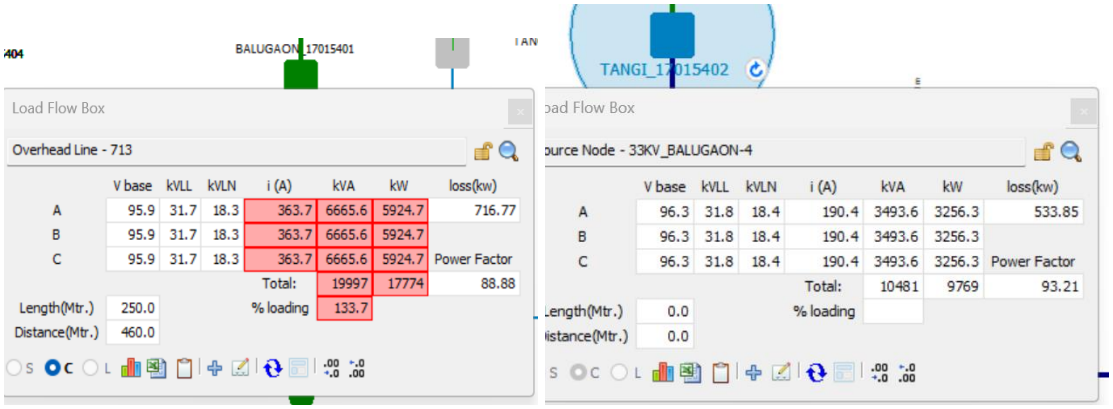


Objective:

To maintain reliability of power supply, reduction in frequent interruptions in the feeder, reduction of conductor snapping and strengthening the existing network by augmenting weak section and lower conductor size.

Existing Scenario:

- The existing 33 kV Balugaon Feeder emanating from Balugaon GSS consists of both 232 sq. mm and 100 sq. mm AAAC conductors.
- The section highlighted in black consists of 100 sq. mm AAAC conductors and passes through a portion of a residential area. This section is in a highly unsafe condition, as the conductors have become brittle and weak due to ageing.
- Due to the ageing and brittleness of the conductors, frequent conductor snapping incidents are being observed.

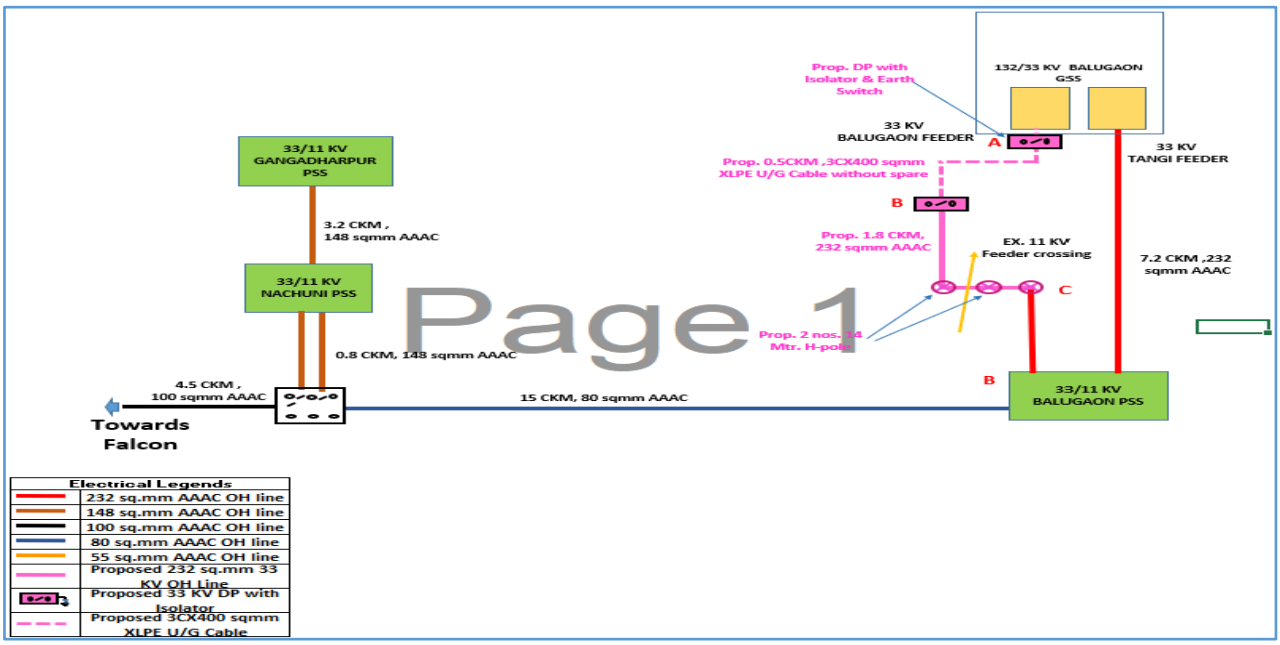


Existing SLD:

Page 1

Existing Summer'26 Loading and projected load at 33kV Balugaon and Tangi Feeder:

Existing Loading								
GSS Name	**33kV Feeder Name**	**Feeder Capacity (MVA)**	**Peak Loading Summer'26 (MVA)**	**% Loading**	**Feeder Overloading Status (AS IS)**	**Projected load Summer'28 (MVA)**	**% Loading**	**Feeder Overloading Status Summer'28**
Balugaon	Balugaon	15.54	15.90	102%	Overload	19.94	128%	Overload
Balugaon	Tangi	25.71	8.00	31%	OK	10.04	39%	OK



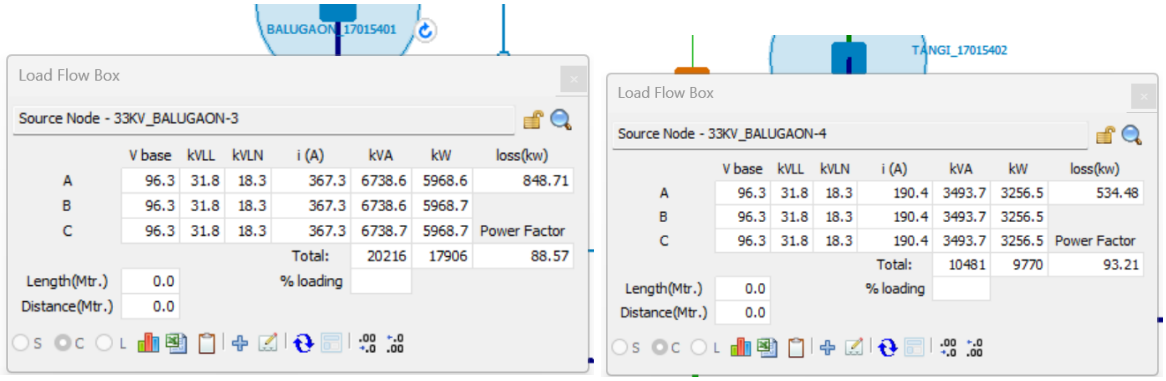
Priority and Timeline of the Project:

Priority: Since at present, the 33kV Balugaon feeder emanating from Balugaon GSS are serving 28044 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 47 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation and diversion from vegetation land is proposed for 33kV Balugaon feeder, to improve safe and reliable power supply.

Proposed SLD:



Scope of Work:

- Augmentation of Damaged 100 sq. mm Section of 33 kV Line to 232 sq. mm laying of 0.6 KM 33kV 1CX630sqmm U/G Cable.

Existing Summer'26 Loading and projected load at 33kV Balugaon and Tangi Feeder after execution of proposal:

Loading after Proposal (Summer'28)					
GSS Name	**33kV Feeder Name**	**Feeder Capacity (MVA)**	**Projected load (MVA)**	**% Loading**	**Feeder Overloading Status**
Balugaon	Balugaon	25.71	19.94	78%	OK
Balugaon	Tangi	25.71	10.04	39%	OK

3	C	PART C: Dismantling of Materials	₹ 1,08,032.17
		Total Amount	**₹ 1,52,97,296.74**
		Total Amount (In Cr)	**₹ 1.53**
Total estimated cost is Rs. 1.53 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 1.53 Cr. (For detailed BoQ refer Annexure-11.8).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

- Ensuring safe, reliable and quality power supply to the consumers with strengthning of 33kV network.
- It will improve the reliability and continuity of power supply by reducing frequent interruptions and conductor snapping.

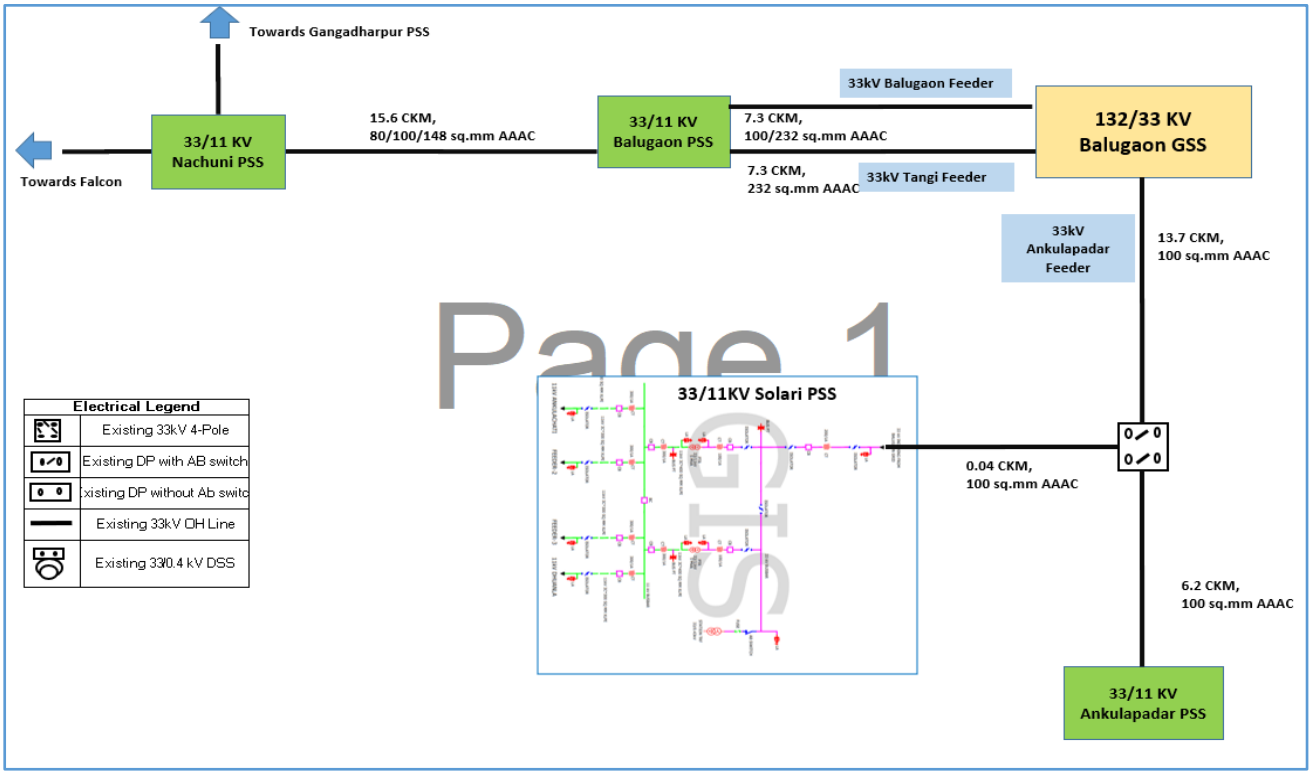
9. Proposal for reliability improvement of 33kV Ankulapadar Feeder and providing 33kV second source connectivity to 33/11kV Solari PSS :

Proposal:

Proposal for Construction of a New 33 kV Linking Line between the 33 kV Ankulapadar and Tangi–Balugaon Feeders to Improve Network Reliability at Solari PSS by Providing a 2nd Source and Enabling Ring Connectivity.

Requirement/ Need of the proposal:

Objective:



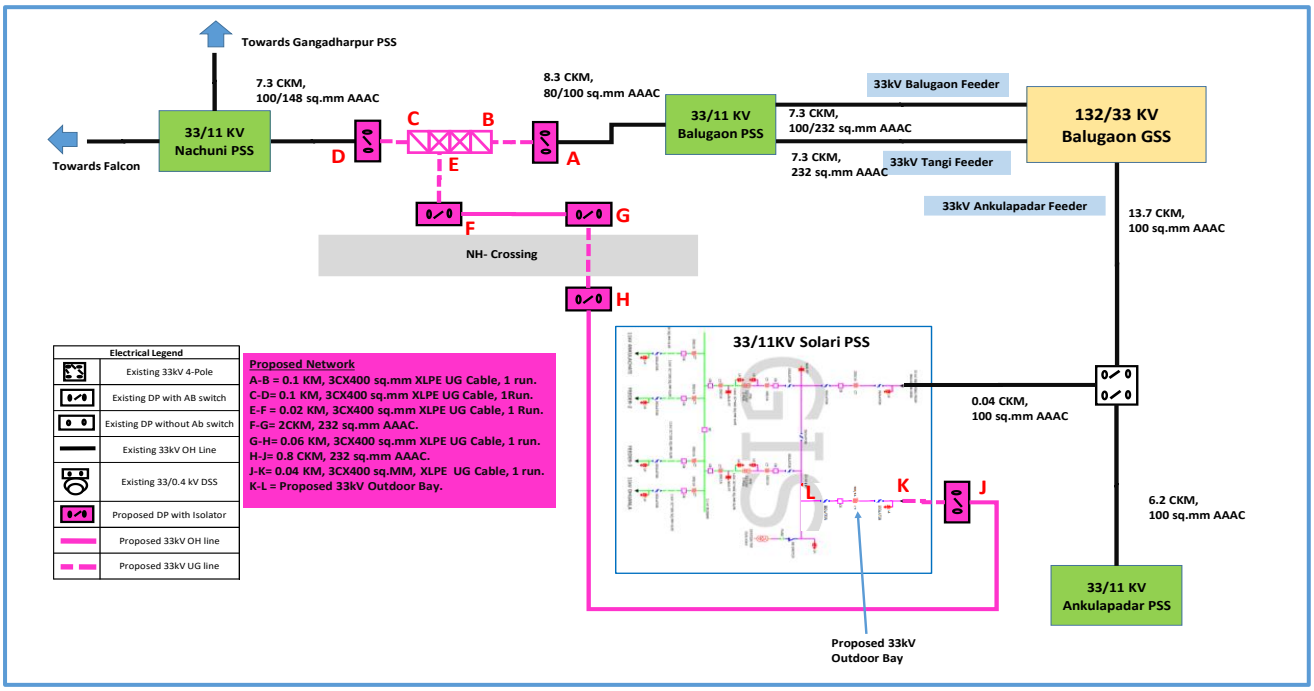
Provision of 2nd Source to Solari PSS through 33 kV Bay and N-1 Reliability for 33 kV Ankulapadar Feeder.

Existing Scenario:

- At present, 33kV Ankulapadar feeder is emanating from Balugaon GSS and feeding power supply to 33/11kV Solari PSS and Ankulapadar PSS.
- 33kV Tangi-Balugaon feeder is emanating from Balugaon GSS and feeding power supply to 33/11kV Nachuni PSS, Gangadharpur PSS and HT Industrial consumers.

- 33 kV Ankulapada Feeder is an OH, radial, and lengthy feeder that passes through vegetation-prone areas, which affects the reliability of power supply to the area during any breakdown or maintenance work.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Ankulapadar and Tangi feeders emanating from Balugaon GSS are serving 32220nos. consumers through existing network. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Construction of a new 33 kV Outdoor Bay at Solari PSS to provide an additional 33kV Source source arrangement for the PSS from 33kV Tangi feeder.
- Construction of new 33kV linking line with 0.32 KM underground cable and 2.8 CKM overhead line.
- After execution of the proposal, Solari PSS will have ring connectivity with an additional source of power supply. Both the 33 kV Ankulapada Feeder and 33 kV Tangi Feeder will achieve N-1 connectivity.

Proposed SLD:

Scope of Work:

1. Laying 3CX400sqmm of XLPE U/G cable- 0.32Ckm.
2. Construction of 2.8 CKM 33 KV O/H line using 232 sqmm AAAC.
3. Construction of 33kV New out door bay at Solari PSS.

Proposed Cost with Estimate Break-up:

3	C	PART C: Construction of One No of 33 KV Outdoor line bay.	₹ 36,63,786.06
		Total Amount	**₹ 2,47,95,375.98**
		Total Amount (In Cr)	**2.48**
Total estimated cost is Rs. 2.48 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 2.48 Cr. (For detailed BoQ refer Annexure-11.9).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.
b) Reduction of electrocution risk and public safety hazards.
c) Safe operation and isolation of the feeder.
d) Protection of electrical assets against lightening and surge related failure.
e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

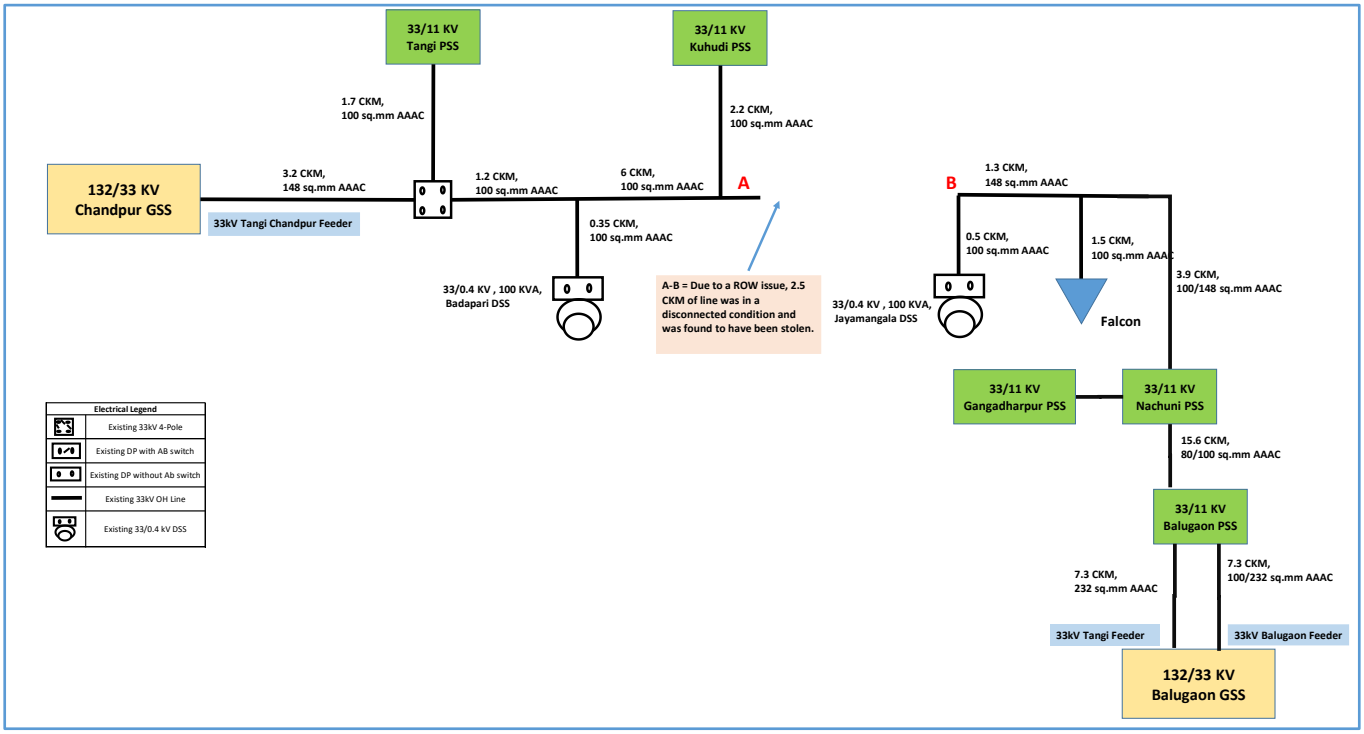
- Additional 33kV source to PSS with ring connectivity.
- Provide uninterrupted and reliability power supply for Solari PSS.

10. Construction of a New 33 kV Interlinking Line between 33 kV Tangi Feeder and 33 kV Tangi–Chandpur Feeder for N-1 Connectivity and Improved Network Reliability:

Proposal:

Construction of a New 33 kV Interlinking Line between the 33 kV Tangi Feeder and 33 kV Tangi–Chandpur Feeder from Jayamangal Tapping Point to Kuhudi Tapping Point to Achieve N-1 Connectivity and Improve Network Reliability

Requirement/ Need of the proposal:



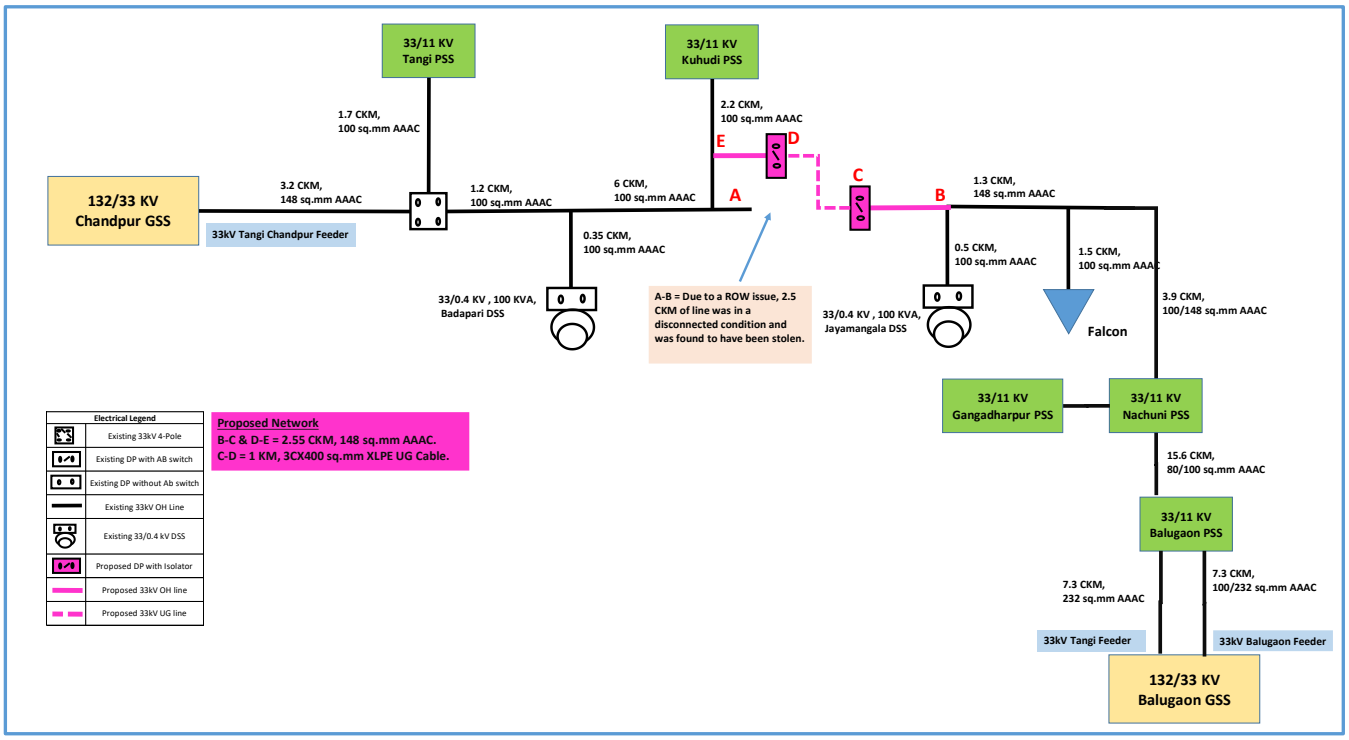
Objective:

To ensure reliable power supply and achieve N-1 connectivity for the 33 kV Tangi Feeder and 33 kV Tangi–Chandpur Feeder.

Existing Scenario:

- At present, the 33 kV Tangi–Chandpur Feeder is emanating from Chandpur GSS and supplying power to 33/11 kV Tangi PSS and Kuhudi PSS. The feeder is radial in nature.
- The 33 kV Tangi Feeder is emanating from Balugaon GSS and supplying power to 33/11 kV Nachuni PSS, Gangadharpur PSS, and HT industrial consumers. The feeder is also radial in nature.
- Both the 33 kV feeders are OH, lengthy, radial, and pass through dense vegetation, which affects the reliability of power supply in the area during breakdowns or maintenance work.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Tangi-Chandpur feeder emanating from Chandpur GSS is serving 20011nos. consumers and the 33 kV Tangi-Balugaon Feeder emanating from Balugaon GSS is serving 13952nos. consumers through existing network having radial connectivity and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The 33kV Tangi-Chandpur feeder has 88 Nos. tripping and Tangi feeder has 120 Nos. tripping during the last year. Since the feeders are radial in the absence of ring connectivity and reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Construction of interlinking line of 3.55 KM between Tangi- Chandpur Feeder & Tangi feeder from Jaymangal Tapping point to Kuhudi Tapping point.

Proposed SLD:

Scope of Work:

1. Construction of 33 kV line of 148 Sq.mm. AAAC-2.55 CKM and 33kV, 3Cx400sqmm U/G cable-1 KM for inter connection of 33kV Tangi-chandpur feeder with Tangi feeder.

Proposed Cost with Estimate Break-up:

		Total Amount	**₹ 1,70,88,384.93**
		Total Amount (In Cr)	**1.71**
Total estimated cost is Rs. 1.71 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 1.71 Cr. (For detailed BoQ refer Annexure- 11.10).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

- Ensuring safe, reliable, and quality power supply to consumers through N-1 connectivity of the 33 kV network.
- Since ring connectivity will be established, power supply can be restored from an alternate source during any breakdown or preventive maintenance work.

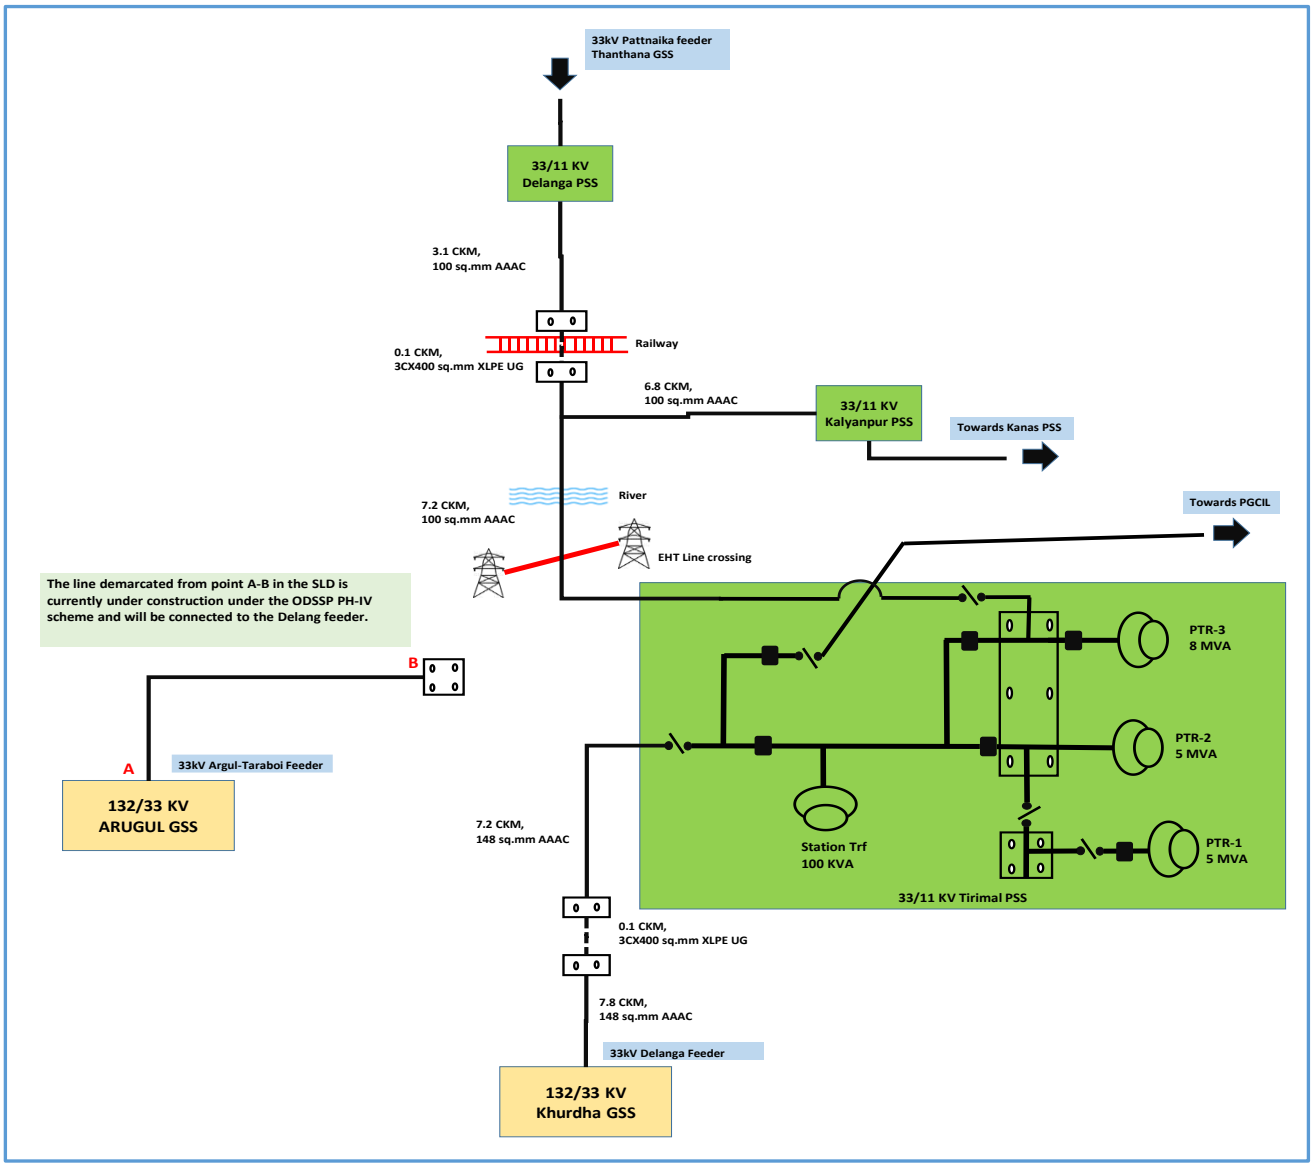
11. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Delanga Feeder:

Proposal:

Proposal for augmentation and refurbishment of 33kV Delanga feeder and interlink it with 33KV Argul Taraboi Feeder at Tirimal PSS.

Requirement/ Need of the proposal:

Objective:



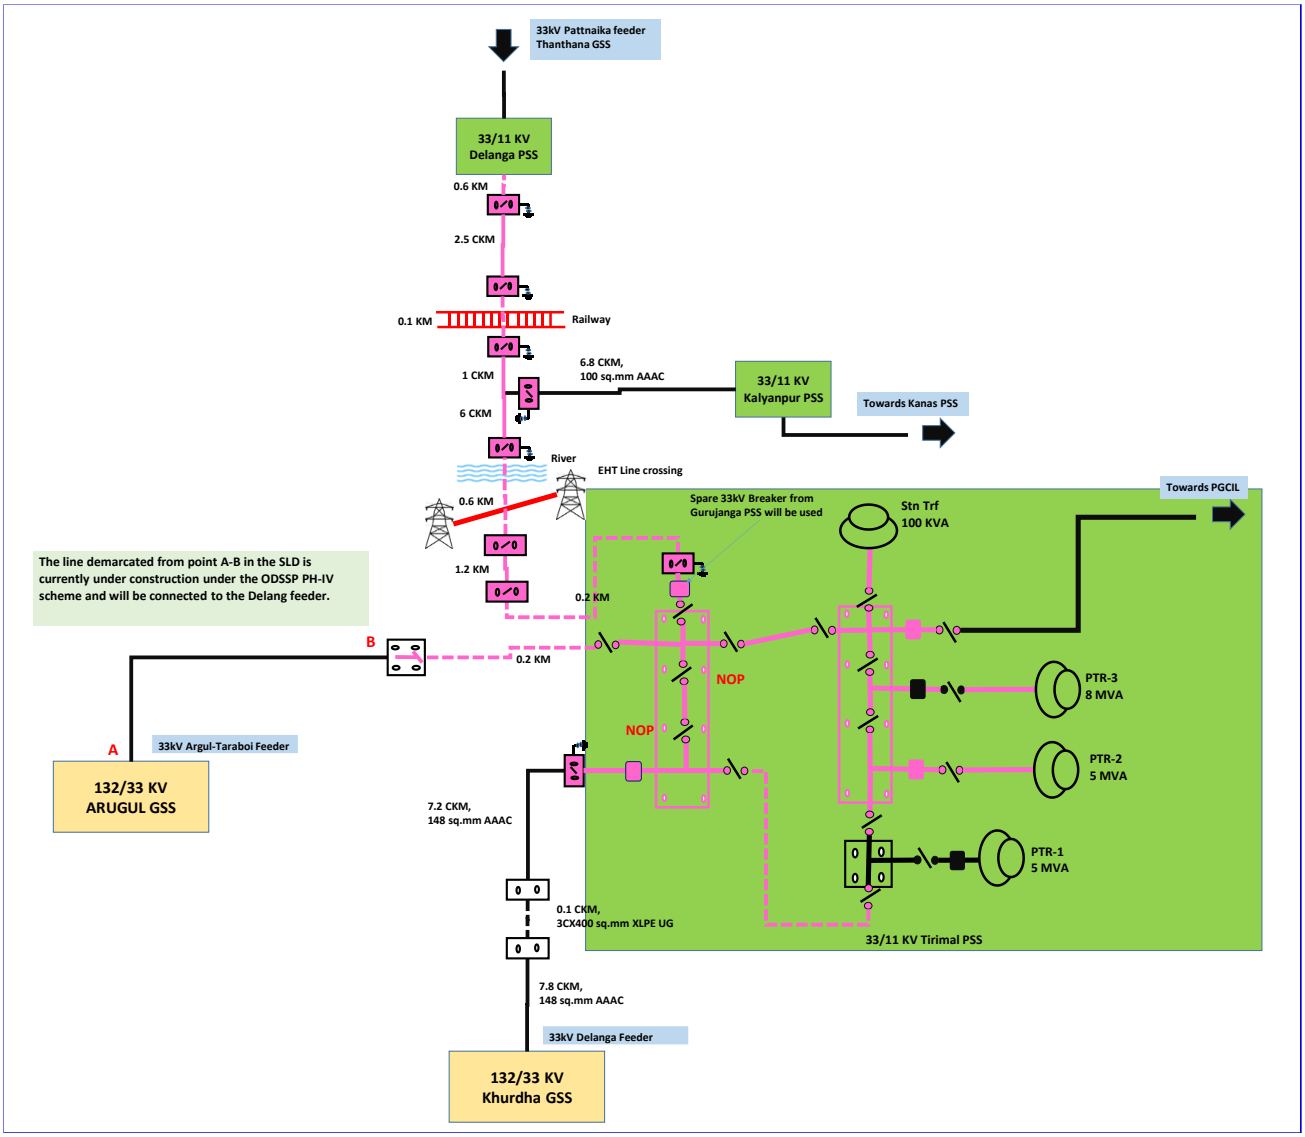
To maintain the reliability of power supply, reduce frequent interruptions and conductor snapping, strengthen the existing network by augmenting weak sections and replacing undersized conductors, and provide ring connectivity with the new 33 kV Delanga Feeder (under construction under ODSSP Ph-IV) emanating from Argul GSS.

Existing Scenario:

- Existing 33kV Delanga Feeder emanating from Khordha GSS having lower size conductor and is in unsafe condition between Tirimal PSS to Delanga PSS .
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.

- 33 kV feeder is overhead, lengthy and pass through dense vegetation, which affects the reliability of power supply in the area during any breakdown or maintenance work.
- Construction work of the 33 kV Argul–Taraboi Feeder from Argul GSS to the Tirimal tapping point is in progress under the ODSSP Ph-IV scheme.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Delanga feeder emanating from Khordha GSS are serving 22670 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 225 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Refurbishment of 33 kV Delanga Feeder from Tirimal PSS to Delanga PSS.
- Interlinking of the Proposed 33 kV Argul–Taraboi Feeder with the 33 kV Delanga Feeder at Tirimal PSS.

Proposed SLD:

Scope of Work:

a) Augmentation of 33 kV line of 100 Sq.mm. to 148 Sq.mm. -10.7 CKM

b) Laying of 33kV,3Cx400sqmm U/G cable – 1.4 km.

c) Existing 33kV Bus will be refurbished along with re-orientation of the breakers at Tirimal PSS for feeder interlinking.

d) One 33kV outdoor breaker will be installed for the 33kv outgoing feeder towards Delang PSS. The breaker will be shifted from Gurujanga PSS.

Proposed Cost with Estimate Break-up:

Total estimated cost is Rs. 7.24 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 7.24 Cr. (For detailed BoQ refer Annexure-11.11).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

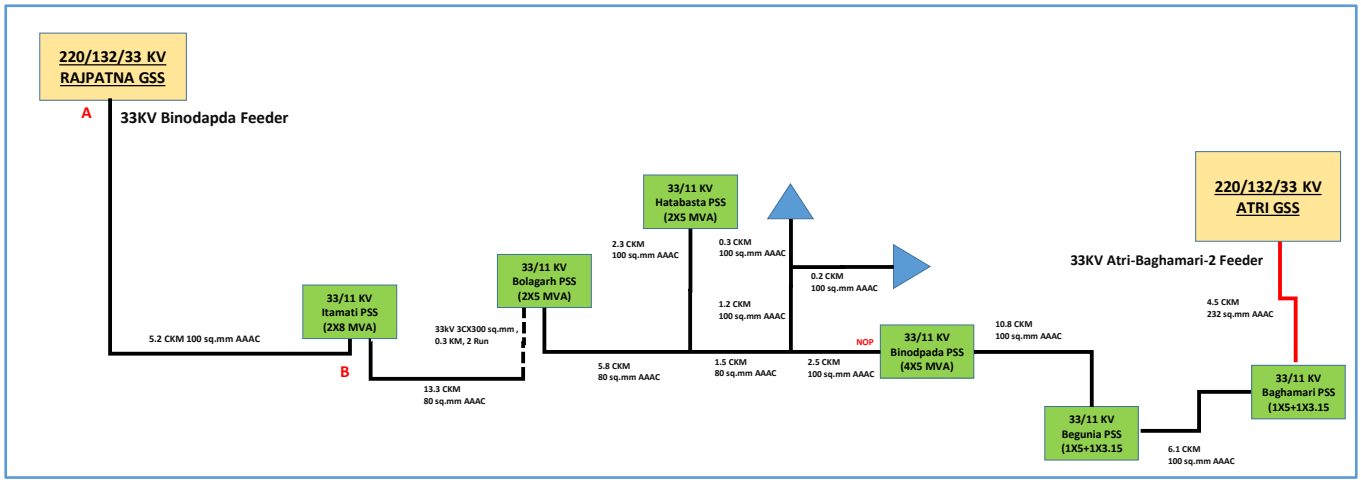
- Ensuring safe, reliable and quality power supply to the consumers with strengthning and N-1 connectivity of 33kV network.
- Ring connectivity will be established for Tirimal PSS.
- Tripping will be reduced due to installation of additional breaker for outgoing feeder for Delanga PSS.

12. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Binodpada Feeder:

Proposal:

Refurbishment for 33kV Binodpada feeder from Rajpatna GSS to Itamati PSS, to improve reliability of network and provide quality power.

Requirement/ Need of the proposal:



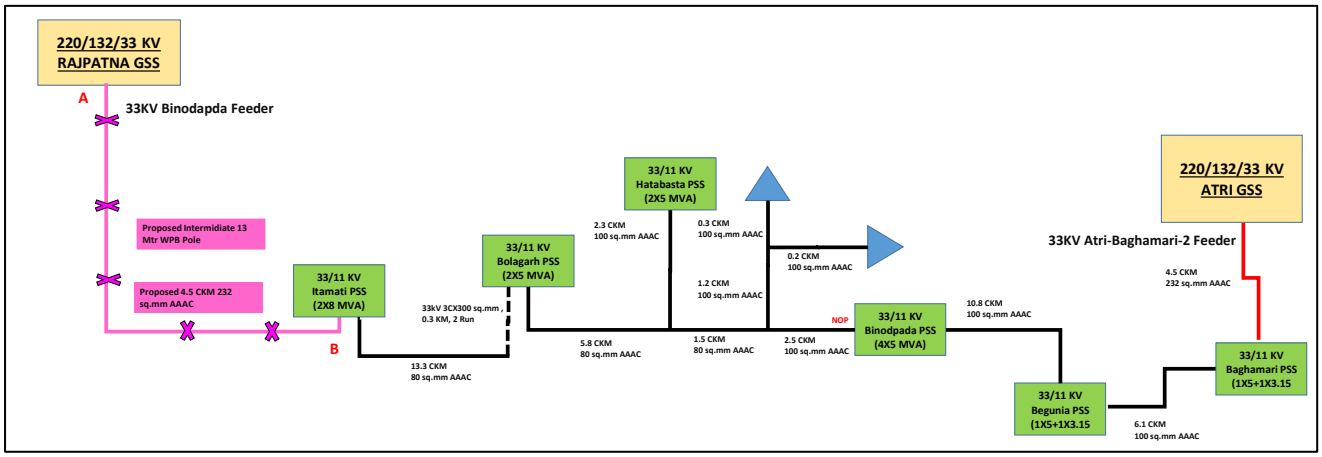
Objective:

To ensure reliable power supply to the Itamati Town area and cater to the load of Bolgarh PSS, Hatabasta PSS, and Binodpada PSS during N-1 contingency of the 33 kV Atri–Baghamari Feeder.

Existing Scenario:

- At present, the 33 kV Binodpada Feeder is emanating from Rajpatana GSS and supplying power to Itamati PSS, Bolgarh PSS, Hatabasta PSS, and some HT consumers. The feeder is connected through the existing 33 kV overhead network with a total line length of 32 CKM. In the existing linking line section, the portion of the feeder from Rajpatana GSS to Itamati PSS, having a line length of 4.7 CKM, consists of a mixed network of OH bare conductors and XLPE cable supported on 10 m PSC poles.
- Conductor are very old and in weak condition. Due to aging effect and brittleness, these conductors are snapping frequently.
- In addition, minimum ground clearance has not been maintained in several places over the feeder.
- During breakdown or maintenance of the 33 kV Atri–Baghamari-2 Feeder, the 33 kV Binodpada Feeder is unable to cater to the load due to the lower conductor size.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, the 33kV Binodpada feeder emanating from Rajpatna GSS are serving 34000 nos. consumers through existing network having lower-size conductors and further due to the ageing of conductors, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. The no. of trippings during the last year was 31 nos. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- Augmentation & refurbishment is proposed for 33kV Binodapada feeder (From Rajpatna GSS to Itamati PSS), to improve safe and reliable power supply.

Proposed SLD:

Scope of Work:

- Augmentation and refurbishment of existing 33kV feeder of length of 4.7 CKM using 232SQ.MM. -AAA XLPE covered Conductor and 13 Mtr WPB poles, from Rajpatana GSS to Itamati PSS.
- Intermediate poles for crossing of existing 11KV Line using 14 Mtr H-Poles.

Proposed Cost with Estimate Break-up:

Annexure-11.12	
TP CENTRAL ODISHA DISTRIBUTION LIMITED	
Name of the Cicle :-	BBSR-2
Name of the Division :-	NYED
Name of the Sub-Division : -	Nayagarh
Name of the Work :-	Proposal for refubrishment and augmentation of 33KV Binodpada Feeder.
Names of Schemes: -	**CAPEX 27-28**
Abstract of Estimate	

Sl. No.	Description	Gross
1	PART A: Augmentation of 4.2 KM 33kV O/H Line using 232SQ.MM. -AAA Conductor.	62,14,281.85
2	PART B: Construction of 6 nos. of 14 Mtr. H-Pole for exsiting 11kV OH line crossing.	8,12,531.82
3	PART C: Augmentation of 0.5 CKM 33kV O/H Line Length on 13 mtr H-Pole for Pin-Points and Cut-Points & 13 Mtr WPB Pole for DP using 232 SQ.MM. -XLPE AAA Covered Conductor.	13,09,418.73
4	PART D: Dismantling of Materials	2,13,577.72
5	**Total Gross**	**85,49,810.13**
Total estimated cost is Rs. 0.86 Cr.		

Cost Estimate: ₹ 0.86 Cr. (For detailed BoQ refer Annexure-11.12).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

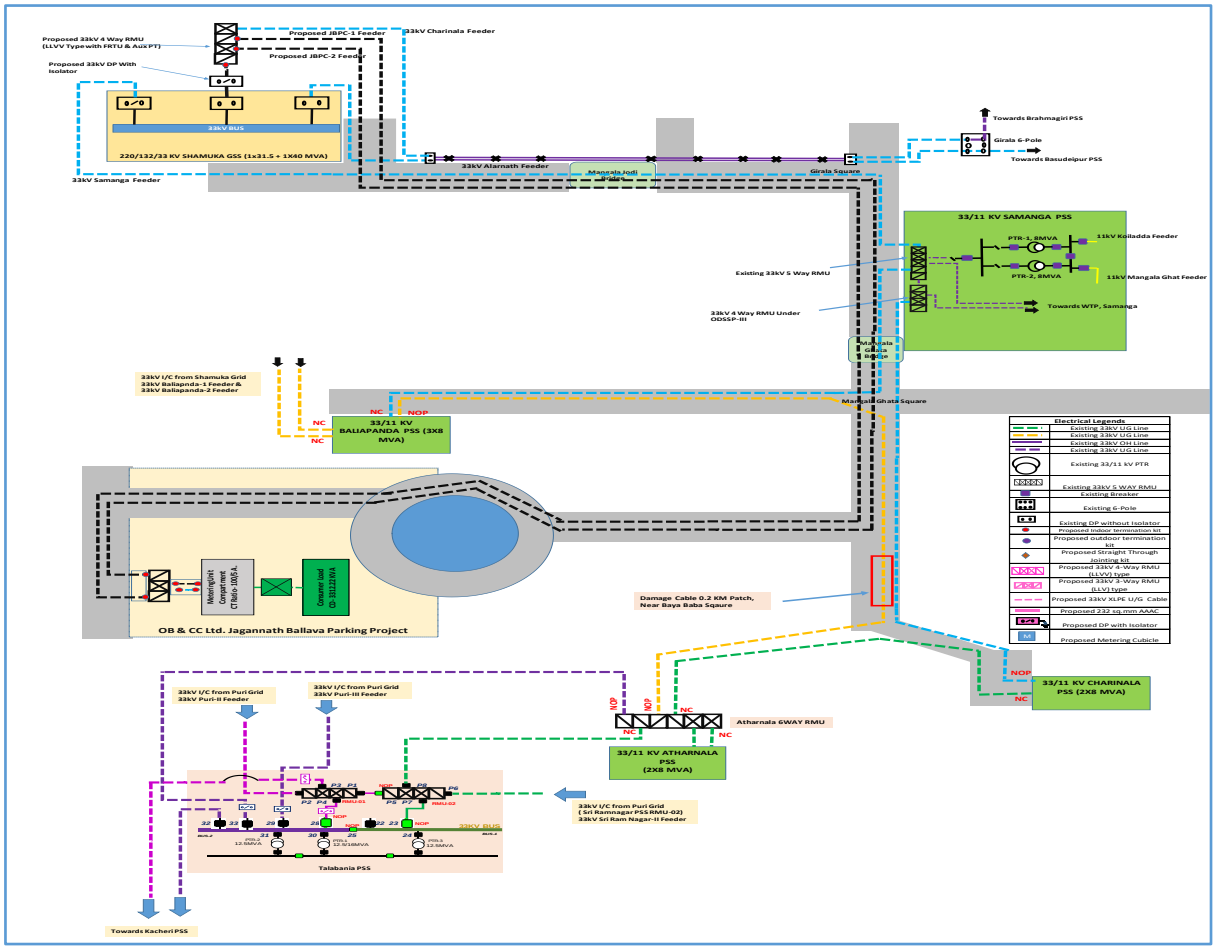
- Strengthening of 33kV Binodpada feeder to improve reliability of the network.
- Improved N-1 connectivity with 33kV Atri-Baghamari feeder, including Itamati PSS and other PSS.
- Ensuring reliable power supply of the Itamati town area.
- Reduction in transient tripping of the feeder due to use of XLPE covered conductor.

13. Proposal for reliability improvement of Puri town area by extension of 33kV JBPC Feeder:

Proposal:

Proposal for extension of 33kV JBPC feeder from JBPC to Atharnala PSS to Talabania PSS for reliability improvement in puri town area.

Requirement/ Need of the proposal:



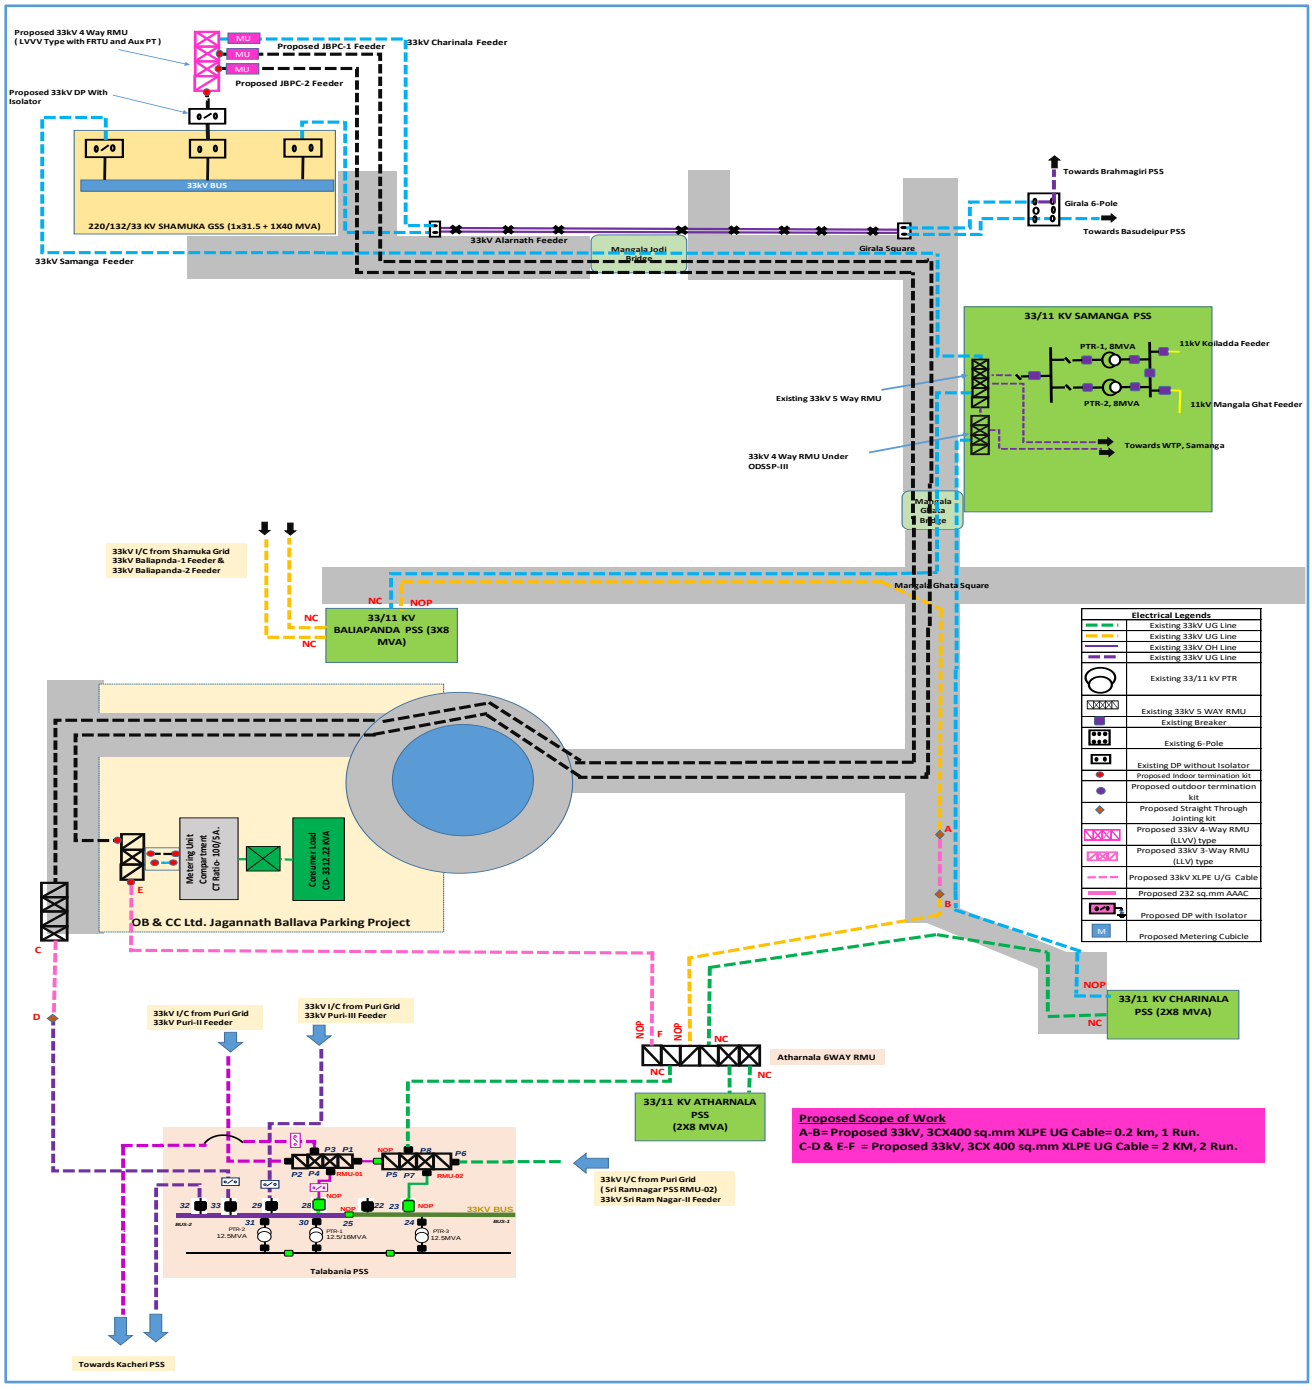
Objective:

To maintain reliability of power supply to Puri town area by extension of 33 KV JBPC feeder and providing N-1 connectivity.

Existing Scenario:

- In the existing scenario, 33/11 kV Talabania PSS, which supplies power to Grand Road, Mausima Temple, Shree Jagannath Temple, and several other critical installations in the Puri town area, is receiving power supply from Puri GSS.
- In the event of any issue at Puri GSS, there may be a delay in restoring power supply to Talabania PSS, which could affect the overall reliability of the Puri town area.
- Recently 33 kV HT consumer JBPC has charged with 2 Nos. UG feeders from Shamuka GSS which is near to Talabania PSS with a distsnce of 3 KM.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since Talabania PSS is depend on the Puri GSS, to have a better redundancy and to improve reliability , it is proposed to have additional source to Talabania PSS from Shamuka GSS via JBPC through interconnection.

Proposed Scenario:

- Ex33kV Interconnection is proposed in between JBPC and Talabania PSS for N-1 redundancy and improve reliability.

Proposed SLD:

Scope of Work:

1. Extension of 33 kV line using 3CX400 sqmm U/G Cable-4.2 KM (Single run).

Proposed Cost with Estimate Break-up:

Annexure-11.13

Names of Schemes: -		**TPCODL CAPEX (FY 27-28)**	
ABSTRACT OF ESTIMATE			
Sl. No.	**Part**	**Description**	**Amount**
1	A	PART A:- Supply & laying of 33kV, 3CX400 sq.mm XLPE U/G Cable =4.2 Km Without spare run.(Refer proposed SLD point A-B, C-D & E-F)	₹ 5,85,63,393.51
2	B	PART B:- Installation of 3 Nos. of metering cubicle for feeder out going.	₹ 9,67,777.64
		Total Amount	**₹ 5,95,31,171.15**
		Total Amount (In Cr)	**5.95**
Total estimated cost is Rs. 5.95 Crore. (On TPCODL Capex Scheme)			

Cost Estimate: ₹ 5.95 Cr. (For detailed BoQ refer Annexure-11.13).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

Benefit to the system and consumers:

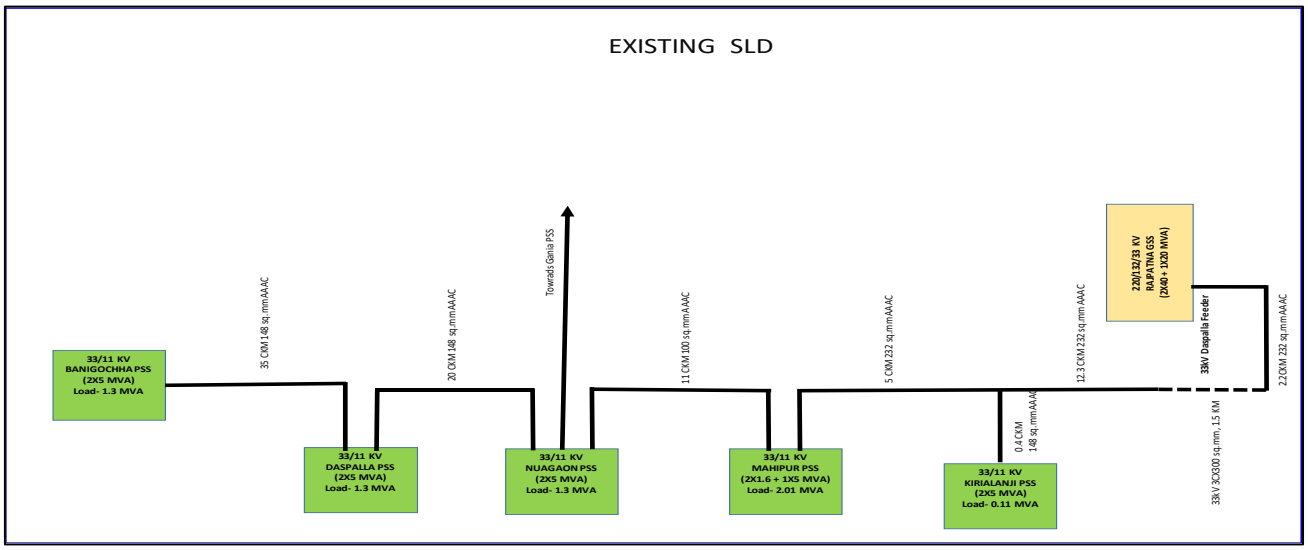
- Ensuring safe, reliable and quality power supply to the consumers of Puri town area with ring connectivity of 33kV network.

14. Proposal for reliability improvement by Augmentation and Refurbishment 33kV Daspalla Feeder:

Proposal:

Refurbishment for 33kV Daspalla feeder from Daspalla PSS to Banigocha PSS) to improve reliability of network and provide quality power supply.

Requirement/ Need of the proposal:



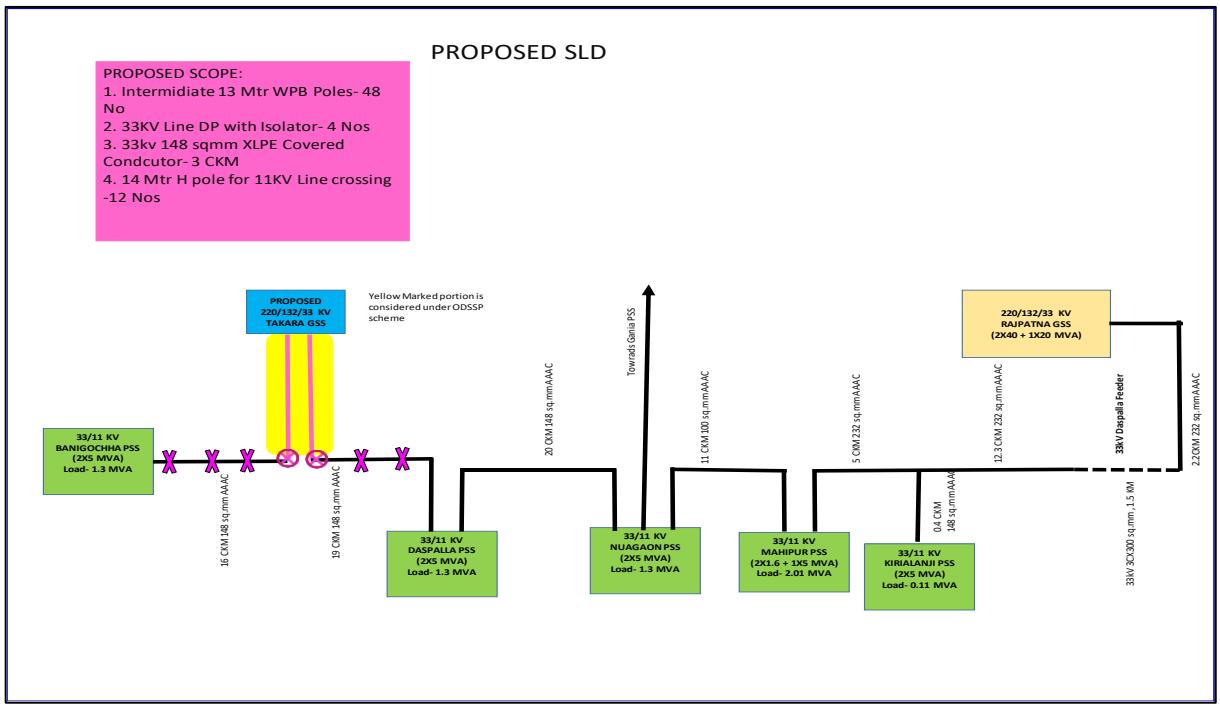
Objective:

To ensure reliable power to Banigocha area and as well as 2nd connectivity to Daspalla town from upcoming Dasplla GSS.

Existing Scenario:

- At present, Daspalla feeder is emanating from Rajpatana GSS and feeding power to Kirialanji PSS, Mahipur PSS, Nuagaon PSS, Daspalla PSS and Banigocha PSS. The feeder is connected through 33 overhead network with an existing line length of 87 CKM. In this area of existing linking line, part of the feeder from Daspalla PSS to Banigocha PSS with a line length of 35 CKM having mix network of OH Bare conductor & XLPE Conductor with 13 Mtr H-Pole.
- The feeder in unsafe condition due to theft of jointing plates from the H-Poles for which poles get breakdown even during small wind pressure and frequent tripping occurs due to passing through dense vegetation.
- At some portion of this feeder the ground clearance is not in safe condition due to long spans.
- Daspalla PSS as well as Banigocha PSS is radially connected to Rajpatana GSS.
- Considering the existing network condition, it is not in safe condition and being radial network affecting reliability of power supply.

Existing SLD:



Priority and Timeline of the Project:

Priority: Since at present, Part of the 33kV Daspalla feeder from Daspalla PSS to Banigocha PSS is serving 5917 nos. consumers through existing network however due to bare conductors in dense forest area, multiple joints, frequent faults and conductor snapping incidents are being observed, affecting the reliability of power supply. Additionally, inadequate ground clearance at several locations and vegetation encroachment along the feeder corridor pose safety concerns for the public as well as personnel. In the absence of reliability enhancement measures, consumers connected to the feeder will continue to face frequent and prolonged power supply interruptions.

Proposed Scenario:

- It is proposed for augmentation with feeder refurbishment, for identified portion of network with bare conductor sizes to XLPE Covered conductor.
- New intermediate poles has been proposed for maintaining safety ground clearance.
- New pole jointing plates with nut & bolts has been proposed for existing H-Pole refurbishment.

Proposed SLD:

Scope of Work:

1. Augmentation of existing line with 148sqmm XLPE Covered conductor -4.0 Ckm.
2. Proposed intermediate 13 Mtr WPB poles – 44 Nos.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.14		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Cicle :-		BBSR-2
Name of the Division :-		NYED
Name of the Sub-Division : -		Daspalla
Name of the Work :-		Proposal for Refubrishment of 33KV Daspalla to Banigocha Feeder
Names of Schemes: -		TPCODL CAPEX (FY 2027-28)
Abstract of Estimate		
Sl. No.	**Description**	**Gross**
1	Part A: Refubrishment of 33kV Line Length OF 35 CKM with 40 Mtr. Span using 148 SQ.MM. -XLPE AAA Covered Conductor using 13 Mtr WPB intermidiate pole.	1,05,67,383.52
6	**Total Gross**	**1,05,67,383.52**
Total estimated cost is Rs. 1.06 Cr. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 1.06 Cr. (For detailed BoQ refer Annexure-11.14).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

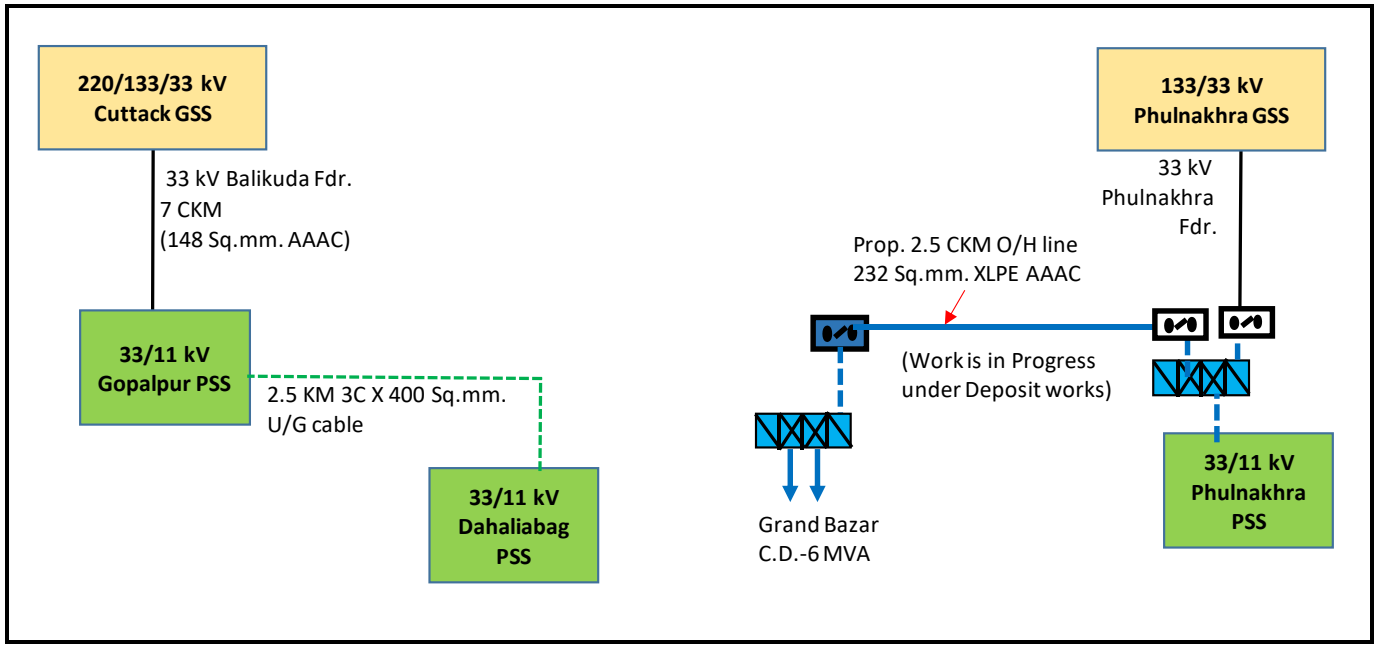
- Strengthening of 33kV Daspalla feeder to improve reliability of the network.
- Improved N-1 connectivity with 33kV Daspalla feeder, including Daspalla PSS and other PSS.
- Ensuring reliable power supply of the Banigocha and Daspalla town area.

15. Proposal for reliability improvement by Construction of interlinking line between 33kV Balikuda Feeder. & Phulnakhra Feeder:

Proposal:

Proposal for construction of new linking line between 33 kV Balikuda & Phulnakhra Fdr. to improve N-1 reliability.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, improve quality of power by providing N-1 connectivity between Dahaliabag & Phulnakhra PSS.

Existing Scenario:

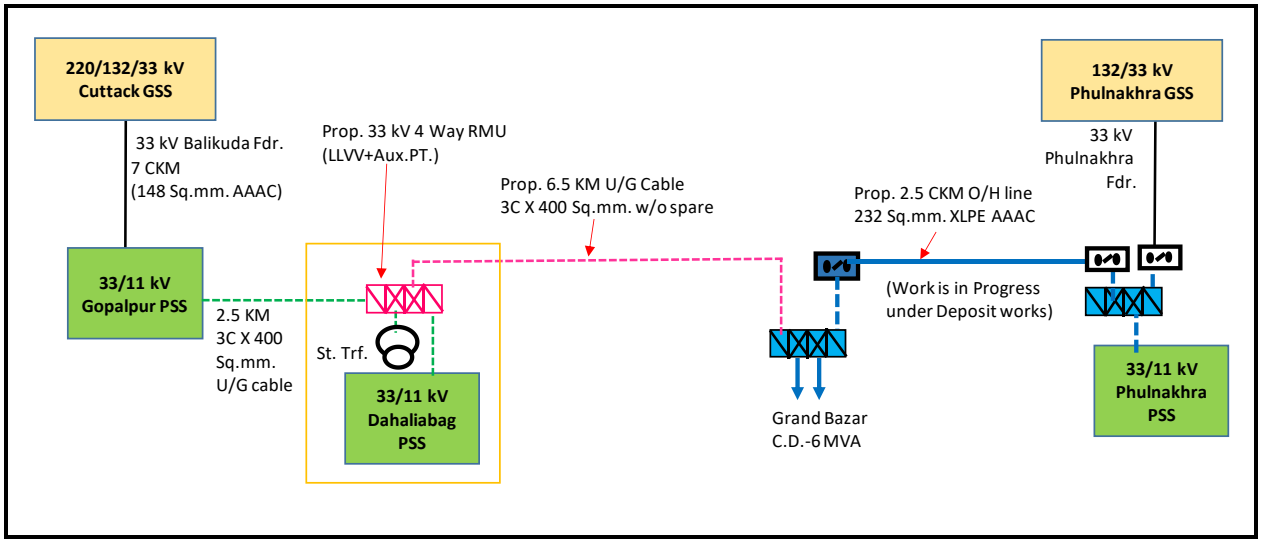
- At present, the 33 kV Balikuda feeder is emanating from 220/132/33 kV Cuttack GSS and supplying power to 33/11 kV Gopalpur and Dahaliabag PSSs.
- The 33 kV Phulnakhra feeder is emanating from 132/33 kV Phulnakhra GSS and supplying power to 33/11 kV Phulnakhra PSS.
- Both feeders are operating in a radial configuration, resulting in a single source of supply. Consequently, in the event of any fault, breakdown, or planned shutdown on either feeder, power supply to the associated substations and consumers is interrupted, adversely affecting the reliability and continuity of supply.

Existing SLD:

Priority and Timeline of the Project:

Priority: At present, the 33 kV Balikuda feeder emanating from 220/132/33 kV Cuttack GSS is serving 13,272 consumers, while the 33 kV Phulnakhra feeder emanating from 132/33 kV Phulnakhra GSS is serving 13,389 consumers. Both feeders are operating through an existing radial network configuration,

which adversely affects the reliability and continuity of power supply due to the absence of an alternate source arrangement.



During the last year, the 33 kV Balikuda feeder recorded 28 tripping incidents, whereas the 33 kV Phulnakhra feeder recorded 78 tripping incidents. However, Since Balikuda feeder is radial in nature, any fault, breakdown or planned shutdown on the feeder results in prolonged interruption of power supply to the downstream substations and consumers, thereby affecting system reliability and increasing outage duration.

In the absence of suitable reliability enhancement measures, consumers connected to Balikuda feeder will continue to experience frequent and prolonged power supply interruptions. Therefore, strengthening the network through the creation of an interconnection/ring main arrangement between the 33 kV Balikuda and 33 kV Phulnakhra feeders is essential to provide an alternate power source during contingencies, improve operational flexibility, reduce outage duration, enhance system reliability, and ensure safe, reliable, and quality power supply to the 26,661 consumers served by these feeders.

Proposed Scenario:

- Construction of new 33 kV interlinking line having length 6.5 CKM between 33 kV Balikuda & Phulnakhra feeder to improve N-1 reliability via Grand Bazar.
- Installation of 01 No. 33 kV, 4-Way RMU (LLVV) at Dahaliabag PSS is proposed for efficient feeder switching, network sectionalisation, and smooth system operation.

Proposed SLD:

Scope of Work:

- Interconnection of 33 kV Balikuda & Phulnakhra feeder is proposed to improve reliability.
- Mitigation of radial connectivity to Balikuda and Dahaliabag PSS.
- Supply and Laying of 6.5 KM 33 kV 3C X 400 Sq.mm. U/G cable without spare run.
- Supply and Installation of 1 No. of 33 kV 4 Way RMU at Dahaliabag PSS.

Proposed Cost with Estimate Break-up:

ABSTRACT OF ESTIMATE		
Sl. No.	**Description**	**Amount**
1	Part-A :- 1. Supply and Laying of 6.5 KM 33 kV 3C X 400 Sq.mm. U/G cable without spare. 2. Supply and Installation of 1 No. of 33 kV 4 Way RMU at Dhaliabag PSS	60,367,468.93
	Total Amount	**60,367,468.93**
	Total Amount (In Cr.)	**6.04**
Total estimated cost is Rs.6.04 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 6.04 Cr. (For detailed BoQ refer Annexure-11.15).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

a) The proposal has been made to maintain essential compliances with statutory safety regulations

b) Compliance with electrical safety regulation for distribution system.

c) Reduction of electrocution risk and public safety hazards.

d) Safe operation and isolation of the feeder.

e) Protection of electrical assets against lightening and surge related failure.

f) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

i) Second source will be available for both 33/11 kV Dahaliabag & Phulnakhra PSS.

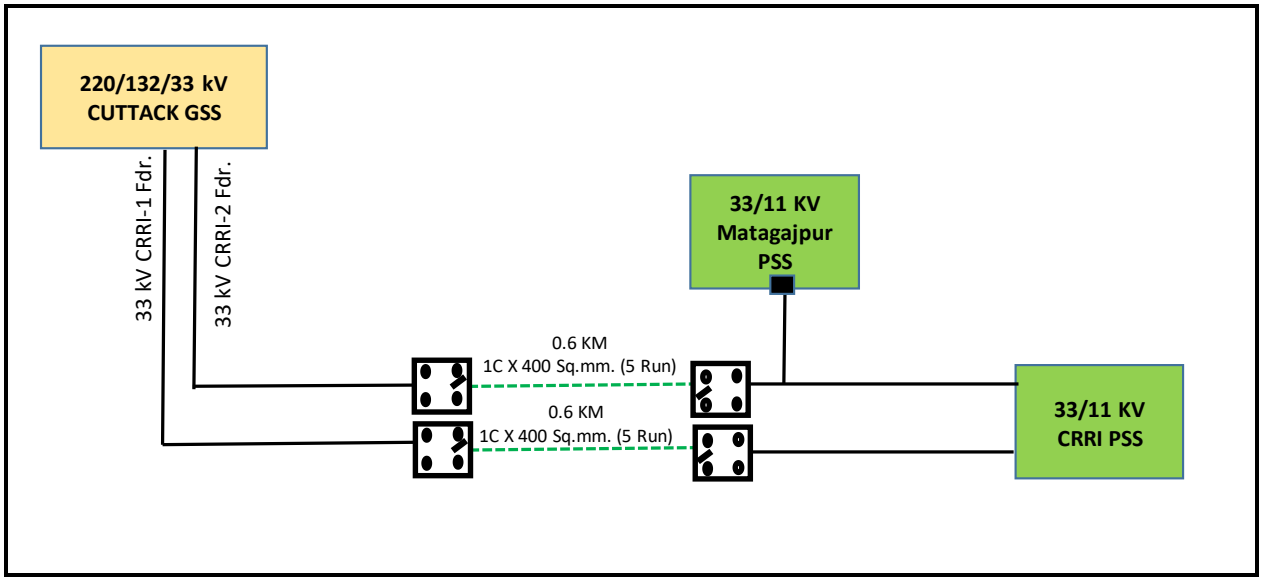
ii) Ensuring safe, reliable and quality power supply to the consumers by improveing N-1 reliability.

16. Proposal for reliability improvement by Construction of interlinking line between 33kV CRRI-1 Feeder. & Matagajpur PSS:

Proposal:

Proposal for construction of new linking line between 33 kV CRRI-1 feedder & Matagajpur PSS to improve N-1 reliability.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, improve quality of power by providing second source to Matagajpur PSS.

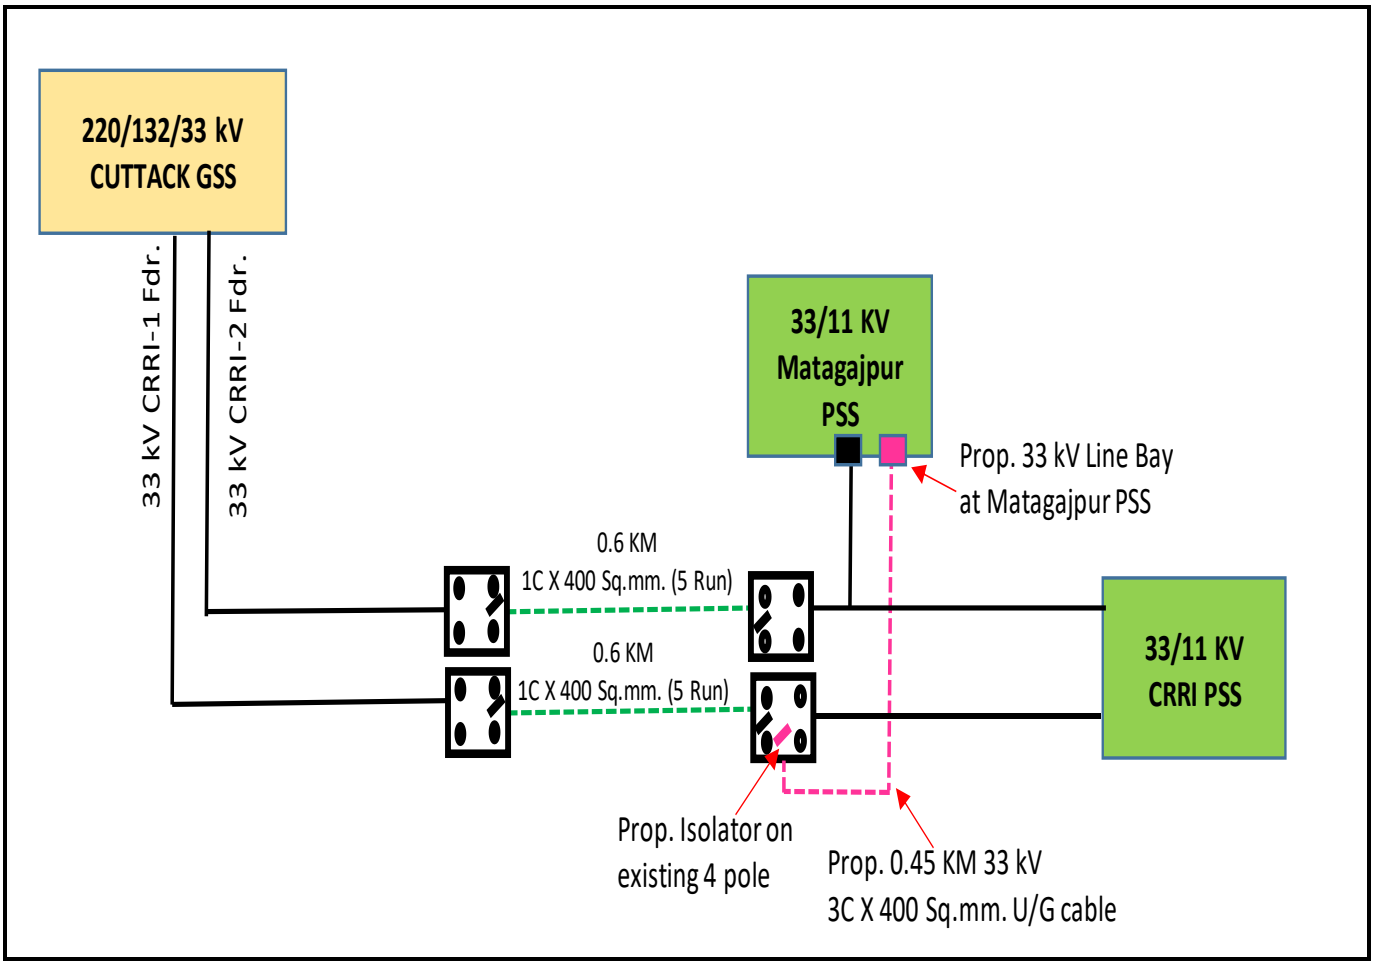
Existing Scenario:

- At present, the 33 kV CRRI-1 feeder is emanating from 220/132/33 kV Cuttack GSS and supplying power to 33/11 kV CRRI PSS.
- The 33/11 kV Matagajpur PSS is presently receiving power supply from the 33 kV CRRI-2 feeder through a T-off arrangement. As the substation is dependent on a single source of supply, any fault, breakdown, or planned shutdown on the parent feeder results in interruption of power supply to the entire area served by Matagajpur PSS.
- Further, Matagajpur PSS caters predominantly to an urban load centre, where uninterrupted and reliable power supply is of critical importance. The existing single-source arrangement limits operational flexibility and adversely affects system reliability during contingencies.

Existing SLD:

Priority and Timeline of the Project:

Priority: At present, 33/11 kV Matagajpur PSS is serving 3,699 consumers and is receiving power supply from the 33 kV CRRI-2 feeder through a T-off arrangement. The existing arrangement does not provide direct switching and isolation facilities at the substation end, making feeder operation, maintenance, and fault management difficult. Consequently, any fault or shutdown on the parent feeder directly affects the power supply to Matagajpur PSS and its downstream consumers.



During the last year, the 33 kV CRRI-1 feeder and 33 kV CRRI-2 feeder experienced 16 and 27 tripping incidents, respectively. Since Matagajpur PSS is dependent on a single source through a T-off arrangement, these interruptions have a direct impact on the reliability and continuity of power supply to the consumers served by the substation.

Further, considering that Matagajpur PSS caters to an urban load centre, the existing network configuration lacks the operational flexibility required for prompt fault isolation, restoration, and maintenance activities. The absence of direct control and an alternate supply arrangement increases outage duration and adversely affects service reliability.

Proposed Scenario:

- Construction of a new 33 kV interlinking line of approximately 0.45 CKM between the 33 kV CRRI-1 feeder and 33/11 kV Matagajpur PSS is proposed to improve N-1 reliability of the network.
- Construction of 01 No. 33 kV Outdoor Bay at Matagajpur PSS is proposed to facilitate smooth operation, switching, and network control.

Proposed SLD:

Scope of Work:

- Supply and Laying of 0.45 KM 33 kV 3Cx400 Sq.mm. U/G Cable without spare run from existing 4 pole at JICA to Matagajpur PSS.
- Construction of 01 No. of 33 kV Line Bay at Matagajpur PSS.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.16		
TP CENTRAL ODISHA DISTRIBUTION LIMITED		
Name of the Division :-	**CDD-II**	
Name of the Sub-Division : -	Badambadi	
Name of the Work :-	Proposal for 33 kV linking line of 0.45 KM from CRRI-1 Fdr. to Matagajpur PSS for N-1 connectivity	
Names of Schemes: -	TPCODL CAPEX (FY 27-28)	
ABSTRACT OF ESTIMATE		
Sl. No.	**Description**	**Amount**
1	Part-A:- Laying of 0.45 KM 33 kV 3Cx400 Sq.mm. U/G Cable without spare run from existing 4 pole at JICA to Matagajpur PSS.	4,243,461.88
2	Part-B :- Installation of 1 No. of 33 kV Line Bay at Matagajpur PSS (Refer SLD point)	3,153,527.78
	Total Amount	**7,396,989.66**
	Total Amount (In Cr.)	**0.74**
Total estimated cost is Rs. 0.74 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 0.74 Cr. (For detailed BoQ refer Annexure-11.16).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

a) The proposal has been made to maintain essential compliances with statutory safety regulations

b) Compliance with electrical safety regulation for distribution system.

c) Reduction of electrocution risk and public safety hazards.

d) Safe operation and isolation of the feeder.

e) Protection of electrical assets against lightening and surge related failure.

f) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

i) Second source will be available for 33/11 kV Matagajpur PSS.

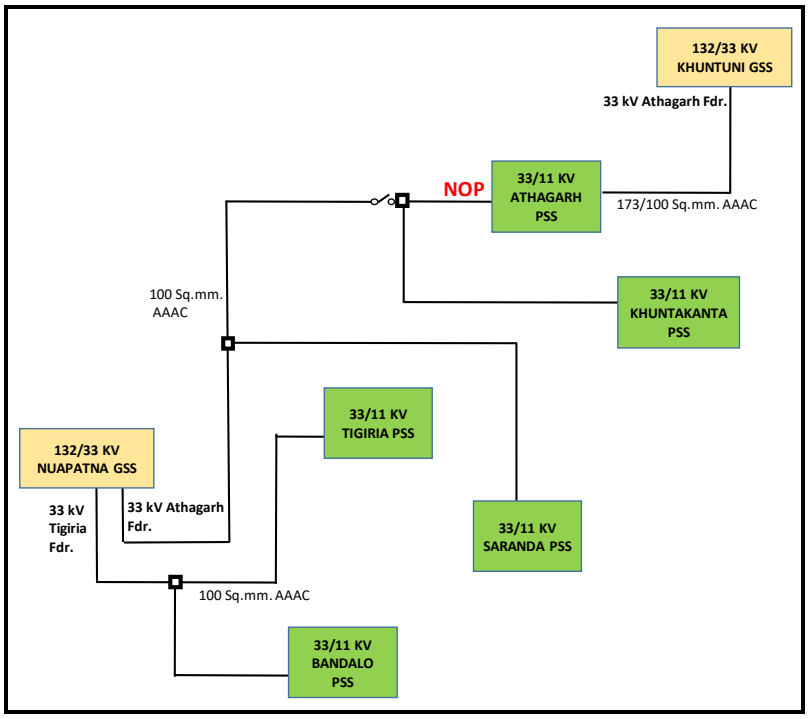
ii) Ensuring safe, reliable and quality power supply to the consumers by improveing N-1 reliability.

17. Proposal for reliability improvement by Construction of interlinking line between 33kV Athagarh Feeder. & Tigiria PSS:

Proposal:

Proposal for construction of new linking line between 33 kV Athagarh feedder & Tigiria PSS to improve N-1 reliability.

Requirement/ Need of the proposal:



Objective:

To maintain reliability of power supply, improve quality of power by providing second source to Tigiria PSS.

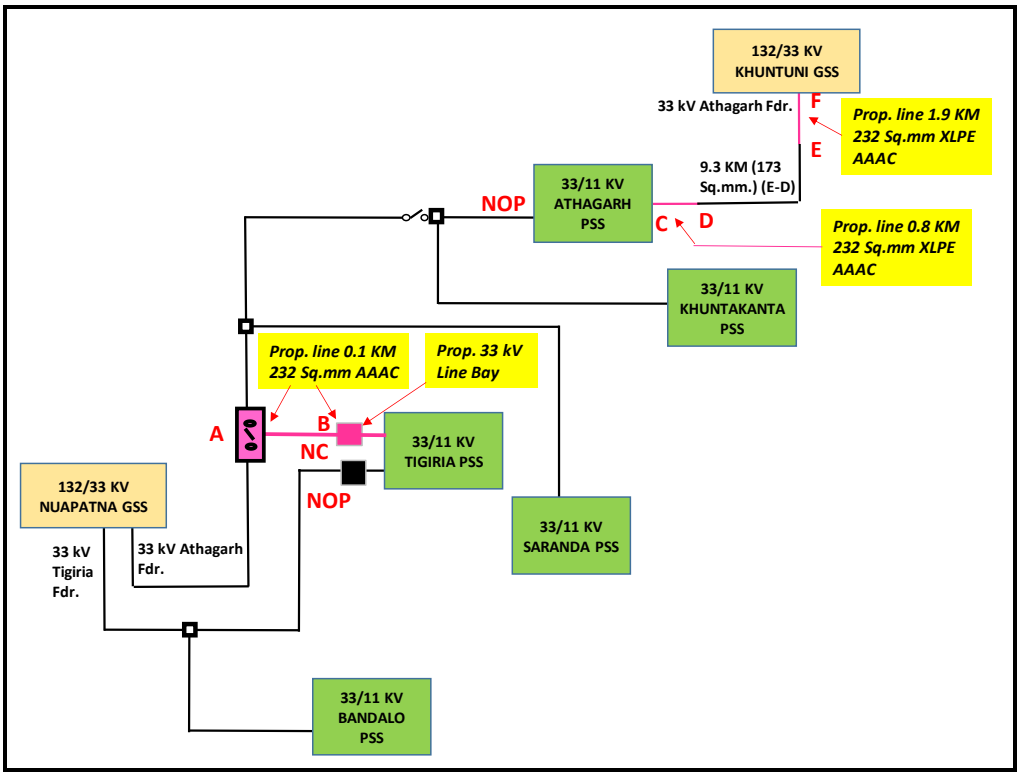
Existing Scenario:

- At present, the 33 kV Athagarh feeder is emanating from 132/33 kV Nuapatna GSS and supplying power to 33/11 kV Khuntakanta and Saranda PSSs.
- The 33/11 kV Tigiria PSS is presently availing power supply from the 33 kV Tigiria feeder through a T-off arrangement. As the substation is dependent on a single source of supply, any fault, breakdown, or planned shutdown on the parent feeder directly affects the power supply to Tigiria PSS.

Existing SLD:

Priority and Timeline of the Project:

Priority: At present, 33/11 kV Tigiria PSS is serving 7,651 consumers and is receiving power supply from the 33 kV Tigiria feeder through a T-off arrangement. The existing configuration provides only a single source of supply to the substation and does not offer direct switching and isolation facilities at the PSS end, making feeder operation, maintenance, and fault management difficult.



During the last year, the 33 kV Tigiria feeder and 33 kV Athagarh feeder recorded 98 and 128 tripping incidents, respectively, indicating reliability concerns in the existing network. Since Tigiria PSS is connected through a T-off arrangement, any fault, breakdown, or planned shutdown on the parent feeder directly affects the power supply to the substation and its downstream consumers, resulting in service interruptions and prolonged outage duration.

Further, as Tigiria PSS serves a growing sub-urban load centre, the existing network configuration lacks the operational flexibility required for efficient load management, prompt fault isolation, and restoration of supply during contingencies. The absence of direct control facilities at the substation further complicates maintenance activities and increases restoration time.

Proposed Scenario:

- Augmentation of 2.7 CKM 33 kV line using 13 Mtr. WPB Pole & 232 Sq.mm. XLPE AAAC for strengthening of 33 kV Athagarh feeder emanating from Khuntuni GSS.
- Installation of 01 No. of 33 kV outdoor at Tigiria PSS for smooth operation and switching.
- Supply & laying of 0.25 CKM 33 kV 3CX400 Sq.mm. U/G cable (2 run) (back to back arrangement) for 132 kV line crossing to ensure safety.

Proposed SLD:

Scope of Work:

- Interconnection of 33 kV Athagarh & Tigiria feeder is proposed to improve reliability & double source connectivity at Tigiria PSS.
- Construction of 0.1 KM 33 kV O/H line with 232 Sq.mm. AAAC.
- Installation of 1 No. of 33 kV Line Bay at Tigiria PSS.
- Strengthening of 33 kV Bus at Tigiria PSS.

- Shifting of 33/0.4 kV Station Transformer.
- Augmentation of 2.7 KM 33 kV line with 232 Sq.mm. XLPE AAAC of Athagarh Fdr. emanating from Khuntia Grid.
- Laying of 0.25 KM 33 kV 3Cx400 Sq.mm. U/G Cable (2 Run) with Back to back arrangement for 132 kV line crossing.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.17		
TP CENTRAL ODISHA DISTRIBUTION LIMITED

ABSTRACT OF ESTIMATE		
Sl. No.	**Description**	**Amount**
1	Part-A :- Construction of 0.1 KM 33 kV line with 232 Sq.mm. AAAC (Refer SLD point- A-B)	579,784.10
2	Part-B :- 1. Installation of 1 No. of 33 kV Line Bay at Tigiria PSS (Refer SLD point- B) 2. Strengthening of 33 kV Bus at Tigiria PSS. 3. Shifting of 33/0.4 kV Station Transformer.	4,448,446.85
3	Part-C:- Augmentation of 2.7 KM 33 kV line with 232 Sq.mm. XLPE AAAC of Athagarh Fdr. emanating from Khuntia Grid. (Refer SLD)	8,139,352.53
4	Part-D:- Laying of 0.25 KM 33 kV 3Cx400 Sq.mm. U/G Cable (2 Run) with Back to back arrangement for 132 kV line crossing.	3,362,073.42
	Total Amount	**16,529,656.90**
	Total Amount (In Cr.)	**1.65**
Total estimated cost is Rs. 1.65 Crore. (On TPCODL Capex Scheme)		

Cost Estimate: ₹ 1.65 Cr. (For detailed BoQ refer Annexure-11.17).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

a) The proposal has been made to maintain essential compliances with statutory safety regulations
b) Compliance with electrical safety regulation for distribution system.
c) Reduction of electrocution risk and public safety hazards.
d) Safe operation and isolation of the feeder.
e) Protection of electrical assets against lightening and surge related failure.
f) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

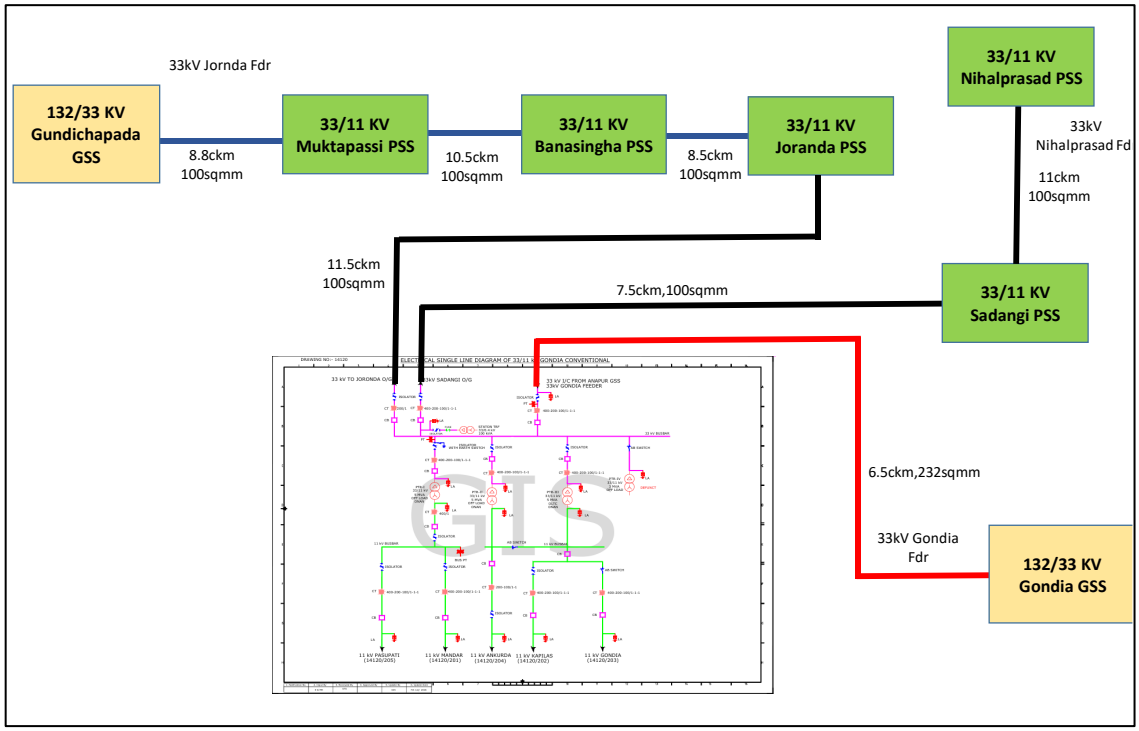
i) Second source will be available for 33/11 kV Tigiria PSS.
ii) Ensuring safe, reliable and quality power supply to the consumers by improveing N-1 reliability.

18. Proposal for reliability improvement by Construction of interlinking line between 33kV Joranda Feeder. & 33kV Nihalpasad Feeder:

Proposal:

Proposal of new 33kV linking line from 33kV Nihaprasad Feeder to 33kV Joranda Feeder, which improve network reliability at Gondia PSS and Nihalprasad Joranda area by provide additional source and improving voltage profile.

Requirement/ Need of the proposal:



Objective:

To ensure reliable power supply and improve N-1 connectivity for Nihalparasad & Joranda area.

Existing Scenario:

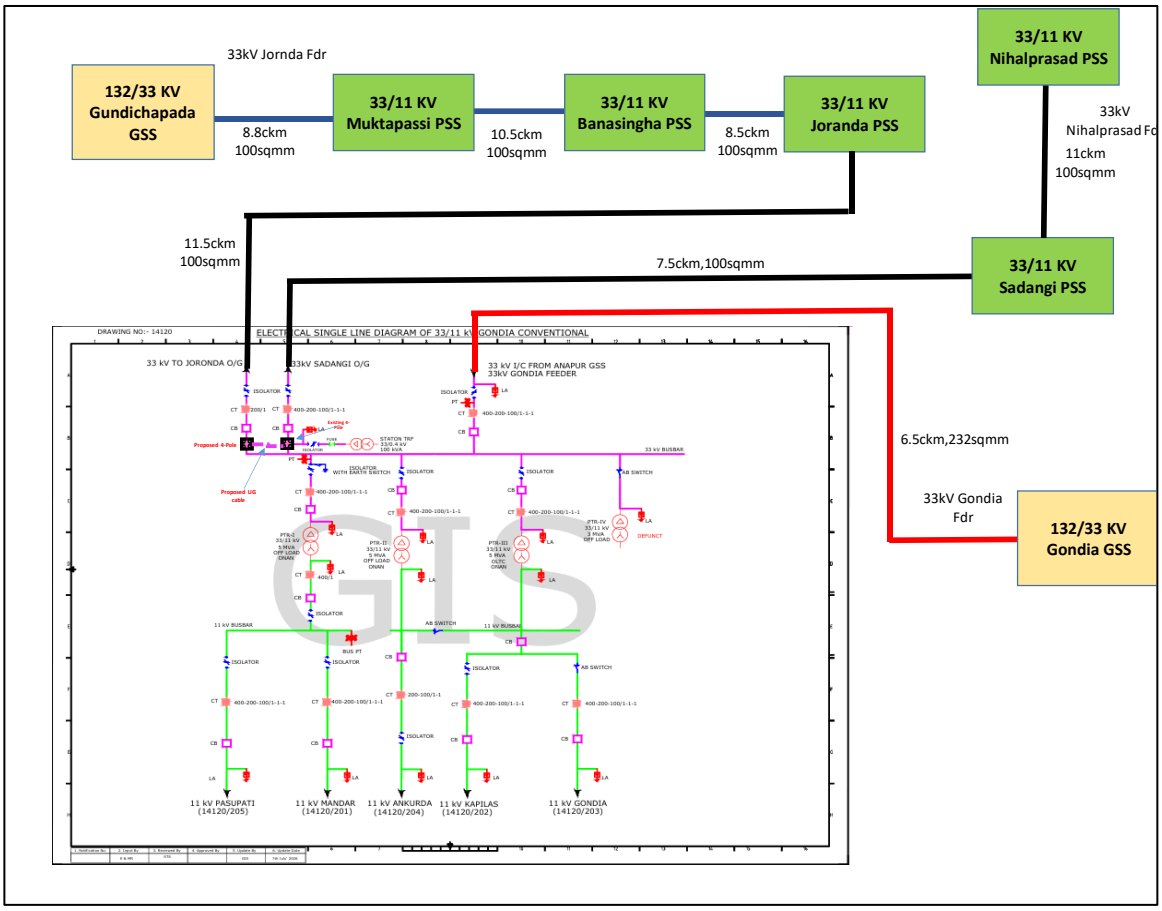
- At present, the existing 33 kV Joranda feeder, emanating from Gundichapada GSS, supplies power to the 33/11 kV Muktapassi,Banasingha PSS and Joranda PSS. The feeder caters to a consumer base of approximately 16851 consumers and is radial in nature and considerably lengthy.
- At present, the existing 33 kV Gondia feeder, emanating from Gondia GSS, supplies power to the 33/11 kV Gondia, Mandar(Sadangi) PSS and Nihalprasad PSS. The feeder caters to a consumer base of approximately 22,867 consumers and is radial in nature and considerably lengthy.
- The existing 33 kV Joranda feeder is highly lengthy, with the Muktapassi PSS, Banasingh PSS, Joranda PSS connected radially from the feeder. Consequently, in the event of any fault or interruption in the feeder, all downstream PSSs remain without power supply until the fault is identified and rectified, resulting in prolonged interruption to a large consumer base.

Existing SLD:

Priority and Timeline of the Project:

Priority: During the last year, the feeder recorded 181 instances of tripping, indicating a significant level of interruption in the existing network. Owing to the considerable length of the feeder, identification and localization of faults require substantial time. Further, since the downstream PSSs are radially connected, any fault or interruption in the 33 Joranda feeder causes the affected downstream area to remain without power supply until the fault is identified, isolated, and the feeder is restored.

The existing arrangement, therefore, results in frequent and prolonged power supply interruptions affecting a large consumer base of 22,867 consumers. The absence of an alternate source also restricts the possibility of quick restoration of supply during contingencies, thereby adversely affecting the overall reliability and continuity of power supply.



In view of the above, reliability enhancement of the existing network through provision of an alternate source of supply is essential. Establishing an interconnection between the 33/11 kV Gondia PSS and Joranda PSS, will provide an alternate source to the downstream network. This arrangement will enable back-feeding of the affected area during outages of the 33kV Nihalprasad feeder, facilitate faster restoration of supply, reduce the duration and extent of interruptions, and substantially improve the reliability, continuity, and operational flexibility of the distribution system.

The proposed measure is therefore considered necessary to strengthen the existing network and ensure more reliable power supply to the consumers presently dependent on the long radial 33 kV Joranada feeder.

Proposed Scenario:

- Construction of new 33kV linking line will provide addition 33kV source from Gondia GSS to Nihalprasad & Joranda area.
- After execution of proposal, during any breakdown or maintenance of existing 33kV feeders part load of the industrial area will restore which will improve network reliability of power supply.

Proposed SLD:

Scope of Work:

1. Construction of 33kV line using 3Cx400sqmm- 0.120Ckm.
2. Installation of 33kV 4-Pole-1Nos.

Proposed Cost with Estimate Break-up:

ANNEXURE-11.18	
TP CENTRAL ODISHA DISTRIBUTION LIMITED	
Name of the Division :-	**DED (Dhenkanal)**
Name of the Work :-	***Reliability of 33kV NIhalprasad feeder by linking of 33kV Joranda Feeder in Gondia PSS :*** Linking of 33kV Nihalprasad feeder to 33kV Jornada Feeder, improve network reliability by improve voltage profile, reduction in feeder length and reduction technical loss of network.

Scope of work:-	Proposal Details 1.33kV UG Cable -120mtr 2.4-Pole-1nos
Names of Schemes: -	TPCODL CAPEX (FY 2027-28)

ABSTRACT OF ESTIMATE

Sl. No.	Part	Description	Amount
1	A	Standard BoQ and Estimate for 33kV 3C, 400sqmm UG Cable without spare	₹ 7,99,942.46
2	B	Standard BoQ and Estimate for 33 KV 4 Pole using WPB GI Pole 160x152 (13Mtr. Long) with One No. of Isolator and LA Set	₹ 5,39,712.09
3	C	33kV Line Length with 40 Mtr. Span using 232 SQ.MM. -XLPE AAA Covered Conductor	₹ 7,41,229.40
		Total Amount	**₹ 20,80,883.94**
		Total Amount (In Cr)	**₹ 0.21**

Cost Estimate: ₹ 0.21 Cr. (For detailed BoQ refer Annexure-11.18).

i. All rates considered in the estimate as per the Cost Data Book (CDB) approved by Energy Department (GoO), dt: 05.05.2026

ii. For items which are not covered under approved CDB, material supply, civil and erection rate have been considered as per latest Rate Contract (RC) after competitive bidding or based on Budgetary Quotations from OEMs.

Statutory and Safety Requirements:

The proposal has been made to maintain essential compliances with statutory safety regulations

a) Compliance with electrical safety regulation for distribution system.

b) Reduction of electrocution risk and public safety hazards.

c) Safe operation and isolation of the feeder.

d) Protection of electrical assets against lightening and surge related failure.

e) Improvement in operational safety for maintenance personnel and public.

Benefit to the system and consumers:

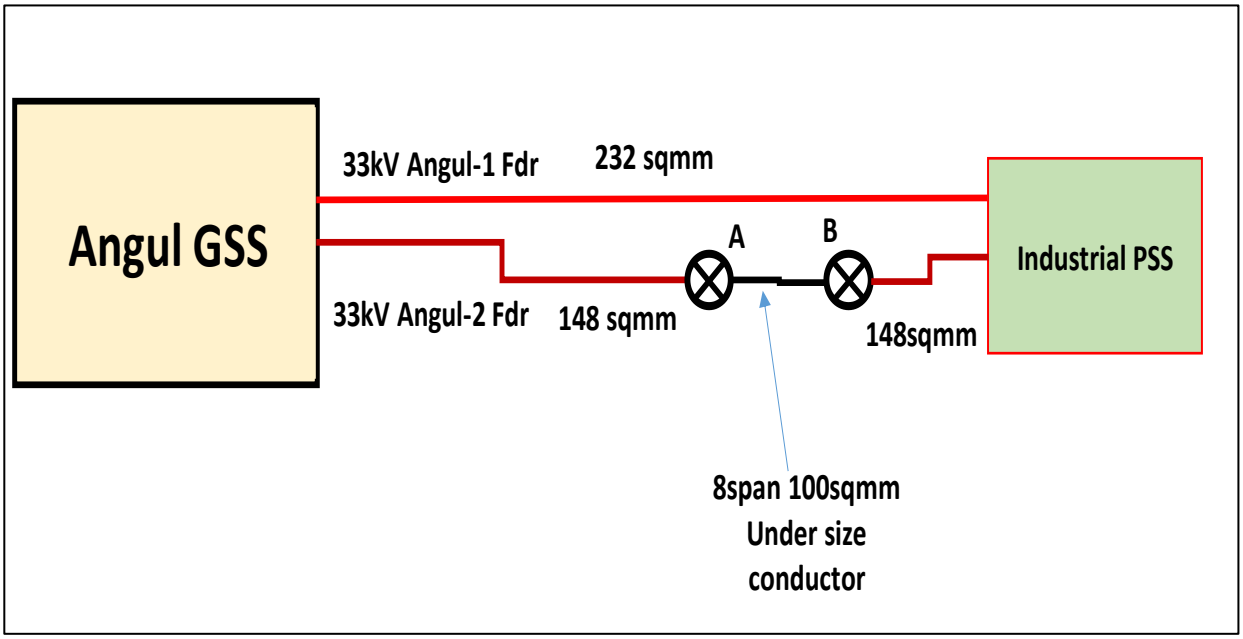
- Second source will be available for both 33/11 kV Joranda & Gondia PSS.
- Ensuring safe, reliable and quality power supply to the consumers with by improve N-1 reliability.

19. Proposal for reliability improvement by Augmentation of 33kV Angul-2 Feeder:

Proposal:

Proposal for Augmentation of 33kV Angul-2 feeder for reliability improvement.

Requirement/ Need of the proposal:



Objective:

To ensure reliable power supply by Augmentation of 33kV Angul-2 Feeder.

Existing Scenario:

- At present, Existing 33kV Angul-2 feeder is emanating from Angul GSS and feeding power supply to Industrial PSS and Bantala PSS. Feeder having conductor size of 148 sq.mm and in middle 8span 100sqmm which causing overloading during N-1 scenario.
- 33kV Angul-2 feeder is emanating from Angul GSS and feeding power supply to PSS and HT consumer.
