Scheme Name: Smart Meter IT Infrastructure

1. Proposal

Background

TPWODL, from FY22-23 till now has deployed approximately **9.5 lakh Smart Meters** across its licensed distribution area and is undertaking large-scale expansion under the Smart Metering Program. The cumulative smart meter base is projected to increase **to 15 lakh Smart Meters by FY 2028**, resulting in considerable growth in connected metering endpoints requiring real-time monitoring, data acquisition, storage, analytics, and integration with utility business systems.

Financial Year	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028

Existing Scenario

Smart Meter IT infrastructure which hosts **Head End System (HES)** and **Meter Data Management System (MDMS)** and associated components was initially designed to accommodate **5 lakh smart meters** and gradually enhanced inline with filed installation throughout the years and presently manages ~ **9.5 lakh meters**. This enhancement of infrastructure along with Solution which has greatly contributed to smooth functioning of Smart Metering environment.

TPWODL's smart meter deployment roadmap envisages a sustained year-on-year increase in meter installations, necessitating a corresponding expansion of the underlying IT infrastructure. As the smart meter base is projected to reach **15 lakh consumers**, the existing ecosystem will require augmentation of compute resources, storage capacity, database infrastructure, application servers, system integration platforms, and communication networks to ensure seamless operations.

Without the proposed infrastructure enhancement, the growing volume of meter data and system transactions is expected to place significant stress on the existing environment, leading to:

- Increased processing delays in meter data acquisition and validation.
- Higher latency in billing, reporting, and analytics functions.
- Degradation in database performance due to rising transaction volumes.
- Reduced responsiveness of HES, MDMS, and consumer-facing applications.
- Enhanced requirements for cybersecurity, data protection, and backup infrastructure.
- Challenges in maintaining high availability, business continuity, and disaster recovery standards.
- Limited scalability to support future smart grid initiatives and advanced digital utility applications.

2. Scope of Work

Based on existing scenario, proposed Smart Meter IT Infrastructure augmentation is critical to ensure a **scalable, secure, resilient, and future-ready digital backbone** capable of supporting TPWODL's expanding smart metering ecosystem and delivering reliable services to consumers.

The proposed Smart Meter IT Infrastructure project aims to:

- Ensure seamless scalability of HES and MDMS platforms up to 15 lakh smart meters.
- Support future smart grid initiatives and digital utility transformation.
- Enable near real-time acquisition and processing of consumer energy data.
- Improve billing efficiency and reduction of AT&C losses.

- Enhance system reliability, cybersecurity, backup and recovery capabilities.
- Create a future-ready IT backbone for advanced analytics, demand response and energy management.

The infrastructure augmentation is therefore a critical enabler for realizing the benefits envisaged under the Smart Metering Program. The scope includes procurement, installation, integration, configuration, testing and commissioning of IT infrastructure required to support approximately **15 lakh Smart Meters** across the distribution network.

3. Physical Target:

TPWODL targets to complete all the above-mentioned activities under the scheme within March 2028.

4. Benefit to the System and Consumers

Benefit to Utility	Automated meter operations, real-time grid visibility, advanced analytics, stronger revenue protection, and a scalable infrastructure supporting 15 lakh smart meters, all backed by high availability, disaster recovery, and enhanced cybersecurity for reliable and secure utility operations.
Benefit to Consumers	Accurate and transparent billing, improved customer service, real-time energy usage visibility, faster outage restoration, and readiness for future smart energy services such as Time-of-Day tariffs, demand response, EV integration, and distributed energy resources.

The Smart Meter IT Infrastructure project is essential for supporting the projected growth of the smart metering ecosystem from the current level to 15 lakh meters by FY 2028. The proposed infrastructure enhancement will ensure

uninterrupted operation of HES and MDMS platforms, improve operational efficiency, strengthen cybersecurity, enable advanced analytics, and deliver reliable smart metering services to consumers while supporting the utility's long-term digital transformation objectives.

3	1030852	Crusher Dust filling	Backfilling with Crusher Dust procured externally including compaction of backfill by watering and tamping with approved hand or mechanical tampers. (mode of measurement will be Pre & Post work levels.Voids to be deducted at 20% if on truck measurement))	M3	44.00	700.00	30,800.00
4	1030018	P/L dry rubble soling	Providing and laying 225 or 300 mm thick dry rubble soling with approved quality stones including filling gaps with small chips ramming with hand rammer etc. complete.	M3	20.00	1,765.00	35,300.00
5	1031053	P and F paver blocks 60mm	Providing and laying 60 mm thick factory made chamfered edge interlocking Cement Concrete paver blocks of M-25 grade with approved color design & pattern in footpath, parks, lawns, drive ways or light traffic parking etc, of required strength, thickness & size/ shape, made by table vibratory method using mould, laid in required colour & pattern over 50mm thick compacted bed of sand, compacting and proper embedding/laying of inter locking paver blocks into the sand bedding layer through vibratory compaction by using plate vibrator, filling the joints with sand and cutting of paver blocks as per required size and pattern, finishing and sweeping extra sand. complete all as per direction of Engineer-in-Charge. The side joints / Open ends should be filled / sealed by M-15 grade concrete as required etc.	M2	64.00	1,200.00	76,800.00
6	1031056	P and L PCC M10 (1:3:6) grade	Providing and laying in position cement concrete of grade M-10 including the cost of centring and shuttering - All level : 1:3:6 (1 Cement : 3 coarse sand (Zone - III) : 6 graded stone aggregate 20 mm nominal size).	M3	3.00	6,500.00	19,500.00
7	1031057	P and L PCC M15 (1:2:4) grade	Providing and laying in position cement concrete of grade M-15 including the cost of centring and shuttering - All level : 1:2:4 (1 cement : 2 coarse sand (Zone - III) : 4 graded stone aggregate 20 mm nominal size)	M3	13.40	6,800.00	91,120.00
8	1030329	M25 with requi slump for Raft/footings	Providing and placing to correct line and level, in position, machine mixed reinforced cement concrete RCC of grade M25 with required slump for Raft / footings at all levels including vibrating, curing, providing construction joints, leaving cut-outs/ pockets, placing of inserts/ embedments, dewatering wherever necessary etc., complete all as per drawing , including cost of providing form work for all shapes (including steel plate/ply wood shuttering, strutting, steel scaffolding etc.), but excluding the cost of providing reinforcement, inserts / embedments, and as directed by the ENGINEER	M3	12.00	8,500.00	1,02,000.00
9	1030330	RCC of grade M25 for Pedes, col, walls	Providing and placing to correct line and level, in position, machine mixed reinforced cement concrete RCC of grade M25 with required slump for Pedestals, columns, walls at all levels including vibrating, curing, providing construction joints, leaving cut-outs/ pockets, placing of inserts/ embedments, dewatering wherever necessary etc., complete all as per drawing , including cost of providing form work for all shapes (including steel plate/ply wood shuttering, strutting, steel scaffolding etc.), but excluding the cost of providing reinforcement, inserts / embedments, and as directed by the ENGINEER	M3	9.00	8,800.00	79,200.00
10	1030025	RCC of grade M25 for Beams / slabs	Providing and placing to correct line and level, in position, machine mixed reinforced cement concrete RCC of grade M25 with required slump for Beams / slabs at all levels upto 4.50M including vibrating, curing, providing construction joints, leaving cut-outs/ pockets, placing of inserts/ embedments, dewatering wherever necessary etc., complete all as per drawing , including cost of providing form work for all shapes (including steel plate/ply wood shuttering, strutting, steel scaffolding etc.), but excluding the cost of providing reinforcement, inserts / embedments, and as directed by the ENGINEER	M3	45.00	9,600.00	4,32,000.00
11	1030031	Providing and Fixing Reinforcement- HYSD	Providing all the materials including binding wires, cleaning, bending, cutting, hoisting, placing in position, lapping and binding with 16 SWG annealed soft iron wire or tack welding reinforcement steel for all types of RCC / Precast work irrespective of locations & levels all as per drawings including steel scaffolding, handling and transporting from site stores, complete as directed by using High yield strength deformed bars conforming to IS 1786 - HYSD Bars	TON	7.50	97,000.00	7,27,500.00
12	1031062	P and L Brickwork below plinth	Providing & laying non modular fly ash bricks conforming to IS:12894, class designation 7.5 average compressive strength in foundation and plinth thoroughly soaked in water, with Cement mortar 1:5 (1 cement : 5 coarse sand) including racking out joints, curing etc. complete as directed by the Engineer-in-charge.	M3	16.00	6,500.00	1,04,000.00
13	1031063	P and L Brickwork above plinth	Providing & laying non modular fly ash bricks conforming to IS:12894, class designation 7.5 average compressive strength above plinth upto 4.5M height, thoroughly soaked in water, with Cement mortar 1:5 (1 cement : 5 coarse sand) including scaffolding, racking out joints, curing etc. complete as directed by the Engineer-in-charge.	M3	67.00	6,900.00	4,62,300.00
14	1031068	P and L 125 thk Brickwork	Providing all material and constructing brick masonry upto 125 mm. thick and in cement mortar (1:4) using approved quality, class 7.5 conforming to IS:3102 table moulded bricks (Fly Ash Bricks), including leaving inserts / pockets, steel scaffolding, curing, raking joints, etc. Any reinforcement required to be placed shall be paid separately in reinforcement item of this BOQ.	M2	78.000	700.00	54,600.00

15	1031070	P and L 12mm internal plaster	Providing and plastering internal surfaces of concrete and brick work such as walls, columns, beams, etc. with cement mortar 1:4 mix finish smooth including providing and erecting steel scaffolding, hacking concrete surface, providing bands, grooves drip moulds, curing, etc. - 12 mm thk	M2	365.000	400.00	1,46,000.00
16	1030294	Plaster 18 mm plastering ext surfaces	Providing all materials and carrying out **sand faced plaster 18 mm thick in sigle layer** and plastering external surfaces of concrete and brick work such as walls, columns, beams etc. with 1:4 cement mortar, including providing & erecting steel scaffolding, hacking of concrete surfaces, curing including bands, drip moulds, grooves, etc. complete with 2% Accoproof or approved waterproofing compound	M2	215.000	410.00	88,150.00
17	1030092	Providing and apply 2nd coat of putty	Providing all materials ,tools, tackles such as wire brush, putty blade, sand paper etc. for removing all loosely adhering material from the internal surface of existing wall, ceiling , plastered surface etc. & ensuring substrate should be clean, free from dust, grease & loose material. Moisten the wall with sufficient quantity of clean water prior to application of 1st coat of Birla White Wallcare Putty or equivalent. Allow the 1st coat surface to dry for at least 3 hrs. after that rub the surface gently with the putty blade in order to remove all loose particles.
