

**BEFORE THE ODISHA ELECTRICITY REGULATORY COMMISSION  
BIDYUT NIYAMAK BHAWAN, Unit-VIII, BHUBANESWAR.**

1

**Case No.104 of 2012**

**In the matter of :** Western Electricity Supply Company of Odisha Limited (WESCO)

And

**In the matter of :** Shri Ramesh Ch. Satpathy, Secretary,  
National Institute of Indian Labour, Plot No.302(B),  
Beherasahi, Nayapalli, Bhubaneswar-751012.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Quality Power Supply**

Quality of power supply has drastically increased as compare to past period. Voltage condition has improved due to SI work, upgradation of Sub-station and replacement of old conductors. Augmentation in Net work assets has also been made due to capacity addition on account of RGGVY scheme.

**2. T&D Loss**

It is a fact that T&D loss has not been reduced as per target given by Hon'ble Commission. However, the nominal reduction made in the recent past on account of SI works, Deposit works, frequent vigilance checking by departmental staff & de-hooking staff etc. The licensee has proposed a reduction of 3% in T&D during the ensuing year on account of efficiency gain & capital works under GoO Capex scheme which may kindly be approved.

**3. Fatal & Non-Fatal Accidents**

The details of Fatal & Non-fatal accidents during last year & Actual till Sep-12 has already been submitted in P-2 format in the ARR filing. However the same is reproduced below: -

	<u>Fatal</u>		<u>Non-Fatal</u>	
	<u>Animal</u>	<u>Human</u>	<u>Animal</u>	<u>Human</u>
FY 11-12	25	20	01	11
FY 12-13(till Sep-12)	42	08	00	10

**4. System Improvement work**

System improvement work on account of MP/MLA laid fund & on account of own fund during last year is as under

	<u>MP-MLA laid fund</u>	<u>Own Fund</u>
Net work Asset( in lakh)		
FY 11-12	11.44	138.39
FY 12-13(till Dec-12)	-	607.15

**5. Non-reduction of AT & C loss**

Non-reduction of AT & C loss as per Target set by Hon'ble Commission is due to un-realistic target and quantum of reduction approved subject to materialization of other support service like adequate Energy police station with proper strength, independent charge to Energy police station, Government support and support from all the stake holders.

6. **Outstanding dues with Govt. Departments & PSUs as on Dec-12**

The outstanding position as on Dec-12 with Government department & PSUs are as under: -

	<u>As on 31-12-12( in lakhs)</u>
Govt. Deptt.	3509
PSUs	5053

7. **Load reduction of HT & EHT Industries during current year**

The following HT & EHT industries have reduced there load :-

Sl.	Name of the consumer	Existing(CD)	Reduced(CD)
	<u>EHT-Industries</u>		
1	Adhunik Metaliks Ltd	55556	43330
	<u>HT-Industries</u>		
1	Om Ganesh Minerals	333	111
2	Shri Radha Raman Alloys Ltd.	2800	2530
3	Pawanjay Sponge Iron Ltd.	8730	6000
4	CRG Industries Pvt. Ltd.	500	250
5	Core Minerals	271KW	30 KW
6	Kalinga Sponge Iron Ltd.	4500	950
7	Kamlesh Kumar Singh Engineers (P) Ltd.	300	111
8	B & B Industries	278	140
9	Manager, TISCO	495KW	250KW
10	Shree Balaji Ispat	133	85
11	Narsingh Minerals Works (P) Ltd	133	85
12	SOS Children's Village	180	55
13	Mahavir Ore & Sponge Pvt. Ltd	134	85
14	Khedaria Ispat Ltd Ltd	2800	700
15	M/s. Shri Radha Krishna Ispat Pvt. Ltd	5400	2800
16	Evangelical Hospital	244.44	100
17	M/s. Krishna Kanhaiya Metals Pvt. Ltd.	195	90
18	M/s Gopi Krishna Minerals and Metals Pvt. Ltd.	195	89

**For and on behalf of Western Electricity  
Supply Company of Odisha Limited**

**Managing Director**

**C.C. :** Shri Ramesh Ch. Satpathy, Secretary,  
National Institute of Indian Labour, Plot No.302(B),  
Beherasahi, Nayapalli, Bhubaneswar-751012.

**Note- This is also available at the licensee's website-www.wescoorissa.com**

**BEFORE THE ODISHA ELECTRICITY REGULATORY COMMISSION  
BIDYUT NIYAMAK BHAWAN, Unit-VIII ,BHUBANESWAR.**

2

**Case No.104 of 2012**

**In the matter of :** Western Electricity Supply Company of Odisha  
Limited (WESCO)

And

**In the matter of :** Shri. Arun Kumar Sahu, Assistant Secretary,  
Orissa Consumers' Association, Devajyoti Upabhokta  
Kalyan Bhawan, Biswanath Lane, Dist-Cuttack-2

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Compliance to Hon'ble High Court order & Hon'ble Commission tariff order**

The licensee has duly complied the direction of the Hon'ble High Court order in WPC No. 8409 of 2011 and Hon'ble Commission's direction issued in past years.

**2. Audited Accounts**

The Annual accounts of the licensee has been duly audited till FY 2011-12 & reports thereof has been submitted with Hon'ble Commission. Annual accounts for FY 2012-13 has to be audited only after completion of the financial year. The ARR & tariff application for FY 2013-14 has been filed based on Audited figure of FY 2011-12, actual figure till Sep-12 and estimated for balance six months of the current year. Hence, the ARR application for FY 2013-14 has been prepared in correct method and actual facts which may kindly be approved.

**3. T&D Loss**

Hon'ble Commission is approving loss level on normative basis without considering the ground reality. However, the projection made for loss reduction is based on actual position and considering the effect of Capex and other system improvement work including support from al the stake holder.

**4. Availability of ARR Application to the general public**

The licensee has published the ARR filing in local news paper both in English & Odia daily having wide circulation in its area of operation. The same was also made available in its Electrical Division offices, Corporate office, Circle offices for the general consumers who can avail the same by paying nominal amount of ` 200/- towards photocopy charges. The ARR application was also made available with the licensee's website [www.wescoorissa.com](http://www.wescoorissa.com) as well as Hon'ble Commission's website [www.orierc.org](http://www.orierc.org) for general public. Hence the contention of the objector regarding non-availability of application copy is not correct.

**5. Composite Application**

The licensee has not filed any composite application. The ARR application of the licensee has been filed independently with factual position of WESCO only.

However, where ever any composite reference has been made the same has been narrated for better understanding of the matter.

**6. Introduction of BOOT Model**

WESCO has not executed any franchisee agreement under BOOT Model illegally without prior approval of OERC.

**7. Cost control & Recovery of Arrears**

There is no such extra expenditure are being incurred by the licensee beyond approval of Hon'ble Commission whether in A&G cost or in the head of R&M expenditure. To recover arrear vigilance checking, consumer camp with prior intimation. Raid by Energy Police, Bill revision etc. are regularly done.

**8. OTS Scheme is good for defaulters**

The OTS scheme has been adopted with due approval of Hon'ble Commission. The revenue generated from defaulting consumers is always helpful to the system and increase the cash flow position, thereby will reduce burden as a whole. Hence, the contention of the objector that OTS scheme is encouraging the regular defaulter is not correct.

**9. Revenue collection & Billing and details of Security deposit**

The details of revenue collection & billing are regularly supplied to Hon'ble Commission. The same are also available in the Audited accounts of the licensee. Regarding actual position of security deposit, details are also submitted with Hon'ble Commission.

**10. Interest on Security deposit**

The licensee is regularly crediting interest on security deposit on 1<sup>st</sup> May of every year to all its consumers existing on billing fold & on the security deposit available as on March @ 6% p.a. There is no such violation of regulation has been made by the licensee. Consumers are free to move to GRF/Ombudsman for redressal of their grievances, if any.

**11. Compliance in Case No. 35/2011**

The licensee has made its submission as per requirement of Hon'ble High Court in the above matter before Hon'ble Commission.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory  
Commission against the Retail supply Tariff Application by WESCO for the year 2013-  
14.

**1. Security Deposit in shape of NSCs**

The licensee has initiated & ascertained some of the NSCs documents in few divisions in the denomination of ` 10/- each. It is also not possible to trace from the certificates regarding depositor details and other particulars. On sample basis enquiry to postal department was made for encashment of the old certificate. They are not able to guide in a suitable manner.

**2. Provision of Bad & Doubtful Debts**

Provision for Bad & Doubtful debts are being made as per prevailing regulation & policy of the company. In the tariff order FY 2012-13 Hon'ble Commission have allowed `155 crore towards bad debt against outstanding of 31.03.2005 based on Receivable audit report carried out by independent auditors.

**3. Other Suggestion & Recommendation**

The suggestion & recommendations as submitted by the objector needs proper deliberation before implementation.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory  
Commission against the Retail supply Tariff Application by WESCO for the year 2013-  
14.

**1&2 :**

Requires no reply.

**3 to 8:**

The allegation regarding non availability of printed copy of ARR and RST application for FY 2013-14 in any of the offices of the Licensee is not correct and the printed copy is available in all the offices for the general public.

**9:**

The sales projection is always based on the audited figures and future load forecast and accordingly estimate of sales has been properly made. Various steps have been taken for reduction of losses by the Licensee including to arrest theft of energy. The same has been enumerated in its RST application. WESCO has taken a lot of initiatives to arrest the losses and against all odds. WESCO has taken steps to collect arrears by way of OTS and disconnection activities are also being carried out to collect the arrears.

**10:**

Hon'ble Commission approves the O&M expenses reasonably and the promoters are not getting reasonable return on the equity participation. Hon'ble OERC is approving the notional revenue in each financial year considering the loss level which is more than 19% to the actual loss level of the licensee. The redetermination of loss levels is required to make the Discoms viable.

**11:**

Restoration of power supply is being made upon receipt of complaint by the fuse call offices operated at Section level. In case of transformer failure , majority of the transformers are being replaced within the due time. In order to overcome the low voltage, System Improvement works are carried out. The reconnection are being made immediately after receipt of payment against the arrears. The bill related complaints are being disposed of at different level commencing from Section/ Sub Division to Corporate level.

**12:**

It is true that the hooking in rural areas is common due to bare conductors. WESCO is taking steps to replace the bare conductors through AB cable. FIRs are being lodged in case of power theft at the energy police stations and other police stations through enforcement and vigilance activities.

**13:**

WESCO is taking steps for replacement of hazardous poles and conductors where ever required. Boundary wall & Fencing of 11/0.4 KV substations are being made on availability of funds. WESCO also made awareness campaign to the general public through media strategy. Most of the monthly energy bills are delivered to the consumers at the spot complying to the Regulation and no question of late delivery arises. The payment made by the consumers in rare cases which is not posted is immediately attended on receipt of complaint.

**14:**

GRF is extended arm of the licensee to solve the grievance of the aggrieved consumers. Most of the consumer's complaints are being redressed through CHP. The advertisement has been made about establishment and function of GRF and Ombudsman and awareness has been made amongst the consumers. Almost all the GRF orders are being implemented by the Licensee. The back side of the consumers bill is pre printed with the address of GRF and Ombudsman in order to aware the consumers.

**15. Quality of Supply:**

WESCO is tryig its level best to provide reliable and uninterrupted power supply to its consumers. Accordingly, the system improvement work has been undertaken as enumerated above. The Licensee is following the guaranteed and over all standard of performance as per the direction of Hon'ble Commission. The System Improvement works also to be undertaken in CAPEX. Repair and maintenance activities are also being done as per the availability of funds. As per the Regulation and Tariff orders issued by the Hon'ble Commission during statutory power cuts in excess of 60 hours in a month, the demand charges are being prorated.

**16. Quality of Service:**

WESCO is providing prompt service to the consumers through its fuse call centres. Now, the centralised toll free number has been provided so that immediate service can be attended to. The energy bills are being served to the consumers at the spot through spot billing. The energy police stations are not adequately staffed to combat against theft of energy.

**17. Tariff Issues:**

The interest on security Deposit are being provided as per the Regulation and direction from the Hon'ble Commission from time to time on 1st May of every year. DPS should be charged in case of non payment or delay in payment by the consumers. All the three phase consumers are provided with the static meters.

Open Access Charges are fixed by Hon'ble Commission as per the E.Act, 2003 and the load factor is being calculated on the basis of no. of hours of availability of power supply if it is more than 60 hours.

The loss mentioned in the tariff application neither false nor fabricated and based on audited figures of past years and projection for ensuing year.

**18. Financial Issues:**

The revenue gap should be bridged by way of increase in RST, reduction in BST, grant/ subsidy from GoO as mentioned in the prayer of the application.

**19. Working of the Licensee:**

The consumers are not ignorant about their rights. The facts and figures submitted by the licensee are always based on the audited previous year figures. The licensee is always transparent about its facts and figures. Hon'ble Commission is reviewing the performance on half yearly basis and directing the licensee to take steps for reduction of losses. In case of the consumer purchase meter directly from the vendor, the meter test report is attached and available to the consumers.

**20. Review of Past operations in general:**

The efficiency of the distribution licensee has been improved and standard of performance has been improved. Licensee is following the overall standard of performance and guaranteed standard of performance as per the Regulation of Hon'ble Commission. Due to inadequate tariff and gap in approved loss and actual loss, the revenue requirement of the licensee could not be met.

**21. Audited Result:**

WESCO are complying the direction of Hon'ble Commission.

The Power Purchase agreement is being followed with GRIDCO.

The preparation of bill are accurate complying to the tariff orders of Hon'ble Commission and collection thereof are being posted against the respective consumers through software.

The employees have been directed to attend the complaints of the consumers. Upon receipt of the complaints against the employees, the action is being taken against the employees who are not attending the complaints.

There is no mismatch between the figures as per the performance review and submission of the licensee in its ARR and RST application.

All the estimates prepared against the prospective consumers are attached with the Remunerative calculation.

**22. Distribution Loss:**

9 nos of Energy Police Stations are started functioning in the licensee area in addition to earlier Police Station at Burla. Vigilance and Enforcement activities are carried out at Circle level. All sorts of measure are being taken to curb the theft and wherever required bare conductors are being replaced by AB cable along with replacement of meters and brought to the outside.

**23. Provision for Bad & Doubtful debts:**

Hon'ble commission will decide the matter relating Provision of Bad and doubtful debts on the basis of the report of the independent Auditors appointed by the Hon'ble Commission. The collection inefficiency may be considered as bad debt. WESCO is also taking action against the defaulting consumers for disconnection of power supply. Govt. has taken in principle decision for adjustment/payment of outstanding dues as on 31.03.2012.

**24. Energy Audit and Consumer Indexing:**

Energy Audit are being carried out at 33 KV and 11 KV level. However, the fruitful energy audit is not carried out due to defective meters and provision has been made for DTR level metering under CAPEX. The consumers have been tagged with a particular DTR and DTRs are tagged with the feeders. However, the actual measurement is not possible due to defectiveness of the meters. However, the loss measured is actual and is audited as the sales and purchase figures are metered.

**25. Sales:**

Sales projected by the licensee are on the basis of past year audited figures, current year 6 months actual and estimated for the ensuing year considering the growth and Rural Electrification Programme under RGGVY and BGJY including Mega Lift Irrigation Project of GoO.

**26. Demand Side Management:**

WESCO has already undertaken the work of replacement defective meters and proposed to replace the bare conductors by AB cables through system improvement work to control the demand side and reducing the A&TC loss.

WESCO also taking energy conservation measure and entered into an agreement with M/s Banyon Environmental Innovations Pvt. Limited, a Hyderabad based Company who shall provide CFL bulbs at very nominal cost against the replacement of incandescent bulbs. But the same is yet to be implemented although the project has been registered in UNFCCC web site.

**41. Tariff Rationalisation measures:**

As per the direction of Hon'ble Commission actual power factor up to 4 decimal points is being taken for calculation of Load factor.

**27. Surcharge:**

The issue of Cross Subsidy while determining tariff of the respective category is well addressed in the tariff order of Hon'ble Commission for the FY 2012-13 looking the National Electricity Policy, National Tariff Policy, E.Act,2003 and Regulation.The tariff for FY 2012-13 is so designed that it is well within + or – 20% of Avg. cost of supply

The issue of Cross Subsidy and the stand of licensee have already been enumerated in the para-10 and page no. 94 of ARR and RST application.

WESCO has no objection of third party audit of standard of performance and energy audit.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**BACK GROUND:**

In accordance with the provisions of regulation 53 of OERC (Conduct of Business) Regulations, 2004 and Regulation 5 of OERC (Terms and conditions for determination of Tariff) Regulations, 2004 the Discoms are required to file the applications for determination of Annual Revenue Requirement (ARR) and revision of Retail Supply Tariff (RST) for ensuing financial year with the commission by 30th November of current year.

Complying with the provisions of above –mentioned Regulations, Petitioner has submitted its application for approval of its Annual Revenue Requirement and Retail supply tariff for the financial year 2013-14. The petitioner has filed its petition under Sec-62 and other applicable provisions of the Electricity Act 2003 and in conformity with provisions of OERC (Terms and conditions for determination of Tariff) Regulations, 2004 and OERC (conduct of Business) Regulations 2004.

The application filed is not the copy of the earlier petition and based on the facts, figures and development made during the current financial year and requirement of the licensee for the ensuing year to provide better service to the consumers.

The Licensee is operating in a Regulatory regime and in transparent manner and complying all the statutory obligations. The petition is filed as per the format prescribed by the Hon'ble Commission to know the exact status of the Licensee commercially as well as financially. The fear of the objector about the rights of the consumer is not genuine.

The Licensee is complying all the relevant sections of the Electricity Act, 2003 and Regulation made there under by Hon'ble Commission from time to time in true spirit. As per the statute the ARR of the Company has been filed before Hon'ble Commission. So, the rejection of ARR application without citing any reason is a premature approach of the objector.

**DISTRIBUTION LOSS:**

The Target of Circle wise distribution loss may be fixed for better monitoring and fixation of responsibility. However, the separate and distinct surcharge for circle wise differential tariff is a cumbersome exercise and also not practical in the present set up and consumer mix like Urban and Rural.

**POWER PURCHASE COST:**

WESCO is purchasing power from GRIDCO as per the BST rate fixed by the Hon'ble Commission. During the current FY 2012-13, WESCO has also projected the quantum energy as approved by the Hon'ble Commission and shall not be more. The power purchase requirement is also being projected every year looking to the loads coming under different Grid S/S. The short term as well as long term demands forecast are also being projected and submitted to OPTCL and Hon'ble OERC as per the direction and statute. The licensee is also in the same view that the excess power purchase cost should be disallowed in the true up exercise and should not consider the notional revenue.

The power purchase requirement is always submitted considering demand side management as well as unrestricted power.

The billing system of the licensee is fully automated and the upgradation as well as further intervention of IT are being taken and the expenditure also forecasted in the ARR.

**CAPITAL INVESTMENT PLAN:**

The detail investment plan under CAPEX has enumerated in the para 2.6 , page no. 36 to 45 of the application. The Plan is prepared as per the DPR and due approval of the Hon'ble Commission.

**EMPLOYEE COST:**

Licensee has projected the employee cost considering the requirement through recruitment and retirement of the employees as well as normal growth rate including the terminal liabilities. Licensee has proposed employee cost of Rs.325.97 Cr for the ensuing year.

**O&M EXPENSES:**

Hon'ble Commission has already fixed the norms for determination of R&M expenses and A&G expenses. The objector has suggested the fixation of O&M cost on the basis of the consumers and Substations which requires thorough analysis for fixation of the same. Hon'ble Commission is reviewing the performance semi annually/annually and the CAPEX related separately also.

The consumer contribution to the capital asset is being treated as capital receipt as per the accounting principle.

Licensee has projected the contingency reserve is 0.375% of the Opening GFA. Hon'ble Commission is monitoring the progress of the licensee as well as the norms fixed as per the overall standard of performance and guaranteed standard of performance. Licensee is agree with the view of the objector for calculation of AT&C loss.

Case No.104 of 2012

**In the matter of :** Western Electricity Supply Company of Odisha  
Limited (WESCO)

And

**In the matter of :** Shri. Akshya Kumar Sahani,, M/s Sahani Energy  
Consultancy, B/L-108, VSS Nagar, Bhubaneswar

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Minimum charges in case of LT(SI), LT(MI) category of consumers**

The proposal given to recover minimum charges in case of the above category of consumers because most of the consumers are under utilizing their load or are being involved with un-authorized use of electricity. One way the objector is objecting that the licensee is not able to arrest loss at the same time is objecting the proposals where loss can be arrested.

**2. Delayed Payment Surcharge**

The proposal of the objector not to levy DPS on all the consumers is not correct as WESCO is paying the DPS to GRIDCO & OPTCL for non payment on the entire units purchased.

**3. Introduction of KVAH Billing**

There is no such regulation for billing on the basis of Graded Slab method. So, no such amendment is required in the OERC Regulation. The same can be dealt through tariff determination process.

**4. Emergency power supply to Captive Power Plants(CPP)**

Regulation 80(15) does not say that the consumer under this category will not pay the Demand charges. It has been noticed and adequate data has been submitted before Hon'ble Commission that Industries those who have taken only for Emergency power supply they are consuming power in a regular manner even though the quantum of drawl is less. That means the industries are deliberately opting for Emergency power supply to avoid fixed cost.

**5. Discontinuance of Load Factor incentive**

The reason of discontinuance of LF incentive has been clearly submitted in the ARR application of the licensee. The scenario when LF incentive was introduced during that period abundant power was available in Odisha, now the situation has changed. Accordingly the submission made by WESCO for discontinuation of Incentive tariff is quite justified.

**6. Discontinuance of 'Take or Pay Tariff'**

The reason of discontinuance of Take or Pay tariff has been narrated in the ARR application. As per introduction of 'Assured Energy' concept no such industries are coming forward to avail the same. That means in the previous method there was no such efficiency gain they were benefited because of Commission's order only. The purpose of take or pay tariff was defeated in case of old method.

**7. Billing of LI points**

The reason of rationalization measures proposed has been clearly supported with in the ARR application.

**8. MMFC for consumers with CD < 110 KVA**

The reason of proposal of implementation of MMFC for consumer with CD < 110 KVA has been given in ARR application.

**8. Guide line for replacement of burnt Transformer**

The licensee has given adequate reason in this regard in the ARR application, which may kindly be appraised.

**9. Rebate for Prompt Payment**

The detailed reason has been explained in the ARR application & may kindly be approved.

**10. Remunerative Calculation**

Remunerative calculation are being made as per clause 13(1), Appendix-I of OERC Code 2004.

**11. Compliance to GRF & Ombudsman orders**

Necessary compliance to GRF & Ombudsman order are being made which are within the ambit of regulation & order. Where ever the same is not implementable the licensee prefers higher forum against GRF & Ombudsman order.

**12. Bulk Supply Price payable by Discoms**

The licensee is also proposing for two part tariff for its Bulk purchase from GRIDCO.

Limited (WESCO)

And

**In the matter of :** Sri R.K.Jain, Chief Electrical Distribution Engineer, East  
Coast Railway, Rail Sadan, Chandrasekharpur,  
Bhubaneswar-751017.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory  
Commission against the Retail supply Tariff Application by WESCO for the year 2013-  
14.

**1. Reduction of Tariff for Railway**

Railway is paying at par with other HT & EHT consumers where loss component is nominal. Accordingly the average cost of supply vs average tariff realization is well within the permissible limit hence suggestion for reduction of railway's tariff is not acceptable.

**2. KVAH Tariff**

Railway contention is that they are maintaining power factor above 90% & requesting for reduction of tariff. A consumer who is maintaining power factor of more than 90% is automatically compensated in shape of non-applicability of power factor penalty on account of KVAH Billing. Hence, there should not be any further reduction in tariff.

**3. Withdrawal of 120% drawl of Contract Demand during peak period**

There is no such reason has been cited by railway for continuity of drawl beyond 120% of CD during off peak period. Hence, the suggestion is not acceptable and the proposal as submitted by the licensee may kindly be approved.

**4. Poor quality of supply to Railway Traction**

Railway is a high value consumer of the licensee, they are always being given priority. Sometimes, breakdown occurs on account of fault at consumers end also.

**5. Off peak period Energy discount @ 10 paise/KWH**

Railway is a two phase consumer who is not eligible for TOD benefit. If TOD benefit to railway would be given then the purpose of Regulation 7(a) of OERC (Terms & Conditions for determination of Tariff) Code 2004 would be defeated.

13

**Case No.104 of 2012**

**In the matter of :** Western Electricity Supply Company of Odisha Limited (WESCO)

And

**In the matter of :** Sri R.P.Mohapatra, Plot No. 775 (P), Lane-3, Jayadev Vihar, Bhubaneswar-751013.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Revocation of Licensee & interim arrangement**

It has been suggested by the objector for immediate revocation of licensee of WESCO & interim alternate arrangement will fetch immediate result. In the past interim arrangement was made for CESU and continuing till date. The licensee is putting its entire effort for all out success with all sort of odds in the distribution Business. Hon'ble Commission is well aware & they do have adequate experience with regard to alternate arrangement. If revocation of licensee would have the only solution for improvement of power sector, Hon'ble Commission might have exercised the same. Hence, the suggestion for revocation of licensee is not correct.

**2. Distribution Loss**

Hon'ble Commission is approving the Distribution loss of the licensee on normative basis without considering the ground reality. The T&D loss target is need to be redetermined considering the detail submission made by the licensee in para 2.4 (page 27) of its ARR application.

Regarding availability of working meter at consumers premises, as on Sep-12 it is 90% which has been submitted before Hon'ble Commission in P-13 format. Replacement of meters are being regularly made considering the fund availability of the licensee. Further, provision for procurement of meters under Capex scheme has also been made during the ensuing year.

**3. Collection of Revenue**

The bifurcation of collection from arrear and from current is as under

	( ` in lacs)	
	<u>FY 2011-12</u>	<u>FY 2012-13(till Nov-12)</u>
Total Collection	167780	125768
Against Current dues	161675	123609
Against Arrear dues	6105	2159

Hon'ble Commission have considered ` 155 crore towards bad debt while approving ARR for FY 2012-13 on the basis of receivable audit report duly carried out by third party. The above provision was against outstanding as on 31-03-2005. Hon'ble Commission have also directed in the ARR of FY 2011-12 to update the same till FY 2009. Now, considering the actual audited figure till March-12, the licensee has requested Hon'ble Commission to approve for conducting receivable audit for the period 01-04-2005 to 31-03-2012. The detailed submission has been made in para 5.2 of the ARR application which may kindly be approved.

#### 4. Comparison of BST increase vs RST

The details of Avg. retail tariff of WESCO vs Avg. BST excluding transmission charges has been given in para 01(page 05) of the ARR application. The analysis made by the objector seems to be for other Discoms. If the same would be made in line with the objector it will shows a different picture.

		09-10	10-11	11-12	12-13	Increase over 09-10	
						P/u	%
BST	Excluding Transmission	154	194	262	300	146	95%
	Increase over P/y P/u	-	40	68	38		
	in %	-	26%	35%	15%		
RST	Avg. Price P/u	267.43	327.70	413.10	463.79	196.36	73%
	Increase over P/y P/u	-	60.00	85.40	50.69		
	in %	-	22%	26%	12%		
Increase	Increase RST over P/u BST	-	20	17.40	12.69	50.36	

It may be mentioned here that the analysis made in shape of P/u will not give the correct picture as the Avg. RST taken in shape of per unit will only holds good when the licensee would able to billed on the basis normative loss level approved by Hon'ble Commission. The above average prices are approved figures considering the approved loss level. Hence, there is no such misleading in submission has been made by the licensee.

#### 5. Proposal for Tariff Rationalisation measures

##### (i). Minimum charges in case of LT(SI), LT(MI) category of consumers

The proposal given to recover minimum charges in case of the above category of consumers because most of the consumers are under utilizing their load or are being involved with un-authorized use of electricity. One way the objector is objecting that the licensee is not able to arrest loss at the same time is objecting the proposals where loss can be arrested.

##### (ii). DPS for all category of consumers

The proposal of the objector not to levy DPS on all the consumers is not correct as WESCO is paying the DPS to GRIDCO & OPTCL for non payment on the entire units purchased. The same can be dealt through tariff determination process.

##### (iii). Introduction of KVAH Billing

There is no such regulation for billing on the basis of Graded Slab method. So, no such amendment is required in the OERC Regulation.

##### (iv). Applicability of PF penalty

In case of HT category Specified Public Purpose, General Purpose <110KVA & HT Industries(M) supply they are being given incentive under Graded slab method as like of other HT & EHT consumers. So, in the same manner there should be applicability of PF penalty as well as PF incentive till KVAH Billing is adopted. The licensee has submitted for introduction of KVAH Billing which may kindly be approved.

##### (v). Emergency power supply to CPPs

Regulation 80(15) does not say that the consumer under this category will not pay the Demand charges. It has been noticed and adequate data has been submitted before Hon'ble Commission that Industries those who have taken only for Emergency purposes they are consuming power in a regular manner even though the

quantum of drawl is less. That means the industries are deliberately opting for Emergency power supply to avoid fixed cost.

(vi). Discontinuance of LF incentive

The reason of discontinuance of LF incentive has been clearly submitted in the ARR application of the licensee. The scenario when LF incentive was introduced during that period abundant power was available in Odisha, now the situation has changed. Accordingly the submission made by WESCO for discontinuation of Incentive tariff is quite justified.

(vii). Discontinuance of 'Take or Pay Tariff'

The reason of discontinuance of Take or Pay tariff has been narrated in the ARR application. As per introduction of 'Assured Energy' concept no such industries are coming forward to avail the same. That means in the previous method there was no such efficiency gain they were benefited because of Commission's order only. The purpose of take or pay tariff was defeated in case of old method.

(viii). Billing of LI points

The reason of rationalization measures proposed has been clearly supported with in the ARR application.

(ix). MMFC for consumers with CD < 110 KVA

The reason of proposal of implementation of MMFC for consumer with CD < 110 KVA has been given in ARR application.

**6. Power Purchase Cost & other cost**

The projection for power purchase & other element of cost has been made based on Audited figure of FY 2011-12, actual of 1<sup>st</sup> six months of current year in a prudent manner which may kindly be considered for FY 2013-14.

**7. Power Factor Incentive and Penalty**

The present method of incentive beyond 97% of PF is quite adequate , anything lower on the same would adversely affect the licensee.

**8. Projection of Demand & Energy**

The SMD and energy drawl has been proposed considering the past trend only.

During statutory power cuts or load restriction consumers are compensated for non-availability of power beyond 60 hours in a month.

TOD benefit are being given to all the three phase consumers.

**9. Bulk Supply Price payable by Discoms**

The licensee is also proposing for two part tariff for its Bulk purchase from GRIDCO.

**10. Proposal for separate license for supply to EHT consumers**

There is no such Regulation exist in OERC or in the Electricity Act 2003 for giving independent license to EHT category. For availing Distribution license the applicant has to move as per Sec-14 of Electricity Act.

Limited (WESCO)

And

**In the matter of :** Shri Lalita Mohan Pattnaik, M/s. Shiba Sankar Rice Mill,  
Kundraguda, Borigumma, Ps. Borigumma, Dist. Koraput.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.

**In the matter of :** Sri. Gokul Chandra Panda, M/s Jagannath Rice Mill, At.  
Main Road, Po/Ps.Borigumma, Dist. Koraput.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory Commission against the Retail supply Tariff Application by WESCO for the year 2013-14.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.

Tudusapalla, Po/Ps. Sasahandi, Via. Borigumma, Dist.  
Koraput.

Rejoinder to objections received by the Secretary, Odisha Electricity Regulatory  
Commission against the Retail supply Tariff Application by WESCO for the year 2013-  
14.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.

14.

**1. Data & Information**

The licensee has filed its ARR & tariff application for the FY 2013-14 based on Audited Accounts for FY 2011-12, Actual till Sep-12 & estimation has been made for the balance six months of the current year. Hence, the perception of the objector that the company has filed the ARR application with window dressing data is not correct.

**2. Line Cable Network Assets**

It is correct that the network assets are very old. However, during last 12 year of its operation lot of work has been carried out through various schemes like PMU, MNP, SI, Deposit works by private party as well as government body etc. towards up-gradation & replacement of sub-stations & conductors. Recently Government of Odisha have launched Capex scheme through which the licensee has proposed for network asset addition of ₹ 468 crore.

**3. Non-following of OERC Regulation**

The objector has a strong belief that the licensee is not following the clause 12 of (Condition of Supply) Code 2004 in almost all the cases which is not correct at all.

Further, the consumers are free to move GRF or OMBUDSMAN to lodge their grievances if any.
